North Carolina State University

Welcome to North Carolina State University!

About the Catalog

This catalog showcases all of the programs and plans offered at our university, from undergraduate baccalaureate degrees, to the Doctor of Veterinary Medicine.

The Undergraduate Catalog (http://catalog.ncsu.edu/undergraduate/) houses important information on academic policies for student success, undergraduate admission and readmission information, and different ways you can be involved on during your undergraduate career at NC State.

The Graduate Catalog (p. 63) hosts a wealth of information on paths to your degree, career and research opportunities, and the NC State Graduate School Handbook.

Learn about all of the student activities (p. 41) available to the Wolfpack, exceptional services (p. 47) offered to all students, and other important resources (p. 33) that we’re proud to provide.

Check out the Course Descriptions (p. 683) to see every course option being offered for the 2020-2021 academic year, and view the new dynamic Course Search (http://catalog.ncsu.edu/course-search/) to search courses by subject or keyword.

We’re happy you’re here, and we can’t wait to show you all that NC State University has to offer. What are you waiting for?
About Us

North Carolina State University (https://www.ncsu.edu/) (NC State) began as a land-grant institution grounded in agriculture and engineering. Today, we're building a leading public research university that excels across disciplines.

NC State is a powerhouse in science, technology, engineering and math. We lead in agriculture, education, textiles, business and natural resources. We're at the forefront of teaching and research in design, the humanities and the social sciences. And we're home to one of the planet's best colleges of veterinary medicine.

Our more than 36,000 undergraduate and graduate students learn by doing. They pursue research and start new companies. They forge connections with top employers and serve local and global communities. And they enjoy an outstanding return on investment.

Introduction

Founded March 7, 1887 by the North Carolina General Assembly under the provisions of the national Land-Grant Act, North Carolina State University is now one of the nation's preeminent research institutions and the university of choice for accomplished, high-performing students from around the world.

NC State's extensive public and private partnerships create a unique culture of collaboration to address the grand challenges facing society. The university's solution-driven research, technology and scholarship lead to new ideas, products and services. It's no wonder NC State is know for its forward-looking philosophy: Think and Do.

With more than 35,000 students and 8,000 faculty and staff, NC State is a comprehensive university known for its leadership in interdisciplinary innovation. As a leader in experiential education, NC State provides remarkable opportunities for students to put learning into practice and to develop career-ready skills.

The university is consistently ranked as a top-tier university by U.S. News & World Report and is regularly named by Kiplinger’s as a top-10 best value in public higher education, a ranking that combines academic quality and affordability. Because of this value, NC State students graduate with lower-than-average debt, according to U.S. News.

Beginning their freshman year, NC State students are able to explore their major right away — by conducting research alongside faculty or starting a challenging co-op or internship. NC State has a large and diverse student population with the feel of a tight-knit community.

NC State is located in the Research Triangle region, home to many of the country’s leading Fortune 500 technology, research and pharmaceutical companies. NC State’s Centennial Campus is home to more than 150 corporate and government research partners, incubator companies and NC State research units.

Mission, Vision and Values

Mission

As a research-extensive land-grant university, North Carolina State University is dedicated to excellent teaching, the creation and application of knowledge, and engagement with public and private partners. By uniting our strength in science and technology with a commitment to excellence in a comprehensive range of disciplines, NC State promotes an integrated approach to problem solving that transforms lives and provides leadership for social, economic, and technological development across North Carolina and around the world.

Vision

NC State University will emerge as a preeminent technological research university recognized around the globe for its innovative education and research addressing the grand challenges of society.

Values

Consonant with our history, mission, and vision, North Carolina State University affirms these core values:

• Excellence—in all endeavors
• Freedom—of thought and expression
• Respect—for cultural and intellectual diversity
• Responsibility—for individual actions and service to society
• Stewardship—in sustaining economic and natural resources
• Integrity—in the pursuit, creation, application, and dissemination of knowledge

History

Founded March 7, 1887 by the North Carolina General Assembly, the school—then known as the North Carolina College of Agriculture and Mechanic Arts—embodied ideals that were rapidly transforming the field of higher education. Chief among them was the belief that colleges should not be reserved for a select few and that the children of farmers, mechanics and other workers should have access to the opportunities and benefits of higher education.

NC State was established under the provisions of the Morrill Act of 1862, which allowed the U.S. government to donate federally owned land to the states for the purpose of establishing colleges that would teach “agriculture and the mechanic arts.” The brand-new school held its first classes in the fall of 1889 with 72 students, six faculty members and one building. In the early 1900s, a new federal program sparked an era of outreach work at the college. The 1914 passage of the Smith-Lever Act created an educational partnership between land-grant colleges and the U.S. Department of Agriculture. Under this new cooperative extension program, the colleges would send staff to meet with farmers around the state and provide practical agricultural instruction. This led North Carolina to establish the Cooperative Agricultural Extension Service (now the North Carolina Cooperative Extension Service (http://www.ces.ncsu.edu/)) at NC State.

By the 1920s, North Carolina State College (as the school was then known) was beginning to grow beyond its original agricultural and mechanical focus, adding schools of engineering, textiles, education and business, as well as a graduate school. The Depression posed economic challenges for higher education throughout the nation, and State College was no exception. As the crisis slowly eased, the college renewed its growth, adding students and developing new programs until the onset of World War II. State College contributed to the war effort by hosting a number of military detachments and training exercises and by refitting the work of several departments and programs to military and defense purposes.

The campus experienced unparalleled growth during the postwar years as the G.I. Bill brought thousands of former servicemen to campus. In the following decades, the college continued to expand its curricula, creating schools of design, forestry, physical and mathematical sciences,
and humanities and social sciences. During these years of growth, the name was changed again, this time to North Carolina State University at Raleigh—the university's current official name.

The university celebrated its 100th anniversary in 1987, which also saw the creation of Centennial Campus (http://centennial.ncsu.edu/), bringing together academic, corporate, government and nonprofit leaders to partner in teaching, research and economic development.

NC State has developed into a vital educational and economic resource, with more than 34,000 students and 8,000 faculty and staff. A wealth of university outreach and extension programs continue to provide services and education to all sectors of the state’s economy and its citizens. Consistently ranked a best value (http://www.kiplinger.com/tools/colleges/school.php?id=7794/) among the nation’s public universities, NC State—the state’s largest university—is an active, vital part of North Carolina life. Today, more than 128 years after its founding, NC State continues to follow its original mission: opening the doors of higher education to the citizens of North Carolina and providing teaching, research and extension that strengthen the state and its economy.

**Campus**

NC State University is located west of downtown Raleigh on 2,099 acres. The campus acreage includes Centennial Campus on 1,105 acres and Centennial Biomedical Campus on 215 acres. West Campus includes the College of Veterinary Medicine and the stadium/arena complex. Nearby are research farms, biology and ecology sites, horticulture and floriculture nurseries and research forests that cover an additional 3,000 acres. Elsewhere across the state are research farms and 4-H camps.

**Research Triangle Park**

NC State is one of three nationally renowned research universities in the Triangle area, along with Duke University in Durham and the University of North Carolina at Chapel Hill. Within the 30 mile triangle formed by the three universities is Research Triangle Park, a 7,000-acre research park founded in 1959 by leaders in academia, business and government. Today, Research Triangle Park is home to some of the most innovative technology and research-based companies in the world.

**Faculty**

The university has 9,553 employees, including 2,360 faculty. Among the many honors and recognitions received by members of the faculty are 9 memberships in the National Academy of Sciences, 18 memberships in the National Academy of Engineering, one membership in the Institute of Medicine, and 778 members of NC State’s Academy of Outstanding Teachers.

**Students**

In the 2018 Fall Semester, the university’s head count enrollment totaled 35,479. Included in this number were 25,199 students in undergraduate degree programs, 10,280 in graduate degree programs, 400 First Professional and 1,801 non-degree-seeking students. The total enrollments by college were:

- Agriculture and Life Sciences - 3,575
- Design - 841
- Education - 1,717
- Engineering - 9,617
- Natural Resources - 1,976
- Humanities and Social Sciences - 4,480
- Management - 3,947
- Sciences - 4,070
- Textiles - 1,110
- Veterinary Medicine - 483
- Division of Academic and Student Affairs - 1,345

The student population included 2,055 African American students, 4,190 other non-white students, and 16,562 female students. Students at the university come from 56 states (including DC and territories) and 132 foreign countries. The international enrollment is a distinctive feature of the institution as 4,068 international students give the campus a cosmopolitan atmosphere.

**Outreach and Extension**

As North Carolina’s flagship research intensive, community engaged land-grant university, NC State has a unique mission to serve the citizens of this state through technical assistance, professional development, lifelong education, technology transfer, and other means of applying knowledge to real world issues and problems. Faculty, students, and staff from all ten academic colleges and other units engage in collaborative research, learning, and service partnerships with business, industry, government, and communities, in the Triangle region and across the state. Extension and engagement imperatives include economic development, environmental stewardship, K-12 education, leadership development, and entrepreneur support. NC State’s Office of Extension, Engagement, and Economic Development reaches over one million citizens annually through Cooperative Extension, Industrial Extension, McKimmon Center for Extension and Continuing Education, NC State’s Economic Development Partnership, the General Hugh Shelton Leadership Center, and the North Carolina Small Business and Technology Development Center.

**Administration**

NC State is one of 16 constituent institutions of the multi-campus University of North Carolina system (http://www.northcarolina.edu/). The UNC Board of Governors is the policy-making body legally charged with “the general determination, control, supervision, management, and governance of all affairs, of the constituent institutions.”

NC State is a member of the National Association of State Universities and Land-Grant Colleges. It is also a member of the American Council on Education, the College Entrance Examination Board, the Council of Graduate Schools, the National Commission on Accrediting and the Southern Association of Colleges and Schools.

North Carolina State University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (http://www.sacscoc.org/) to award associate, baccalaureate, master’s and doctoral degrees. Contact the:

Commission on Colleges
1866 Southern Lane
Decatur, Georgia, 30033-4097

Or call 404-679-4500 for questions about the accreditation of North Carolina State University. We are providing this contact information here to enable interested constituents:
1. to learn about the accreditation status of NC State,
2. to file a third-party comment at the time of NC State’s decennial review, or
3. to file a complaint against the institution for alleged non-compliance with a standard or requirement.

Normal inquiries about NC State, such as admission requirements, financial aid, educational programs, etc., should be addressed directly to the university and not the Commission’s office.

**University Administration**

**Office of the Chancellor**

W. Randolph Woodson, Chancellor

P.J. Teal, Secretary of the University

Lindsay Recchie, Assistant to the Chancellor

Maggie Thompson, Chancellor's Communications Specialist

Mary Catherine Cole, Program Associate

Lisa Pierson, Business Officer

**Office of the Executive Vice Chancellor and Provost**

Warwick A. Arden, Executive Vice Chancellor and Provost

Dr. Mark Bernahard, Vice Provost for Continuing Education

Leslie Boney, Vice Provost for Outreach and Engagement

Dr. Fashaad Crawford, Vice Provost for Assessment and Accreditation

Dr. Louis Hunt, Senior Vice Provost for Enrollment Management and Services

Dr. Duane Larick, Senior Vice Provost for Academic Strategy and Resource Management and Chief of Staff

Dr. Bailian Li, Senior Vice Provost for Global Engagement

Dr. Thomas K. Miller, Senior Vice Provost for Academic Outreach and Entrepreneurship

Dr. Margery Overton, Senior Vice Provost for Institutional Strategy and Analysis

Greg Raschke, Senior Vice Provost and Director of Libraries

Sheri Schwab, Vice Provost for Institutional Equity and Diversity

Dr. Katharine Stewart, Vice Provost for Faculty Affairs

**Chancellor’s Cabinet**

Warwick Arden, Executive Vice Chancellor and Provost

Brad Bohlander, Chief Communications Officer, Associate Vice Chancellor of University Communications

Boo Corrigan, Director of Athletics

Marc I. Hoit, Vice Chancellor for Information Technology

Kevin Howell, Vice Chancellor for External Affairs, Partnerships and Economic Development

Charles Maimone, Vice Chancellor for Finance and Administration

Allison Newhart, Vice Chancellor and General Counsel

Sheri L. Schwab, Vice Provost for Institutional Equity and Diversity

Brian Sischo, Vice Chancellor for University Advancement

P.J. Teal, Secretary of the University and Assistant to the Chancellor

Mladen Vouk, Vice Chancellor for Research and Innovation

Marie Williams, Associate Vice Chancellor for Human Resources

Lisa Zapata, Interim Vice Chancellor for the Division of Academic and Student Affairs

**Deans of the Colleges**

Dr. Jeffery P. Braden, College of Humanities and Social Sciences

Dr. Frank Buckless, Stephen P. Zelnak, Jr. Dean of the Poole College of Management

Dr. Mary Ann Danowitz, College of Education

Dr. Myron Floyd, College of Natural Resources

Dr. Peter Harries, The Graduate School

Dr. David Hinks, Wilson College of Textiles

Dr. Mark Hovesten, College of Design

Dr. Richard Linton, College of Agriculture and Life Sciences

Dr. D. Paul Lunn, College of Veterinary Medicine

Dr. Louis Martin-Vega, College of Engineering

Dr. Christine McGahan, College of Sciences

Bret Smith, Interim, University College, Division of Academic and Student Affairs

**Board of Trustees**

Thomas E. Cabaniss, Chair

Ann B. Goodnight, Secretary

Robert “Chip” Andrews III

James A. “Jim” Harrell III

Edwin J. “Ed” Stack III

Edward I. “Ed” Weisiger Jr., Second Vice Chair
Stanhope A. Kelly, First Vice Chair
Wendell H. Murphy
Ven Poole
Ronald W. Prestage
Dewayne N. Washington
Melanie Flowers, Student Body President

University Council
Melanie Flowers, Student Body President
Pat Gaddy, Chair-Elect, Staff Senate
Cecile Hinson, Director, Internal Audit
Hans Kellner, Chair of the Faculty
Margery Overton, Senior Vice Provost for Institutional Research and Planning
Greg Raschke, Senior Vice Provost and Director of Libraries
Coleman Simpson, Student Senate President
Janice Sitzes, Staff Senate Chair
Benny Suggs, Associate Vice Chancellor for Alumni Relations
James Withrow, Graduate Student Association President
*The University Council is also composed of the chancellor’s cabinet and the deans of the colleges.

### Admission and Enrollment

View the following links for helpful information about the various paths to admission to NC State, enrollment options and procedures, financial aid eligibility, and university tuition and fees.

- Admission (p. 17)
- Enrollment (Registration) (p. 24)
- Financial Aid (p. 26)
- International Programs and Activities (p. 27)
- Supplemental Academic Programs (p. 29)
- Tuition and Fees (Graduate) (p. 30)
- Tuition and Fees (Undergraduate) (p. 30)

### Admission

What best describes the type of student you are? Are you looking to attend NC State for one of our outstanding undergraduate baccalaureate degree programs? Are you thinking about pursuing your doctoral degree here? Or, do you want to explore some of our course offerings as a Non-Degree Studies student? Check out the links below to view admissions requirements and procedures based on your academic history, needs and goals.

- Undergraduate Admission (p. 17)
- Graduate Admission (p. 21)
- Non-Degree Studies (p. 23)
- Readmission (p. 24)

### Undergraduate Admission

NC State is a member of the Common Application (http://www.commonapp.org/) and the Coalition for Access, Affordability, and Success (http://www.coalitionforcollegeaccess.org/). Students may choose to apply through either application system. Undergraduate Admissions implements a notification date system for both domestic freshman and transfer applicants. International applicants are notified of their admission decision on a rolling basis once their application is complete. Freshmen are strongly encouraged to apply during the fall of their senior year in high school by the early action deadline.

Application Dates and Deadlines (https://admissions.ncsu.edu/apply/dates-and-deadlines/)

Freshman and transfer applicants for the College of Design and Fashion and Textile Design program must submit a complete application including a portfolio and additional essay by November 1 and list it as their first choice major.

All applications for the spring semester should be submitted prior to October 1. A few programs do not accept applications for spring entry including applied mathematics and mathematics, College of Design studio-based majors, College of Engineering, Exploratory Studies, fashion and textile design, physics and statistics.

Students are notified of their decision on their wolfPAW account (https://wolfpaw.ncsu.edu/Default.asp) and admitted students (https://admissions.ncsu.edu/enroll/) must confirm their enrollment by May 1, or within ten days of if they are accepted after May 1.
The Undergraduate Admissions website (http://admissions.ncsu.edu/) provides more information on the application review process and procedure.

Office of Undergraduate Admissions
NC State University
121 Peele Hall
Campus Box 7103
10 Watauga Club Drive
Raleigh, NC 27607
Phone: 919-515-2434
Email: undergrad-admissions@ncsu.edu

Admission to the university is highly competitive. Applicants are asked to indicate their first and second choices for a curriculum, including undeclared majors within a college, or, if undecided, to indicate their choice of participating in University College Exploratory Studies. Applicants not admitted in their first curriculum choice will be reviewed for admission in their second curriculum choice. The admissions decision is based on a holistic review of a complete application. Of primary importance is the high school record, including the level and difficulty of the courses taken, the overall grade point average, rank in class, and scores on the SAT or the ACT. Extracurricular involvement, leadership, and many other factors are also considered.

Admissions Requirements

The Board of Governors of the University of North Carolina System has determined that the Minimum Course Requirements (MCR) for all constituent institutions, including NC State, shall include a high school diploma or its equivalent and the following course units taken in high school:

1. Six course units in language, including
   • Four units in English
   • Two units in a language other than English

2. Four course units of mathematics in any of the following combinations:
   • Algebra I and II, Geometry, and one unit beyond Algebra II
   • Algebra I and II, and two units beyond Algebra II or
   • Integrated Math I, II, III and one unit beyond Integrated Math III

3. Three course units in science, including
   • At least one unit in a life or biological science, and
   • At least one unit in physical science, and
   • At least one laboratory course

4. Two course units in social studies, including
   • One unit in U.S. history
   • One other unit in social studies

Competitive applicants will typically exceed these minimum courses. It is recommended that every student take a foreign language course and a mathematics course in their senior year.

NC State does not conduct individual interviews with applicants, however, students are always welcome to walk-in and meet with an admissions officer at NC State’s Joyner Visitor Center. Information sessions and student led campus tours are also available Monday through Friday at the Joyner Visitor Center (http://admissions.ncsu.edu/visit/schedule-your-visit/).

How to Apply

1. Review our deadlines: The application opens in August
2. Complete the application through the Common App or the Coalition App; we do not have a preference. Applicants for Studio-Based Majors will also need to submit a portfolio.
3. Pay the $85 application fee, or provide an official fee waiver.
4. Self-report your test scores. Visit our website (https://admissions.ncsu.edu/apply/freshmen/application-process/) for more information and for our school codes.
5. Submit your official academic transcript.
6. Check your status in your wolfPAW (https://apply.ncsu.edu/portal/wolfpaw/) account throughout the application process.

Admissions Dates and Deadlines

Decisions are released on the corresponding notification date as long as the application is complete by the deadline.

Fall Entry Early Action:
   • Deadline: November 1
   • Notification Date: January 30

Fall Entry Regular Decision:
   • Deadline: January 15
   • Notification Date: March 30

Spring Entry Regular Decision:
   • Deadline: October 1
   • Notification Date: December 1

Some programs do not accept applications for spring entry. Visit our website for details.

Studio-Based Majors

The following programs are considered studio-based majors and are fall entry only:

   • Architecture
   • Art & Design
   • Fashion & Textile Design
   • Graphic Design
   • Industrial Design

Application Deadline: November 1
Portfolio and Optional Essay Due: November 1

Agricultural Institute

NC State’s 2-year Agricultural Institute (AGI) (http://catalog.ncsu.edu/undergraduate/agriculture-life-sciences/agricultural-institute/) accepts freshman and transfer applicants.

Fall Entry:
• Deadline: June 1
• Decision Date: Rolling

Spring Entry:
• Deadline: November 1
• Decision Date: Rolling

Credit Opportunities
Students can jump-start their college careers by acquiring pre-enrollment credits by one or more of the following means:

1. by passing a proficiency examination administered by a teaching department at NC State;
2. by meeting a specific minimum score on certain Advance Placement Program (AP), International Baccalaureate (IB) examinations, and/or A and AS Level Equivalencies; and/or
3. by attaining a minimum score on certain College Level Examination Program (CLEP) subject tests.

Learn about the recognized test curriculum, accepted test scores and credit awarded at admissions.ncsu.edu/apply/credit-opportunities (http://admissions.ncsu.edu/apply/credit-opportunities/).

Out-of-State Students
Undergraduate applicants from outside North Carolina are reviewed using the same criteria as applicants from North Carolina. NC State is limited to enrolling not more than 18 percent of total new undergraduate students from outside the state as set forth by the University of North Carolina System.

The path to NC State is not always direct. About 20 percent of our students start their college career at another college or university. All transfer applicants should have at least 30 transferable college credit hours completed, including specific coursework and a competitive GPA based on the major you are applying for. Meeting these recommendations does not guarantee admission but sets you up to be considered a competitive applicant in the review process. View our recommendations for competitive applicants (https://admissions.ncsu.edu/apply/transfers/application-review/#recommendations-for-competitive-applicants).

What We Look For
Here are some of the items we’re looking at when evaluating your transfer application to NC State:

1. Your college coursework and GPA
2. Your high school coursework and test scores if you have less than 30 transferable college semester credit hours completed
3. Your interest in the program you’re applying for
4. Your accomplishments/involvement outside of the classroom
5. Your background and opportunities
6. Your individual story

Visit our Transfer Admissions website (https://admissions.ncsu.edu/apply/transfers/application-review/) for more information and recommendations for competitive transfer applicants. Students are always welcome to walk-in and meet with an admissions officer at NC State’s Joyner Visitor Center. Information sessions and student-led campus tours are also available Monday through Friday at the Joyner Visitor Center (http://admissions.ncsu.edu/visit/schedule-your-visit/).

How to Apply
1. Review our deadlines: The application opens in August. Be sure to pay attention to additional requirements and timelines for Studio-Based Majors and the Agricultural Institute.
2. Plan your path, and review our recommendations for competitive applicants.
3. Complete the application through the Common App (http://www.commonapp.org/) or the Coalition App (http://www.coalitionforcollegeaccess.org/); we do not have a preference. Applicants for Studio-Based Majors will also need to submit a portfolio.
4. Pay the application fee or provide an official fee waiver.
5. Submit your official academic transcript(s) from each institution you have attended.
6. Check your status in your wolfPAW (https://apply.ncsu.edu/portal/wolfpaw/) account throughout the application process.

Admissions Dates and Deadlines
Decisions are released on the corresponding notification date as long as the application is complete by the deadline.

Fall Entry Regular Decision:
• Deadline: January 15
• Notification Date: March 30

Spring Entry Regular Decision:
• Deadline: October 1
• Notification Date: December 1

Some programs do not accept applications for spring entry. Visit our website for details.

Studio-Based Majors
The following programs are considered studio-based majors and are fall entry only:

• Architecture
• Art & Design

Transfer Admissions Center
Joyner Visitor Center
1210 Varsity Drive
Raleigh, NC 27607
Phone: 919-513-1200

At NC State we value diversity and welcome international students. Located in Raleigh, North Carolina, we are proud to be home to the most diverse student body in North Carolina hosting students from 117 different countries.

The Office of International Services (https://internationalservices.ncsu.edu/future-students/) is the main resource for international students regarding immigration regulations, university policies, employment and travel. They provide assistance to you and your family as you prepare to arrive on campus and to smooth the transition to studying in the U.S.

What We Look For
Here are some of the items we’re looking at when evaluating your transfer application to NC State:

1. Your Academic Achievement
3. Your level of English language skills
4. Your interest in the program you are applying for
5. Your accomplishments/involvement outside the classroom
6. Your background and opportunities
7. Your individual story

Visit our International Admissions website (https://admissions.ncsu.edu/apply/international/international-application-review/) for more information on application considerations, including interactive interviews (for Chinese applicants) and SAT or ACT composite scores (for Freshman applicants only).

How to Apply

1. Review our deadlines: The application opens in August. Be sure to pay attention to additional requirements and timelines for Studio-Based Majors and the Agricultural Institute.
2. Complete the application through the Common App (http://www.commonapp.org/) or the Coalition App (http://www.coalitionforcollegeaccess.org/); we do not have a preference. Applicants for Studio-Based Majors will also need to submit a portfolio.
3. Pay the application fee ($100 for international applicants).
4. Submit your academic credentials. Visit our website for details.
5. Show proof of English proficiency (https://admissions.ncsu.edu/apply/international/international-application-review/), if you are not from a country where English is the official or commonly spoken language.
6. Check your status in your wolfPAW (https://apply.ncsu.edu/portal/wolfpaw/) account throughout the application process.

Admissions Dates and Deadlines
Decisions are released on the corresponding notification date as long as the application is complete by the deadline.

Fall Entry Early Action:
• Deadline: November 1
• Notification Date: January 30

Fall Entry Regular Decision:
• Deadline: January 15
• Notification Date: March 30

International applicants must apply by the deadline and will have their admissions decisions released on a rolling basis once your application is complete.

Spring Entry Regular Decision:
• Deadline: October 1
• Notification Date: December 1

Some programs do not accept applications for spring entry. Visit our website for details.

Studio-Based Majors
The following programs are considered studio-based majors and are fall entry only:
• Architecture
• Art & Design
• Fashion & Textile Design
• Graphic Design
• Industrial Design
Application Deadline: November 1
Portfolio and Optional Essay Due: November 1

Agricultural Institute

NC State’s 2-year Agricultural Institute (AGI) (http://catalog.ncsu.edu/undergraduate/agriculture-life-sciences/agricultural-institute/) accepts freshman and transfer applicants.

Fall Entry:
• Deadline: June 1
• Decision Date: Rolling

Spring Entry:
• Deadline: November 1
• Decision Date: Rolling

Use of Agents or Educational Agencies

NC State does not partner with incentive-based agents or educational agencies to represent the University or to administer any part of the application process.

We recognize that in many countries agents or consultants are retained by students and their families to assist in applying to universities in the United States. It is not necessary to engage an agent in order to have a strong chance of admission to NC State. Admission decisions are not based on the recommendations of agents.

NC State expects an application to be the work of the applicant and that all information on the application is complete, accurate and truthful. We may reject application materials, cancel an admissions offer or dismiss a student from attendance, if it is determined that application materials have been falsified.

It is critical that applicants use their own email address, phone number, and mailing address on their application to ensure that all communication from NC State is delivered in an accurate and timely manner. Missing any important communication from NC State may delay applicants’ application process and admission decisions.

Financial and Immigration Information

All international applicants seeking an F-1 or J-1 student visa must submit a Certificate of Financial Responsibility (CFR) as part of the admission process. The purpose of this form is to certify financial solvency for the student throughout his/her program of study - this is a federal requirement that must be met before the Office of Undergraduate Admissions can issue any visa certificates.

In addition, applicants deemed admissible who are already in the U.S. must also fill out a Visa Clearance Form (VCF). This includes international applicants who are in a nonimmigrant visa category other than F-1 or J-1 (ex: H-4, L-2, DACA, E-2, Pending Permanent resident etc.). These applicants are not required to complete a CFR, unless they plan to change to F-1 or J-1 student status (if eligible).

CFR and VCF forms are reviewed by the Office of Undergraduate Admissions upon receipt. If the information provided by the applicant is incomplete or not acceptable (e.g. sponsor and bank official signatures, bank statements, etc.), the applicant will be notified that his/her documents were not approved and why. Notification is done via e-mail. The applicant will then have an opportunity to correct the problem(s) and resubmit the form(s). Applicants can check the status of their applications through their WolPAW account.

Once the applicant is considered admitted (fully or conditionally) to the University, the Office of Undergraduate Admissions mails out the appropriate Certificate of Eligibility (Form I-20 for an F-1 visa or Form DS-2019 for a J-1 visa) along with the full admission letter and other important pre-arrival information. Newly fully admitted international students will also receive information and guidance from the Office of International Services (OIS) via email prior to their arrival to NC State. Conditionally admitted international students will received information from the Intensive English Program (IEP) prior to their arrival as well.

New F-1 and J-1 international students must check-in with the Office of International Services upon arrival to campus and attend the New International Student Orientation, which is scheduled a few days before the semester begins.

New international students who are accepted to NC State have the opportunity to participate in a Summer Start program during the month of July before fall classes begin. More information can be found here. https://newstudents.dasa.ncsu.edu/summerstart/

Graduate Admission

For a list of graduate degrees, details on the programs, and admissions information, please consult the Graduate Programs website (https://grad.ncsu.edu/programs/).

The Graduate School is committed to provide a transformative experience for graduate students and postdoctoral researchers at NC State by preparing these talented individuals to become true leaders ready to tackle the major challenges facing our state, nation, and world. NC State is recognized as a national leader in the STEM disciplines, and the University supports advanced study and innovative research in numerous fields, including agriculture, life sciences, design, education, engineering, natural resources, humanities and social sciences, management, textiles, and veterinary medicine, along with many exciting interdisciplinary programs.

NC State currently offers over 160 master’s programs and more than 60 doctoral programs in both traditional and emerging disciplines, including biomedical engineering, biotechnology, genomics, geographical information systems, nanotechnology, and natural resources. The University also offers a broad range of certificate programs that afford graduate students and postdoctoral scholars with opportunities to collect certification for key skills and knowledge. Moreover, several Professional Science Master’s programs are offered that tailor educational outcomes to employer needs.

The Graduate School also proudly offers numerous professional development experiences throughout the year. These opportunities are meant to endow graduate students and postdoctoral scholars with a competitive edge that enhances their ability to land jobs and to experience long-term career success. Graduate School professional development programming incorporates training that pertains to four core
competency areas: professional and personal development, leadership and management, academic development, and communication. Signature programs include the Notes From the Field seminar series, the Transition to Industry Immersion Program, the Dissertation and Thesis Institute, the Teaching and Communication Certificate program, the Preparing Future Faculty program, the STEM Faculty Launch program, the Team Case Studies course, and the Job Search Strategies course.

The criteria used for admissions decisions vary according to programs and schools/colleges, reflect an evaluation of the applicant’s potential for graduate work, and consider the ability of a program to accommodate additional students. Commonly, departmental admissions committees consider requests for admission and forward their recommendations to the Graduate School. However, Graduate School regulations govern the criteria for the classification of graduate student status.

Applications and all supporting documents must be received on or before the priority deadlines OR the Program Deadlines (https://grad.ncsu.edu/programs/), whichever is earlier. Please be aware of specific program deadlines (https://grad.ncsu.edu/programs/), as many are earlier than the Graduate School priority deadlines. All application fees are totally non-refundable. Note that applications must be submitted to the Graduate School by midnight Eastern Standard Time on the deadline.

The Graduate School (https://grad.ncsu.edu/)
1020 Main Campus Drive, Box 7102
Raleigh, NC 27695

For a list of graduate degrees, details on the programs, and admissions information, please consult the Graduate Programs website (https://grad.ncsu.edu/programs/).

Applications and all supporting documents must be received on or before the priority deadlines OR the Program Deadlines (https://grad.ncsu.edu/programs/), whichever is earlier. Please be aware that many program deadlines are earlier than the Graduate School priority deadlines.

