Bioinformatics

Genomic sciences has two components. Functional genomics, the generation of large bodies of data relating to organism function, encompasses gene discovery, gene expression, protein and nucleic acid structure and function, gene and gene product interactions, and genomic approaches to breeding and comparative studies relevant to ecology and evolutionary biology. Bioinformatics is the analysis of these vast and complex data sets including methods to analyze extremely large sets of genomic information such as DNA sequences and expression from DNA microarrays. Students register in either of these two fields but also receive a solid grounding in the other through core courses common to both programs. Unique and exceptional resources include the Bioinformatics Research Center and the Genome Research Laboratory.

Admission Requirements

Students should have an undergraduate major in the biological or physical sciences, mathematics, statistics or computer science and have completed calculus and other comparable courses. In addition to the other application requirements, a student should submit a statement of interests and career goals.

Master’s Degree Requirements

Students take a 15-credit core curriculum of courses common to both programs followed by courses specific to the degree and discipline. The Master’s of Bioinformatics requires a minimum of 33 credit hours. The Master’s of Functional Genomics requires a minimum of 30 credit hours, and the Master’s of Science in Functional Genomics requires a minimum of 36 credit hours.

Doctoral Degree Requirements

The Ph.D. program requires a total of 72 credits, and all students participate in a journal club, monthly seminar series and research ethics training. A co-mentoring system exists between bioinformatics and functional genomics through which each student has advisors from both disciplines. Throughout the program they will have the opportunity to gain practical experience in the Genome Research Laboratory, Bioinformatics Research Center and DNA Sequencing Facility.

Student Financial Support

A significant number of fellowships are available through the genomics program, and students may also be supported by research grant funds awarded to genomics faculty members.

Degrees

- Bioinformatics (MR) (http://catalog.ncsu.edu/graduate/interdisciplinary/bioinformatics-bioinformatics-mr/)
- Bioinformatics (PhD) (http://catalog.ncsu.edu/graduate/interdisciplinary/bioinformatics-bioinformatics-phd/)

Faculty

Full Professors

Jose Miguel Alonso
Christopher M. Ashwell

David M. Bird
Donald L. Bitzer
Russell J. Borski
Matthew Breen
Dennis T. Brown
Ignazio Carbone
Marie Davidian
Jon Doyle
Robert Graham Franks
Sujit K. Ghosh
Amy Michele Grunden
Jason M. Haugh
Jacqueline M. Hughes-Oliver
Erich L. Kaltofen
Robert M. Kelly
Matthew D. Koci
Bailian Li
Hsiao-Ching Liu
Christian Maltecca
Earl S. Maxwell
Melissa Schuster Merrill
David C. Muddiman
Spencer V. Muse
Charles H. Opperman
James N. Petitte
Robert M. Petters
Jorge A. Piedrahita
Brian J. Reich
Maria C. Sagui
Barbara Sherry
Seth M. Sullivant
Jeffrey L. Thorne
Jung-Ying Tzeng
Mladen Alan Vouk
Ross W. Whetten
Fred Andrew Wright
Associate Professors
David Lawrence Aylor
Nicolas Buchler
Gavin Clay Conant
Michael B. Goshe
Steffen Heber
Slavko Komarnytsky
David S. Lalush
Terri A. Long
Arnab Maity
Flora Meilleur
Dahlia M. Nielsen
Jonathan W. Olson
Xinxia Peng
David Michael Reif
Michael L. Sikes
Charles Eugene Smith
Lori June Unruh Snyder
Yihui Zhou

Assistant Professors
Hamid Ashrafi
Benjamin J. Callahan
Denis Fourches
Amanda Marie Hulse
David Rasmussen
Christina Zakas

Emeritus Faculty
William Reid Atchley
Wendy F. Boss
Rebecca S. Boston
James W. Brown
Vincent L. C. Chiang
Eugene Eisen
Todd Robert Klaenhammer
Wayne Tompkins
Anastasios A. Tsiatis
Paul L. Wollenzien

Practice/Research/Teaching Professors
Patricia A. Estes
Jane L. Lubischer
