

# Undergraduate Research (OUR)

---

The office of Undergraduate Research supports and promotes undergraduate opportunities in discovery, inquiry, and creativity-based scholarship through mentored research experiences with NC State faculty and other national and international scholars and professionals. Undergraduate Research is scholarly study in any discipline in which this scholarship culminates in advancements in science, technology, engineering, business, the arts, or humanities. Students from any discipline can engage in the excitement of scholarly research and present their work at multiple annual symposia. Research and travel awards supporting both student projects and the communication of results are available.