**Domestic Applicants**

- Unofficial transcripts from all colleges and universities previously attended
  - If you are currently enrolled in an institution taking courses, you will need to provide a list of courses in progress
  - All foreign transcripts must be translated to English through a certified Credential Evaluation Service
  - Official transcripts and statements of degree will be required if you are recommended for admission
- 3 Recommendations from people who know your academic record and potential for graduate study
  - All recommendation letters are submitted online through a link that will be sent to each recommender’s email once their information is listed on the recommendation list
- Standardized Test Scores
  - Depending on the prospective program’s admission requirements, this may include: GRE, GMAT, and/or MAT scores
- Statement of Purpose & CV/Resume
- Supplemental Documentation
  - Depending on the prospective program’s admission requirements, this may include: research papers, additional essay questions, or writing/media samples
- Application Fee
  - International Application: $85.00
  - Graduate Certificate Application: $25.00
  - Payments are made online as the last step of the Admissions application through any major credit card issuer
  - All application fee submissions are totally non-refundable

**International Applicants**

Non-Degree Studies

NC State's Non-Degree Studies (NDS) program provides opportunities for students who are not full-time degree-seeking students to enroll at NC State for a variety of reasons. NDS caters to:

• Working professionals looking to advance in their careers,
• Students who need to meet NC State admission requirements for an undergraduate or graduate program,
• Students who would like to try out classes at NC State,
• High school students (https://registrar.ncsu.edu/nds/aeo-students/) who wish to earn college credit and have exhausted enrollment options at their home institutions,
• North Carolina Senior learners (https://registrar.ncsu.edu/nds/over65/) wishing to audit courses tuition-free,
• and so many others.

Eligibility

• Students must have graduated from high school at least one year before beginning enrollment or have the written support of their high school principal
• Students must be eligible to return to any previous institution(s) attended
• Students must maintain a minimum cumulative GPA of 2.0 at all times to remain eligible to continue

NDS Classifications

Undergraduate Studies
  • Students who have not yet obtained a baccalaureate degree
  • Students enrolled in an undergraduate certificate program

Post-Baccalaureate Studies
  • Students who have obtained a baccalaureate degree

Academic Enrichment Opportunities
  • Rising high school juniors and seniors with a cumulative weighted GPA of 3.5 or higher

North Carolina Senior Auditors ("65+")
  • North Carolina residents aged 65-years and older

How to Apply to the NDS Program

Students interested in the NDS program will apply online through our ApplyNDS portal. Depending on what type of student you are, whether you have previously been a student at NC State, and your residency (in-state, out-of-state, or international), there may be different components to the application. Details are available on the NDS website (https://registrar.ncsu.edu/nds/). It is important that applicants follow each step of the application carefully, as your application may not be considered if we are missing any important information or documentation.
Application Dates and Deadlines

The deadline to apply to the NDS program for the Fall 2020 semester is August 14, 2020. Applicants are notified of their decision on a rolling basis. The deadline for the Spring 2021 application will be posted to the NDS website during the summer.

Readmission

Sometimes students may take some time away from NC State, and that's okay. Any Undergraduate or Agricultural Institute student who has not enrolled in a Fall or Spring semester may apply for readmission to continue their degree program if they wish to continue.

Eligibility

Students are eligible to apply for readmission if you fall into one of the following categories:

• Former Undergraduate and Agricultural Institute students eligible to return to NC State University
• Suspended Undergraduate Students (additional action required)
• Former Undergraduates who obtained a degree and wishes to seek an additional undergraduate degree

Students who desire a change of curriculum can apply through the Change of Degree Application (CODA) upon readmission, except for Leadership in the Public Sector. The Leadership in the Public Sector (LPS) major, housed within the College of Humanities and Social Sciences, is an online degree completion program for students who have been away from NC State University for more than three years. It is not available for transfer via CODA. If you are interested in this program, please review the LPS Program website and contact the program advisor or director before readmitting into your previous major.

Students who have completed their undergraduate degrees and wish to return to pursue an additional degree must complete the application for readmission and complete the Readmission to Additional Degree form. Students who have a break in enrollment for at least 3 years may appeal for Contractual Readmission. Students who are contractually readmitted will be placed on Academic Warning and must maintain a 2.0 GPA on all coursework attempted after readmission. Failure to do so will result in permanent dismissal from the university.

Students are encouraged to begin the Contractual Readmission process early. Colleges may have additional requirements or deadlines; students should consult with their college and/or academic advisor before starting the contractual readmission application. Visit our website for more information and to download the Contractual Readmission Application Form.

How to Apply

Application dates and deadlines are updated on our website throughout the year.

All students applying for readmission to NC State must pay a non-refundable, $60 Readmission Application Fee.

The Readmission application is available online at our ApplyReadmit portal. Decisions are released on a rolling basis.

Residency Determination

All students applying for undergraduate readmission and requesting in-state tuition are required to complete the North Carolina Residency Determination Service (RDS) prior to completing the Readmission application. You will need your Residency Certification Number (RCN) in order to complete your Readmission application.

Enrollment (Registration)

Enrollment Process

Enrollment is conducted using MyPack Portal, NC State's online student services application. The Student Services Center website houses tutorials and guides for completing enrollment as easily and efficiently as possible. A schedule of courses for each semester is also available online prior to the beginning of the enrollment period.

Enrollment consists of three steps:

1. Students meet with advisors to determine course requirements and to have their Advising Hold released;
2. Students enroll in courses in MyPack Portal; and
3. Students pay tuition, fees, and all other debts to the university by the established deadlines.

Students can find more information about how to search for classes, how to enroll, how to drop and edit their class schedules, and how to utilize degree planning tools on the Student Services Center website.
Enrollment Calendar and Timeline

Students are assigned a date and time during which they can begin enrolling for the upcoming term. These assignments are determined by a number of factors, including the student's academic career (i.e., undergraduate, graduate, etc.), classification by credit hours (i.e., junior, senior), and any university groups the student may be a part of.

Enrollment typically begins in October for Spring and Summer semesters, and in March for Fall semesters. The enrollment calendars are published shortly before then.

New freshmen entering in the Fall enroll during summer orientation after meeting with advisors and becoming acquainted with the MyPack Portal.

The enrollment calendar is available online on the Student Services Center website (https://studentservices.ncsu.edu/calendars/enrollment/).

Schedule Revision (drops and adds)

Note: NC State University policies, rules and regulations are updated and reviewed as the need arises. For the most current information regarding this section, please visit the Policies, Rules, and Regulations website (http://policies.ncsu.edu/regulation/reg-02-20-02/).

Courses may be added during the first week of a regular semester without permission of the instructor and during the second week with the permission of the instructor.

Courses may be dropped without regard to course load prior to the Census Date of a regular semester. After the Census Date and prior to the Drop/Revision deadline, full-time undergraduate students who wish to drop courses at any level and whose academic load would thereby fall below the twelve hour minimum course load may do so only for documented medical reasons or other verified, unforeseen grounds of personal or family hardship.

Exceptions to the drop policies require the recommendation of a student’s advisor, the departmental coordinator of advising or the departmental head, and approval by the student’s dean.

The full academic calendar is available on the Student Services Center website (https://go.ncsu.edu/academiccalendar/).

Students who wish to drop all courses must withdraw from the university for the remainder of the semester or summer session in which they are enrolled. All withdrawals for a current or upcoming term are initiated through the self-service Term Withdrawal page in the MyPack Portal. Withdrawals after the drop/revision deadline are approved by the university only under extenuating circumstances. Documentation is required to support these requests. More information about how to initiate a Term Withdrawal is available online (https://studentservices.ncsu.edu/your-classes/withdrawal/).

Veterans Education Benefits

NC State University is approved to administer veterans benefits to eligible students. The Veterans Education Benefits office is located in Witherspoon Student Center, suite 100. Students who are eligible to receive veterans benefits should contact the NC State Certifying Official at veterans-ed@ncsu.edu. For more information see the NC State Veterans Education website (http://registrar.ncsu.edu/veterans/).

Military Priority Registration

NC State strives to ensure the academic success of our military-affiliated students by offering priority registration to student service members, veterans and those using GI Bill benefits. For more information regarding priority registration for military-affiliated students, please contact the university’s Veterans Education Benefits office at veterans-ed@ncsu.edu.

Exchange Programs

Several enrollment programs exist for the purpose of fostering cooperative educational activities. Under these programs students have the opportunity to register for courses at other institutions and to participate in cooperative library arrangements and joint student activities.

Inter-Institutional Program

The Inter-Institutional Registration Program is a voluntary organization comprised of NC State, Duke, North Carolina Central University, University of North Carolina at Chapel Hill, University of North Carolina at Charlotte, and University of North Carolina at Greensboro for the purpose of developing and conducting cooperative educational activities. The program provides the opportunity for students to enroll at another institution for a course accepted for their program of study and not offered on their home campus. Distance education courses are not eligible to be used for Inter-Institutional registration. Other activities include a cooperative library arrangement, joint student activities, and faculty cooperation and interchange. Interested students should contact the Inter-Institutional Coordinator at (919) 515-1427 or visit the Inter-Institutional website (https://studentservices.ncsu.edu/your-classes/exchange-programs/inter-institutional-program/).

UNC Online

The University of North Carolina Online Academic Services supports members of the UNC multi-campus community. This portal provides access to information on University-wide cross-campus online course offerings to enrolled students. It also administers an exam proctoring system to accommodate students, faculty and qualified proctors for scheduled proctored exams. The program provides the opportunity for students to enroll at another institution for a course accepted for their program of study and not offered on their home campus through Distance Education courses only. Students should contact the Inter-Institutional Coordinator at (919) 515-1427 or visit the UNC Online website (http://online.northcarolina.edu/).

Cooperating Raleigh Colleges

The Cooperating Raleigh Colleges Program (CRC) is a voluntary organization comprised of NC State, Meredith College, St. Augustine’s College, Shaw University, Wake Technical Community College, and William Peace University for the purpose of developing and conducting cooperative educational activities within the Raleigh area. The course taken at the visited school must be a course that is accepted for their program of study and not offered through NC State. Interested students should contact the Inter-Institutional Coordinator at (919) 515-1427 or visit the Cooperating Raleigh Colleges website (https://studentservices.ncsu.edu/your-classes/exchange-programs/cooperating-raleigh-colleges/).

Student Services Center
Please visit the Student Services Center website (http://studentservices.ncsu.edu) for more detailed information regarding types of aid and how to apply.

Scholarships

NC State offers a variety of scholarships (https://studentservices.ncsu.edu/your-money/financial-aid/types/scholarships/) for both incoming first-year students and those who are continuing at NC State. Consideration for these awards is given to students who are academically competitive and exhibit special talents or characteristics. Some scholarships require that students also demonstrate financial need. Once admitted to NC State, students can apply for scholarship consideration by using PACK ASSIST (https://ncsu.academicworks.com/), NC State University’s scholarship application portal. To maximize scholarship consideration, students should apply for admission by October 15 and complete the FAFSA by March 1.

In addition to these university-wide scholarships, many colleges and departments offer specific awards to students enrolled in their academic programs. These scholarships, funded by alumni, friends of the university, foundations, and industry, are available to both incoming freshmen and to continuing students. Consult the college or department websites for important deadlines and apply online with PACK ASSIST (https://ncsu.academicworks.com/). (https://go.ncsu.edu/packassist/)

NC State encourages students to search for private scholarships. Many organizations offer awards based on place of residence, background, professional affiliations and/or field of study. Students should use the many free online scholarship search websites to search and apply for outside scholarships.

University Academic Scholarships

Scholarships

By completing the FAFSA, students are considered for all forms of federal financial aid, as well as most types of state and institutional aid. Some academic scholarships may require separate applications. Determination of the applicant’s need is based on estimated educational costs as established by the Office of Scholarships and Financial Aid and a consideration of the family’s financial strength, as determined by the analysis of the FAFSA.

Financial Aid

Our mission is to make an NC State education affordable and accessible. We provide scholarships, grants, loans, and work funding to support students and their families. Our staff is here to help you navigate the process of applying for financial aid.

To be considered for financial assistance, a student must complete the Free Application for Federal Student Aid (FAFSA). This form, submitted online at www.fafsa.gov (http://www.fafsa.gov), evaluates the family’s ability to pay for educational expenses. Students who submit a FAFSA to the federal processor by March 1 are given first priority for need-based scholarship and grant consideration.

By completing the FAFSA, students are considered for all forms of federal financial aid, as well as most types of state and institutional aid. Some academic scholarships may require separate applications. Determination of the applicant’s need is based on estimated educational costs as established by the Office of Scholarships and Financial Aid and a consideration of the family’s financial strength, as determined by the analysis of the FAFSA.

Aid is available on a non-discriminatory basis to all qualifying students based on the applicant’s financial need. Financial aid awards are usually made in the form of "packages," which combine aid from all sources including the federal, state and institutional funds, and private entities.

Award packages can include gift aid (scholarships and grants), student loans, and/or employment through the Federal Work-Study program. Students must reapply for aid each year. Renewal is based on continued financial need as well as satisfactory academic progress as defined by the Policy (https://studentservices.ncsu.edu/your-degree/academic-progress/) on Satisfactory Academic Progress for Financial Aid Eligibility.

Please visit the Student Services Center website (http://studentservices.ncsu.edu/your-money/) for more detailed information regarding types of aid and how to apply.

University Academic Scholarships

Park Scholarships

The Park Scholarships program, established in 1996, brings exceptional students to NC State University based on outstanding accomplishments and potential in scholarship, leadership, service, and character. The program develops and supports Park Scholars in these areas, preparing them for lifelong contributions to the university, state, nation, and world.

Approximately 40 scholarships will be awarded this year to outstanding entering freshmen for undergraduate study in any discipline at NC State. As one of the most prestigious and comprehensive undergraduate scholarships in the nation, the Park Scholarship covers the cost of attendance for four years and includes educational trips, retreats, and seminars; enrichment grants to fund study abroad, research projects, service activities, and conferences; individualized faculty mentoring; and more.

The Park Scholarships are named for the late Roy H. Park ’31, an NC State alumnus who created the charitable Park Foundation, dedicated to education, media, and the environment. The Park Foundation initially funded the Park Scholars through annual grants; then, in September 2013, the Park Foundation committed $50 million to begin an endowment for Park Scholarships. With others’ support, this endowment will sustain the Park Scholarships program in perpetuity.

To date, 20 classes of Park Scholars have graduated and built a vibrant alumni network. For more information, visit the Park Scholarships website (http://park.ncsu.edu/).

Goodnight Scholars Program

The Goodnight Scholars Program, funded by a gift from Dr. Jim and Ann Goodnight, began in 2008 with 25 scholars. Since that time, it has grown into a comprehensive student development program designed to develop scholars into leaders within the STEM and/or education fields. The Program celebrated its eighth graduating class in May 2019, adding to its network of alumni stretching from coast to coast in the United States and throughout the world: all of whom are using their STEM talent to address critical societal, economical, and educational issues. Currently, the Program has more than 200 active students, and expanded to include transfer students beginning in Fall 2017.

The scholarship is targeted at low and middle-income families from North Carolina and is limited to students studying in the STEM disciplines or affiliated education majors. The current value of the scholarship is $20,500 and is renewable for up to four years for first-year students, and two years for transfer students. In addition to the scholarship, Goodnight Scholars have access to an assortment of developmental programming focused on their professional and personal growth, as well as enrichment grant funding to support their unique endeavors.

Dr. Jim Goodnight is founder and CEO of the SAS Institute, the world's leading business intelligence software vendor. Ann Goodnight, director of...
community relations at SAS, serves on the University of North Carolina Board of Governors and is a former member of the NC State Board of Trustees. Both are NC State graduates. Their frequent interactions with Goodnight Scholars provide unique and invaluable exposure to visionary leaders. Please visit the Goodnight Scholars website (https://goodnight.ncsu.edu/) for more information about the program and its exceptional scholars.

The Caldwell Fellows

The Caldwell Fellows is an intensive and comprehensive leadership development program that over 50 years at NC State has produced 1300+ outstanding alumni shaped by the Robert Greenleaf model of Servant Leadership. Supported through endowments held by the NC State Alumni Association, over 100 alumni “invest” in individual Fellows, providing funds for their development through experiential learning. Students selected as Fellows are expected to engage deeply in the program’s rich offerings, which include community-based service-learning, wilderness adventure, international engagement, and capstone training at the Center for Creative Leadership. Students receive three years of stipend (divided 70-30 between tuition and funds available for experiential learning), all contingent upon a student’s maintenance of the program ideals and a 3.25 cumulative GPA.

The application period for selection begins in January of each year, after a student’s initial semester(s) at NC State is complete. The program actively seeks applicants from all colleges at NC State. The rigorous selection process is based on an application portfolio which includes essays, a short video, letters of recommendation, and the first semester transcript at NC State (minimum 3.25 GPA); high school transcripts and standardized test scores are not reviewed. The application is available on the Caldwell Fellows website (http://ncsu.edu/caldwellfellows/). Application reviews by campus faculty and program alumni determine the finalists who are invited to interviews in February. Only first year students are eligible to apply.

The Caldwell Fellows program was created to honor the legacy of John T. Caldwell and to carry out his spirit and ideals. As Chancellor of NC State for 16 years, he presided over the university as a servant leader: inspiring excellence, modeling moral behavior and marshaling the strengths of the entire campus to further the common good. Guided by a deep respect for the potential inside every individual, he held a vision of NC State as a place where young people could find and refine their unique capabilities and potential. The Caldwell endowment is the only university-wide merit-based scholarship funded by alumni and supporters of NC State.

The program also derives from the NC Fellows program, originally known as the Richardson Fellows program, established in 1968 by Smith Richardson of the Richardson Vicks Corporation. Concerned for the state’s future leadership, Mr. Richardson established Fellows Programs on North Carolina campuses and charged them with developing leadership in their promising students. Caldwell Fellows maintain close ties with the internationally acclaimed Center for Creative Leadership, also created by the Smith Richardson Foundation.

Open minds and open hearts are core to the Caldwell Fellows community. Curiosity, creativity, respect for diversity, and commitment to service to the greater good are common qualities which are sought and developed in all Fellows.

International Programs and Activities

Study Abroad

Study abroad allows students to develop skills required to face the grand challenges of society - deepen intercultural sensitivity, think more critically and creatively, and broaden both personal and academic perspectives. Distinguish yourself from your peers by developing skills in independence, flexibility, and the ability to deal with ambiguity. Make the world your classroom at NC State.

Study Abroad Programs

NC State offers programs worldwide that meet academic, career, and personal interests. Study Abroad is for every major: fulfill major, minor, or general education program courses abroad. Plus, participation in NC State study abroad programs fulfill the Global Knowledge co-requisite degree requirement for NC State students. Students should work with their academic advisor to identify a time frame and outline a course plan for study abroad. For all majors, with academic planning, study abroad does not delay graduation at NC State. View program options by major. (http://go.ncsu.edu/studyabroadbymajor/)

Funding Study Abroad

Study Abroad is affordable at NC State. Semester exchange programs provide the most economical option for most students since standard tuition and fees keep the cost of a semester abroad comparable to a semester on campus at NC State. Students are eligible to receive financial aid (including loans, grants, and scholarships) for the cost of any study abroad program. Study abroad scholarships provide additional funding to about 1/3 of applicants receiving an award, plus many other financial resources are available in support of study abroad. View information about NC State Study Abroad Scholarships (https://studyabroad.ncsu.edu/funding/nc-state-scholarships/).

Applying for Study Abroad

With hundreds of opportunities to choose from—each differing in courses, duration, language, cost, location—early planning is key to a successful study abroad experience. Well prepared students typically start planning a year in advance. Learn more at http://studyabroad.ncsu.edu.

Kim Priebe, Director

Global Perspectives Certificate

The goal of the Global Perspectives Certificate is to:

- recognize students for their international studies and activities and
- encourage students to continue their global interests both overseas and within the United States.

All undergraduate degree-seeking students and all majors are welcome, including undergraduate international students. Upon completion,
students will receive an official certificate and a notation on their transcript documenting their global experiences during their studies. Learn more about the GPC and get started today at gpc.dasa.ncsu.edu (http://gpc.dasa.ncsu.edu/).

North Carolina Japan Center

Jonathan Brewster, Director

The NC Japan Center was established in July 1980 to strengthen the state’s academic, economic, scientific, and cultural ties with Japan. In its many aspects, the Center serves as a focal point for interaction between Japanese and North Carolinians. It is a statewide resource intended to assist all citizens, universities, companies, and public and private institutions in relations with the Japanese. The NC Japan Center works to inform people of the state about modern Japan and its people. It also provides information and resources for Japanese citizens living in North Carolina.

Consistent with NC State’s “Think and Do” land-grant mission, the NC Japan Center works in partnership with the Economic Development Partnership of North Carolina to attract Japanese businesses to the state, as well as strengthens relationships between NC State and academic partners in Japan. An external Board of Advisors includes prominent citizens of North Carolina who have a strong interest in Japan and US-Japan relations. Its Academic Advisory Committee consists of faculty from colleges across the university who provide guidance and direction for academic exchange and development. The NC Japan Center cooperates closely with the NC State Japanese language program and provides a full range of non-credit Japanese language courses to the public. For more information, please contact Jonathan Brewster at (919) 515-3450 or visit the North Carolina Japan Center’s website (http://www.ncsu.edu/japan/).

International Students

The Office of International Services (OIS) is charged with meeting the immigration advising and cross-cultural programming needs for the university’s more than 4000 international students and 700 J-1 Exchange Visitor scholars who come from more than 120 different countries. Services provided by OIS include advising students and scholars on immigration regulations and university policies; authorizing certain types of on or off-campus employment authorization for F-1 and J-1 visa holders; and providing cultural programs designed to enrich the cultural and academic experience of the campus community. OIS programs include: New International Student Orientation, Culture Corps, ISSERV service learning program, English Conversation Club, and many others. New international students are required to participate in New International Student Orientation. OIS also provides opportunities for U.S. students to get involved in the international community at NC State by inviting participation in various cross-cultural programs such as volunteering at the International Student Orientation and English Conversation Club.

International applicants must apply to the Admissions Office by the stated deadlines and must meet all the necessary requirements for admission. In addition, international applicants must meet certain language and financial criteria (see the TOEFL and Financial Information sections under Freshman Admission).

The North Carolina Global Training Initiative (GTI) sponsors several short-term certificate, internship, and research programs that international students may be interested in. These full-time non-degree study programs allow international students to study at NC State for one semester in order to learn about U.S. culture and education, improve their conversational English, take undergraduate courses in their field of study back home or in preparation for admission to a degree program here in the U.S., and experience life in the U.S. These programs have a later application deadline and are great for students to take before enrolling in an undergraduate or graduate degree program in the US or for siblings and friends of current degree-seeking students who want to study in the US together.

International students may be interested in joining the GTI’s Cultural Exchange Network (CENet). CENet connects NC State’s domestic and international students through joint participation in social, academic, and service learning events and workshops. Visit the CENet website (go.ncsu.edu/CENet (http://go.ncsu.edu/CENet/)) for more details about the program and how you can apply.

Anyone interested in the GTI’s programs can visit us on the web at www.ncsu.edu/gti (http://www.ncsu.edu/gti/) for more information.

Outline of minimum immigration requirements for F-1 and J-1 students:

• Keep passport and I-20 or DS-2019 current
• Maintain full-time enrollment every semester (12 hours/semester for undergraduates)
• Make good academic progress toward your degree
• Do not work or intern off campus without prior written approval from OIS
• Do not work on campus more than 20 hours in any one week during the semester
• Update any address change in MyPack Portal within ten days of moving
• Update OIS immediately of any changes in name, funding, or visa status
• Consult with an OIS advisor before changing curriculum/majors, withdrawing, dropping below full-time, transferring to another school/program, etc.
• Purchase and maintain the NC State University approved Health and Accident Insurance or other insurance plan that meets the published minimum coverage requirements.
• Keep your valid passport and recently signed visa certificate (I-20 or DS-2019) with you when you travel abroad. Consult with an OIS advisor about visa and travel questions

Further information about immigration requirements, employment and travel questions, cultural opportunities, and other critical information designed to assist international students are detailed on the OIS website. For individual advising, please call (919) 515-2961 to make an appointment with an advisor or stop by during our walk-in hours of 10:00am-11:45am and 1:00pm-2:45pm on Monday, Tuesday, Thursday and Friday (no walk-ins on Wednesdays).

The Intensive English Program (Conditional Admission and IEP-only)

The Intensive English Program (IEP) at North Carolina State University is a full-time, non-credit academic program offered to international, non-native English speakers. Its mission is to provide high-quality language instruction to those seeking academic preparation, professional development and/or personal enrichment. Programs of study are offered in the fall, spring, and summer semesters.

In the IEP, students take up to 25 hours per week of intensive language study in all core language skills. Students who enroll in the IEP will be tested for the appropriate level of English instruction when they arrive on campus.

Classes are located on NC State’s main campus and nearby on Hillsborough Street. IEP students are also offered the opportunity to participate in numerous cultural enrichment activities designed to help them get to know the surrounding area and interact with other students. Academic coaching (tutoring) is offered to students free of charge.

Students join the IEP as conditionally admitted students or IEP-only students. While the course of instruction is identical for both, IEP-only students are not guaranteed admission to degree programs, but may apply directly to such programs while enrolled in the IEP.

Conditional Admission

For undergraduate applicants who meet the competitive academic requirements for admission, but who do not yet possess the minimum English proficiency requirements for full, direct admission, NC State offers conditional admission. For NC State conditionally admitted students, the IEP provides the opportunity to improve one’s English language skills before moving into a degree program.

Successful completion of the IEP requires achieving at least a B or higher in each course, meeting strict attendance obligations, and passing all exit requirements.

Incoming Exchange Students

NC State has a growing number of international exchange partners from around the world. The Study Abroad Office warmly welcomes incoming exchange students to NC State's internationally renowned programs for a semester or for the full academic year.

Visit the NC State Study Abroad website (https://studyabroad.ncsu.edu/subpage-example/incoming-student/) for information about exchange programs at NC State, the application process, English proficiency requirements, preparation and arrival, and what you can expect during your time in Raleigh!

Website: https://studyabroad.ncsu.edu/

Cultural Exchange Network (CENet)

The Cultural Exchange Network (CENet) at NC State is a student organization comprised of undergraduate and graduate students from all fields of study and from around the world. CENet fosters global learning and international friendship through social, academic and service activities.

CENet is facilitated by the Global Training Initiative (GTI) and details can be found on the website (go.ncsu.edu/CENet (http://go.ncsu.edu/CENet/)).

Supplemental Academic Programs

Cooperative Education Program

The Cooperative Education Program (co-op) is an opportunity for students to gain hands-on work experience while pursuing a degree. Through alternate semesters of full-time study and full-time work experience, students can:

• Strengthen their job prospects after graduation; companies usually prefer hiring students who have related work experience, especially within their organization
• Be well-paid
• Explore career fields and confirm their choice of major
• Work with state-of-the-art equipment in the industry
• Experience "corporate culture" by working with professionals and observing how they handle job situations in the given field

The co-op plan can be completed in five years, during which time the student receives 12 to 18 months of industrial experience.

To be eligible for a co-op, students must:

• Be full-time students (in any degree program)
• Have completed a minimum of 30 credit hours (or one semester for transfer students)
• Have been admitted into a degree program prior to reporting for a co-op job
• Have a cumulative GPA of at least 2.50 (3.00 for graduate students)

For more information, visit: https://go.ncsu.edu/co-op (https://go.ncsu.edu/co-op/)

The Peer Mentor Program

The Peer Mentor Program (PMP), offered through the Department of Multicultural Student Affairs, is a student advisory program aims to foster a network of support for culturally diverse first-year students ("mentees"). The peer mentoring relationship is designed to aid in the academic, emotional, and socio-cultural adjustment to college life of mentees. Peer Mentors serve as peer support personnel for mentees and share program goals and responsibilities aimed at ensuring the retention of student participants.

For more information, visit: https://oied.ncsu.edu/divweb/msa/peer-mentor-program/
**Supplemental Instruction**

Supplemental Instruction (SI) is a voluntary academic support opportunity for students in selected sections of historically difficult, large lecture courses. SI supports students who want to improve their understanding of course material in a small group setting. Students are actively engaged with small group activities facilitated by the SI leader, a trained peer tutor. Several sessions are offered at various times each week. A schedule of current SI sessions can be found on the SI website (https://tutorial.dasa.ncsu.edu/si/si-schedule/).

**Tuition and Fees (Graduate)**

The University Cashier’s Office (https://treasurer.ofb.ncsu.edu/cashier/) provides billing, financial aid disbursement and account management services to all students. All students paying tuition and fees are entitled to University services, facilities and programs, including the services, facilities, and programs offered by the Student Center, Health Services, Physical Education Department, and Athletics Department.

Visit the Student Services Center website (https://studentservices.ncsu.edu/your-money/tuition-and-fees/) for the most up-to-date information on campus finances and student tuition and fees.

Students should view the Graduate School website for important information on Residence for Tuition Purposes (https://grad.ncsu.edu/admissions/residency/) and the North Carolina Residency Determination Service (RDS) for graduate programs.

**Tuition and Fees (Undergraduate)**

- **North Carolina Resident**: $4,550 per semester (effective 2019-2020 academic year)
- **Nonresident**: $14,610 per semester (effective 2019-2020 academic year)

A statement of tuition and fees is posted on each student’s account that registered during a normal registration period. Students (and authorized parents) are notified via e-mail (eBILL) when a new statement has posted. Payment in full or approved financial aid information must be received by the due date appearing on the statement. The due date is approximately two weeks before classes begin. Students registering during a late registration period will be required to pay their tuition and fees at the time of registration and may be subject to a late registration fee. Fees are the same for both residents and nonresidents and are required of all students. Nonresident students are required to pay an additional $10,060 per semester for tuition.

1. **Note:** Tuition and fees are fixed items of cost. The rates listed above are for Undergraduate students in a degree program. Tuition and fee rates for Distance Education courses are billed based on the student’s affiliation, see the Student Services Center website (https://studentservices.ncsu.edu/your-money/tuition-and-fees/distance-education/) for full details.

2. **Health Insurance** is billed unless you waive out of the program each semester. For more information, visit the Student Health website (https://healthypack.dasa.ncsu.edu/insurance-and-billing/ship/).

3. **Room rent** is shown as main-campus, double occupancy rate.

4. **Meals, books and supplies, other personal expense, and transportation** are shown as estimates.

5. **For estimated costs of other student classifications please go to the** Student Services Center website (https://studentservices.ncsu.edu/your-money/financial-aid/estimated-cost-of-attendance/).

**Expenses Other than Tuition and General Fees**

**Application Fee**: A nonrefundable fee $85 U.S. must accompany each application for admission ($100 for international students). Applicants may pay the fee online using their WolfPAW account.

**Room Rent**: New incoming students receive instructions on how to apply for housing with the letter of acceptance. Continuing students receive room reservation information each January at their residence hall rooms. The 2020-2021 residence hall room rent ranges from $3,210 to $3,925 per semester and plus a mandatory $140.00 ResNet (internet) charge. The Wolf Village Apartments charge $3,375 per semester plus mandatory charges for ResNet ($140) and cable television ($46) per person per semester. Wolf Ridge Apartments range form $3,585 per person to $4,230 per person per semester plus mandatory charges for ResNet ($140) and cable television ($46) per person per semester.

**Meals**: During their first academic year, new freshmen living on campus are required to participate in one of the university’s available meal plans. Meal plans are available to all registered students and costs for 2020-2021 range from $800 to $2,400. Students may also pay for meals individually at the various dining facilities available both on and near campus.
Books and Supplies: Books and supplies are usually purchased during the first week of classes directly from the NCSU Bookstores. Allow approximately $541 per semester for purchasing books and supplies.

Personal Expenses: Personal expenses vary widely among students but the estimate of $804 is based on what students report that they spend on these items.

Cooperative Education Program Fee: Required of all participating co-op students for each semester in which they are enrolled in an off campus work assignment. This fee, set at $490 for the 2020 Fall Semester, the 2021 Spring Semester, or the combined 2021 Summer Sessions, is used for partial support of the Cooperative Education Program staff in job development and placement activities. Students paying this fee are entitled to all university services, facilities, and programs during the semester or combined summer sessions for which they are enrolled.

COE Program Enhancement Fee - Students enrolled in the College of Engineering will be charged a COE Program Enhancement Fee. This fee is used for program and infrastructure improvements in the College of Engineering to ensure our engineering students are provided career-ready skills that continue to advantage them in the marketplace. Each semester, undergraduates will be charged $750 (12 or more hours), $562.50 (9-11 hours), $375.00 (6-8 hours), and $187.50 (0-5 hours). Each semester graduate students will be charged $750 (9 or more hours), $499.95 (6-8 hours), and $249.98 (0-5 hours). Engineering students who enroll in a co-op work session will not be billed for the computing fee unless they also enroll in an NC State course.

Professional Golf Management Fee: Students enrolled in the Professional Golf Management program (PGM) will be charged $350/semester. The fee pays for golf play and practice privileges at several area golf courses.

Required Fees
Required fees are levied for services, facilities, and programs available to all students whether or not the student takes advantage of them. Students are assessed fees based on the course load they are taking. An itemization of required fees and other detailed information concerning expenses or related data can be obtained on the Student Services Center website (https://studentservices.ncsu.edu/your-money/tuition-and-fees/fees-explanation/) or by contacting:

University Cashier’s Office
NC State, Box 7213
Raleigh, North Carolina 27695-7213
919-515-2986 (Option 4), or via e-mail at studentaccounts@ncsu.edu (studentaccounts@ncsu.edu)

Refund Policy
Reduction in Hours: The last day to reduce hours and receive a refund or reduction in rates is the same as the last day to register or add hours, typically the 10th day of a fall or spring term and the 4th day of a summer session. Tuition and Fees are not prorated after this date for reduced course loads. Specific dates are posted on the Student Services Center website (https://studentservices.ncsu.edu/your-money/bill/refunds-and-reimbursements/refunds-for-reduction-in-hours/) and in MyPACK Portal.

Withdrawal: Dropping all courses for which you are registered constitutes a Withdrawal from the University. Refunds for official withdrawals from NC State University are prorated based upon the percentage of the enrollment period attended. No refunds are made for official withdrawals after 50 percent of the enrollment period has passed. The prorated withdrawal schedule for each semester is publicized on the Student Services Center website (https://studentservices.ncsu.edu/your-money/bill/refunds-and-reimbursements/refunds-for-withdrawal/). In some instances circumstances such as severe medical issues can justify an appeal of your refund percentage. You may submit an appeal to the Fee Appeals Committee when you believe special consideration is merited. Applications for such appeals may be obtained from the Student Services Center website (https://studentservices.ncsu.edu/forms/cashier/refundapp.pdf).

Residency Determination Service (RDS)
The Residency Determination Service (RDS) was established in coordination with the University of North Carolina (UNC), the North Carolina Community College System (NCCCS), the North Carolina State Education Assistance Authority (NCSEAA), and the North Carolina Independent Colleges and Universities (NCICU) as the centralized service for determining residency for students. This service enables a student to use one residency determination for admissions applications to multiple North Carolina public colleges and universities and to demonstrate residency for state aid programs consideration at all (public and private) North Carolina colleges and universities. In compliance with state law, the UNC system requires Undergraduate, Agricultural Institute, and Non-Degree Studies students to request a residency classification through the RDS.

Learn more online at https://ncresidency.cfnc.org.

Residence Status for Tuition Purposes
According to the North Carolina General Assembly (North Carolina General Statutes Section (G.S.) 116-143.1(b) (http://www.ncga.state.nc.us/EnactedLegislation/Statutes/HTML/BySection/Chapter_116/GS_116-143.1.html)), a student qualifies as a resident for tuition purposes if he or she has:

• an established legal residency (domicile) in North Carolina
• maintained that legal residence for at least 12 continuous months prior to being considered for in-state residency

The North Carolina State Residence Classification Manual (http://www.northcarolina.edu/sites/default/files/documents/state_residence_classification_manual.pdf) offers complete information on residency statutes, as well as explanations as how the two qualifications above are evaluated.

Initial Classification: The student’s initial residence classification occurs during the admission application process when the student is first admitted to a community college or UNC institution. The North Carolina State Residence Classification Manual (http://www.northcarolina.edu/sites/default/files/documents/state_residence_classification_manual.pdf) offers complete information on residency statutes, as well as explanations as how the two qualifications above are evaluated.

Reclassification: A student, accepted for admission, who is initially classified as a nonresident and believes he or she meets the requirements of G.S. 116-143.1, -143.3, or any other applicable laws and regulations may request a reclassification by completing the RDS process. The request for reclassification may be submitted either in direct response to the initial classification (if the student believes the initial classification is erroneous), or at a future time if the student has experienced a change in circumstances that he or she believes makes him or her eligible for in-state resident status. Students must submit requests for reclassification in accordance with approved procedures and
application deadlines. The institution will not assume responsibility for initiating such an inquiry independently.

Residency Reclassification Application Deadlines. Except for deadlines set out in the General Statutes, institutions (undergraduate or graduate) may set their own deadlines so long as they are not inconsistent with the deadlines. The deadline to submit the reclassification application along with all supporting documentation cannot be later than the 10th business day of the term for which the student is seeking residency reclassification. All conditions necessary for achieving in-state status must still be satisfied prior to the beginning of the academic term for which the student is seeking reclassification. It is the student’s responsibility to provide the documentation necessary to support his or her claims for in-state residency for tuition purposes by the applicable deadlines.

Residence. To qualify as a resident for tuition purposes, a person must become a legal resident and remain a legal resident for at least twelve consecutive months (365 days) immediately prior to classification. Thus, there is a distinction between legal residence and residence for tuition purposes. Furthermore, twelve months legal residence means more than simple abode in North Carolina. In particular, it means maintaining a domicile (permanent home of indefinite duration) as opposed to “maintaining a mere temporary residence or abode incident to enrollment in an institution of higher education.” The burden of establishing facts which justify classification of a student as a resident entitled to in-state tuition rates is on the applicant for such classification, who must show his or her entitlement by the preponderance (the greater part) of the residency information.

Parents’ Domicile. If an individual, irrespective of age, has living parent(s) or court appointed guardian of the person, the domicile of such parent(s) or guardian is, prima facie, the domicile of the individual; but this prima facie evidence of the individual’s domicile may or may not be sustained by other information. Further, non-domiciliary status of parents is not deemed prima facie evidence of the applicant child’s status if the applicant has lived (though not necessarily legally resided) in North Carolina for the five years preceding enrollment or registration.

Effect of Marriage. Marriage alone does not prevent a person from becoming or continuing to be a resident for tuition purposes, nor does marriage in any circumstance insure that a person will become or continue to be a resident for tuition purposes. Marriage and the legal residence of one’s spouse are, however, relevant information in determining residency intent. Furthermore, if both a husband and his wife are legal residents of North Carolina and if one of them has been a legal resident longer than the other, then the longer duration may be claimed by either spouse in meeting the twelve month requirement for in-state tuition status.

Military Personnel. Any active duty member of the armed services qualifying for admission to an institution of higher education but not qualifying as a resident for tuition purposes shall be charged the in-State tuition rate and applicable mandatory fees so long as the member establishes residency in North Carolina within 30 days after the discharge and is continuously enrolled in the degree of other program in which the member was enrolled at the time the member is discharged.

Any dependent relative of a member of the armed services who is abiding in this State incident to active military duty, as defined by the Board of Governors of The University of North Carolina and by the State Board of Community Colleges while sharing the abode of that member shall be eligible to be charged the in-State tuition rate, if the dependent relative qualifies for admission to an institution of higher education. The dependent relatives shall comply with the requirements of the Selective Service System, if applicable, in order to be accorded this benefit. In the event the member of the armed services is reassigned outside of North Carolina or retires, the dependent relative shall continue to be eligible for the in-State tuition rate and applicable mandatory fees so long as the dependent relative is continuously enrolled in the degree or other program in which the dependent relative was enrolled at the time the member is reassigned or retires. In the event the member of the armed services receives an Honorable Discharge from military service, the dependent relative shall continue to be eligible for the in-State tuition rate and applicable mandatory fees so long as the dependent relative establishes residency within North Carolina within 30 days after the discharge and is continuously enrolled in the degree or other program in which the dependent relative was enrolled at the time the member is discharged. A person charged less than out-of-state tuition rate solely by reason of this section shall not, during the period of receiving that benefit, qualify for or be the basis of conferring the benefit of G.S. 116-143.1.

Grace Period. If a person (1) has been a bona fide legal resident, (2) has consequently been classified a resident for tuition purposes, and (3) has subsequently lost North Carolina legal residence while enrolled at a public institution of higher education, that person may continue to enjoy the in-state tuition rate for a grace period of twelve months measured from the date on which North Carolina legal residence was lost. If the twelve months ends during an academic term for which the person is enrolled at a State institution of higher education, the grace period extends, in addition, to the end of that term. The fact of marriage to one who continues domicile outside North Carolina does not by itself cause loss of legal residence marking the beginning of the grace period.

Minors. Minors (persons under 18 years of age) usually have the domicile of their parents, but certain special cases are recognized by the residence classification statute in determining residence for tuition purposes.

a) If a minor’s parents live apart, the minor’s domicile is deemed to be North Carolina for the time period(s) that either parent, as a North Carolina legal resident, may claim and does claim the minor as a tax dependent, even if other law or judicial act assigns the minor’s domicile outside North Carolina. A minor thus deemed to be a legal resident will not, upon achieving majority before enrolling at an institution of higher education, lose North Carolina legal residence if that person

1. Upon becoming an adult “acts, to the extent that the person’s degree of actual emancipation permits, in a manner consistent with bona fide legal residence in North Carolina” and
2. Begins enrollment at an institution of higher education not later than the fall academic term following completion of education prerequisite to admission at such institution.”

b) If a minor has lived for five or more consecutive years with relatives (other than parents) who are domiciled in North Carolina and if the
relatives have functioned during this time as if they were personal guardians, the minor will be deemed a resident for tuition purposes for an enrolled term commencing immediately after at least five years in which these circumstances have existed. If under this consideration a minor is deemed to be a resident for tuition purposes immediately prior to his or her eighteenth birthday, that person on achieving majority will be deemed a legal resident of North Carolina of at least twelve months duration. This provision acts to confer in-state tuition status even in the face of other provisions of law to the contrary; however, a person deemed a resident of twelve months duration pursuant to this provision continues to be a legal resident of the State so long as he or she does not abandon North Carolina domicile.

Lost but Regained Domicile. If a student ceases enrollment at or graduates from an institution of higher education while classified as a resident for tuition purposes and then both abandons and re-acquires North Carolina domicile within a twelve month period, that person, if he or she continues to maintain the reacquired domicile into re-enrollment at an institution of higher education, may re-enroll at the in-state tuition rate without having to meet the usual 12-month durational requirement. However, any one person may receive the benefit of this provision only once.

Change of Status. A student admitted to initial enrollment in an institution (or permitted to enroll following an absence from the institutional program which involved a formal withdrawal from enrollment) must be classified by the admitting institution either as a resident or as a nonresident for tuition purposes prior to actual enrollment. A residence status classification once assigned (and finalized pursuant to any appeal properly taken) may be changed thereafter (with correspondingly change in billing rates) only at intervals corresponding with the established primary divisions of the academic year.

Transfer Students. When a student transfers from one North Carolina public institution of higher education to another, he or she is treated as a new student by the institution to which he or she is transferring and must be assigned an initial residence status classification for tuition purposes.

Non-U.S. Citizens. Persons who are not U.S. citizens but who have certain visa and immigration statuses that grant them the legal ability to establish and maintain a bona fide domicile in this country are subject to the same considerations as U.S. citizens in determining residence status for tuition purposes. If it is later discovered that the person’s visa or immigration status was obtained fraudulently, the institution shall have the right to seek and collect payment of full, out-of-state tuition, along with fees and costs associated with such collection. Non-U.S. citizens present in the United States under certain visa statuses such as tourists, visitors on business, and temporary foreign/international students do not have the legal capacity to establish a bona fide domicile in this country (and thus, not in North Carolina). As examples, holders of non-immigrant visa statuses such as B, C, D, F, J, M, Q, S, and TN visas (and dependent visas for spouses and children such as a TD visa) cannot establish domicile with these documents, in and of themselves, unless there is a change in their visa status. An EAD, in and of itself, does not confer any domicile with these documents, in and of themselves, unless there is a change in their visa status. An EAD, in and of itself, does not confer any domicile with these documents, in and of themselves, unless there is a change in their visa status. An EAD, in and of itself, does not confer any domicile with these documents, in and of themselves, unless there is a change in their visa status. An EAD, in and of itself, does not confer any domicile with these documents, in and of themselves, unless there is a change in their visa status.

UNC System Employees. A person who is a full-time employee, in a permanent position, of The University of North Carolina, or is the spouse or dependent child of a full-time employee, in a permanent position, of The University of North Carolina, and who is a legal resident of North Carolina, qualifies as a resident for tuition purposes without having maintained that legal residence for at least 12 months immediately prior to his or her classification as a resident for tuition purposes.

The following categories of persons are eligible for tuition waivers:

Survivors of Deceased Law Enforcement/Emergency Workers. Tuition waivers are available to the surviving spouse and children of a law enforcement officer (including sheriffs), firefighter, volunteer firefighter or rescue squad worker who was killed as a direct result of a traumatic injury sustained in the line of duty (including both active service and training for active duty). Additional eligibility requirements must be met.

Families of Disabled Law Enforcement/Emergency Workers. Tuition waivers are available to the spouses and children of law enforcement officers (including sheriffs), firefighters, volunteer firefighters, or rescue squad workers who are permanently and totally disabled as a direct result of a traumatic injury sustained in the line of duty (including both active service and training for active service). Additional eligibility requirements must be met.

Note: Decisions on residence for tuition purposes are based on NC G.S. 116-143.1 and 116-143.3 and on the State Residence Classification Manual which was prepared by the General Administration of the University of North Carolina system.

This information is subject to change.

Campus Resources

NC State’s vast university offices and divisions exist to serve our students, faculty, staff, visitors and guests. The units below showcase just a sampling of the important work being done on and off campus every day to ensure that our community has the resources they need to achieve and thrive at NC State.

- Distance Education and Learning Technology Applications (DELTA) (p. 33)
- Office of Information Technology (p. 34)
- Office of Institutional Equity and Diversity (p. 34)
- Office of Professional Development (p. 35)
- Office of Research and Innovation (p. 35)
- University Advancement (p. 36)

Distance Education and Learning Technology Applications (DELTA)

Dr. Tim Petty, Associate Vice Provost, Online and Distance Education Sharon Broere, Director, Online and Distance Education Administrative Services

DELTA centrally administers NC State’s online and distance education program activities and support services. We schedule online and distance-based courses and sections. We provide application, enrollment and services for non-degree studies' students. We provide student communications, course detail information, a virtual orientation, an online FAQ, campus proctoring services and remote testing arrangements. DELTA collaborates with other NC State units to provide library resources, student registration, campus authentication, financial aid and billing services for online and distance education students. For more information, visit the Online and Distance Education website (https://online-distance.ncsu.edu/).
DELTA also manages the university’s learning technology infrastructure, including various asynchronous learning management systems (WolfWare, Moodle), Zoom, a tool for synchronous online teaching and learning, and lecture capture technologies for all technology-assisted courses, whether online or on-campus.

**Office of Information Technology**

NC State offers you a leading-edge academic computing environment to enrich your student life and learning. Here, you’ll find that many colleges and administrative and academic units are involved in providing various IT resources, services and information.

The Office of Information Technology (OIT) provides centralized campus-wide computing and information and communication technology services in support of the university’s academic and administrative goals. Some of OIT’s major services are:

- Campus-wide data network infrastructure, including the multi-gigabit network backbone and wireless computing infrastructure
- MyPack Portal, the gateway to university online enterprise systems and services, such as Human Resources, Financials and the Student Information System
- ResNet, high-speed wired and wireless Internet access for students living in campus housing
- Cable TV and telephone, which are available to all students, faculty and staff
- Hundreds of software packages for student use from computing labs, and many also available from the NC State Virtual Computing Lab (VCL) environment
- G Suite, which provides the university’s official email and calendaring services and numerous collaborative tools powered by Google
- University’s central Web servers
- File space
- Classroom technology support
- High Performance Computing (HPC) for researchers and students in computational science
- IT security for campus computing resources, including acceptable use, rules and regulations
- NC State Help Desk, which provides support to students and other users of campus resources
- Hardware and software support for student-owned computers through the OIT Walk-in Center

**Unity ID and Password**

As an NC State student, you will have a Unity ID and password, which are your credentials to access campus-wide computing services and facilities.

Information about your Unity ID and password and help are provided during student orientation sessions, from the NC State Help Desk, and online on the OIT (https://oit.ncsu.edu) website.

**Unity Labs**

As a student, you may use the Unity computer labs that are equipped with Windows, Linux and Macintosh workstations that provide direct access to information technologies. Colleges and academic departments support additional computing facilities, and overall, there are about 123 student-computing labs on campus, with about 2,800 workstations with high-speed network connections. NC State does not require you to own a computer, although specific colleges or programs may make this requirement. Information about computer recommendations, specifications and purchasing options are published online on the OIT (https://oit.ncsu.edu) website and updated annually.

**Help**

For additional information, see NC State’s computing resources:

- OIT (https://oit.ncsu.edu) website
- OIT Walk-in Center, West Dunn Building (corner of Dan Allen and Thurman drives)
- NC State Help Desk, 515-HELP (4357); help@ncsu.edu; or help.ncsu.edu (https://help.ncsu.edu)

Marc Hoit, Vice Chancellor for Information Technology and Chief Information Officer

**Office of Institutional Equity and Diversity**

The Office for Institutional Equity and Diversity (OIED) is committed to fostering an inclusive, accessible and diverse intellectual and cultural campus experience related to the mission of NC State University.

**Diversity Engagement, Training and Education**

The Diversity, Engagement, Training and Education unit within the Office for Institutional Equity and Diversity provides leadership in the university’s efforts to coordinate, implement and facilitate educational programs, promote cultural competence and foster an understanding of and appreciation for diversity, equity and inclusion throughout the university community. Activities include providing diversity training, programs and consultation for the recruitment, retention and success of students, faculty and staff and reviewing and recommending changes to university policies, procedures and regulations to promote diversity and enhance inclusion.

**Equal Opportunity and Equity**

The Equal Opportunity and Equity unit of the Office for Institutional Equity and Diversity strives to make NC State University a discrimination-free, harassment-free environment for faculty, students and staff to work, live and learn. This unit is responsible for managing and monitoring the university’s equal opportunity compliance activities, overseeing the university’s equal opportunity policies, responding to complaints, conducting investigations, developing and delivering training and educational outreach to campus and consulting with supervisors, managers and unit equity officers regarding equal opportunity concerns and initiatives.

**Bias Impact Response Team**

The Bias Impact Response Team (BIRT) at NC State supports the campus community by providing a system through which a person can report incidents of bias on and around campus. BIRT seeks to effectively engage with impacted individuals and groups to achieve awareness, support, education and restoration. See the BIRT website at bias-incident.ncsu.edu (http://bias-incident.ncsu.edu/).
Campus Community Centers

NC State's Campus Community Centers report to the Office for Institutional Equity and Diversity (OIED). Collectively, the centers foster community; celebrate identity and culture; raise awareness; and support, empower and advocate for positive change for underrepresented and marginalized students, families and communities. They assist OIED in its goal of fostering an inclusive, accessible and diverse intellectual and cultural campus experience by creating spaces and activities that improve campus climate and enhance the overall educational experience for all students.

See Campus Community Centers under Student Services for information on the African American Cultural Center, GLBT Center, Multicultural Student Affairs and the Women's Center, which report to the Office for Institutional Equity and Diversity.

Office of Research and Innovation

Mladen A. Vouk, Vice Chancellor for Research and Innovation
Wade Fulghum, Assistant Vice Chancellor, Office of Research Commercialization
Genevieve Garland, Assistant Vice Chancellor for Research Operations and Communications
Jonathan Horowitz, Associate Vice Chancellor for Research Infrastructure and Development
Rick Liston, Assistant Vice Chancellor for Administration
Lorena McLaren, Executive Director, Corporate and Foundation Relations, University Development
Pradip Pramanik, Director, Proposal Development Unit
Shawn Troxler, Associate General Counsel
Alyson Wilson, Associate Vice Chancellor for National Security and Special Research Initiatives

Office of the Vice Chancellor

Vice Chancellor

As Chief Research Officer (CRO), the Vice Chancellor oversees all research activities at NC State. Under his authority, units reporting to the Office of Research and Innovation centrally manage research administration, the university’s intellectual properties, and industry and government agency alliances on the university’s award-winning research campus. Researchers at NC State are supported by $405++ million in sponsored programs from federal, local government, industry, and nonprofit organizations. NC State’s research portfolio exceeds 5,000 invention disclosures, 960+ US patents (OR rated #6 in patents issued), 800 active commercialization agreements, and 595+ products to market. Centennial Campus hosts more than 70 corporate, government and nonprofit partners working with the university’s 75+ centers and institutes, laboratories and research departments.

Research Operations

The Research Operations Unit provides strategic leadership and support to the Office of Research and Innovation. The office consists of three units: Strategic Initiatives, Education and Training, and Marketing and Outreach.

Integrated Support Services Center (ISSC)

The ISSC was created to provide streamlined, professional services to faculty and administrators, eliminating costly duplication, creating efficiency and improving timeliness.

Research Development

Research Development Office (RDO)

The RDO facilitates collaboration between faculty and interdisciplinary research experts, providing strategic and responsive support that enhances the university’s most valued research initiatives. By searching a centralized, easy-to-access portal, researchers quickly find internal and external funding opportunities. Once identified, potential funding translates to successful grants with the help of Research Development’s tools and training resources that support researchers as they plan, write, and submit competitive proposals.
Centers + Institutes
NC State’s Centers and Institutes reflect the university’s commitment to interdisciplinary scholarly pursuit, including research, instruction and public service. These cutting-edge organizations are frontrunners in their field, blazing the trails for other researchers to follow. Research and innovation on topics ranging from climate change to textiles add value to the everyday lives of our state’s citizens, maintaining public trust and admiration and standing at the forefront in global excellence for research and discovery. Here, the leadership of these organizations can access the materials, procedures and policies necessary to manage their efforts responsibly, equitably and with the highest integrity.

Proposal Development Unit (PDU)
The PDU supports faculty teams in the development of large-scale, interdisciplinary research proposals. These services include team facilitation, budget development, writing and editing, and administrative assistance, thereby enabling investigators to concentrate on the research-related aspects of their proposals. PDU support is available to NC State faculty planning proposals with estimated total budgets of at least $1M.

Research Administration and Compliance
Sponsored Programs & Regulatory Compliance Services (SPARCS)
SPARCS facilitates the submission of proposals, negotiation of agreements, the administration of internally and externally funded projects, and the administration of subagreements that provide funding to NC State. This includes all aspects of externally sponsored research and scholarship, from pre-award management to non-fiscal post-award management.

Office of Research Commercialization
Office of Research Commercialization (ORC)
NC State University is a research powerhouse and a powerful economic engine for North Carolina. ORC plays a crucial role in this by protecting and promoting University research discoveries and intellectual property, working with and guiding industry partners, and promoting the acceleration of startups. ORC provides innovators with a wide range of programs and services to protect, market, and license intellectual property developed at NC State. Collaboration with NC State innovators and industry partners has led to the creation of more than 125+ startups and 575+ commercialized products that benefit society on a local, national and global scale. Among surveyed universities without medical schools, NC State consistently ranks among the top 10 for key technology transfer metrics.

University Advancement
The mission of University Advancement of NC State University is to facilitate communication, internally and externally, and to enhance the image of the University; to provide meaningful programs and service to alumni and friends; to seek service-support participation and ambassadorship from constituents; to build and sustain a strong volunteer leadership network; to raise money from private sources; to manage the collection of private gifts for North Carolina State University; to manage an effective alumni and development database and gift systems; and to coordinate with the General Administration in areas of government and legislative priorities in Raleigh and Washington.

The office oversees a division that includes development, alumni relations, university communications, and advancement services. Visit the University Advancement website (https://leadership.ncsu.edu/advancement/) for more information.

Advancement Services
Advancement Services supports the operations of Alumni Relations, University Development and University Communications. The department oversees the alumni and donor database, working to process gifts and conduct research about potential contribution opportunities. Other initiatives include management of the University online giving website, support of the alumni association alumni web portal, conducting education and training in the areas of national best practices and rules and regulations pertaining to fundraising activities, ethics, and accountability, and management of an international listserv dedicated to the furtherance of the entire advancement services profession.

The NC State Alumni Association
The NC State Alumni Association engages alumni through programs and services that foster pride and enhance lifelong connections to NC State. The Association encourages alumni to be Red and White for Life — with connections to the university and fellow alumni no matter where they live by linking alumni to the university through membership, a statewide, national, and growing international network of alumni, programming for special-interest groups and students, events and an array of communication tools, including the award-winning NC State magazine. The Alumni Association offers membership options and benefits for alumni who join, and supports a growing Student Alumni Association (SAA), with events and programming that builds connections and enhances their student experience. The Association also sustains the prestigious Caldwell Fellows Scholarship Program, funded by alumni endowments and contributions, and designed to foster academic excellence, leadership, personal growth and service learning.

The Association upholds campus traditions such as the official class ring, Homecoming, Ram Roast, the Tradition Keepers Medals, Wolfpack Freshmen Welcome events, and Founders’ Day, as well as the Legacy Luncheon for incoming freshmen whose parents and/or grandparents attended NC State. In addition, the Association is responsible for the Evening of Stars Gala to celebrate NC State’s distinguished alumni, and the Faculty Awards to recognize the achievements of the university’s outstanding undergraduate and graduate faculty. The Association offers services such as the Wolf Treks alumni travel program and Career Services. Students and alumni can visit the Alumni Association in the Dorothy and Roy Park Alumni Center on Centennial Campus, or contact the Alumni Association at (919) 515-3375 or (800) 627-2586. For a complete overview of programs, services and events, visit the Alumni Association’s website (http://www.alumni.ncsu.edu).

University Development
University Development works with the colleges and programs at North Carolina State University to secure private financial support for priority projects and programs. This support may come from individuals (alumni, parents, students, faculty, staff, and friends), corporations, philanthropic foundations and other organizations. The mission of University Development is to strengthen relationships with alumni and friends and reconnect them with campus colleagues in their colleges and areas of interest, reach out to alumni and friends living out-of-state to carry the messages of NC State’s progress, success, and vision for the
future, and to serve as liaisons to university-wide programs to support their fundraising and outreach efforts.

University Development provides services to the colleges and programs in capital campaigns, gift planning, corporate & foundation relations, and annual giving. University Development also facilitates external and internal communication among fundraisers, and coordinates approaches to prospective donors.

University Communications and Marketing

University Communications and Marketing builds positive relationships between NC State University and its many constituents through strategic internal and external communications that convey the university’s brand identity. The office is comprised of university relations, marketing and creative strategies, web communications, and special events, and focuses on:

- Increasing awareness of the university's distinctive benefits
- Ensuring consistency in university-wide messaging and visual identity by facilitating integration and coordination of public relations and communications efforts throughout the university
- Monitoring and responding to public issues and perceptions
- Providing marketing, communication and Web strategy, counsel and creative services to campus clients
- Providing guidance and resource assistance for university events

Leadership

Brian C. Sischo, Vice Chancellor for University Advancement
Brad C. Bohlander, Associate Vice Chancellor for University Communications & Chief Communications Officer
Jim Broschart, Associate Vice Chancellor for University Development
Derek Bryan, Assistant Vice Chancellor of Finance and Administration
Jeff Baynham, Interim Associate Vice Chancellor for Advancement Services
Maggie Musick, Interim Executive Assistant to the Vice Chancellor
Reid Ricciardi, Executive Director of Talent Management
Benny Suggs, Associate Vice Chancellor and Executive Director for Alumni Relations & Alumni Association
Alan Taylor, Assistant Vice Chancellor for Principal Gifts
Christina Walker, Chief of Staff and Executive Director of University Advancement

NC State Policies

North Carolina State University is committed to academic integrity, and all students are required to adhere to the NC State Code of Student Conduct (https://policies.ncsu.edu/policy/pol-11-35-01/). Individual policies on conduct, including those listed below, are posted on University Policies, Regulations, and Rules (https://policies.ncsu.edu/) (PRRs).

- University Patent Procedures (https://policies.ncsu.edu/policy/pol-10-00-01/)
- Grievance Procedures for Graduate Students (https://policies.ncsu.edu/regulation/reg-11-40-02/)
- Code of Student Conduct (https://policies.ncsu.edu/policy/pol-11-35-01/)
- Academic Integrity (https://policies.ncsu.edu/policy/pol-11-35-01/)
- Policy on Illegal Drugs (https://policies.ncsu.edu/policy/pol-04-20-05/)

Sexual Harassment Policy (https://policies.ncsu.edu/regulation/reg-04-25-02/)
Racial Harassment Policy (https://policies.ncsu.edu/regulation/reg-04-25-02/)
University Copyright Procedures (https://policies.ncsu.edu/regulation/reg-01-25-03/)

Equal Opportunity and Non-Discrimination

It is the policy of the State of North Carolina to provide equality of opportunity in education and employment for all students and employees. Accordingly, the university does not practice or condone unlawful discrimination in any form against students, employees or applicants on the basis of race, color, religion, creed, sex, national origin, age, disability or veteran status. Nor does the university allow discrimination on the basis of sexual orientation with respect to internal university matters that do not contravene federal or state law and that do not interfere with the University’s relationships with outside organizations, including the federal government, the military, ROTC, and private employers. [NOTE: The NC State University equal opportunity and nondiscrimination policy includes transsexual individuals within the policy’s prohibitions against discrimination on the basis of sex. This includes actual or perceived gender identity and gender expression. See Price Waterhouse v. Hopkins, 490 U.S. 228 (1989); Smith v. City of Salem, 378 F.3d 566 (6th Cir. 2004);] Retaliation against any person complaining of discrimination is in violation of federal and state law and North Carolina State University policy, and will not be tolerated.

Unlawful Harassment

Harassment based upon race, color, religion, creed, sex, national origin, veteran status, age, or disability is a form of discrimination in violation of federal and state law and North Carolina State University policy and will not be tolerated. It is the internal policy of North Carolina State University to prohibit harassment on the basis of sexual orientation. Retaliation against any person complaining of harassment is in violation of federal and state law and North Carolina State University policy, and will not be tolerated. North Carolina State University will respond promptly to all complaints of harassment and retaliation. Violation of this policy can result in serious disciplinary action up to and including expulsion for students or discharge for employees.

Every individual is encouraged, and should feel free, to seek assistance, information and guidance from his/her supervisor, the Office for Equal Opportunity, the Office of Student Conduct or the Employees Relations section of Human Resources. For additional information, contact: Office for Equal Opportunity, 1 Holladay Hall, Box 7530, North Carolina State University, Raleigh, NC 27695-7530, Phone: (919) 513-1234 or 515-3148.

Disability Resource Office

Individuals desiring reasonable accommodations for their documented disabilities should contact the Disability Resource Office (https://dro.dasa.ncsu.edu/) (DRO), 2751 Cates Avenue, Holmes Hall, (919) 515-7653 (Voice), (919) 515-8830 (TTY). Services and accommodations are provided based on an individual’s documented needs and are determined in consultation with the individual and a DRO representative. For students, such requests should be made far in advance of registration deadlines to ensure timely services and
accommodations. DRO will maintain appropriate confidentiality of records and communication regarding disability.

**Associations and Accreditation**

**Associations**
The university is a member of the Association of Public and Land-grant Universities, the American Council on Education, the Association of Governing Boards of Universities and Colleges, the Association of American Colleges and Universities, the Education Advisory Board, the Engagement Scholarship Consortium, the National Association of College and University Business Officers, the Oak Ridge Associated Universities, the Southern Association of Colleges and Schools Commission on Colleges, Campus Compact, the University Professional and Continuing Education Association, and the Cooperating Raleigh Colleges.

**Accreditation**
North Carolina State University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award associate, baccalaureate, master's and doctoral degrees. Contact the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of NC State University.

In addition, many of the university's professional programs and departments are accredited by national professional associations, including:

Specialized Academic Program Accreditation (https://provost.ncsu.edu/institutional-quality/accreditation/specialized-program-accreditation/)

Equal Opportunity and Non-Discrimination Policy

It is the policy of the State of North Carolina to provide equality of opportunity in education and employment for all students and employees. Educational and employment decisions should be based on factors that are germane to academic abilities or job performance. North Carolina State University ("NC State") strives to build and maintain an environment that supports and rewards individuals on the basis of relevant factors such as ability, merit and performance. Accordingly, NC State engages in equal opportunity and affirmative action efforts and prohibits discrimination, harassment and retaliation, as defined by NC State’s Equal Opportunity and Non-Discrimination Policy (POL 04.25.05) (https://policies.ncsu.edu/policy/pol-04-25-05/).

NC State will promptly, thoroughly and impartially respond to all complaints of Discrimination, Harassment and Retaliation.

Any individual with a complaint of Discrimination, Harassment or Retaliation should use the procedures outlined in the Resolution Procedures for Discrimination, Harassment and Retaliation Complaints.

Substantiated instances of Discrimination, Harassment and Retaliation, as defined in the policy, are violations of the policy and will not be tolerated by NC State.

For more information, please contact:

Office for Institutional Equity and Diversity
231 Winslow Hall
Box 7530
NC State University
Raleigh, NC 27695-7530
Phone: (919) 515-3148
TTY: (919) 515-9617
Website: oied.ncsu.edu/divweb/ (https://oied.ncsu.edu/divweb/)

1 This policy is established in accordance with 41 CFR Part 60 and is implemented in accordance with applicable laws and their amendments, including but not limited to, Title VI and Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Executive Order 11246, the Age Discrimination in Employment Act of 1975, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, the Vietnam Era Veterans’ Readjustment Assistance Act of 1974, the Civil Rights Restoration Act of 1988, North Carolina General Statutes Chapters 116 and 126.

2 The policy’s prohibition against discrimination on the basis of sex includes actual or perceived gender identity and gender expression.

3 NC State does not allow discrimination nor harassment on the basis of sexual orientation with respect to internal university matters that do not contravene federal or state law and that do not interfere with NC State’s relationship with outside organizations, including the federal government, the military, ROTC, and private employers.

Student Activities

At NC State, we are dedicated to providing students with not only a world-class education, but a well-rounded and enriching collegiate experience. Students have the opportunity to take in thrilling performances put on by Arts NC State, connect with like-minded peers by joining or beginning any of 700+ student organizations through Student
Involvement, or cheer on the Wolfpack with pride as our 23 varsity sports teams take on the competition.

Take a look through the resources below to see just some of the ways that students can get involved and stay active both on and off campus with the Wolfpack community.

- Arts NC State (p. 42)
- Campus Facilities (p. 43)
- Intercollegiate Athletics (p. 45)
- Student Involvement (p. 46)
- Student Media (p. 46)

**Arts NC State**

The six visual and performing arts programs of Arts NC State - Crafts Center, the Dance Program, the Gregg Museum of Art & Design, the Department of Music, NC State LIVE and University Theatre - provide opportunities for our students and our community to explore, learn, create, and grow. Whether through academic courses, cutting-edge performances and exhibitions or the preservation of traditional crafts, Arts NC State educates our students for the 21st century while providing a living link to our rich cultural heritage. For additional information, please visit the Arts NC State website (https://arts.ncsu.edu/).

**The Crafts Center**

Explore your creative side and Make it Here! The NC State Crafts Center is an excellent resource for all students. Whether you're interested in learning a skill or just want to “de-stress,” the Center has a comprehensive range of offerings in clay, digital photography, wood, jewelry/metals, fibers, glass, lapidary, mixed media and more. The Crafts Center is a diverse and creative space where skill and self-expression are fostered through the making and sharing of art and craft. Join us for special student-only classes such as Friday CRAFTernoons, Stressbusters and more. It’s also a great place to visit, study and surround yourself with creativity. Mentorship thrives at the Center. Professional staff and crafts instructors provide quality technical advice and materials support. With the intent of enhancing quality of life, the Crafts Center reaches out through academic collaboration, support for student life, and partnerships with other arts organizations. Participation in associated crafts guilds that routinely meet at the Crafts Center provides NC State students a creative platform within the university and beyond.

For answers to your questions about the Crafts Center, please call 919.515.2457 or visit the Crafts Center website (https://craftsarts.ncsu.edu/) for our upcoming programming, calendar information, map and directions.

**Dance Program**

The NC State Dance Program gives students the opportunity to study dance through direct experience in choreography and performance. The program’s two student companies, the State Dance Company (DAN 295 Problems of Dance Performance) and the Panoramic Dance Project (DAN 210 Current Trends in Afrocentric and World Dance), are open by audition. A vast array of classes, offered through the Master Class Series, are open to all NC State students, faculty and staff. The program also offers other academic courses such as Dance Composition (DAN 272 Dance Composition - Solo Forms) and Hip-hop Dance (DAN 260 Hip-hop Dance).

The Dance Program provides a rich training ground for choreographers through the study of composition, independent study, and guided choreographic projects. As undergraduate and graduate students pursuing degrees in various fields, the dancers at NC State bring their diverse insights and experiences into the artistic process and contribute meaningfully to the art. The Dance Program’s three annual concerts are described below:

- **The Dance Program Fall Concert**: The Fall Concert features the choreography of current students who create work through independent study, as well as guest artists and company directors. Both the State Dance Company and the Panoramic Dance Project are represented on the Fall Concert.

- **State Dance Company Concert**: The State Dance Company performs a distinguished collection of modern dance for their annual concert. The concert features premiere and repertory work created by the dance program directors and invited guest artists.

- **Panoramic Dance Project Concert**: For their annual spring concert, the Panoramic Dance Project presents a variety of dance styles in a world context with a focus on African, hip-hop and Latin dance. The concert features work by the director, guest artists and selected student choreographers.

For more information, please contact 919.515.7034 or visit the Dance Program website (https://dance.arts.ncsu.edu/).

**Gregg Museum of Art & Design**

The Gregg Museum seeks to inspire creativity, innovation and the expression of ideas. With frequently-changing exhibitions and exciting free programs like films, artist talks, workshops, or yoga nearly every week, there’s always something new to see or do at the Gregg. As one of NC State’s designated Student Centers, the museum and its surrounding gardens offer a great place to study, have a picnic, or hang out with friends in a stimulating environment. Wifi is available both outdoors and inside.

The Gregg collection includes more than 35,000 objects from every continent, such as ceramics, glass, textiles, furniture, photography, paintings and sculptures, folk and outsider art, works on paper, Native American art, industrial design, archaeological artifacts, and fashion and costume. If you’re looking for inspiration or researching a topic involving objects, feel free to approach the museum staff for help. Each semester the Gregg also offers internships (for class credit) and paid student positions that provide experience in museum work.

To schedule tours or class visits, or to plan to use the permanent collection for research, please call 919.515.3503 or visit Gregg.arts.ncsu.edu (https://gregg.arts.ncsu.edu/).

The Gregg is located at 1903 Hillsborough Street, just across Pullen Road from the university’s Memorial Belltower, at the northern tip of Pullen Park. Opening hours are 10am-5pm Tuesday, Wednesday, Friday and Saturday; 10am-9pm Thursday; and 1pm-5pm on Sunday. The galleries are closed Mondays. Admission is free.

**Department of Music**

The Department of Music provides educational and performance opportunities for student and community participants through a variety of musical experiences and academic courses. Both a 15-hour minor in Arts Entrepreneurship and a 20-hour music minor is offered for qualified undergraduate students who wish to engage in more extensive study of
music and the arts. Three tracks are offered: Performance, Composition, and General Studies.

For full descriptions of the academic courses, consult the Department of Music (http://catalog.ncsu.edu/undergraduate/university-college/music/) page in the NC State University Course Catalog, contact 919.515.2981 or visit the Department of Music’s website. (https://music.arts.ncsu.edu/)

A wide variety of performing ensembles provide opportunities for students to develop both artistically and intellectually through applied music study. Through performance, the ensembles play an important role in campus life, presenting public concerts and performing at official functions (both on and off campus) and athletic events. Curricular performing ensembles receive one academic credit that may be used to satisfy free elective requirements in any academic major. Membership in most ensembles requires an audition with the instructor. See the Department of Music’s website (https://music.arts.ncsu.edu/) for audition information.

- **Choral Ensembles.** The Choral program offers students from all academic areas an opportunity to participate in the exploration and performance of the highest quality choral repertoire from all eras. The ensembles include State Chorale, Tenor-Bass Choir (Singing Statesmen), Soprano-Alto Choir (Vox Accalia), and the African American Choral Ensemble. Performance highlights have included concerts every semester, tours and occasional collaborations with other ensembles.

- **Orchestras.** The Raleigh Civic Symphony and Chamber Orchestra combine student and community musicians with professional leaders to present concerts of innovative programming on campus and in other Triangle area venues. Area professionals serve as concertmaster, principal cellist, and guest coaches, to provide high-level instruction and leadership to community and student players. Both orchestras require an audition.

- **Athletic Bands.** The Marching Band (Power Sound of the South) is active during football season, and the Varsity (Pep) Band is active during basketball season. Students must audition for a band and will be placed according to their ability and interest.

- **Concert Bands.** Two concert bands, the Symphonic Band and the Wind Ensemble, are offered each semester. Students must audition for the Wind Ensemble and will be placed according to their ability and interest.

- **Jazz Ensembles.** The jazz program includes Jazz Ensemble I, Jazz Ensemble II and a variety of Jazz Combos. The jazz groups perform both on and off campus during the fall and spring semesters. Students must audition for a jazz ensemble or combo and will be placed according to their ability and interest.

- **Piano.** Beginning piano classes are offered to students from all academic areas for credit. No previous experience is required. Applied lessons are offered to advanced piano students who have passed an audition and are admitted to the music minor program in piano performance with limited additional openings for non-minors.

- **Voice.** A Vocal Techniques class is offered to beginning voice students for credit with instructor approval. Previous voice study is not required. Applied voice lessons are offered to advanced voice students who have passed an audition and are admitted to the music minor program in vocal performance with limited additional openings for non-minors.

- **Pipes & Drums.** Students may learn to play the bagpipes, an instrument known to many of North Carolina’s earliest settlers. Pipes, drums, and other equipment are furnished. Beginning pipe and drum lessons are available to students without previous experience.

**NC State LIVE**

Experience amazing performers from around the world. A typical NC State LIVE season features outstanding professional artists from a wide range of disciplines, including jazz, world music, modern and contemporary dance, drama and comedy. Discounted tickets are available to NC State students, faculty, and staff, as well as parents of current NC State students and members of the NC State Alumni Association. The NC State community also has the opportunity to engage with world-class artists through free workshops, master classes, artist lectures, and more. Contact: 919.513.3030 or visit the NC State LIVE website (https://live.arts.ncsu.edu/).

**University Theatre**

University Theatre is NC State’s volunteer student theatre, open to all students regardless of major. Through our large-scale Main Stage series, cutting-edge performance based Open Door Series, and professional summer TheatreFEST series, students can enjoy theatrical works that tell stories from different perspectives and in varied genres.

Participating both on stage and backstage, students can be a part of the campus theatre community. Audition for a show; develop skills in our various shops, including scenery, costumes, lighting, sound or projections; join a production crew; or become a member of our stage management team. Academic classes are offered in conjunction with our theatre minor and numerous workshops throughout the year. Employment opportunities for live events are also offered. University Theatre is also home to a chapter of Alpha Psi Omega national theatre honor society.

Contact: 919.515.3927 or visit the University Theatre website (https://theatre.arts.ncsu.edu/).

**Ticket Central**

Ticket Central serves as the centralized box office for the visual and performing arts programs at NC State. Ticket Central tickets events in a variety of performance venues including Titmus Theatre, Kennedy-Mclwhee Theatre, and the Talley Student Union. In addition to serving the six Arts NC State programs, Ticket Central provides ticketing services on a fee basis for many campus and community organizations.

The box office is located in the main lobby of Thompson Hall. Normal hours of operation are Monday-Friday 1-6 p.m. If there are performances during the week, the box office will remain open until curtain. On weekends with performances, the box office will open one hour prior to curtain. Hours vary during University holidays and during the summer. Tickets may be purchased in person, over the phone by calling 919.515.1100, or online by visiting the Ticket Central website (https://tickets.arts.ncsu.edu/).

**Campus Facilities**

NC State’s campus facilities are home to many of our student activities and events. From screening films in the historic Witherspoon Student Center, joining Student Government meetings in Talley Student Union, participating in intramural sports at the Carmichael Complex, or watching one of University Theatre’s student-directed plays in Frank Thompson Hall, students and visitors can have a variety of experiences all right
here on campus. Here are just a few of the spots that serve our student activities and services.

The Campus Cinema

The Campus Cinema, located in Witherspoon Student Center, presents films ranging from independent works to the latest Hollywood blockbusters in digital format with Dolby® Digital Surround Sound. The Cinema is a fully functional movie theatre with 460 seats and a concession stand offering freshly popped popcorn, one free popcorn per person. Movie screenings are free to NC State and the general public unless otherwise specified. Check out the cinema website at: https://uab.ncsu.edu/films-schedule/ (http://uab.ncsu.edu/films-schedule/). If you desire any assistive devices, services, or other accommodations to participate in these activities, please contact the UAB Films Advisor at 919-515-5168.

Carmichael Complex

Carmichael Complex consists of Carmichael Gym, Carmichael Recreation Center, Willis R. Casey Aquatic Center, Miller Fields, 12 tennis courts, and 8 basketball courts, which offer a wide variety of indoor and outdoor fitness choices for students. Students may use the pools, indoor track, courts, cardio equipment, the outdoor fields, and tennis courts unless otherwise reserved for classes, events or maintenance. The Carmichael Complex is home to University Recreation and the Department of Health & Exercise Studies. For more information, please visit the Carmichael Complex website (http://recreation.ncsu.edu/facilities/carmichael/) or call (919) 515-PLAY (7529).

Gregg Museum of Art & Design

Gregg Museum of Art & Design is NC State’s collecting museum, with more than 35,000 examples of contemporary and historic ceramics, textiles, glass, furniture, photography, paintings, sculptures, folk and outsider art, archaeological artifacts, works on paper, and fashion garments preserved in its permanent collection. Frequently-changing exhibitions and interesting programs make every visit special.

Located in the original 1928 Chancellor’s Residence at 1903 Hillsborough Street (just across from NC State’s famous Memorial Belltower), the Gregg includes period rooms, formal gardens, and a contemporary 15,000 sq. ft. galleries wing. All are used as exhibition and programming spaces, and are free and open to students and public alike.

Departments, groups, and individuals may also book spaces for private meetings, conferences, workshops, parties, weddings, and other events. Call 919-515-8956 for rates and availability.

To schedule tours or class visits, or to make arrangements to use the permanent collection, call 919-515-3503 or visit Gregg.arts.ncsu.edu (https://gregg.arts.ncsu.edu/). The Gregg and its surroundings offer a great place to meet, hang out, study, play, or have a picnic in a stimulating environment. Wifi is available both outside and indoors. Hours are 10am-5pm Tuesday, Wednesday, Friday and Saturday; 10am-9pm Thursday; and 1pm-5pm on Sunday. The galleries are closed Mondays. Admission is free.

Price Music Center (PMC)

Price Music Center (PMC) is the location for the Department of Music and its programs. Until 1965, the first Pullen Hall had been the original music building, which, along with many band instruments, pianos, and a music library, was destroyed by a student arsonist. Built in 1971, Price Music Center is named to honor Percy Walter (Daddy) Price, the father of today’s musical organizations on campus and the University’s first music director in 1923.

Practice studios are available to NC State students on a first-come, first-served basis. Each practice room has an upright piano and music stand. For questions about practice space in Price, call 919.515.2981. For more information, see Department of Music (https://music.arts.ncsu.edu/).

Price Music Center is located at 2620 Cates Avenue, next to the Talley Student Union. The main office is located on the second floor, room 203. Additional facilities and offices are located in the south wing of Broughton Hall.

Talley Student Union (TSU)

Talley Student Union (TSU) is the hub of student life on campus and is the place to study, shop, dine and engage with your peers. Talley Student Union is anchored with nine food venues, Wolfpack Outfitters, the Woodward Student Involvement Center and Stewart Theatre. If students are looking to connect with the arts, enhance their leadership skills, or connect with peers, Talley Student Union is the place to start. Students can even be part of the amazing student employment team that operates the facility.

Program offices and service areas that can be found in the Talley Student Union include:

• Arts NC State;
• Center for Student Leadership;
• Dance Program;
• Ethics & Public Service;
• Fraternity and Sorority Life; GLBT Center;
• Multicultural Student Affairs; Student Involvement;
• NC State LIVE;
• NC State Student Centers Administration;
• Student Centers Board of Directors;
• Union Activities Board;
• University Theatre Administration;
• Women’s Center;
• RAVE! Events;
• Ticket Central;
• and University Graduate Student Association.

RAVE! Events

To reserve room in the Talley Student Union or to plan your event, please visit R (http://campusenterprises.ncsu.edu/talley-student-union/) AVE!'s website (https://campusenterprises.ncsu.edu/rave-events/) or contact RAVE! Events at 51-EVENT (513-8368).

Frank Thompson Hall

Frank Thompson Hall is the location for University Theatre and the Crafts Center. Built in 1925 as a gymnasium, Thompson Hall reopened in Fall 2009 after an extensive renovation that was an extraordinary partnership between NC State students, private citizens, businesses and the extended NC State community.

Thompson Hall houses University Theatre’s full production activities, performances, and classes. Facilities include the Titmus Theatre, the Kennedy-McIlwee Studio Theatre, the costume shop, the scenic
construction and paint shop, lighting and sound facilities, as well as rehearsal and classroom spaces. The renovation brought state-of-the-art technologies and improved accessibility to the building that now returns to its purpose as a hub of student activity. For more information, see University Theatre (https://theatre.arts.ncsu.edu/).

Located on the ground floor of Thompson Hall, the Crafts Center offers technology-rich studios and specializes in classes and workshops in clay, digital photography, wood, jewelry/metal, fibers, glass, lapidary, mixed media and more. For more than fifty years, the Crafts Center has provided a friendly learning environment for students and craftspeople of all levels. NC State’s Crafts Center is one of the finest university crafts programs in the country. Classes and studio use are available to NC State students, alumni, employees, and the general public. For information, see Crafts Center (https://crafts.arts.ncsu.edu/).

Thompson Hall is located on Dunn Street and Jensen Drive.

**Witherspoon Student Center (WSC)**

Witherspoon Student Center (WSC) currently houses the African-American Cultural Center, Student Government and Student Media which includes the offices of five student-run media organizations:

- Agromeck (yearbook);
- The Nubian Message and Technician (newspapers);
- Windhover (literary magazine);
- and WKNC FM 88.1 (radio station).

Witherspoon includes two accessible balconies; one meeting room available by reservation through REM; the African-American Cultural Center’s Sankofa Room, Gallery and Library; and Campus Cinema, used for films, lectures, classes and special events.

**Intercollegiate Athletics**

**Go Pack!**

NC State has a long and storied history in athletics, as well as a loud and passionate fanbase that supports the Wolfpack faithfully. The university’s athletics programs (http://www.gopack.com/) enjoy a tradition of excellence as they compete in the prestigious Atlantic Coast Conference.

The athletics program is self-supporting and is operated primarily through gate receipts, radio and television revenues, NCAA distributions, student fees, and private donations. Funds for athletics grants-in-aid are provided through the North Carolina State Student Aid Association, also known as the Wolfpack Club.

**Sports**

The Department of Athletics conducts the university’s intercollegiate athletics program, which includes 23 varsity sports. The athletics program is administered by the Director of Athletics, Boo Corrigan. The Council on Athletics is appointed by the Chancellor and serves in an advisory capacity to the Director of Athletics and the Chancellor.

Men’s varsity sports include soccer, cross country, and football in the fall; basketball, swimming and diving, indoor track, and wrestling in the winter; and outdoor track, golf, tennis, and baseball in the spring. Varsity sports for women include soccer, cross country, and volleyball in the fall; basketball, indoor track, swimming and diving, and gymnastics in the winter; and outdoor track, golf, softball and tennis in the spring. The co-ed rifle team competes during the winter.

**Athletics Facilities**

The Wolfpack’s football facility, Carter-Finley Stadium, boasts 57,600 permanent seats. The 106,000 square-foot Murphy Football Center, which is the operations hub for the football program, stands in the south end zone, while the Finley Fieldhouse houses visitor locker rooms and other operations spaces on the north end of the field. Soaring high above it all is Vaughan Towers, a 117,000 square-foot structure along the west grandstand that houses 955 club-level seats, 51 private luxury suites, a University suite for the Chancellor and a state-of-the-art press box.

The men’s basketball squad competes in the PNC Arena, which boasts one of the top capacities in the Atlantic Coast Conference with seating for 19,500 fans. Since PNC Arena opened in 1999-2000, NC State has finished every year in the top-25 nationally in attendance. The women’s basketball squad plays in the James T. Valvano Arena at William Neal Reynolds Coliseum – one of nine areas on campus designated as a “hallowed space.” The arena has seating for 5,500 in the facility which recently underwent a $35 million renovation and now houses the Wolfpack Walk of Fame and History. It’s also the home of gymnastics, wrestling and rifle, as well as NC State’s ROTC programs.

Located in the heart of campus, the Dail Soccer Field is located inside Paul Derr Track under stadium lights. Adjacent to that complex is the Dail Softball Stadium. Situated across from historic Reynolds Coliseum, the picturesque campus setting serves as the background for one of the best softball facilities in the ACC.

With seating for 3,480, Doak Field at Dail Park has been the home of Wolfpack baseball for over 50 years. Across the street from “The Doak” is the J.W. Isenhour Tennis Center. The outdoor stadium, has six lighted courts, chairback seating for up to 1,000 spectators, and an electronic scoreboard. The indoor courts, named in honor of former Wolfpack standout Andy Andrews, provides seating for up to 200 spectators.

The golf team trains at the beautiful Lonnie Poole Golf Course, an 18-hole, 7,350-yard, par 71 public course located on Centennial Campus. The $11.6 million dollar Arnold Palmer Signature multipurpose golf course also houses a research center and The Carol Johnson Poole Clubhouse. This facility also supports critical academic programs, including the Professional Golf Management (PGM) and turfgrass programs.

The Willis R. Casey Aquatic Center serves as the hub for the Pack’s nationally-ranked swimming and diving teams. The site of many ACC Championship meets over the years, it features two pools and spectacular seating for approximately 1,000 fans.

The Wolfpack’s athletics administrative offices and coaches’ offices for soccer, track and cross country, and wrestling are located in the Weisiger Brown General Athletics Facility. The Case Athletics Center houses the Academic Support Program for Student-Athletes.

The fundraising offices of the Wolfpack Club and the athletic department’s ticket offices are located in the Palisades Building near Carter-Finley Stadium: 5400 Trinity Rd. (Suite 500), Raleigh, NC 27607.

For ticket information call (919) 865-1510 or 1-800-310-Pack. The main athletic department receptionist: (919) 515-2101. Visit the official athletic department website (http://www.gopack.com/) for complete information.
Student Involvement

The Wolfpack's starting place for students to get involved at NC State, Student Involvement helps students find fun and meaningful ways to make NC State home through involvement on campus. The department supports the Wolfpack’s diverse community of student organization members, leaders, and advisors through advising, education, and programming. Student Involvement also provides resources to students that make it easy to find any of over 700 student organizations to join or start an organization that doesn’t exist.

Getting involved is an important way students can develop the sense of belonging necessary for academic success, personal and professional development. Being involved on campus is a great way to build a sense of belonging at NC State, increase cultural competencies and develop multiple perspectives, as well develop academically, personally, and professionally.

Student Government

Founded in 1921, Student Government is a student-run organization that serves as the official voice of the student body. The organization attempts to better the student experience at NC State by working alongside university administrators to address student concerns.

Student Government is organized into five primary areas: executive, legislative, judicial, the treasury, and the Board of Elections. Student organizations may seek funding from Student Government appropriations committee through a bi-annual process.

The University Activities Board

The University Activities Board (UAB) was formed in 1951 to produce quality programming “for the students, by the students.” The mission of UAB is to create innovative activities that stimulate, motivate, educate, and involve the student body. Annual programs include Wolfstock, Pan-African Week, and TUFFTalks.

Fraternity and Sorority Life

There are over 50 fraternities and sororities at NC State University, each founded to prepare students for society through a values-based fraternal experience. Affiliation with an organization is designed to empower students to pursue their potential, providing opportunities to belong, give, achieve, live and lead. How organizations enact those values through membership, programs, and activities are what makes each organization unique. Fraternities and sororities provide opportunities to get involved, helping students on a large campus build a support network of peers that share similar goals and interests. Organizations challenge members to take on new responsibilities, develop their leadership potential, be active within the campus and surrounding communities, and adopt a commitment to volunteerism and civic engagement. Fraternities and sororities also provide their members with a unique lifetime membership, connecting them with local graduate and alumni chapters and national alumni groups well after graduation.

Approximately half of our chapters provide housing for their members with 15 chapters currently living in Greek Village on campus and 4 new homes under construction. The University, in partnership with our fraternities and sororities, has committed to redevelop Greek Village over the next 10 years. At completion, Greek Village will be home to over 35 different fraternities and sororities in a combination of homes, townhouses and apartments.

For more information on membership, educational programming, or service opportunities, visit the Department of Fraternity and Sorority Life’s website, the office in 5261 Talley Student Union, or call (919) 513-2910.

Shelly Brown Dobek, Director of Fraternity and Sorority Life

Student Media

Department website: https://ncsu.edu/sma
NC State students have the opportunity to produce and manage a variety of student-oriented media. By working with these media, students gain valuable co-curricular experience in sales, marketing, journalism, broadcasting, production, design, multimedia communication, leadership and management. NC State boasts five media outlets staffed by students and supported in large part by self-generated non-fee revenue, as well as a student-staffed Business and Marketing office which coordinates advertising sales, sponsorships and full-service marketing opportunities for all five media. Many staff positions are paid.

Agromeck

Agromeck, the university’s yearbook, provides a record in words and pictures of student and campus activities each year. Student staff members include photojournalists, writers, designers and editors, all with a common mission: documenting the history of the university from the student perspective. The Agromeck has received the nation’s highest awards for general excellence and photography as well as national Pacemaker and Crown awards.

Nubian Message

Nubian Message provides news and features about the African-American community at NC State, as well as coverage of regional, state and
national issues of interest to our students. To find out more about this bi-weekly publication, visit the Nubian Message online.

**Technician**

*Technician*, the university’s oldest student newspaper, is published each Thursday when school is in session during the fall and spring semesters, and online with breaking news and online-only content year-round at technicianonline.com (https://technicianonline.com). With a print circulation of 4,000 copies at nearly 100 newsstands on and near campus, the *Technician* has earned numerous state and national awards for news, features, sports, opinion writing and photography, as well as general excellence. Online, you’ll find continuous updates of news, features, sports, campus events, and other content of interest to students, including video, audio and photo slideshows.

**The Windhover**

*The Windhover*, the campus literary and visual arts magazine, is published each spring. As a showcase for NC State’s creative writers, poets, artists, photographers and musicians, it has received numerous national awards, including the Pacemaker from the Associated Collegiate Press and Gold Crown from the Columbia Scholastic Press Association. Visit the Windhover online (http://www.ncsu.edu/windhover/).

**WKNC (88.1 FM)**

WKNC (88.1 FM), NC State’s student radio station, operates at 25,000 watts, for a potential effective potential audience of more than 1.4 million through its FM signal alone, as well as an online stream and a mobile app that lets listeners enjoy WKNC from anywhere in the world. It employs a full complement of student managers, DJs, engineers, journalists and bloggers to provide programming 24 hours a day. It also sponsors a variety of live music events both on campus and at various music venues in Raleigh. Visit (and listen to!) WKNC online (http://www.wknc.org). If you have an HD radio, you can also enjoy WKNC HD-2.

**Student Media's Business Office**

Student Media’s Business Office gives students interested in sales and marketing an opportunity to hone their skills while earning commission on every advertisement and sponsorship they sell. From print, to broadcast, to online sales, few (if any) organizations at NC State offer our students a better way to build their “real-world” business and marketing acumen as they work toward earning their degree from NC State. To find out more, visit the Business and Marketing Office online. (https://www.ncsu.edu/sma/)

**The Student Media Board of Directors**

The Student Media Board of Directors is a way for students to get involved in the management of a large business operation. The Board of Directors is the governing arm for all student media which use student fee monies to support their operations. Elections to the Board are held in the spring.

**Student Services**

NC State University knows that there’s more to academic success than books and research papers. That’s why we offer a full range of services to support students in all aspects of their academic careers. Our full-service Student Health Center helps keep students healthy, while our Career Development Center helps them plan for life after graduation.

Take a look through all of our student services below to see how we are here to support your time at NC State.

**Academic Advising Services**

2751 Cates Avenue
Pre-Law Advising

Law schools neither prescribe nor recommend a particular undergraduate curriculum for prospective candidates. A student may prepare for law school within any of the majors offered by the nine undergraduate colleges. Pre-Law Services at NC State are offered through the Career Development Center (http://careers.ncsu.edu/). Through Pre-Law Services, students receive guidance on preparing for law school, taking the LSAT, and applying to law school. Students have the opportunity to learn and network through experiential learning programs, internships, seminars and workshops, and the annual Law School Fair.

The Pre-Law Advisors also works with the Pre-Law Students’ Association (PLSA), which is open to all interested students. During the year the PLSA provides programs that have included: NC State Law School Fair, local attorneys, panel of Law School students, Law School Directors of Admission, information on the admissions process. For more information, visit the Pre-Law Services website (https://careers.dasa.ncsu.edu/gain-experience/pre-professional/pre-law/).

Health Professions Advising

Many NC State undergraduate students are planning a career in the health professions and will apply to attend medical, dental, optometry or other health care graduate schools after graduation. Health Professions Advising at NC State University offers guidance, information, and support to students interested in attending health professional school. The Health Professions Advisor can assist you with:

- Prerequisite course selection
- Becoming a competitive candidate
- Selecting potential health professions schools
- Application materials & timelines
- Personal statement assistance
- Interview tips & preparation

Health professional schools do not require students to obtain a designated “Pre-Health” degree. Instead, they seek students who have demonstrated academic success and who also have excelled in other areas including clinical and service experience as well as social development. Like most schools, NC State does not offer a dedicated “Pre-Health” curriculum. Instead, we recommend that students interested in health professions select the academic major that is of greatest interest to them while ensuring that they select courses that provide a strong foundation in the natural sciences required by most professional programs for admission. These include biology, chemistry, physics, and calculus along with recommended courses like genetics and biochemistry. It is also recommended that students select courses that improve communication and writing skills as well as provide a strong foundation in the humanities, psychology and ethics.

For more information on Health Professions Advising, visit the Health Professions Advising website (https://prehealth.dasa.ncsu.edu/).

Veterinary Professions Advising Center (VetPAC)

The Veterinary Professions Advising Center (VetPAC) aims to provide NC State students and alumni the guidance, resources and experience necessary to become uniquely competitive veterinary school applicants. While there is no formal "pre-veterinary" program or degree at NC State, many students interested in pursuing veterinary school often declare majors in the following disciplines: Animal Science, Zoology, Biological Sciences, Biochemistry, Microbiology, and Poultry Science.

VetPAC is housed within the College of Agriculture and Life Sciences. For more information on pre-veterinary advising, visit the VetPAC website (https://cals.ncsu.edu/vetpac/).

Academic Support Program for Student Athletes

The Academic Support Program for Student Athletes (ASPSA) is a comprehensive support program that strives to meet the academic, personal and professional development needs of all student-athletes, promoting excellence and effectiveness in undergraduate and graduate education as well as leadership and civic engagement.

ASPSA is committed to extending the educational experience of its constituency with particular emphasis on empowering student-athletes to become strong self advocates, providing specialized initiatives to facilitate a smooth transition from high school to college and from college to professional life while successfully integrating student-athletes into the campus community; enhancing academic skills for student-athletes at all skill levels and providing academic support personalized to the needs of each student-athlete.

ASPSA will maintain a strong sense of integrity and will continue to strive to be one of the benchmark programs for academic support for all collegiate academic support programs in the nation. The mission of the Office of Academic Support Program for Student Athletes at NC State University is:

1. to support the recruitment, retention and graduation of NC State student-athletes;
2. to provide a comprehensive support system that affords NC State student-athletes equitable opportunity to pursue academic, personal, and professional development and
3. to strongly adhere to the principles of integrity, excellence, and lifelong learning.

NC State's Campus Community Centers are proudly comprised of the African American Cultural Center, the GLBT Center, Multicultural Student Affairs, and the Women's Center.

African American Cultural Center

The mission of the African American Cultural Center is to promote awareness of and appreciation for African American and other African descent experiences through activities and events that enhance academic excellence and strengthen cultural competence for the campus and surrounding communities. Students, staff and visitors are welcome to attend our programs and events and to visit the Art Gallery and Library in Witherspoon Student Center, the first building on NC State's campus named for an African American, Dr. Augustus M. Witherspoon.

To learn more about the African American Cultural Center, visit our website (https://diversity.ncsu.edu/aacc/). Our main office is located on the 3rd floor of Witherspoon Student Center.

African American Cultural Center
355 Witherspoon Student Center
Email: aaculturalcenter@ncsu.edu

GLBT Center

The mission of the NC State GLBT Center is to engage, develop and empower members of the gay, lesbian, bisexual and transgender communities and their allies. To fulfill that mission, we help students connect to form social support networks; offer identity-based and health-related information and resources; consult with students individually and collectively on issues related to personal identity and academic success; refer students to a wide variety of resources on campus and in the local community; provide professional and leadership development opportunities; and host educational events and programs.

Our vision is of a campus where students, staff, faculty and alumni feel a shared responsibility to increase their individual understanding of and comfort with diversity, to enhance their ability to connect with members of their own communities, to build coalitions across identity groups and to work collaboratively to raise awareness, promote respect and create a culture where they can advocate for equity, inclusion and social justice on behalf of themselves and others.

For more information about our educational workshops, events, student organizations, resources or support services, visit our website (http://www.ncsu.edu/gltb/). We are located on the 5th floor of Talley Student Union.

GLBT Center
5230 Talley Student Union
Email: glbtcenter@ncsu.edu

Multicultural Student Affairs

Multicultural Student Affairs researches, designs and implements programs that promote the academic success, retention and graduation of students, with an emphasis on students from historically underrepresented and marginalized ethnic populations. Our programs and services aim to expand students' horizons while honoring their respective cultural experiences.

Multicultural Student Affairs collaborates with many university organizations to conduct programs to enhance personal, professional and cultural development and student success. Programs and services have included orientation symposia, peer mentoring, heritage month programming, cultural celebrations, academic recognition programs, student leadership development, recruitment and advising.

We welcome any NC State student to our programs and services. Visit our website (https://diversity.ncsu.edu/msa/) for more information. We are located on the 4th floor of Talley Student Union.

Multicultural Student Affairs
4261 Talley Student Union
Email: multicultural@ncsu.edu

Women's Center

The mission of the Women's Center is to build and create a community of authentic and engaged allies and leaders to pursue gender equity and social justice; enhancing the campus climate through education, advocacy, support and leadership development.

The Women's Center provides leadership opportunities through programming initiatives such as Feminist Friday's, alternative service break trips and volunteer and internship opportunities. Staff in the Women's Center also serve as direct advocates for survivors of interpersonal violence. Students can speak with an advocate by stopping by the center or calling the 24-Hour Sexual Assault Helpline at 919.515.4444.

To learn more about the Women's Center visit our website (https://diversity.ncsu.edu/womens-center/). We are located on the 5th floor of Talley Student Union.

Women's Center
5210 Talley Student Union
Email: womens-center@ncsu.edu

See also Office for Institutional Equity and Diversity under the University Administration section for other units within this office dedicated to diversity, equity and inclusion at NC State.

Career Development Center

The Career Development Center's mission is to prepare and empower students to identify and pursue their career goals. From first year students to graduate students, services are designed to meet the needs of students across all stages of career development. Career coaches are available to meet with students one-on-one or in group settings. Students are provided access to career related assistance ranging from resume development and interview strategies to job search techniques and experiential learning opportunities.

The Career Development Center's online career tool, ePACK, allows students to search and apply for co-op's, internships, and full-time jobs, schedule an appointment with a career counselor, schedule on-campus interviews with employers, find career fairs, and search for career-related events and activities. A wealth of career information is available on the Career Development Center's website (http://careers.dasa.ncsu.edu/).

College Advising Corps (CAC)
In February 2014, the College Advising Corps launched a partnership with the John M. Belk Endowment to expand the Corps to institutions of higher education, such as NC State University. In its inaugural year, 9 recent NC State graduates were placed into 9 rural high schools across North Carolina to assist students navigate the path to college. Going into its second year, the NC State College Advising Corps has placed 21 recent NC State graduates into 21 high schools.

The College Advising Corps aims to increase the number of first-generation college going, low-income, and/or underrepresented students who apply, enter, and complete college. We believe that every student deserves the opportunity to enter and complete higher education.

Counseling Center
NC State and the Counseling Center work hard to create a campus culture that supports and connects us all. College is a time for tremendous intellectual, social and professional growth. But as we create leaders and innovators, we also want to cultivate emotional and psychological growth that will allow our students to be successful and flourishing.

The Counseling Center provides individual and group counseling for NC State students wishing for assistance with personal, academic or career concerns. Services are primarily short-term in nature and referrals are made as appropriate. Counseling staff includes psychologists, professional counselors, social workers, graduate interns and psychiatrists who are available to work with students with concerns such as anxiety, depression, relationship issues, substance abuse, test anxiety, time management, dissertation support, and choosing a career. All counseling is strictly confidential with exceptions noted on the Counseling Center website. In addition to counseling, workshops and support groups are offered throughout the year in a variety of areas such as time management, stress reduction, suicide prevention, and relationship skills.

The Counseling Center is located on the 2nd floor of the Student Health Center, 2815 Cates Avenue. Appointments may be scheduled by coming by the Counseling Center during walk in hours daily as posted on our website. Emergency after-hours assistance is available by calling the Counseling Center at 919-515-2423 and selecting the Counselor on Call.

Additional information about services can be found on the Counseling Center’s website (https://counseling.dasa.ncsu.edu/).

The Counseling Center is accredited by the International Association of Counseling Services (http://iacsinc.org/).

The College Advising Corps provides additional services.

Disability Resource Office
The Disability Resource Office (DRO) facilitates accommodations and services for individuals with documented disabilities and serious medical conditions. Accommodations and services are rendered based on the individual’s documented needs and are determined through an interactive process. DRO will maintain appropriate confidentiality of records and communication regarding disability. To receive accommodations and services, please contact the DRO as far in advance as possible.

Visit The Disability Resource Office online (http://dso.dasa.ncsu.edu/) for more information about services, student and faculty rights, and other resources.

In accordance with Section 504 of the Rehabilitation Act of 1973 (“Rehab Act”), the Americans with Disabilities Act of 1990 (“ADA”), The ADA Amendments Act of 2008 (“ADAAA”), and state law, NC State is committed to ensure that qualified individuals with a disability in the United States shall be excluded from, denied the benefits of, or be subjected to discrimination under any program or activity. The DRO works diligently to ensure that individuals with disabilities are provided an inclusive experience and equal opportunity by determining eligibility for accommodations for students with disabilities and serving as a resource to faculty in helping them understand their obligation in providing equal access.

Military and Veteran Services
NC State University Military and Veteran Services (MVS) is the university’s centralized resource to coordinate integrated support to military-affiliated students. Our primary objective is to ensure that our veterans and military-affiliated students feel a strong sense of belonging to NC State.

Mission
NC State University is committed to educating, supporting, and honoring student veterans and their families by helping them acquire
the knowledge and skills necessary to achieve their personal and professional goals.

The MVS proudly serves all military-affiliated students, staff, faculty and retirees:

- Discharged and retired veterans
- Active duty military
- Members of the National Guard and Reserve Components
- Spouses and dependents of military and veterans
- Gold Star family members

The goal of the MVS is to ensure you are successful as you:

- Transition from the military to the campus;
- Persist to graduation; and
- Transition from NC State into your chosen career

For more information about our services and resources, visit our website (https://veterans.dasa.ncsu.edu/).

Nick Drake, Director

NC State Dining

NC State Dining’s award-winning program offers food options that are convenient, fresh, wholesome and delicious. We have over 40 dining locations across campus, all of which accept some form of the meal plan. From traditional all-you-care-to-eat dining halls to a mix of restaurants, cafes and convenience stores, our program is designed to meet the unique needs and tastes of the campus community.

NC State Dining hosts a number of theme meals and monotony breakers during the year, including our famous All Carolinias Meal, which features items grown or produced in North Carolina. We also host a number of cultural meals, too. Check out the special events calendar (http://www.ncsudining.com/university-dining-events/) for more details.

Nutrition

We understand the diverse nutritional needs of our campus population, such as food allergies, intolerances, and special dietary preferences. Our website (https://dining.ncsu.edu/locations/) provides nutritional information for all of our restaurants and dining halls, and many locations have a nutrition kiosk where guests can check the daily menu for allergens and other key ingredients.

Our Well-Fed Wolfpack nutrition team and registered dietitian are nationally recognized for their efforts to make NC State one of the best campuses known for its nutrition and wellness programs (http://www.ncsudining.com/campus-dining/healthwellness/). Our dietitian is available for a free consultation to discuss your nutrition goals and special dietary needs. We place a special emphasis on fresh foods and wellness while providing nutrition resources, education, and awareness across campus.

These efforts have helped us earn national recognition, including the Top 26 Healthiest Colleges and Top 10 Gluten Free Accommodating Colleges in the nation.

Meal Plans

All first-year students living on campus are required to have a meal plan.

Our meal plans (https://dining.ncsu.edu/meal-plan-options/) are designed to cover the cost of meals and snacks in three different ways: Dining Hall Swipes, Meal Credits, and Dining Dollars.

- Dining Hall Swipes: Just one swipe at our dining hall locations and you can enjoy a full meal or a light snack, all with a single swipe.
- Meal Credits: Use Meal Credits to purchase a meal at one of our many restaurants or cafes. Meal Credits are also used to purchase a dining hall take-out meal. Meals Credits vary by location and only one Meal Credit can be used per meal period.
- Dining Dollars: Use Dining Dollars at convenience stores and vending machines, or to make small purchases at a restaurant or cafe in lieu of a Meal Credit.

Our Core Plans (the Dining Hall Plan, Flex Plan, and Flex Plus Plans) are primarily designed for students who desire to have the majority of their meals covered by a convenient, affordable campus dining plan. All three plans include all-day access to our dining halls, so students can come and go when they’re hungry to our three all-you-care-to-eat dining halls and enjoy a full meal or light snack as often as they like throughout the semester. (The all-access pass requires 30 minutes pass between each Dining Hall Swipe.)

We also have the Block 170 Plan (170 meals-per-semester) that can be used at any time in the dining halls or once per meal period in a restaurant or cafe, and includes 100 Dining Dollars. Our Commuter/Apartment Plan is for students who commute or live in on-campus apartments. It includes $800 Dining Dollars that can be used at any dining location and comes with a five percent discount at the register on all purchases.

Picking a Plan

Detailed information and a full guide on selecting a plan is available on our website at dining.ncsu.edu. We recommend you review the plans, then consider your expected daily travel and eating patterns once you’ve received your residence hall assignment and course schedule. Once you’ve picked a plan, register online (https://dining.ncsu.edu/meal-plan-options/meal-plan-signup/) or complete the paper form you’ll receive in your packet before you arrive on campus this fall. You can then try out your plan and make any changes via our website prior to September 15. Be sure to re-evaluate for the spring semester to ensure your plan is the right one for you and make any changes by January 31.

We're Here for You

We take pride in offering quality food and services designed specifically to meet the wants and needs of students. For more information, visit NC State Dining online (http://dining.ncsu.edu) or call 919.515.3090. Follow us on Facebook (https://www.facebook.com/ncstatediningpack/), Twitter (https://twitter.com/ncstatedining/) and Instagram (https://www.instagram.com/ncstatedining/) for information on special events, featured menu items, cooking demos, and more.
NC State Stores

NC State Stores has been the authority on textbooks, school supplies, computers and apparel since our founding in 1954. NC State Stores ensures students have access to the best prices and service to secure course materials through price comparison tools and easy on-campus shopping. The Stores also offer the most extensive collection of officially licensed merchandise available anywhere, featuring apparel from leading brands like Adidas, Southern Tide, Peter Millar, Vineyard Vines, Clinique and more.

Shop online or find out more at bookstore.ncsu.edu (http://bookstore.ncsu.edu/).

Locations

Wolfpack Outfitters is the flagship location, located in Talley Student Union. The store carries fan gear, apparel, gifts, books, novelty items, school supplies, technology and more.

Wolfpack Outfitters also services students on Centennial Campus with a smaller satellite location that carries books, school supplies, apparel and snacks. It is located in Wolf Ridge Apartments next to On the Oval Culinary Creations.

Textbooks

Once a student has completed course registration, they can view their book list from their Class Schedule page in MyPack Portal. From there, students can view all required and recommended course materials, compare prices with the online shopping tool, and place an order.

NC State Stores prides itself on the value it provides, and it is backed up with pricing transparency. NC State stores also offers a textbook buy-back program at the end of each semester, and students can visit the Stores’ website to check their value before bringing them in.

Financial Aid and Scholarship Funds

Wolfpack Outfitters will defer payment of online and in-store textbook orders for students who receive financial aid or academic scholarship funds. These charges will be sent to the University Cashier’s office for processing upon disbursement of funds. Only items fulfilled by NC State Bookstores are eligible for this payment method at checkout. Students who receive athletic scholarships or sponsorship (VA, VR, WIA, Services for the Blind) should make all purchases in the store.

Laptops

The Technology Department offers business class computers that meet the specifications for all areas of study at NC State. All computers sold at the NC State Stores meet or exceed the university-set recommendations, and are guaranteed to last through all four years of college.

By purchasing from the NC State Stores, students are guaranteed to receive the convenience of full warranty support on campus.

New Student Programs (NSP)

New Student Programs (NSP) addresses the holistic needs of each new NC State student to create a foundation of success.

Based on the core value that people matter, we achieve this through:

• Cultivating strategic partnerships across the University
• Promoting an environment of personal responsibility
• Fostering inclusivity through a shared campus identity
• Partnering with parents and families
• Preparing and empowering student leaders to serve the campus
• Striving to be innovative in meeting the needs of our community

New first-year, transfer, and international students can visit our website (https://newstudents.dasa.ncsu.edu) to view new student checklists, learn about orientation, explore pre-semester programs, and view other resources for how to connect with the Wolfpack before arriving on campus.

Michael Coombes, Director

Office of International Services

The Office of International Services (OIS) is charged with meeting the immigration advising and cross-cultural programming needs for the university’s more than 4000 international students and 700 J-1 Exchange Visitor scholars who come from more than 120 different countries. Services provided by OIS include advising students and scholars on immigration regulations and university policies; authorizing certain types of on or off-campus employment authorization for F-1 and J-1 visa holders; and providing cultural programs designed to enrich the cultural and academic experience of the campus community. OIS programs include: New International Student Orientation, Culture Corps, ISSERV service learning program, English Conversation Club, and many others. New international students are required to participate in New International Student Orientation. OIS also provides opportunities for U.S. students to get involved in the international community at NC State by inviting participation in various cross-cultural programs such as volunteering at the International Student Orientation and English Conversation Club.

International applicants must apply to the Admissions Office by the stated deadlines and must meet all the necessary requirements for admission.
In addition, international applicants must meet certain language and financial criteria (see the TOEFL and Financial Information sections under Freshman Admission).

The North Carolina Global Training Initiative (GTI) sponsors several short-term certificate, internship, and research programs that international students may be interested in. These full-time non-degree study programs allow international students to study at NC State for one semester in order to learn about U.S. culture and education, improve their conversational English, take undergraduate courses in their field of study back home or in preparation for admission to a degree program here in the U.S., and experience life in the U.S. These programs have a later application deadline and are great for students to take before enrolling in an undergraduate or graduate degree program in the US or for siblings and friends of current degree-seeking students who want to study in the US together.

International students may be interested in joining the GTI’s Cultural Exchange Network (CENet). CENet connects NC State’s domestic and international students through joint participation in social, academic, and service learning events and workshops. Visit the CENet website (go.ncsu.edu/CENet (http://go.ncsu.edu/CENet/)) for more details about the program and how you can apply.

Anyone interested in the GTI’s programs can visit us on the web at www.ncsu.edu/gti (http://www.ncsu.edu/gti/) for more information.

Outline of minimum immigration requirements for F-1 and J-1 students:

- Keep passport and I-20 or DS-2019 current
- Maintain full-time enrollment every semester (12 hours/semester for undergraduates)
- Make good academic progress toward your degree
- Do not work or intern off campus without prior written approval from OIS
- Do not work on campus more than 20 hours in any one week during the semester
- Update any address change in MyPack Portal within ten days of moving
- Update OIS immediately of any changes in name, funding, or visa status
- Consult with an OIS advisor before changing curriculum/majors, withdrawing, dropping below full-time, transferring to another school/program, etc.
- Purchase and maintain the NC State University approved Health and Accident Insurance or other insurance plan that meets the published minimum coverage requirements.
- Keep your valid passport and recently signed visa certificate (I-20 or DS-2019) with you when you travel abroad. Consult with an OIS advisor about visa and travel questions

Further information about immigration requirements, employment and travel questions, cultural opportunities, and other critical information designed to assist international students are detailed on the OIS website. For individual advising, please call (919) 515-2961 to make an appointment with an advisor or stop by during our walk-in hours of 10:00am-11:45am and 1:00pm-2:45pm on Monday, Tuesday, Thursday, and Friday (no walk-ins on Wednesdays).

Prevention Services

NC State Prevention Services believes that information should be shared from an objective and factual perspective, without bias or an agenda to steer an individual in any one direction unless imminent harm would result. Prevention Services is a no-cost service to all students and offers consultation to parents of students, staff, and faculty. We are flexible in format and willing to work with you, your group(s), and/or your department in some of, but not limited to, the following ways:

- one-on-one conversations focused on resources
- formal/informal presentations and trainings
- formal/informal conversation facilitators
- staff/student group meeting guests
- Q & A resource
- student group leadership trainings/discussions
- event planning for risk management and problem prevention

CARES: Student Behavioral Case Management

The CARES case managers at NC State work collaboratively with campus resources to provide support for students who are in distress or crisis or who are identified as exhibiting concerning or worrisome behaviors. Effective case management ensures that the community at large remains supported and safe while the student involved gains the necessary resources to remain successful academically and personally at NC State. Services include:

- Providing comprehensive outreach and consultation services to the NC State community in order to proactively identify students with concerns
- Providing early intervention and behaviorally based assessments to determine appropriate resources and referrals to campus and community resource
- Working constructively with students to foster resilience and self-advocacy
- Monitoring student progress, seeking input from collateral resources as needed

Learn more about CARES: Student Behavioral Case Management on our website at: https://prevention.dasa.ncsu.edu/nc-state-cares/about/

Alcohol and Other Drug Prevention Education

Alcohol and Other Drug Prevention Education (AOD) is rooted in objectivity, compassion, and non-judgment. Although AOD supports community members that choose to live an abstinent lifestyle, the program does not use an abstinence based methodology or believe in telling others how to live their lives. AOD cannot condone underage drinking or illicit drug use as this would mean advocating for individuals to break the laws of North Carolina. However, our program does understand
that some community member's personal choices do not abide by the law on this topic. Alcohol and Other Drug prevention Education is here to reduce the harm and unwanted consequences associated with alcohol and other drug use. Services include:

- Providing alcohol education programming to all first-year students prior to arriving at NC State
- Consulting with campus partners, students, alumni and faculty regarding AOD topics including risk management and prevention
- Providing training for the campus community on harm reduction strategies
- Facilitating the Howl for Help: Health intervention for AOD related emergencies without violation by the Code of Student Conduct
- Administering BASICS (Brief Alcohol Screening and Intervention for College Students)

Learn more about Alcohol and Other Drug Prevention Education on our website at: https://prevention.dasa.ncsu.edu/alcohol-prevention/about-aod/

**Suicide Prevention Services**

Suicide Prevention Services' goal is to reduce barriers to help-seeking at NC State by promoting a campus culture of caring and taking responsibility for the mental health needs of our students. This program supports individuals and groups on campus as they strive to understand the warning signs, offer guidance in talking to students, friends, and colleagues and to connect them to available resources. Suicide Prevention Services also offers support to those impacted by the loss of a loved one to suicide.

Services include:

- Providing QPR (Question, Persuade, and Refer) Suicide Prevention Training
- Creating and collaborating large scale campus events focused on suicide prevention and mental health awareness
- Developing and providing programming for faculty and staff focused on early intervention
- Supporting the Division of Academic and Student Affairs' postvention efforts following tragic events involving students, faculty or staff

Learn more about Suicide Prevention Services on our website at: https://prevention.dasa.ncsu.edu/suicide-prevention/about-suicide-prevention/

**NC State Prevention Services**

Email: prevention-services@ncsu.edu

**Student Health**

At NC State we believe in enhancing both students individual health and the overall health of our campus community. With an understanding that Wellness is the interdependent and interactive combination of love for what is done each day, the quality of relationships, the security of finances, the vibrancy of physical health, and the pride taken in what is contributed to our communities. Student Health Services is at the cornerstone health and wellness on campus and offers non-urgent medical care and health prevention to students as an outpatient center.

We are staffed by board certified physicians, nurse practitioners, physician assistants, registered nurses and other medical support professionals. Some of our services include primary care, gynecology services, physical therapy, nutrition counseling, pharmacy, and specialty services with local dentists, orthopaedists, and gastroenterologists.

Student Health is accredited by the Accreditation Association for Ambulatory Health Care, Inc (http://www.aaahc.org/) (AAAHC) and Commission on Office Laboratory Accreditation (http://www.cola.org/) (COLA).

To learn more about the many services and benefits we offer students, visit our website at https://healthypack.dasa.ncsu.edu (https://healthypack.dasa.ncsu.edu/).

**Hours of Operation**

**Student Health Services on Main Campus** operates on the following hours:

- Monday: 8 a.m. - 5 p.m.
- Tuesday: 9 a.m. - 5 p.m.
- Wednesday: 8 a.m. - 5 p.m.
- Thursday: 8 a.m. - 5 p.m.
- Friday: 8 a.m. - 5 p.m.
- Saturday: 9 a.m. - 12 p.m. (During fall and spring semesters, excluding breaks, for illness and injury)
- Sunday: Closed

**Student Health Services on Centennial Campus** is our newly opened location in Plaza Hall on Centennial Campus. For hours of operation, please check our website.

**Physical Therapy on Main Campus** allows appointments during the following hours during the fall and spring semesters:

- Monday: 8 a.m. - 5 p.m.
- Tuesday: 9 a.m. - 5 p.m.
- Wednesday: 8 a.m. - 5 p.m.
- Thursday: 8 a.m. - 5 p.m.
- Friday: 8 a.m. - 2 p.m.
- Saturday: Closed
- Sunday: Closed

A nurse advice line is available at all other times to assure students receive qualified nurse and medical advice. During adverse weather, students should check the Student Health Services website, https://healthypack.dasa.ncsu.edu (https://healthypack.dasa.ncsu.edu/) for any variance in operating hours.

**Summer session** hours are Monday through Friday, 8 a.m. to 5 p.m. with **no weekend hours.** We accept patients for care up to 4:20 p.m to provide sufficient time for you to see your healthcare provider.

Patient appointments are typically 20 minutes.

**How to Schedule an Appointment**

Appointments can be scheduled online, via the HealthyPack Portal (https://sso.medicateconnect.com) (https://sso.medicateconnect.com) or by calling Student Health Services at 919.515.2563.
Charges

All registered students pay a health fee which provides access to care and covers most, but not all, office visits for provider services. There are charges associated with x-rays, lab tests, allergy injections, travel vaccines, physical therapy, annual physicals, some office visits and specialty clinics. Students are responsible for the cost of prescriptions and over the counter medications /supplies available at the Student Health Pharmacy, as well as expenses incurred when referred to an off-campus laboratory, physician, hospital or pharmacy. Student Health Services will file most insurances on behalf of the student for services and prescriptions received at Student Health. Charges not covered by insurance may be transferred to the student’s account with University Cashiers Office. Check with us prior to your visit to determine if your insurance plan is considered in-network.

Student Health partners with several specialty groups to offer on campus care. Specialists include Dermatology, Orthopedics and Gastroenterology. Insurance is filed by the specialty group and not Student Health. Check with the specialty group prior to your visit to determine if your insurance plan is considered in-network.

Student Health, in partnership with Campus Smiles Dental Services, provides comprehensive dental care to students. Campus Smiles accepts most dental plans and will file your insurance for you. Cash discount pricing is also available. To make an appointment, contact Student Health and ask for the dental clinic. Two locations are available for your convenience - Main Campus and Centennial Campus.

Staying Healthy and Well

As a part of our mission, Student Health not only provides high quality health care but also a comprehensive disease prevention and health education program to the NC State community. Our outreach health educator and Pack Peer Educators offer a variety of information, programs and services to students on issues facing today’s young adults. Health topics include nutritional counseling, alcohol and drug education, healthy sexuality, women’s health, men’s health and much more.

Pack Peers is our student volunteer program that includes two tracks: Track I- Peer Education and Track II- Clinical Experience. Students interested in becoming engaged in our Pack Peer program should visit our website at https://healthypack.dasa.ncsu.edu/ for more information.

Required Medical Insurance

As mandated by the UNC System, NC State University requires all undergraduate students taking 6 or more credit hours to have and show evidence of a creditable health insurance policy. Students failing to provide proof of coverage by the published deadline each semester will automatically be enrolled in and billed for the university-sponsored health insurance plan through Student Blue. Note: This is a University requirement.

The University-sponsored health insurance plan (Student Blue) has a robust set of benefits at an affordable premium. Each year, complete information is available to students at the start of the fall and spring semesters. For more information regarding the health insurance requirement and/or the University-sponsored health insurance plan, please see the information at: https://healthypack.dasa.ncsu.edu/.

Confidentiality

All health and medical information is kept secure and confidential and is not divulged to anyone without the express written consent of the patient as required by Federal law.

Please Note: Parents must have the written consent of their student for the release of any protected health information (PHI). Guarantor of payment is not considered written consent for access to PHI.

Medical Insurance

NC State University requires all undergraduate degree-seeking students who are taking 6 or more credit hours to either purchase the University-sponsored health insurance plan (Student Blue) or provide evidence of an existing creditable health insurance policy. Students who are already covered by an insurance policy (i.e. through parent plans, family plans, employer-sponsored plans, or student health insurance) and wish to waive out of the university-sponsored plan must submit a waiver for each term.

Students enrolled in Distance Education courses only are not eligible for health insurance and therefore are not required to submit a waiver.

Students who do not waive out by the waiver deadline will automatically be enrolled in and billed each semester for the university-sponsored health insurance plan. This university-sponsored health insurance plan has a robust set of benefits at an affordable premium. More information regarding the health insurance requirement and/or the university-sponsored health insurance plan is available on the Student Health Services website at https://healthypack.dasa.ncsu.edu/.

Julie Casani, M.D., MPH - Director and Medical Director

Student Legal Services

University Student Legal Services (USLS) is a nonprofit corporation initiated by the Student Government at NC State which is funded by student fees. The service is free for currently enrolled NC State students who have paid their student fee. The purpose of the service is to provide education, advice and representation within the scope of the prepaid student legal services plan. The USLS plan is registered with the North Carolina State Bar. The service focuses on helping students resolve their legal problems with as little disruption as possible to their educational endeavors. The office promotes preventative law, enabling the students to make educated choices. The service provides advice, limited court representation, document creation and review as well as educational seminars and materials on legal issues affecting students. The usual areas of law that most impact students are landlord tenant, consumer matters, employment questions, immigration, traffic and DMV issues, criminal issues and expungements as well as domestic matters.

Confidentiality

The staff are not employees of the NC State or the State of North Carolina and as licensed attorneys are required to preserve the confidentiality of clients. All staff working with the office are bound by
the Rules of Professional Conduct relating to nondisclosure of any information that has been discussed. The policy is firmly followed by the office to encourage clients to speak candidly about all information necessary for effective legal representation.

To learn more about Student Legal Services and the services that we can provide, visit our website at studentlegal.dasa.ncsu.edu (https://studentlegal.dasa.ncsu.edu).

Student Services Center

The Student Services Center (SSC) is NC State’s one-stop center for student registration, financial aid, and billing needs. The Center was formed in 2016 to merge the resources and services of the University Cashier’s Office, Department of Registration and Records, and Office of Scholarships and Financial Aid in order to better serve the students of NC State. Students can visit the SSC in Harris Hall on Main Campus to order an official transcript, receive an enrollment verification, meet with a financial aid counselor, or discuss payment options with the university cashiers.

The Student Services Center website provides helpful information for students on how to search and register for classes, as well as everything they need to know about staying on track to graduate. Our experts are ready to help incoming, current and former members of the Wolfpack— and their families—accomplish any financial or academic task necessary.

Department of Registration and Records

The Department of Registration and Records is responsible for maintaining student records and enrollment systems, establishing the academic calendar, establishing and upholding policies on academic standards, and providing several other essential services to students and faculty on campus.

Charles Clift, University Registrar

Office of Scholarships and Financial Aid

The Office of Scholarships and Financial Aid is responsible for evaluating students’ financial need and eligibility, awarding financial aid packages, disbursing federal and state financial aid awards, and upholding policies on academic standards for financial aid recipients.

Financial aid counselors and staff at NC State are trained and highly equipped to meet the needs of all students, even those with the most exceptional of circumstances. We are dedicated to working with students as closely as possible to ensure a seamless transition to NC State without financial worry.

Krista Ringler, Associate Vice Provost and Director

University Cashier’s Office

The University Cashier’s Office projects a positive image of the University by providing courteous and professional service. We treat each individual customer with dignity and respect. Financial services for the University are provided in an ethical and professional manner with a focus on fiscal integrity and accountability. The success of our students will always be our primary concern.

Maria Brown, Director

Learn more about the Student Services Center on our website at studentservices.ncsu.edu (https://studentservices.ncsu.edu)

The Student Services Center is bound by the Family Educational Rights and Privacy Act (FERPA), which gives students certain rights to privacy of their education records and rights of access to their education records. Employees and agents of the University are expected to comply fully with this law. Please review the NC State REG 10.00.01 - Family Educational Rights and Privacy Act (FERPA) (https://policies.ncsu.edu/regulation/reg-11-00-01/) for detailed information about this federal law and what it means for our students, their families, and sharing of student information.

The NC State Libraries

The NC State Libraries’ website (http://www.lib.ncsu.edu) is a rich source of information and serves as a gateway to resources and services.

The Libraries’ collections reflect the strengths of the university across disciplines. We provide demand-driven, network-based collections to the campus community in support of research and teaching. We are recognized as a national leader in building extensive research holdings in the areas of engineering, science, technology, and agriculture. The collection contains over 5.3 million volumes of books, bound journals, and government documents; over 128,000 print and electronic serial subscriptions; over 1.2 million e-books; 635 full-text databases in all disciplines and extensive digital collections; numerous video, audio, and multimedia titles; unique and rare materials in the Special Collections Research Center. The Libraries’ participation in the Triangle Research Libraries Network (TRLN) provides convenient access to the collections of Duke University, UNC-Chapel Hill, and NC Central University.

Key spaces at the libraries include:

- Learning Commons, Faculty Research Commons, Graduate Student Commons
- Large-scale, immersive visualization spaces
- Digital media creation facilities
- Dataspace with advanced computing, software, training, and consultation (Hunt)
- A Game Lab for the scholarly study and enjoyment of games and for interactive workshops and demonstrations
- iPearl Immersion Theater for panoramic display of faculty and student work (Hunt)
• Makerspaces offering 3D printing and scanning and other specialized tools
• Special Collections Reading Room and Exhibit Gallery (Hill)

The Libraries website (http://www.lib.ncsu.edu) provides information about libraries and access to many services, including reference assistance, interlibrary loan, and electronic reserves. Library Course Tools (http://www.lib.ncsu.edu/course/) web pages are available for every course offered at NC State. These customized pages include e-reserves, article databases, librarian recommendations, citation tools, IM a Librarian for help, and more. The Libraries’ Course Books on Reserves program makes over 4,500 required texts available on Course Reserves each year.

Greg Raschke, Senior Vice Provost and Director of Libraries

Transportation

Parking Permits

All students (including Freshmen) living on or off campus may purchase a parking permit until all available student parking space is sold. Demand for permits does exceed supply. Permits are sold online on a semester basis via the Transportation website (http://www.transportation.ncsu.edu), and are available on a first-come, first served basis. Students must be enrolled in classes in order to be able to purchase a parking permit. All parking permits at NC State are virtual.

Parking Enforcement

Permitted parking areas and hourly visitor spaces are enforced: Monday - Friday: 7:00 a.m. to 5:00 p.m. except on Official University Holidays.

Exceptions include:

• Resident parking areas ("RC," "RE," "RW") are enforced: Monday - Thursday: 7:00 a.m. to Midnight; Friday: 7:00 a.m. to 5:00 p.m.
• Any space or area designated as reserved 24/7, handicap parking spaces and no parking areas.

Wolfline (Buses)

Wolfline is NC State’s bus service which is tailored to student class schedules, but also serves the general public fare-free. Wolfline buses operate every day classes are in session, serving all three campuses, three park & ride lots, official NC State housing and privately-owned apartment complexes located on city streets traveled by Wolfline buses on the way to or from these areas. No university ID, pass, or fare is required to ride. Buses are red, white and black with the Wolfline logo lettering.

Wolfline buses travel along designated routes and only stop at designated Wolfline stops, some of which are shared stops with city (GoRaleigh) and regional (GoTriangle) transit providers. A few routes are designated as “limited stop.”

Please visit the Wolfline website (https://transportation.ncsu.edu/riding-the-wolfline-bus/) for the most up-to-date information about park-and-ride lots and locations, bus routes and schedules.

Alternative Transportation Options

NC State University Transportation offers the following alternative transportation options:

• Bicycling: Bicycling is an inexpensive, healthy and environmentally-friendly way to travel to, from and around campus. Bike racks are conveniently located throughout our three campuses, as well as on all Wolfline buses. Students are strongly encouraged to register their bicycles through the Transportation office; Campus Police also offers free engraving on bicycles.
• Lime Bike/Scooter Share: NC State now offers a pilot program with LimeBike, a dockless public bike share, and Lime-S, a dockless electric scooter program. LimeBike technology is integrated into smart bikes and scooters and a smart phone app. There’s no kiosk docking station so bikes and scooters can be ridden anywhere and parked at any bike rack or designated bike parking area throughout campus. Thirty-minute bike rides are $0.50 for NC State students and employees by registering with an @ncsu.edu email address. The cost for a Lime-S scooter is $1 to unlock and $0.06 per minute for NC State students and employees.
• Walking: As an urban campus, NC State University is very walkable with short distances to off-campus locations such as shopping and restaurants, as well as between campus destinations. Many students and staff choose to walk to school or work, and/or combine walking with another alternative mode to get around campus. Visit the Transportation website (https://transportation.ncsu.edu/walking/) to download a Walk Times map.
• Carpool: NC State students who participate in the student carpool program can enjoy carpooling benefits and gain access to premium parking areas. The Transportation office requires at least two commuter students to form a carpool. All registered carpool participants must show proof of vehicle registration and a local address.
• Local/Regional Transit: GoRaleigh, the City of Raleigh’s public transit services, offers city-wide bus service. Four GoRaleigh routes serve the NC State campus. GoTriangle provides regional bus service to NC State from Raleigh, Cary, Apex, Durham, Chapel Hill, Wake Forest, Zebulon, Wendell, and many points in between. GoPass (https://transportation.ncsu.edu/local-transit/) is a bus pass sponsored by NC State Transportation, at a cost of $5 per year for NC State students. GoPasses allow NC State students and staff to ride city (GoRaleigh) and regional (GoTriangle, GoCary, and GoDurham) buses to commute to campus, get to the airport, or visit friends at other nearby universities.
• Zipcar: Zipcar is a car-share program that offers the convenience of car ownership without the hassles of having a car on campus. There are six vehicles available for use at NC State which are parked in designated spots around campus: Dan Allen Drive (Bragaw Hall Carriageway), Avent Ferry Complex, and Centennial Campus. Students can join Zipcar for a $35 annual membership fee, and can reserve Zipcars at a rate of $8 per hour and $69 per day. Costs include gas, insurance and roadside assistance.
• Wolfpack Pick Up: Wolfpack Pick Up is a service designed for students with injuries or living with disabilities. Wolfpack Pick Up services students on both Main Campus and
TRIO Programs

The TRIO Programs are Federal outreach and student services programs designed to serve under resourced individuals, first-generation college students, and individuals with disabilities to progress through the academic pipeline from middle school to post baccalaureate programs.

The Talent Search and Upward Bound Programs serve pre-college level students. Talent Search serves grades 6-12 and Upward Bound serves 9-12 while the Student Support Services STEM Programs support enrolled undergraduate NC State University students. These programs utilize a holistic approach in providing academic tutoring, personal counseling, mentoring, financial guidance, and other support services necessary for educational access, persistence and degree completion.

Undergraduate Research (OUR)

The office of Undergraduate Research supports and promotes undergraduate opportunities in discovery-, inquiry- and creativity-based scholarship through mentored research experiences with NC State faculty and other national and international scholars and professionals. Undergraduate Research is scholarly study in any discipline in which this scholarship culminates in advancements in science, technology, engineering, business, the arts, or humanities. Students from any discipline can engage in a holistic approach in supporting both student projects and the communication of results are available.

Dr. Chris Ashwell, Director

University Fellowships Office (UFO)

The University Fellowships Office (UFO)—formerly called the Fellowship Advising Office—helps NC State’s undergraduate students, graduate students, and alums learn of and apply for nationally competitive and prestigious awards. These awards fund a wide range of opportunities, and many are connected to undergraduate and graduate degree programs or internships, overseas opportunities, and independent projects.

Some of our services include:

- Meeting with candidates to discuss their goals and interests and to help identify matching opportunities
- Reviewing and critiquing drafts of application essays and statements
- Providing institutional endorsements for applicants who receive the campus nomination (for the awards that require nominations/endorsements)
- Submitting application materials at the national level on behalf of applicants
- Staging practice interviews for applicants selected at the national level for finalist interviews

Courtney Hughes, Director

University Housing

Living on Campus

Living on campus is an essential part of the Wolfpack experience: that’s why students are required to live in University Housing their first year.

When you live on campus, you’ll be at the heart of the Wolfpack nation, making it easy to be a part of all that NC State has to offer. Whether you’re looking for the close-knit community of a village (https://villages.dasa.ncsu.edu/) or the diverse social opportunity of a traditional residence hall, we have the housing option (https://housing.dasa.ncsu.edu/find-a-community/) that’s right for you. With a selection of 20 residence halls (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/) and four on-campus apartment communities (https://housing.dasa.ncsu.edu/find-a-community/apartment-options/), you’ll enjoy the once-in-a-lifetime opportunity to live in the heart of NC State.

Get Started with University Housing

Incoming First-Year Students

1. **Apply for housing**: You should complete your University Housing and Living and Learning Village application as soon as possible. Students who have received acceptance for the Fall semester may access the housing application through the Campus Living section on MyPack Portal (https://mypack.ncsu.edu/). If you decide not to attend NC State, you can cancel your housing application without penalties. Space is assigned in the order in which applications are received. If you have a preferred building or roommate already in mind, an early application will help you get them.

2. **Choose a place to live**: You have a lot of options to choose from, ranging from residence halls to our Wolf Village Apartments. Find
the ones that you like best (https://housing.dasa.ncsu.edu/find-a-community/).

Incoming Transfer Students

Due to the first-year live-on requirement that began in 2017, space is very limited for upper-class students. There are options available, however. NC State has two Living and Learning Villages that reserve space for transfer students.

1. Located in Wolf Village Apartments (https://housing.dasa.ncsu.edu/find-a-community/apartment-options/wolf-village-apartments/) on the main campus, the Second-year Transitions And Transfer Experience (S.T.A.T.E.) Village (https://villages.dasa.ncsu.edu/village-options/state-village/) connects students to a variety of campus resources and programming meant to navigate their years following their freshman experience.

Undergraduate students must be enrolled in at least 12 credit hours to be eligible to live on campus during the fall and spring terms. Students who must drop below these minimum requirements should contact University Housing to request an exception. Summer session housing (https://housing.dasa.ncsu.edu/current-residents/summer-housing/) is also available.

More Information

For more information about living on campus, visit:

University Housing
Monday - Friday | 8:00 a.m. to 5:00 p.m.
1112 Pullen Hall

Phone: 919.515.2440
Web: housing.ncsu.edu (https://housing.ncsu.edu/)

Living and Learning Villages

NC State’s Living and Learning Villages are interested-based living communities that engage students both inside and outside the classroom. Villages provide an unparalleled living experience where you’ll make lifelong friends and immerse yourself in the NC State community. There is currently no additional cost to join a village.

The Albright Entrepreneurs Village provides sophomores, juniors, seniors and graduate students across all academic disciplines the opportunity to live, socialize and work with entrepreneurial-minded students. Residents can explore and develop their entrepreneurial interests in an environment that fosters creativity.

Creative, vibrant and colorful only begin to describe the experiences you’ll have as you explore theater, visual arts, crafts, music, dance and more.

BMI strives to establish a brotherhood and develop leaders among black male students. By promoting academic success, personal growth, professional development, and self-responsibility, the group breaks through negative stereotypes and combats challenges facing African-American males in today’s society.

EcoVillage is a first-year student program that welcomes students from all majors, creating both a multi-disciplinary and an inter-disciplinary educational experience that prepares students for lifelong sustainable leadership, engagement, advocacy, and discovery.

The Engineering Village is an extension to the College of Engineering’s First-Year Engineering (https://www.engr.ncsu.edu/academics/undergrad/firstyear/) program introducing students to the field of engineering; encouraging thoughtful consideration to complex challenges facing our communities.

The Exploratory Studies Village is for students entering the university who are knowingly undecided about a major. A year of guided inquiry and exploration coupled with one-on-one sessions with their academic advisor helps move students through the career planning and decision-making process.

Global Village is a living and learning community for those interested in living and interacting with people from different backgrounds, experiences, countries, and viewpoints.

Honors and Scholars Village (https://villages.dasa.ncsu.edu/village-options/honors-and-scholars-village/) - Live in Berry, Becton or Bagwell Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/berry-hall/)

Honors Village and Scholars Village merged in 2017 to become Honors and Scholars Village (https://dasa.ncsu.edu/honors-scholars/). The most noticeable change being that Scholars Village residents will be relocating from Sullivan Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/sullivan-hall/) to east campus beginning Fall 2018. Students from both the University Honors Program (https://honors.dasa.ncsu.edu/) (UHP) and the University Scholars Program (https://scholars.dasa.ncsu.edu/) (USP) will now live together in the Honors Commons. The move will provide village residents with the opportunity to live and learn in a vibrant, socially and intellectually stimulating environment that fosters mindful interaction.

ILV provides experiential learning for students who have a passion for leadership and service. Students are given the opportunity to engage in practical application of leadership to real-world issues and explore leadership development through one on one sessions with professionals. ILV enhances students’ college experience and prepares leaders to make their personal IMPACT on the state, nation, and the world.

Students living in the Native Space community will demonstrate growth and learning along three focal points of the living experience: culture, academics and community engagement. Residents will find a deeper awareness of Native American history and drive cultural awareness through participation in Native American Heritage Month and the annual NC State Pow Wow.

SAY Village is a community for first-year students in any academic discipline who have a passion for working with youth. Students develop one-on-one mentoring relationships with local elementary school students and learn what it means to be a youth advocate.

Provides second-year and transfer students with opportunities to make the most of their NC State experience by focusing on the six core pillars essential to student success: academic success, career development, community and global engagement, diversity, leadership, and life skills.

Encourages and promotes the development and maintenance of a healthy body, mind, and spirit through a wide array of wellness programs and events. Students have the opportunity to experience personal growth while learning about the seven dimensions of wellness.

WISE Village was created for female freshman and sophomore students majoring in science, technology, engineering, and mathematics. Membership in WISE provides a powerful networking opportunity with other goal-oriented women as you pursue your STEM major.

WOW Village enhances women's leadership outside the classroom through empowerment, leadership development, self-awareness and diversity/social justice. WOW creates a holistic community that fosters individual women's growth and development while challenging residents to act as citizens of a global community.

**University Tutorial Center (UTC)**

The University Tutorial Center provides free academic assistance to NC State undergraduate students enrolled for credit in many challenging 100- and 200- level math, physics, and chemistry classes. Several types of assistance are available that are designed to best meet the students' needs, including tutoring by appointment, group tutoring, and Supplemental Instruction (SI). In addition, Writing and Speaking consultations are available to both undergraduate and graduate students. They provide assistance to all students who need help at any stage of the writing process in the English language.

Students are eligible to become a tutor for the UTC if they have an established GPA of 3.25 or better and a least a B+ in the course(s) they wish to tutor. All new tutors are required to take USC 210, Introduction to College Tutoring, during the first semester of employment. All tutors are trained in techniques that are designed to help students become independent learners.

**Wellness and Recreation**

**About Wellness and Recreation**

The Department of Wellness and Recreation is proud to be a leader of well-being at NC State. We value the impact of movement and inspire behaviors that improve health and well-being. Our programs, services and facilities enhance academic success by assisting students in developing skills and resilience needed for college and beyond.

**Programs and Services**

Take one of the more than 100 Group Fitness (https://wellrec.dasa.ncsu.edu/fitness/group-fitness-2/) classes offered each week, designed for every fitness level. Challenge yourself by taking cycling, TRX®, yoga, BODYPUMP™, Zumba® or a variety of other class formats and experience firsthand how we make fitness fun. Students can take their structured workout to the next level with Small Group Training (https://wellrec.dasa.ncsu.edu/fitness/training-services/small-group-training/), where our coaches lead workshops on Olympic lifting, boxing and more.

Receive one-on-one attention from our nationally-certified personal trainers (https://wellrec.dasa.ncsu.edu/fitness/training-services/personal-training/). Learn how to exercise, improve performance and establish fitness goals. No matter what your fitness level, we have a trainer who wants to work with you.

Our ThriveWell (https://wellrec.dasa.ncsu.edu/wellness-2/) program offers wellness coaching and health education programs for individuals and groups. Wellness coaching takes a holistic approach and discovers how personal wellness impacts student success, strengths, values and goals. Establish a wellness plan and stay accountable with a certified health coach. Learn stress management techniques, strategies and lifestyle modification tips from our team of experts.

Intramural Sports (https://wellrec.dasa.ncsu.edu/sports/intramural-sports/) offers more than 40 different leagues and events throughout the year. Sports range from flag football, basketball, soccer and volleyball to exciting and unique events such as pool battleship, bubble soccer and cricket. Create a team and compete for a championship, join a recreational league with friends or sign up for an individual/dual sport or special event to find a new favorite activity.

For students seeking a more competitive sports experience, check out one of the Club Sports (https://wellrec.dasa.ncsu.edu/sports/club-sports/) teams that include a wide variety of men’s, women’s and co-ed sports. These student-led organizations practice regularly and compete against other colleges and universities at local, state and national levels.

Outdoor Adventures (https://wellrec.dasa.ncsu.edu/outdoor-adventures/) offers students unique outdoor trips and educational clinics. Rent outdoor equipment from the Outdoor Adventures Equipment Rental Center or climb to new heights on the indoor climbing wall. Students can challenge themselves individually or build community with customized programs at our Challenge Course located in Schenck Memorial Forest.

Our Student Employment (https://wellrec.dasa.ncsu.edu/about-us-2/student-employment/) program supports more than 700 students employed annually through Wellness and Recreation. Students enhance their development by learning transferable skills that will prepare them for future careers.

**Carmichael Complex**

Carmichael (https://wellrec.dasa.ncsu.edu/facilities/) is a 300,000-square-foot facility designed to help students achieve their personal wellness, recreation and fitness goals.

Features include:

- Six Strength and Conditioning Centers (30,000-square-foot)
- Six Fitness/Activity Rooms
- 11 Indoor Basketball/ Multipurpose Courts
- 25-yard pool and dive well
- 50-meter pool
- Indoor climbing wall
- Indoor track
- 14 racquetball courts
- One squash court
- Personal training suite
- Men’s and women’s locker rooms
- Single occupant locker rooms
- Steam room
• Sauna
• Equipment Checkout
• Day-use lockers
• Social lounges

Wellness and Recreation manages numerous outdoor facilities that promote healthy, active living.

• Miller Outdoor Recreation Field
• Method Road Recreation Complex
• 12 outdoor tennis courts
• Four outdoor basketball courts
• FitGround outdoor functional training area
• Centennial Campus Recreation Fields
• Centennial Campus Disc Golf Course

**Wolfpack One Card**

The Wolfpack One Card is the official ID card for NC State students, faculty, staff and affiliates. The One Card allows NC State students to:

• Access meal plans
• Enter their residence hall or other buildings with restricted access
• Work out at the gym
• Check out books at the library
• Create and access their AllCampus account to make purchases at participating on-campus locations. All Campus funds are also used for Wolfprint (campus air printers). Wolfprint provides quick and easy printing at a variety of buildings across campus.

Incoming students receive their card during summer orientation. New graduate students will not receive ID cards during the New Graduate Student Orientation, and should visit the One Card office in Talley Student Union to obtain an ID card.

Students are encouraged to store their card in a safe and convenient location as they will use it often during the course of a day. Don't hole punch it or tumble it in a dryer to extend the life of the card. Replacement cards are $20.

To report a lost or stolen card, students should call or visit the Wolfpack One Card office or go online (http://onecard.ncsu.edu/). The office is located on the main level of Talley Student Union. Students can also stop by to ask questions about the many features of the ID card during regular business hours: Monday - Friday from 8 a.m. - 6 p.m.

For more information, call us at 919.515.3090 or visit the Wolfpack One Card website (https://onecard.ncsu.edu/).
Graduate instruction was first offered at North Carolina State University in 1893, and the first doctoral degree was conferred in 1926. In the ensuing years, the Graduate School has grown steadily and now provides instruction and facilities for advanced study and research in the fields of agriculture and life sciences, design, education, engineering, natural resources, humanities and social sciences, management, physical and mathematical sciences, textiles and veterinary medicine.

The Graduate School is currently composed of more than 2,400 graduate faculty members. Educated at major universities throughout the world and established both in advanced teaching and research, these scholars guide the University’s more than 7,000 master’s and doctoral students from all areas of the U.S. and many other countries. The faculty and students have available exceptional facilities, including libraries, laboratories, modern equipment and special research areas.

Additionally, a cooperative agreement exists among the Graduate Schools of the University of North Carolina at Chapel Hill, the University of North Carolina at Greensboro, Duke University, and North Carolina State University which increases the educational and research possibilities associated with each institution.

The Graduate Catalog contains Graduate School requirements and pertinent information for individual graduate programs, a current list of graduate faculty, and a selection of other resources for new students. The Catalog is informational only and is subject to change. Official policies and procedures are in the Graduate Handbook (p. 638) and on the NC State Policies, Rules, and Regulations (https://policies.ncsu.edu/) web site.

• Molecular Biotechnology (Certificate) (p. 188)
• Watershed Assessment and Restoration (Certificate) (p. 189)
• Youth Development and Leadership (Certificate) (p. 188)

Agricultural and Extension Education

Our graduate programs offer flexibility and enable graduates to pursue diverse career options. Prepare for a career teaching agricultural education to middle or high school students, or become an Extension agent helping farmers and families succeed in their communities. Pursue other rewarding positions such as agricultural museum curators, environmental educators, agricultural missionaries, agricultural public relations representatives, or congressional officers.

The following graduate programs in Agricultural and Extension Education are available:

• Graduate Certificate in Agricultural and Extension Education (requires 15 hours)
• Master of Science in Agricultural and Extension Education (requires 36 hours including a thesis)
• Master of Agricultural and Extension Education (requires 36 hours; can be taken as an on-campus degree or a 100% internet-based degree program)
• Sixth-Year Certificate in Agricultural Education
• Doctor of Education in Agricultural and Extension Education (requires 72 hours)

Admission Requirements

• A minimum undergraduate GPA of 3.0 for Masters applicants; a minimum graduate GPA of 3.5 for Doctoral applicants
• A minimum GRE combined General Test score of 300 and 4.0 or better on the GRE Analytical Writing Test for master’s applicants. (GRE scores can be waived for Master’s applications with the completion of a 3.0 or higher in six credit hours of graduate-level coursework) The GRE is not required for doctoral applicants beginning Spring 2021.
• Three letters of recommendation
• A statement of purpose: Prospective graduate students will draft a statement of purpose for graduate work. If the student intends to complete a thesis or dissertation, the statement should also indicate the nature of potential research work, including possible topics or questions, and minimally two professors from the Agricultural and Human Science department whose research areas potentially align with those possible research topics. Prospective students should plan to meet with faculty prior to submitting their applications to discuss the research with those professors and include those ideas in the statement.

Master’s Degree Requirements

The Department offers an M.S. degree, which requires a thesis for which the student receives six hours of credit, and a Master of Agricultural and Extension Education (M.R.) as a non-thesis track. Both Master’s degree programs require a total of 36 credit hours. The student’s advisory committee will meet with the student to determine the appropriate courses for their Plan of Work. Minors are optional but, if selected, require a minimum of nine credit hours.

Graduate Certificate Requirements

The Department also offers a graduate certificate in agricultural and extension education. This certificate program involves completion of 15 credit hours divided into two focuses: Agricultural Education and Extension Education.

Sixth-Year Certificate

The Department offers an array of courses that are recognized by the NC Department of Public Instruction as comprising a Sixth-Year Certificate. Students are required to complete 24 hours of advanced graduate work past the Master’s degree. Contact the Director of Graduate Programs for details.

Doctoral Degree Requirements

A Doctor of Education (Ed.D.) degree in Agricultural and Extension Education is offered. A minimum of 72 hours past the Bachelor’s degree is required. More hours may be required based upon the past degrees and experiences of the candidate. The student’s graduate committee will determine the specific courses needed. At least six hours of statistics is required. Twelve hours of credit is earned for writing the dissertation (AEE 895). The student’s advisory committee will meet with the student to determine the appropriate courses for their Plan of Work.

Student Financial Support

A limited number of research and/or teaching assistantships are available on a competitive basis. Applications for open positions are due in January for the following academic year. Other financial aid is available from the Office of Financial Aid and on a competitive basis from the Graduate School.

Faculty

Full Professors
Koralalage Sunil Upali Jayaratne
Barbara Kirby
These can be in AEE or in disciplines such as Animal Science, Crop Science, Horticulture, Entomology, Forestry, and Youth Development and Family Life Education, among others. Although it is not required, students can also declare a minor. Students will need to take 9-12 hours in a specialty and work with a professor from that area.

Agricultural and Extension Education (Certificate)
The Department of Agricultural and Extension Education offers a Graduate Certificate in Agricultural and Extension Education. The program focuses on developing knowledge and skills needed to be effective teachers of agriculture in the public schools and community colleges or to work as an educator with the Cooperative Extension Service or in other non-formal educational settings such as public gardens, nature centers and in international development.

Admissions
Students apply online by visiting the Graduate School’s website and completing an ApplyYourself online application. Students currently in a graduate degree program should contact the program director for information regarding adding the certificate program to an existing degree program.

Requirements
The certificate program involves completion of 15 credit hours and the preparation of a professional portfolio. The career goals of the student will determine which sequence of courses to take.

Plan Requirements
The Graduate Certificate in Agricultural and Extension Education is divided into two focuses: Agricultural Education and Extension Education.

Certificates earned will be distributed as: “Graduate Certificate in Agricultural Education and Extension Education” without focus area specifications.

Total Hours 15

Animal Science
Animal science offers an opportunity for training in a diversity of basic sciences and the integration of such knowledge into the framework of a living system. Students can major in animal science or co-major in animal science and one of the following disciplines: biochemistry, genomics, genetics, microbiology, nutrition, physiology or statistics. Students can also concentrate in management and production areas.

Admission Requirements
Factors considered for admission include: grade point average, scores on the GRE, undergraduate courses, experiences, statement of interest, and
letters of recommendation. In addition, a member of the Animal Science Graduate Faculty must be willing to serve as the applicant’s advisor for the M.S. program.

**Master of Science**

A minimum of 30 credit hours, including 18 hours of graduate level course work in the degree program, is required. Students also complete and defend a thesis based on their research. The minor is optional. If a student selects a minor, the advisory committee must include a member from the minor field.

**Master of Animal Science**

The non-thesis Master of Animal Science (MR) degree (Option B) requires a minimum of 36 credit hours, 19 credits of core courses and 17 credits of elective courses. Additional information regarding core courses and elective course requirements is on the Animal Science Graduate Program (https://cals.ncsu.edu/animal-science/students/graduate/) web site. The MR degree program is also offered through distance education.

**Student Financial Support**

A limited number of research and teaching assistantships are available through the department and are awarded on a competitive basis. Students are also supported by research grant funds awarded to faculty members. The total support package includes health insurance, tuition, and a stipend. Students applying for assistantships should apply by January 31 for fall admission.

**Other Relevant Information**

To provide an opportunity for students to develop their teaching skills, graduate students in a program that includes a thesis are required to assist in the departmental teaching program regardless of source of financial support. All graduate students in the Department of Animal Science who are mentored by departmental graduate faculty members are required to teach a minimum of one semester during their M.S. program.

**Degrees**

- Animal Science (MR) (p. 77)
- Animal Science (MS) (p. 83)
- Animal Science (Minor) (p. 84)

- **ZO 582** Medical and Veterinary Entomology (3 credits)
- **ZO 790** Special Topics (1-6 credits)
- **ZO 791** Topics In Animal Behavior (3 credits)

### Additional Requirements
- 17 Credits [link](https://cals.ncsu.edu/animal-science/wp-content/uploads/sites/3/2018/05/MAS-Elective-Courses.pdf) of elective courses
- No more than two (2) credit hours of a seminar to be included in the 36 credit hour total
- A minimum of one full academic year or its equivalent in residence as a graduate student at the university
- The non-thesis Master of Animal Science degree requires a minimum of 36 credit hours, of which a minimum of 9 credits are in Animal Science courses at the 500 or above level
- Non-thesis programs may include no more than three (3) hours of independent student study credits of special topics project (ANS 610) in the minimum 36-credit program
- Research credit is not permitted in non-thesis programs, except upon approval by an associate dean of the Graduate School in cases where the student was initially enrolled in a thesis program but later transferred to a non-thesis program
- 400-level ANS courses are not permitted in a graduate plan of work
- No more than six (6) hours of 400-level courses from outside departments may be counted toward the 36-credit hour requirement
- Non-Thesis Masters Examination (ANS 690) credits may not be used to satisfy the 36-credit hour requirement
- Non-Thesis Masters Continuous Registration (ANS 688 and ANS 689) credits may NOT be used to satisfy the 36-credit hour requirement
- No more than three (3) credit hours of Masters supervised teaching (ANS 685) may be included in the minimum 36-credit hour program
- A graduate mentor (advisor) is required
- Mentor certification of a graduate plan of work and program completion
- Meet with the graduate mentor at last once per semester
• Complete the annual graduate student progress report
• Committee not required, oral examination not required
• The director of graduate programs (https://cals.ncsu.edu/animal-science/people/Joan/) and the Graduate School (https://grad.ncsu.edu/) must approve the graduate plan of work

Graduate Elective Courses 18
Select any 500 - 700 level courses determined in conjunction with the advisory committee.

Elective Courses 1
Select any "Elective Courses" determined in conjunction with the advisory committee.

Total Hours 30

1 Students may choose 8 credits in combination of: ANS 693 Master's Supervised Research/ANS 695 Master's Thesis Research, Seminar, ANS 685 Master's Supervised Teaching, and other elective graded courses.

Additional Requirements & Restrictions

- A minimum of one (1) full academic year or its equivalent in residence as a graduate student at the university
- A minimum of 30 semester hours of graduate work in the degree program, unless the specific program requires more hours, including a minimum of 18 hours of 500-700 level coursework
- No more than six (6) hours of 400-level courses can be counted toward the minimum 30-hour requirement, and they may not come from the major field
- No more than three (3) credit hours of Masters Supervised Teaching (ANS 685) can be included in the minimum 30-credit program
- No more than six hours of Thesis Research (ANS 693 Master’s Supervised Research/ANS 695 Master’s Thesis Research) in the minimum 30-hour program
- No more than two (2) credit hours of seminar (S/U graded) may be included in the minimum 30-credit hour program
- Masters Thesis Preparation (ANS 699) credits may not be used to satisfy the 30-credit hour requirement
- A thesis
- A departmental defense seminar
- A comprehensive oral examination

Animal Science and Poultry Science

A doctoral degree in Animal Science and Poultry Science with a concentration in either Animal Science or Poultry Science is offered. Specific course requirements are flexible and each student's program is developed in consultation with their Ph.D. advisory committee. The minor is optional but if a minor is included, external faculty representation is required on the advisory committee.

There are two curriculum codes for the Animal Science and Poultry Science doctoral degree program. If a student is interested in a program concentration in Animal Science, the appropriate curriculum code for the admissions application is ANA. If the student is interested in a program concentration in Poultry Science, the appropriate curriculum code for the admissions application is ANP. If the appropriate curriculum code is not selected, it will delay the department's receipt of the applicant's information from the Graduate School.

Note: The Master's programs in Animal Science or Poultry Science are administered independently by each department.

Animal Science Concentration (ANA)

Admission Requirements
Factors considered for admission include: grade point average, scores on the GRE, undergraduate and graduate courses, experiences, statement of interest, and letters of recommendation. In addition, a member of the Department of Animal Science Graduate Faculty must be willing to serve as the applicant's advisor.

Student Financial Support
The Department of Animal Science offers a limited number of research and teaching assistantships that are awarded on a competitive basis. Students are also supported by research grant funds awarded to faculty members. The total support package includes health insurance, tuition, and a stipend. Students applying for these assistantships should apply by January 31 for fall admission.

Other Relevant Information
To provide an opportunity for students to develop their teaching skills, graduate students are required to assist in the departmental teaching program regardless of source of financial support. All graduate students in the Department of Animal Science who are mentored by departmental graduate faculty members are required to teach a minimum of one semester during their Ph.D. program.

Biochemistry

Biochemistry as a discipline serves a pivotal role in advancing research in the Life Sciences. Through a combination of coursework, seminars, and original research, you will complete a Graduate degree and acquire the skills needed to become an independent research scientist. Our major research training areas emphasize:

- Structural and Analytical Biochemistry
- Molecular and Systems Biology
- Metabolism and Disease

**Brief Overview of Programs**

- The accelerated Bachelor’s / Master’s Degree (ABM) is a 5-year dual degree program intended for undergraduate majors who wish to continue beyond the B.S. degree and receive additional training at the graduate level. Interested students who meet the minimum University GPA requirement are typically accepted into the program at the end of their junior year of undergraduate study. The Master's degree obtained after 5 years may be a Master's of Biochemistry (non-thesis) or a Master's of Science (thesis research) depending upon the selection made by the student.
- The Master's of Biochemistry is a non-thesis alternative to the Master's of Science degree in Biochemistry for students wishing to emphasize course work rather than thesis research. The Master’s of Biochemistry is a terminal graduate degree and is not appropriate for students intending to pursue a Ph.D. program.
- The Master’s of Science is a research degree that prepares students in Biochemistry for Ph.D. studies or provides training for technical employment.
- The objective of the Ph.D. program is to prepare students for careers as researchers primarily in academic, industrial, or government research environments.

**Admission Requirements**

Students entering the graduate program in biochemistry should have a bachelor's degree in biochemistry, chemistry or a related physical or biological science, including undergraduate courses in organic chemistry, calculus, physics and physical chemistry, as well as biochemistry/molecular biology. Applicants with a strong record of undergraduate research activity or with practical experience in a professional scientific setting are particularly encouraged to apply. Reporting of GRE scores is strongly encouraged.
ABM Specific Admission Requirements

- a minimum of seventy-five credit hours in their undergraduate programs, including credits earned from advanced placement, but prior to the completion of their bachelor’s.
- a minimum overall undergraduate grade point average (GPA) of 3.500 at NC State at the time of admission into the ABM program.
- (This GPA must be maintained throughout their undergraduate program to remain in the ABM program.)
- receive a grade of B or better in the double counted graduate-level courses (500 or 700 level) while maintaining a 3.50 GPA.
- (Courses with a grade of B- or below cannot be double counted between the two degrees.)
- maintain a 3.50 or better Biochemistry Major GPA.
- be positioned to complete the BS degree requirements by the end of their fourth year, and formally apply for admission to the Graduate School.
- one letter of recommendation from the proposed faculty mentor, indicating the qualifications of the student and willingness to serve as the Master’s advisor.

<td>BCH 710</td>
<td>Biological Scanning Electron Microscopy</td>
<td>3</td>
</tr>
<tr>
<td>BCH 751</td>
<td>Biophysical Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>BCH 760</td>
<td>Protein Crystallography and Macromolecular Modeling</td>
<td>3</td>
</tr>
</tbody>
</table>

## Additional Requirements

- Successful completion of the M.S. degree requires a minimum of 30 credit hours.
- At least 18 credit hours of letter-graded courses (“A,” “B,” “C”, etc.) must be included in the program.

# Accelerated Bachelor's/Master's Degree Requirements

In addition to the standard University and Biochemistry requirements for a B.S. in Biochemistry, students must complete 30 credit hours at the graduate level for the Master’s degree component. This is accomplished as outlined below:

## Undergraduate Core Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BCH 552</td>
<td>Experimental Biochemistry</td>
<td>3</td>
</tr>
<tr>
<td>BCH 553</td>
<td>Biochemistry of Gene Expression</td>
<td>3</td>
</tr>
<tr>
<td>BCH 555</td>
<td>Proteins and Molecular Mechanisms</td>
<td>3</td>
</tr>
<tr>
<td>BCH 560</td>
<td>Molecular Biology for Teachers</td>
<td>3</td>
</tr>
<tr>
<td>BCH 571</td>
<td>Regulation of Metabolism</td>
<td>3</td>
</tr>
<tr>
<td>BCH 590</td>
<td>Special Topics in Biochemistry</td>
<td>3</td>
</tr>
</tbody>
</table>

## 400-level Courses with a 500-level Counterpart

- BCH 701 Macromolecular Structure
- BCH 703 Macromolecular Synthesis and Regulation
- BCH 705 Molecular Biology Of the Cell

Select one additional course:

- GN 701 Molecular Genetics
- BCH/GN 761 Advanced Molecular Biology Of the Cell
- MB 714 Microbial Metabolic Regulation
- MB 718 Introductory Virology
- PO 757 Comparative Immunology

## Master's Thesis Research

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BCH 685</td>
<td>Master's Supervised Teaching</td>
<td>3</td>
</tr>
<tr>
<td>BCH 693</td>
<td>Master's Supervised Research</td>
<td>3</td>
</tr>
<tr>
<td>BCH 695</td>
<td>Master's Thesis Research</td>
<td>3</td>
</tr>
</tbody>
</table>

## Total Hours

30

1. Indicates courses double counted for both Bachelor's and Master's degree
2. Students may choose other courses approved in conjunction with the academic committee

## 400/500-Level Courses

Select two courses listed below:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CH 463/563</td>
<td>Molecular Origins of Life</td>
<td>3</td>
</tr>
<tr>
<td>BIO 488/588</td>
<td>Neurobiology</td>
<td>3</td>
</tr>
<tr>
<td>GN 441/541</td>
<td>Human and Biomedical Genetics</td>
<td>3</td>
</tr>
</tbody>
</table>

- Daniela Jones
- Chad Ashley Poole
- Natalie G. Nelson Sagues
- Chadi Sayde

Admission Requirements

A baccalaureate in biological or agricultural engineering or other engineering discipline (GPA > 2.8) is the preferred prerequisite for admission. Those with a strong academic background in the physical or biological sciences may also be admitted with a requirement for undergraduate work in math, physics, chemistry and basic engineering courses. In the case of applicants with Master's degrees, a Master's GPA of at least 3.2 is required for admission to the PhD. Exceptions to the overall undergraduate GPA requirements may be made for cases where performance in the major or during the last two years was at or above the 3.00 level.

Applicants who do not have an engineering background, but have earned a degree in an appropriate science discipline may be admitted to the Systems Analysis Concentration in the MS or PhD program without completing the engineering prerequisites.

GRE scores are required for all applicants. A faculty review committee will admit the best-qualified applicants.

Students must select a minimum of two courses from the following:

Faculty
Full Professors
Michael D. Boyette
Michael R. Burchell II
Jay Jiayang Cheng
Mari S. Chinn
Garey Alton Fox
Scott A. Hale
William F. Hunt III
Lingjuan Wang Li
Gary T. Roberson
Sanjay Bikram Shah
Mohamed A. Youssef
Wenqiao Yuan

Associate Professors
Francois Philippe Birgand
John J. Classen
Barbara A. Doll

Emeritus Faculty
George Maynard Chescheir III
Robert O. Evans Jr.
Garry L. Grabow
Rodney L. Huffman
Gregory Donald Jennings
Richard W. Skaggs
Jean Spooner
Larry F. Stikeleather
Daniel H. Willits

Practice/Research/Teaching Professors
Otto DeBruhl Simmons III
Areas of study include: cell biology, physiology, ecology, evolution, behavior, and fisheries, wildlife and conservation biology. Specializations within these areas include developmental biology, neurobiology, genomics, invertebrate biology, animal reproduction, biorhythms, behavioral ecology, community ecology, population ecology, conservation biology, fisheries ecology, wildlife field studies, aquaculture and others.

Application Deadlines
To guarantee consideration for funding, applications should be complete by the following dates: for Fall Semester admission both U.S. and international applicants should have their application materials completed by January 15; for Spring Semester the deadline is October 15 for U.S. applicants and international applicants. Please note that it typically requires four to six weeks from the date of your request until transcripts and letters of recommendation reach us. Applications received after the dates listed above will still be considered until the Graduate School deadlines (June 25 and November 25 for U.S. applicants, March 1 and July 15 for international applicants); however, opportunities for funding may be limited (note that the Biology Graduate Program does not accept M.S. and Ph.D. students without support).

Admission Requirements
It is important that you identify a potential faculty adviser, as this will greatly increase your chance of admission to NCSU’s Biology Graduate Program. Although all applications are made available to faculty advisers for review, a graduate student will not be admitted to the Biology Program for graduate studies unless the prospective student has identified a faculty adviser. Once a faculty adviser has requested review of a prospective student, the application is then evaluated with regard to the applicant’s potential for success in graduate school. The admissions process involves consideration of the ability of our program to accommodate students.

Successful applicants usually have a Bachelor’s degree in Biological Sciences or a related field with at least an overall B average and a minimum number of courses in biology (and related fields) and supporting fields (6 in biology, 4 in chemistry, 2 in physics, and 2 in mathematics). In addition to the applicant’s grades and coursework, we consider relevant experience (e.g., through internships, research experiences, volunteer or paid work, and publications), statement of interest, and letters of recommendation. GRE scores are not required. We expect applicants for the MS degree to have at least a 3.0 GPA, and applicants for the PhD degree to have at least a 3.2 GPA. Research experience is highly recommended.

Master’s Degree Requirements
AEC 502 and PHI 816 (or equivalent) are required. No more than six hours of temporary courses (AEC 624, BIO 624, INB 624, BIO 824) or two hours of departmental seminar can be included in the 30-hour requirement for the M.S. Six hours of research credits (INB 695) resulting in a thesis are required. A minor (usually 9-10 hours) is optional. Other requirements may be imposed by the advisor.

Doctoral Degree Requirements
AEC 502 and PHI 816 (or equivalent) are required. A student’s advisory committee recommends appropriate courses which will provide a strong foundation in the student’s area of interest. A minimum of 10 hours of research (INB 895) leading to a dissertation is required. A minor (usually 9-10 hours) is optional. Other requirements may be imposed by the advisor.

Concentrations
Students in all Biology Degree Programs must select a Concentration. Concentrations include Aquaculture and Aquatic Sciences, Molecular, Cellular and Developmental Biology, Ecology and Evolution, Forensic Sciences, Integrative Biology, Physiology and Behavior, and Zoology.
Consult the Biology Graduate Program Handbook for Concentration-specific requirements.

**Student Financial Support**
Graduate teaching and research assistantships are available to well-qualified M.R., M.S. and Ph.D. students.

**Other Relevant Information**
Excellent research facilities, equipment and computers are available. Off-campus research is conducted at the Pamlico Aquaculture Field Laboratory, research and extension centers in Eastern and Western North Carolina, the Center for Marine Science and Technology in Morehead City, and at facilities of state and federal agencies and private organizations. Field work can be conducted at nearby natural areas and laboratory work at various state and federal laboratories associated with the department, nationally, and internationally. For additional information see the Biology Graduate Program web pages: [https://cals.ncsu.edu/applied-ecology/students/graduate/biology/](https://cals.ncsu.edu/applied-ecology/students/graduate/biology/) and [https://bio.sciences.ncsu.edu/graduate/graduate-programs/Biology](https://bio.sciences.ncsu.edu/graduate/graduate-programs/Biology/).

Biology (MS)

Degree Requirements
Students may choose from the degree tracks below to complete coursework within a focus area.

Degrees earned will be distributed as: “Master of Science in Biology” without track specifications.

Additional Courses are determined in conjunction with the academic committee to meet the 30 total hours

Total Hours 30

1 Students may take PHI 816 Introduction to Research Ethics or equivalent to meet this requirement.

Aquaculture and Aquatic Sciences Track

Total Hours  9

Other Requirements

- Every student is required to complete training logs. Many of the modules can be completed while taking the BIO 520 course. Please contact the Forensic Sciences Concentration Chair for additional information.
- Students are also required to start the Training Case Record Form after their first year and/or after taking BIO 520, whichever comes first. Please contact the Forensic Sciences Concentration Chair for additional information.
- Forensic Anthropology Society of Europe Level II Certification is strongly recommended but not required- costs associated with this exam are the student’s responsibility.

Integrative Biology Track

This concentration is open to MS and PhD students who do not fit academically within the other Biology concentrations, or who integrate across multiple concentrations. Coursework is determined in consultation with your PhD mentor and committee and is approved by the DGP.

**Additional Courses 63**

Additional courses are determined in conjunction with the academic committee to meet the 72 total hours.

**Total Hours 72**

1 Students may take PHI 816 Introduction to Research Ethics or equivalent to meet this requirement.

### Integrative Biology Track

This concentration is open to MS and PhD students who do not fit academically within the other Biology concentrations, or who integrate across multiple concentrations. Coursework is determined in consultation with your PhD mentor and committee and is approved by the DGP.

### Full Professors

- David Derek Aday
- Betty L. Black
- Russell J. Borski
- David Buchwalter
- Jeffrey A. Buckel
- Ignazio Carbone
- Jaime A. Collazo
- William Gregory Cope
- Harry Valentine Daniels III
- Robert R. Dunn
- David B. Eggleston
- John R. Godwin
- Kevin Gross
- Craig A. Harms
- Jeffrey M. Hinshaw
- Rebecca Elizabeth Irwin
- Thomas J. Kwak
- Thomas M. Losordo
- Carolyn Jane Mattingly
- Heather B. Patisaul
- Luis Alonso Ramirez-Ulate
- Ann Helen Ross
- Mary Higby Schweitzer
- David R. Tarpy

### Associate Professors

- Scott M. Belcher
- Adam Hartstone-Rose
- Randall Brian Langerhans
- John Edward Meitzen
- Nanette M. Nascone-Yoder
- Marianne Niedzlek-Feaver
- Antonio Plancharth
- Reade Bruce Roberts

### Assistant Professors

- Jie Cao
- Kurt Marsden
- Jamian Krishna Pacifici
- Seema Nayan Sheth
- Caitlin Suzanne Smukowski Heil
- Bradley William Taylor
- Christopher Scott Walker
- Elsa Youngsteadt

### Practice/Research/Teaching Professors

- Jennifer L. Campbell
- Louis Broaddus Daniel III
- Miles Dean Engell
- Miriam G. Ferzli
- Jesse Robert Fischer
- Terry Allen Gates
- William Miller Johnstone III
- Jane L. Lubischer
- Erin Alison McKenney
- Lisa M. Paciulli
- Lisa D. Parks
- Martha Burford Reiskind
Crop Science

The Graduate Program in Crop Science revolves around our vision of being a world leader in Crop Science education and in the generation and application of knowledge required for economically and environmentally sustainable crop systems and products, as well as in developing land management strategies that protect the quality of North Carolina’s soil, water and air resources.

Our mission within the Graduate program is to develop future leaders in Crop Science with a focus on improving crop plants and products, devising effective and sustainable crop production systems and effective and sustainable management techniques in both agricultural and urban settings; and dissemination of crop science knowledge for the benefit of users and producers of food, feed, turf, biofuels and fiber in North Carolina, the nation and the world.

The specific program areas in which Graduate education focuses are crop management and physiology, plant breeding and genetics, weed science, alternative crops and pesticide fate and impact on the environment.

Entrance requirements for the Graduate program in Crop Science follow the NC State Graduate School guidelines. A minimum of a 3.0 GPA at the Baccalaureate or master’s level is required, although exceptions may be made for master’s applicants with a very strong GPA in science classes and/or their final two years, or with substantial post-baccalaureate work experience. Students accepted will typically have a bachelor’s or master’s degree in crop science, or closely related fields, with strong preparation in the biological and physical sciences. The Graduate Record Examination is also required but there is no minimum score on any of the sections.

Financial assistance in the form of a Graduate Assistantship is available for most of the students accepted into the program. However, funding is limited and positions are highly competitive within a major professor’s program area. It is recommended that applicants review the department’s faculty listing and communicate directly with faculty members who have similar interest to theirs.
Degrees

Entomology

Course offerings or research facilities are available in the following areas: agricultural entomology, apiculture, aquatic entomology, behavior, biological control, chemical ecology, forest entomology, genetic pest management, host-plant resistance, insect ecology, insect transmission of plant pathogens, insect microbe interactions, medical and veterinary entomology, pest management, physiology, molecular biology, population genetics, insect symbiosis, urban ecology, urban entomology, systematics and toxicology.

Admission Requirements

Training in biology and appropriate courses in chemistry, biochemistry, mathematics and physics, is preferred. A "B" average (3.0 GPA) is required in biology courses and an overall 3.0 GPA during the last two years of the undergraduate program.

Master's Degree Requirements

A minimum of 30 credits are required for graduation. 9 credits of letter grade entomology courses plus 2 credits of entomology student seminars are also required. The student's advisory committee will meet with the student to identify an appropriate plan of course work.

Doctoral Degree Requirements

A minimum of 72 credits (18 may be transferred from a Master's degree) are required for graduation. For Ph.D. students, 9 credits of letter grade entomology courses plus 3 credits of entomology student seminars are required. The student's advisory committee will meet with the student to identify an appropriate plan of course work.

Student Financial Support

Graduate assistantships and other forms of aid are available to students as described in the Fellowships and Graduate Assistantships section of the Graduate Catalog.

Other Relevant Information

Full admission is permitted only after acceptable applicants have secured an advisor and appropriate financial support. All students are expected to begin their research as soon as possible.

Participants in the minor will learn the basic concepts and principles underlying genetic engineering and the methods used for evaluating the technology's social, cultural and environmental dimensions. The graduate minor is available to students pursuing either an MS or a Ph.D. degree.

Requirements

In order to complete the minor, coursework must be taken in relevant areas of natural sciences and the humanities and social sciences. 9 credit hours from a list of approved courses (see below) are required, 6 of which must be two of the core GES courses. The remaining 3 credit hours must be fulfilled by a course from the list of approved courses that are outside the students' home discipline. A grade of B or higher must be achieved in each course counted towards the minor. In addition, a student must have a GES faculty member on his or her committee (see GES program homepage (https://research.ncsu.edu/ges/) for a list of the GES faculty), and this faculty member should be from a discipline other than the student’s major, ensuring that there is representation from both humanities/social science and natural science.

The choice of courses must be consistent with the interdisciplinary outlook of this minor, namely that students will learn the basic concepts and principles underlying genetic engineering and the methods used for evaluating the technology's social, cultural and environmental dimensions. The minor representative will be responsible for ensuring that the courses taken are appropriate and balance the student's major. Students in the biological sciences will be encouraged to take hands-on courses, such as those offered by the BIT program.

Food Science

The department's professional activities include teaching, research, and extension functions. The program provides an educational, research, and informational center in food science for North Carolina and the nation. The department also houses two research centers, the Southeast Dairy Foods Research Center and the Center for Advanced Processing and Packaging Studies. Course offerings and research opportunities are available in the following areas: chemistry-biochemistry, engineering, microbiology, nutrition and processing technology. The strategic directions of the faculty and staff are in the areas of: food safety and foodborne disease prevention; food manufacturing and entrepreneurship; instructional innovation and effectiveness; and, foods for health and well-being.

Admissions Requirements
To be admitted, a student should be a graduate of an accredited program in food science or the equivalent. Graduates of other majors can be admitted but will have additional course requirements. The best qualified applicants will be accepted up to the number of spaces that are available for new students. We only recommend admission to the M.S. or Ph.D. degree if a member of our research faculty is willing to advise the student's research. Applications from qualified candidates will be reviewed by faculty seeking research students; conversely applicants may contact faculty whose research specialty is of interest to inquire about available positions. Admission to the Master of Food Science will be based on the qualifications of the applicants.

Master's Degree Requirements
A Master's program must include courses from at least two of the following categories: chemistry-biochemistry, engineering, microbiology, nutrition and processing technology. The M. S. in Food Science requires 30 credit hours of course work and research. The Master of Food Science requires 36 credit hours of course work, including an independent project and professional skills.
Doctoral Degree Requirements
A doctoral program must include courses from at least three of the categories listed above (or equivalent courses at another university). Total course credits will vary depending on the needs of the student and the requirements of the Graduate School. All doctoral students are required to pass a departmentally administered written preliminary exam, designed to evaluate a Ph.D. student’s general knowledge and comprehension of food science.

Student Financial Support
Graduate assistantships and other forms of student aid available to students in this program are described elsewhere in the Graduate Catalog. Admission does not guarantee availability of financial support.

Other Relevant Information
Students are encouraged to make personal contact with individual faculty whose research program is of interest to them. Information describing each faculty member’s program is available at our website (http://ncsu.edu/foodscience/).

Horticultural Science

The Department offers graduate programs leading to the Master of Horticultural Science (non-thesis), Master of Science (thesis) and Doctor of Philosophy (thesis) degrees. Completion of the respective requirements normally takes 2 to 2 ½ years for the Masters and 3 to 3 ½ years for the Doctor of Philosophy. Studies may be oriented to floriculture, ornamental and landscape horticulture, pomology (fruit crops) or olericulture (vegetables). A variety of areas for study and research are available: plant physiology, breeding and genetics, herbicide physiology, nutrition, propagation, plant molecular biology and biotechnology, genomics, growth regulators, postharvest physiology, sustainable and organic agriculture, fruits, vegetables, floriculture, woody ornamentals, and landscape horticulture.

Facilities for graduate studies include 40,500 square feet of greenhouse space; the University Phytotron (available for controlled environmental studies on horticultural crops); 19 well-equipped laboratories; 14 controlled temperature storage rooms, an extensive collection of plant materials, both living and preserved; and a variety of climates and soils from coast to mountains in North Carolina on eighteen outlying research stations.

Admission to The Graduate School and the Department is competitive. Admission is usually limited to students with a grade point average of 3.00 or higher. Horticultural Science candidates should have completed course work in physics, mathematics (preferably calculus and statistics), chemistry, biochemistry, soils, plant pathology, genetics, plant physiology, entomology, genomics/bioinformatics, botany/plant biology, cellular biology, molecular biology and several courses in horticulture. Landscape Horticulture candidates should have a complete landscape design background. An applicant deficient in course work may be admitted on a provisional basis until the deficiency is made up. Applicants must provide the basic Graduate Record Examination (GRE) scores, three letters of reference, an unofficial transcript for each previous degree, a personal statement and resume/CV. Applicants from other countries must also furnish evidence of proficiency in English (TOEFL or IELTS). IELTS test date must be no older than two years (24 months) prior to the beginning of the requested entry term.

Financial assistance in the form of a Graduate Assistantship may be available for students accepted into the program. However, funding is limited and positions are highly competitive within a major professor’s program area. You should contact the faculty within the department that are working in your area of interest to inquire about assistantship availability. Students must have a confirmed advisor for admission to the program.

Degrees

- Horticultural Science (MR) (p. 137)
- Horticultural Science (MS) (p. 138)
- Horticultural Science (PhD) (p. 139)
- Horticultural Science (Certificate) (p. 141)
- Horticultural Science (Minor) (p. 139)

Additional Courses \(^3\)
Additional Courses are determined in conjunction with the academic committee to meet the 36 total hours

Total Hours 36

\(^1\) Students have the option to take courses equivalent to ST 511 and ST 512 determined in conjunction with the academic committee.

\(^2\) Core Courses are optional and may be substituted with courses determined in conjunction with the academic committee.

\(^3\) At least 18 of the 36 credit hours must be letter-graded coursework at the 500- and 700-levels.

Horticultural Science (Certificate)

The Graduate Certificate is a non-degree, designed to increase personal knowledge and skills for current or future employment in the horticulture industry. Earning the Graduate Certificate requires completing a minimum of 15 credit hours (usually equaling 5 courses) of coursework. Courses may be taken either on-line or face-to-face.

Participants must hold a bachelor’s degree to enroll in this program. Graduate Certificate applicants should have majored in horticulture, crop science, plant science, or agricultural education with a concentration in plant science, or another closely related degree. Students may begin taking courses for the graduate certificate in Summer, Fall, or Spring. All graduate certificate course work must be completed within four years of enrollment.

* Courses taught online
1 Students must take courses that meet the following requirements: must be at 500-level or higher, letter-graded, passed with a B or better
2 Students can select a maximum of 6 hours from the following subjects: ARE, AEE, BAE, CS, ENT, FS, PP, SCC; courses must be at 400-level or higher.
as foundational courses in microbiology, business management and molecular biology.

**Admission Requirements**

Applications are invited from individuals holding B.S. or M.S. degrees in the physical and life sciences. Applications should be received before May 1 to be considered for Fall semester admission. The Graduate Record Exam (GRE) is required and should be taken sufficiently early so that scores can be submitted and evaluated along with the application. Other requirements include all relevant transcripts, three letters of recommendation and a personal statement that describes the applicant’s career goals as well as why they are pursuing the MMB degree.

**Master’s Degree Requirements**

The Master of Microbial Biotechnology (MMB) degree requires 40 credit hours, including four semesters involvement in an Industry Case Studies course, as well as a summer industry internship. This program also can be combined with a Master of Business Administration (MBA) offered through the College of Management.

**Student Financial Support**

A limited number of full-time participants in the Master of Microbial Biotechnology program may be eligible for Teaching Assistantships. The number of TA positions available varies every semester and there are no guaranteed positions. Students in the MMB program should assume that they will self-fund their education.

Total Hours 40-41

1. Incoming students may be able to opt out of this requirement if they can provide sufficient evidence that indicates basic experience and understanding of technologies including recombinant DNA procedures, gene expression, isolation and identification of nucleic acids and proteins. Evidence may include a letter from current or former supervisors and/or professors attesting that the applicant possesses at least basic understanding and experience. Applicants with doctoral training in a related area may opt out of BIT 510 OR BEC 540, with MMB approval.

Microbiology

Microbiology is an integral part of the life science and biotechnology disciplines across the North Carolina State University campus. The Microbiology Graduate Program involves research and education in laboratories and departments that form inter-disciplinary teams to address critical, global challenges for science and society. The MGP (http://harvest.cals.ncsu.edu/microbiology/) offers courses of study and research leading to the Ph.D., M.S., Master of Microbiology (M.M.) and Master of Microbial Biotechnology (M.M.B.) degrees.

The research-based degrees (M.S and Ph.D.) offered by the program are designed to prepare students for careers in academic, industrial or research institute settings. Course offerings for Microbiology research students focus on microbial genetics and physiology, bioprocessing and fermentation, biotechnology, virology, immunology and host-pathogen interactions. Research throughout the program is diverse, emphasizing most areas where microbes, viruses and systems biology have relevance to basic science and biotechnology. Research opportunities for students involve many areas of specialization including biofuels, bioremediation, environmental microbiology, antibiotic resistance, extremophiles, bacterial pathogens, probiotics, developmental epigenetics, bacteriophages, inflammation modulation and viral pathogenesis; the list is long and broad. Financial support for study towards Ph.D. and M.S. degrees is limited, but can be available in the form of teaching/research assistantships and competitive fellowships.

The non-research-based Masters of Microbial Biotechnology (MMB) is a Professional Science Masters degree that combines concentrations in Microbiology, Business and Biotechnology. This degree is specifically designed to prepare students for positions in the biotechnology, biopharmaceutical and agribusiness industries. The program includes courses that involve semester-long interactions with local biotechnology companies as well as foundational courses in microbiology, business management and molecular biology. The M.M. degree is a rigorous non-thesis degree that is designed for students who want a higher degree in microbiology but do not want to conduct research or are unable to commit to the time demands of a research degree. Many students in the M.M. program either work for local employers or are interested in subsequent applications to professional schools. Financial support is extremely limited for either M.M.B or M. M. students.

Admission Requirements

Applications are invited from individuals holding B.S. or M.S. degrees in the physical and life sciences. Applications should be received in the department before January 15 to be considered for Fall semester admission. The Graduate Record Exam (GRE) is required and should be taken sufficiently early so that scores can be submitted and evaluated along with the application. Other requirements include all relevant transcripts, three letters of recommendation and a personal statement that describes the applicant's academic and career goals as well as their area of interest.

Master's Degree Requirements

The Master of Science (M.S.) requires 30 credit hours, of which 18 must be graded, a written thesis and at least one semester of laboratory teaching experience. The Master of Microbial Biotechnology (M.M.B.; http://harvest.cals.ncsu.edu/master-of-microbial-biotechnology/mmb/) degree requires 40 credit hours and four semesters involvement in an Industry Case Studies course, as well as a summer industry internship. This program also can be combined with a Master of Business Administration (M.B.A.) offered through the College of Management. The Master of Microbiology (M.M.) requires 30 credit hours, of which 18 must be graded, but has no requirement for a written thesis or laboratory instruction.

Doctoral Degree Requirements

The Ph.D. program (http://harvest.cals.ncsu.edu/microbiology/) is designed for individuals desiring to pursue careers in research and/or teaching. Prospective Ph.D. and M.S. students should become aware of departmental research programs and faculty so that an area of specialization is indicated in the application materials (personal statement). A faculty dissertation advisor and laboratory research program are confirmed at admission or by the end of the first semester. In conjunction with the advisor, the student establishes a four-member faculty advisory committee to guide the research and academic program. At least one semester of teaching assistance / experience is required. A preliminary examination is held soon after completing the second year of study, and the final examination includes a seminar presented by the candidate that is open to the university community.

Student Financial Support

All Ph.D. and M.S. applications to the Microbiology Graduate Program are considered for available assistantships. For highly qualified students, supplemental funds are frequently available. There is limited funding available for international students given the structure of the NC State University Graduate Student Support Plan.

Total Hours 30

Microbiology Courses

The field of Microbiology includes several specialized disciplines such as bacterial physiology, microbial genomics and metagenomics, microbiomes, environmental microbiology, immunology, host-pathogen interactions, molecular genetics and virology. At NC State, M.S. students can take courses that represent, and focus on, the various disciplines of Microbiology. Example courses, fitting into two microbiology “tracks” or focus areas are:

<table>

</table>

Additional Requirements

• 18 credits must be graded
• All graduate students must maintain a minimum cumulative grade point average of 3.0
• The program is completed upon submission of a thesis and completion of all credit requirements

The Interdepartmental Nutrition Program consists of faculty from multiple departments, including: Animal Science; Agricultural and Human Sciences; Food, Bioprocessing, and Nutrition Sciences; Horticultural Science; Molecular and Structural Biochemistry; and the Prestage Department of Poultry Science. Students reside and conduct research in one of these departments under the direction of an appropriate advisor. Research in the nutrition program may be conducted with a variety of species and at various levels, such as molecular, cell, whole animal, and human communities. Research programs are primarily in the area of nutritional biochemistry, experimental animal nutrition (e.g. horses, ruminants, swine, poultry, rodents, and other species), or community nutrition and public health. Graduates find employment in academia, government, industry, and non-profit organizations, or continue their education in medical and allied health fields.

Admission Requirement
To be considered for admission, a student should have a B.S. or M.S degree, preferably in a science-related area. Additionally, applicants must have course work in biology and organic chemistry to be considered for admission. Students for M.S. or Ph.D. should contact and be recommended by a prospective major faculty advisor in their area of interest prior to final admission. Applicants to the Master of Nutrition should indicate their preferences for: on-campus or Distance Education delivery; an emphasis in animal, poultry, or food science (human) nutrition; core science or Professional Science Masters (PSM); and within the PSM, Feed Science or Human Nutrition.
Master’s Degree Requirements
A minimum of 30 course credit hours, including a thesis is required for M.S., 36 for Master of Nutrition. The Master of Nutrition has options for all course delivery by Distance Education, with emphases in Feed Science or Human Nutrition, and an option for course work that qualifies as a Professional Science Master’s degree.

Doctoral Degree Requirements
A minimum of 72 credit hours, including a dissertation for Ph.D. Students must complete core courses, including: Energy Metabolism, Protein and Amino Acid Metabolism, Vitamin Metabolism, and Mineral Metabolism.

Student Financial Support
Assistantships and fellowships may be available for M.S. and Ph.D. students on a competitive basis from the departments in which the advisor resides. Admission does not guarantee availability of financial support.

Degrees
- Nutrition (MR) (p. 153)
- Nutrition (MS) (p. 155)
- Nutrition (PhD) (p. 156)
- Nutrition (Minor) (p. 158)

Physiology

The Physiology Graduate Program is an interdisciplinary and interdepartmental program comprising faculty drawn from across the University. An advanced degree in Physiology is highly valued by the scientific community and can lead to careers in research and teaching in academia, industry and government laboratories, public policy and consulting. Research is carried out using a variety of model organisms, laboratory and companion and agriculturally important species.

Admission Requirements

Students entering the graduate program in Physiology should have a Bachelor's degree in a related biological or physical science. Undergraduate courses should include Physiology, Biochemistry, Organic Chemistry, Calculus, and Physics. Each application package will be screened by the Admissions Committee. Factors considered for admission include: grade point average (3.0 is required for regular admission), GRE scores, undergraduate courses, letters of recommendation, and the willingness of a member of the Graduate Physiology faculty to serve as the applicant’s advisor.

Master’s Degree Requirements

All Master’s students are required to complete PHY 503, PHY 504, BCH 553, and a one-credit hour course in research ethics. Master of Science Degree: For a Master of Science degree a minimum of 30 semester hours of graduate work in the degree program is required including a minimum of 20 hours of course work at the 500-800 level. On average, the M.S. degree takes two to three years to complete. Master of Physiology Degree: The non-thesis Master’s degree (Master of Physiology) requires a total of 36 credits. The median time to degree completion is 1.75 years or less.

Student Financial Support

Financial assistance for qualified students in the form of research assistantships, fellowships and traineeships is available through participating departments only and not through the Physiology program for thesis-based students only.

Other Relevant Information

Graduate students enrolled as Physiology majors are housed in the department of their major professor and may participate in departmental activities.

Recommended Courses Normally Included in Programs of Study for the M.S Degree and the Non-Thesis MOP Program

Other recommended/supporting courses are available through many departments, e.g. Animal Science, Biochemistry, Biomathematics, Biotechnology, Cell Biology, Comparative Biomedical Sciences, Entomology, Genetics, Immunology, Microbiology, Nutrition, Pharmacology, Poultry Science, Psychology, Statistics, and Toxicology, and may be included for consideration in the plan of work.

Course offerings or research facilities are available in the following areas: plant cell biology, cellular imaging, cellulose biology, cellular signaling, plant development, plant hormones, epigenetics, plant systems biology, plant genetic engineering, transgene regulation and silencing, stress biology, chemical genomics, plant gravitational genomics, phytochemistry, metabolic engineering, plant-microbe interactions, aquatic ecology, toxic dinoflagellates, endangered species, plant community ecology, physiological ecology, tropical ecology, evolutionary ecology, paleobotany, plant systematics, evolution of flowering plants, and ethnobotany.

Admission Requirements

Students entering the graduate program in plant biology should have a bachelor's degree in plant biology or a related undergraduate program that includes biological, physical and mathematical science training including undergraduate courses in organic chemistry, calculus and genetics, as well as biology. All applications are screened by a departmental committee, and the best qualified applicants will be accepted until all available spaces are filled.

Master's and Doctoral Degree Requirements

The M.S. requires a total of 30 credit hours (20 of the 30 credit hours must be from 500-, 600-, 700/800-level courses; 18 credit hours must be letter graded); the Master of Plant Biology requires a total of 36 credit hours. The Ph.D. requires a total of 72 credit hours. Two core courses (Functional Plant Biology and either Plant Functional Ecology or Systematic Botany) are required. Other requirements include: a Plant Biology Colloquium, Plant Anatomy, an additional plant biology course, a graduate statistics course, a graduate ethics course, a thesis (for the Ph.D. and M.S., but not the Master of Plant Biology), a comprehensive examination (Ph.D.), oral thesis defense and a one-semester teaching responsibility per degree. Students must maintain a "B" average in all course work.

Other Relevant Information

Graduate research and teaching assistantships and tuition remission information are available from the department. New students supported by departmental research/teaching assistantships may elect to rotate through three laboratories during their first semester. At the end of the semester, they will choose a laboratory for their research activities consistent with their interests and available research projects. Provisions are available for cooperative research in more than one laboratory. Graduate students are expected to attend and participate in the seminar program every semester they are in residence. The department participates in training grants in biotechnology.

Plant Pathology

Plant pathology researches and extends knowledge to solve plant disease problems by focusing on plant-pathogen interactions at the genomic, cellular, organismal, and ecological levels. Approaches include disease management, epidemiology, molecular biology and host-parasite interactions. Focus areas are bacteriology, bioinfomatics, functional genomics, mycology, nematology, virology, soil-borne pathogens and mechanisms of pathogenesis, and host resistance.

Admission Requirements

The general application procedures of the Graduate School noted at the beginning of this section are followed. The Plant Pathology Graduate Program does NOT require the GRE. A detailed statement of applicant interests and goals in plant pathology is very helpful for the admissions committee.

Master's Degree Requirements

There is a core curriculum of a minimum of 12 credit hours that includes PP 501, PP 502, PP 506, PP 707, and PP 601. The core should be supplemented with a minimum of 18 credit hours in courses at the 500 or higher level, which support the focus of the study. Students serve as teaching assistants for one course.

Doctoral Degree Requirements

Students entering the Ph.D. degree program are expected to take the core curriculum outlined for the Master's degree or have had the equivalent at another institution. Additionally, Ph.D. students must include a departmental-approved ethics course, two credits PP 801, and at least two other 700-level Plant Pathology courses. Ph.D. students serve as teaching assistants for two courses.

Student Financial Support

A limited number of half-time assistantships are available on a competitive basis. Benefits include in-state tuition, out-of-state tuition and health insurance as covered under the Graduate School's Graduate Student Support Plan. Applicants are considered for assistantship support at time of application. Special supplements to assistantships are available on a competitive basis for outstanding students. Also, many faculty programs have research grant-funded or training grant-funded assistantships. Contact individual faculty regarding availability of research assistantships.

Other Relevant Information

Fully equipped and staffed laboratories for research are available in addition to greenhouse facilities and environmental growth chambers in the phytotron. Special facilities for experimental work on diseases under field conditions are available at 16 University and NC Department of Agriculture and Consumer Services-related locations throughout the state. Genomics facilities, microcomputers, library, mycological herbarium, digital imaging/graphics equipment programs, and an interdepartmental electron microscopy center are additional features available for the department.

Degrees

- Plant Pathology (MR) (p. 171)
- Plant Pathology (MS) (p. 172)

Faculty

Course offerings and research programs are comprehensive in the areas of physiology, nutrition, microbiology, molecular biology, biotechnology, food science, immunology, genetics, pathology, and toxicology. The demand for skilled workers with advanced training in poultry science is far greater than the supply. Opportunities exist for graduates in research and teaching in universities, government, and private industry.

Admission Requirements
Factors considered for admission include grade point average, strength of prior academic program, experience, letters of recommendation, and special skills or interests. GRE scores are required.

Master's Degree Requirements
While there are no specific course requirements for the master's degree in Poultry Science, most programs exceed the minimum 30 credit hours.

Doctoral Degree Requirements
See Animal Science and Poultry Science.

Student Financial Support
Both research and teaching assistantships are available on a competitive basis within the department. General requirements for these assistantships are as described in the Graduate Catalog. Other financial support may be available in the form of graduate stipend supplementation, research grant support, or out-of-state tuition waivers in accordance with the University's Graduate Student Support Plan.

Other Relevant Information
The Department of Poultry Science occupies modern facilities in Scott Hall, a three-story building on the main campus adjacent to the D.H. Hill Library. The department consists of about 20 faculty, approximately 40 support staff, 25 graduate students and postdoctoral associates, and 100 undergraduate students.

Feed Science (Certificate)

The Graduate Certificate Program in Feed Science is designed to prepare professionals or current degree program students to work in or alongside the animal food industry. The program will provide an advanced foundation in feed science technology, quality assurance and feed formulation, and feed industry leadership. The objectives of this program are for the student to acquire an understanding of the technical aspects of modern animal food manufacturing; food and ingredient quality assurance; animal food safety; feed industry regulations; facility operations, leadership, and safety; formulation; and generally how to apply technical skills to the challenges of the global animal food industry.

Admission Requirements

Applicants must have a BS/BA degree or equivalent four year degree in order to apply to the program. Individuals interested in this certificate program must contact the coordinator of the certificate program.

Program Requirements

A minimum of 12 credit hours from the prescribed list of courses and a grade of 'C-' or better in these courses is required to receive credit for the certificate. To receive a Graduate Certificate in Feed Science, a student must have a minimum 3.0 grade point average on all certificate course work. All course work must be registered through NC State University, transfer credit from other universities is not allowed. All work must be completed in four (4) calendar years, beginning from the time the application is approved by the Director of Graduate Programs.

Soil Science

Soil scientists study and manage land and water resources to protect the environment and enhance agricultural productivity. Graduate education opportunities in soil science at NC State prepares students for careers with public and private organizations in soil, agricultural, environmental, and natural resource sciences. Our graduates find employment opportunities with private sector firms, government organizations, academia, and entrepreneurship.

You will have the opportunity to study and do research with world-class faculty in outstanding laboratory and field facilities. Graduate students may specialize in the following sub-disciplines: soil physics; soil chemistry; soil microbiology and biochemistry; soil fertility and plant nutrition; soil genesis, morphology and classification; and soil, water and land management and conservation. Students can also incorporate other disciplines into their work, presenting outstanding opportunities to focus on issues of interest.

Admission requirements: A minimum of a 3.0 GPA at the baccalaureate (BS) or master’s (MS) level is required. However, exceptions may be made for master’s applicants with a very strong GPA in science classes or their final two years, or with substantial post-baccalaureate work experience. Students accepted will typically have a BS or MS degree in soil science, or closely related fields, with strong preparation in the biological and physical sciences.

To ensure that all graduates are well founded in all aspects of soil sciences, students are expected to acquire competence through coursework in the following sub-disciplines (four for Master’s and all five
for Ph.D. programs): soil physics, soil chemistry, soil microbiology, soil genesis and classification, and soil fertility.

### Degrees

- Soil Science (MR) (p. 180)
- Soil Science (MS) (p. 181)
- Soil Science (PhD) (p. 182)
- Soil Science (Minor) (p. 184)

</table>

1. Students can take no more than two credits of SSC 601 Seminar total.  
2. Students can take four to six credits of SSC 620 Special Problems.  
3. Students may have courses waived upon proving competency in the following coursework.
4 Students must take at least 18 hours of letter-graded course work – these must be NC State courses or inter-institutional courses (https://studentservices.ncsu.edu/your-classes/exchange-programs/inter-institutional-program/).

**Additional Requirements**

All Masters students must demonstrate competence in four of the five sub-disciplines listed below, and Doctoral students must demonstrate competency in all five.

- Soil Chemistry
- Soil Fertility and Plant Nutrition
- Soil Genesis and Classification
- Soil Microbiology and Biochemistry
- Soil Physics

The required competencies can be achieved by any combination of the following:

1. relevant course work from previous undergraduate and/or graduate degree programs;
2. prior professional experience in the major sub-discipline(s); and
3. graduate courses included in the student’s Plan of Work (POW) for their current degree program.

Undergraduate Courses 6
400-Level undergraduate courses from outside soil science will be determined in conjunction with the academic committee.

Elective Courses 18
“Elective Courses” will be determined in conjunction with the academic committee.

Total Hours 30
1. Students can take no more than two credits of SSC 601 Seminar total.
2. Students can take four to six credits of SSC 620 Special Problems.
3. Students are required to take a minimum of two credits and no more than six credits of SSC 693 Master’s Supervised Research or SSC 695 Master’s Thesis Research.
4. Students may have courses waived upon proving competency in the following coursework.
5. Students must take at least 18 hours of letter-graded course work – these must be NC State courses or inter-institutional courses (https://studentservices.ncsu.edu/your-classes/exchange-programs/inter-institutional-program/).

Additional Requirements
- Successful completion of a research problem
- Non-credit exit seminar
- Additional credit hours of seminar and research may be taken in addition to the required 30 credit hours to fulfill continuous registration requirements, but do not need to be listed on the POW

SSC 532  Soil Microbiology
SSC 541  Soil Fertility
SSC 551  Soil Morphology, Genesis and Classification

Elective Courses  tbd

“Elective Course” will be determined in conjunction with the academic committee

Total Hours  72

1 Students must take at least one credit of SSC 801 Seminar.
2 Students are required to take a minimum of two credits of SSC 893 Doctoral Supervised Research or SSC 895 Doctoral Dissertation Research.

Additional Requirements
All Doctoral students must demonstrate competence in the five soil science sub-disciplines listed below.

• Soil Chemistry
• Soil Fertility and Plant Nutrition
• Soil Genesis and Classification
• Soil Microbiology and Biochemistry
• Soil Physics

The required competencies can be achieved by any combination of the following:

1. relevant course work from previous undergraduate and/or graduate degree programs;
2. prior professional experience in the major sub-discipline(s); and
3. graduate courses included in the student’s Plan of Work (POW) for their current degree program.

• Completion of at least 72 semester credit hours beyond the bachelor’s degree
  • If the student has an MS degree from another institution, a maximum of 18 hours of relevant graduate credit from that degree may be applied toward this minimum, upon the recommendation of the student’s Graduate Advisory Committee, and the minimum required will be 54 semester credit hours
  • If a student completes an MS degree at NC State and continues for a doctoral degree without a break in time, up to 36 relevant credit hours taken while in master’s status may be used to meet minimum requirements for the doctoral degree. If there is a break in time between completing the master’s (at NC State) and beginning the doctorate (at NC State), the allowance is limited to 18 hours. Either allowance may include those 400-level courses taken as an approved part of the MS degree.
• Completion of preliminary written and oral examinations must be completed within six calendar years from the date of admission
• Successful completion of an original research program
• Success completion of the final oral examination
• Completion of a non-credit exit seminar

Youth, Family, & Community Sciences

The Youth, Family & Community Sciences Program provides graduate study for current and emerging professionals in family life education, parent education, family life coaching, youth development, volunteer management, and community-based youth and family programs, or related careers. The demand for professionals to teach, administer, and create support systems for children, youth and families is increasing through Cooperative Extension programs, government agencies and initiatives, community-based non-profits, court systems, prisons, social service organizations, health care agencies/organizations, and schools.

The following distance-based graduate programs are available:
• Master of Science in Youth, Family, and Community Sciences (M.S. requires 36 total hours including a thesis)
• Master of Youth, Family, and Community Sciences (M.R. requires 30 hours and a culminating supervised professional experience)

Admission Requirements
Students apply through NC State via the normal Graduate School admissions procedures; applications are reviewed on Nov. 1, April 1, and July 1. All application materials must be submitted electronically (online); mailed or faxed materials are not accepted. Only complete
applications are reviewed. In addition to all Graduate School admission requirements, the Department requires three academic references, a personal statement of current/future career goals including how this program will help you reach your goals, and a 500-800 word academic writing sample that answers the following prompt: What is the role of family science in a diverse society? The Graduate School requires a 3.00 average (4.00 scale) in the undergraduate program. The most qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum grade point average may be made for students with special backgrounds, abilities, circumstances, or interests.

Master’s Degree Requirements

The Master of Science in Youth, Family, and Community Sciences (M.S.) requires 36 hours culminating in a final oral examination and thesis approved by the student’s graduate committee. The Master of Youth, Family, and Community Sciences (M.R.) is a non-thesis degree that requires a total of 30 credit hours culminating in a capstone supervised professional experience. Both degree programs are built upon foundations of theory and application composed of four focus areas: (1) foundations of family life and youth development, (2) professional development and leadership, (3) research and methodological inquiry, and (4) content area concentration.

Student Financial Support

No financial aid/assistantships are available directly from the Department. Financial aid is available from the NC State Office of Financial Aid and on a competitive basis from the NC State Graduate School. Students seeking financial aid should contact the NC State Financial Aid Office directly.

Other Relevant Information

Distance course delivery methods include: totally asynchronous web-based classes, and synchronous Internet based classes. The M.R. and M.S. programs may be successfully completed totally via distance.

Family Life Education and Coaching (Certificate)

The Graduate Certificate in Family Life Education and Coaching prepares students to work with parents, professionals, and families as both family life educators and family life coaches. Family Life Educators (FLE) are strengths-based professionals who provide preventative research-based education to families in organized efforts designed to impart information, skills, experiences, or resources to strengthen, improve, or enrich their family experience. Family Life Coaches (FLC) partner with clients in a thought-provoking and creative process that inspires families to maximize their potential, reach goals, and achieve healthy relationships. Required courses are designed to strengthen the student’s understanding and application of the critical aspects of family life coaching and education, including a strengthened understanding of the fields of coaching psychology and family life education. The 12-credit graduate program can be completed entirely online.

Elective Courses

Select one of the following electives that most aligns with your professional interests:

- YFCS 502 Theories in Family Science
- YFCS 523 Family Relationships Over the Life Course
- YFCS 531 Effective Management of Family Resources
- YFCS 533 Complex Family Issues
- YFCS 537 Human Sexuality
Youth Development and Leadership (Certificate)

The Graduate Certificate in Youth Development and Leadership prepares future and strengthens current professionals working with community-based youth development programs. The required courses are designed to strengthen the student’s understanding and application of critical aspects of community youth programs, including theories of youth development, social, emotional, cognitive, and physical development, resource development and management, volunteer development, advisory committees and boards, organizational structure, human resource management, and current/emerging issues impacting youth and families.

1 Students may take another approved research ethics/bioethics course determined in conjunction with the academic committee

2 Upon passing BIT 510 Core Technologies in Molecular and Cellular Biology with an 80% or higher, students must complete a Capstone Cloning Project.

3 Students may choose another 500-level or higher elective course outside "Elective Courses" listed below determined in conjunction with the academic committee

Elective Courses

<table>

</tr>
</tbody>
</table>

Objectives

- Provide a focus and formal program for students from many disciplines to pursue training in the technical and engineering aspects of designing and analyzing environmental systems with an emphasis on the watershed-scale.
- Provide students the opportunity to develop a solid foundation in engineering systems targeted at environmental issues, particularly related to non-point sources and their impact on water quality at the watershed-scale.
- Provide practicing engineers and other professionals a source of graduate level engineering education in the environmental field.

Admission Requirements

Applicants must have successfully completed an accredited undergraduate engineering program with a GPA of 3.0 (based on a 4.0 scale), or with an overall undergraduate GPA of at least 2.8 coupled with a 3.0 or higher in the undergraduate major, or be currently enrolled in a graduate engineering program. Applicants with a four-year undergraduate science degree who have successfully completed (with a C or better) calculus, differential equations, physics and chemistry will also be considered. A program that includes fluid mechanics or hydraulics is highly recommended. Environmental professionals who do not meet the above criteria may also qualify if appropriate experience can be demonstrated.

Program Requirements

A minimum of 12 hours of coursework selected from the list below. One course can be selected from outside of BAE (up to 2 credit hours), but at least 9 credit hours must be BAE courses.

Watershed Assessment and Restoration (Certificate)

The Department of Biological and Agricultural Engineering offers a Graduate Certificate Program in Design and Analysis of Environmental Systems: Watershed Assessment and Restoration.
College of Design

Programs

- Architecture (p. 190)
- Art and Design (p. 199)
- Design (p. 201)
- Graphic Design (p. 204)
- Industrial Design (p. 206)
- Landscape Architecture (p. 208)

Degree Programs

Master's (MR)

- Art and Design (MR) (p. 200)
- Graphic Design (MR) (p. 205)
- Industrial Design (MR) (p. 207)
- Landscape Architecture (MR) (p. 208)

Doctor of Philosophy (PhD)

- Design (PhD) (p. 202)

Doctor of Design (DDes)

- Design (DDes) (p. 203)

Minors

- Landscape Architecture (Minor) (p. 211)

Certificates

- City Design (Certificate) (p. 196)
- Energy and Technology in Architecture (Certificate) (p. 197)
- Public Interest Design (Certificate) (p. 198)

Architectural Accrediting Board (NAAB)

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 8-year, 4-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The NC State University School of Architecture offers the following NAAB accredited degree programs:

B.Arch (pre-professional degree + 30 graduate credits)
M.Arch Track 1 (pre-professional degree + 48 graduate credits)
M.Arch Track 3 (non-pre-professional degree + 96 credits)

Next Accreditation Visit for All Programs: 2026

Degrees

- Architecture (MR) (p. 191)
- Architecture (Minor) (p. 196)
- City Design (Certificate) (p. 196)
• Energy and Technology in Architecture (Certificate) (p. 197)
• Public Interest Design (Certificate) (p. 198)

City Design (Certificate)

The Graduate Certificate in City Design is a joint program between the School of Architecture and the Department of Landscape Architecture. The certificate program promotes design inquiry and application at the scale of the city for students and practitioners of architecture and landscape architecture. The program's objectives are to consider the human condition, particularly in making significative urban places; design integrated systems of movement with increased accessibility; promote a greater mix of uses and amenities within a well-scaled urban fabric; foster new opportunities for energy production at the local scale; define new means of 'greening' the city; and capture greater senses of identity, meaning, and quality within the city fabric.

Admissions Requirements
Applicants must complete an application form to be considered for the certificate program. To qualify for admission to the certificate program, students must be enrolled in a professional program in architecture or landscape architecture. At the time of application, students must have a 3.00 grade point average (GPA) in their professional degree program.

Degree Requirements
Students must complete 15 hours of coursework from the course menu, as specified in the certificate application, and have a minimum of 3.00 GPA on all certificate coursework. All grades on courses taken towards the certificate program in courses numbered 400 and above are included in the GPA. Courses at the 300 level and below are not eligible for certificate credit and subsequently do not affect the graduate GPA.

The minimum grade to receive certificate credit can be no lower than B-. Students who take letter-graded 400-, 500-, and 700-level courses do not have the option of taking the courses for ‘credit only’ if they intend for the course to be part of the graduate certificate. Transfer credit from other institutions is not allowed for the graduate certificate. All course work must be registered through NC State University.

All certificate requirements must be completed within four (4) calendar years, beginning with the date that the student commences courses.
applicable to the certificate, unless a more restrictive time limit has been established by the program or academic college/school.

**Plan Requirements**

Certificate students are expected to complete a total of 15 hours of coursework. There are three methods of fulfilling this requirement:

- one studio option;
- two studio option;
- no studio option.

Studies must be approved by the certificate coordinator in advance, as to whether they fulfill all, or a majority of the intentions of the certificate program.

Certificates earned will be distributed as: “Graduate Certificate in City Design” without studio option specifications.

**Admissions**

Applicants must complete an application form to be considered for the certificate program. To qualify for admission to the graduate certificate in Energy and Technology in Architecture, students must be enrolled in (or have completed) a professional program in architecture. At the time of application, students must have a 3.00 grade point average (GPA) in their professional degree program.

**Requirements**

Students must complete 15 hours of coursework from the course menu, as specified in the certificate application, and have a minimum of 3.00 GPA on all certificate coursework. All grades on courses taken towards the certificate program in courses numbered 400 and above are included in the GPA. Courses at the 300 level and below are not eligible for certificate credit and subsequently do not affect the graduate GPA. The minimum grade to receive certificate credit can be no lower than B-.

Students who take letter-graded 400-, 500-, and 700-level courses do not have the option of taking the courses for ‘credit only’ if they intend for the course to be part of the graduate certificate. Transfer credit from other institutions is not allowed for the graduate certificate. All course work must be registered through NC State University.

All certificate requirements must be completed within four (4) calendar years, beginning with the date that the student commences courses applicable to the certificate, unless a more restrictive time limit has been established by the program or academic college/school. A student may obtain more than one certificate. Each certificate must have a least nine (9) credit hours that are unique to it.

**Other Information**

Students in this certificate program will become part of an academic and professional community that offers a broad range of extracurricular activities, including the NC Solar Center GreenBuild Lecture Series, visiting lecturers, and colloquia. Note that academic success might have a strong bearing on admission to a degree program, but completion of the certificate program in no way guarantees entry into a graduate degree program. For more information regarding course requirements and the application process, please contact the certificate program coordinator.

1 Requires approval of certificate coordinator

**Energy and Technology in Architecture (Certificate)**

The Graduate Certificate in Energy and Technology in Architecture provides students the opportunity to focus their elective studies through courses and design studio(s) that concentrate on building energy systems along with other building systems. The program’s objectives are to provide educational opportunities for architecture graduate students who wish to acquire knowledge and skills in the design and operation of building system at site and building levels, with an emphasis on energy and materials; to advocate for the importance of energy efficiency over the entire life cycle of a building; and to make our students more competitive in the fields of architectural practice, building engineering, and construction. This certificate program also provides unique interdisciplinary academic and research opportunities among the College of Design, programs within the College of Engineering, NC Solar Center, and building design industries/organizations (i.e. architecture, engineering, general contracting, real estate companies, and public policy agencies).
Public Interest Design (Certificate)

Elective Courses

See "Elective Courses" listed below

Total Hours 15

1 Students have the option to take a third elective course from "Elective Courses" listed below.

ETA Certificate Course Structure

Certificate students are required to take at least one course in each of the above two categories to achieve the learning outcomes defined for the program.

Faculty

Full Professors

Soolyeon Cho
David Hill
Wayne Place
Pat Rand

Associate Professors

Dana Gulling
Jianxin Hu

Assistant Professors

Traci Rider

Public Interest Design (Certificate)

Plan Requirements

The Graduate Certificate in Public Interest Design is divided into three options based on design and studio courses.

Certificates earned will be distributed as: "Graduate Certificate in Public Interest Design" without course option specifications.
Option One

Art and Design

The Art and Design program offers an educational structure that creates a new art and design professional: one for whom artistic and practical talents are developed as different expressions of individual potential. Our objectives are to graduate highly educated art and design professionals with integrated competencies in art, design, aesthetics, theory, hand and digital technologies, design process, and the combination of skills in the chosen concentration with other disciplines of human knowledge.

Admission Requirements

Students will be required to submit a portfolio of past work in electronic format; three letters of recommendation; a statement of personal goals; and transcripts of undergraduate work (minimum undergraduate GPA of 3.0). An interview will be required, but in cases of international applicants or those quite distant from NC State University, may be conducted by means of a long distance phone conversation or may be waived at the faculty’s discretion.

Masters Degree Requirements

The program of study requires a minimum of 48 credit hours of graduate work depending on background preparation of the applicant. Separate tracks of 60 and 72 credit hours accommodate students changing design disciplines or with insufficient background in the chosen concentration.

Other Information

We will only admit students to the program in the fall semester each year. Deadline for application is January 5.

Design

At the College of Design, NC State University, the mission of the Doctoral Programs in Design (comprising both the Ph.D. and D.Des. programs) is to improve the human condition through design research and scholarship. This mission is built in equal parts on the recognition of a fertile common ground among the design disciplines and on the need for specificity and depth within them.

The Doctor of Philosophy (Ph.D.) in Design program values a broad range of research interests that aim to improve the human condition through design. The aim of the Ph.D. in Design is to prepare students holding previous degrees in design disciplines to conduct research in the areas of: design for health and well-being; design for learning; design for sustainability; design and technology; design and the urban context; design methods; and design history and criticism.

The Doctor of Design (D.Des.) program provides distance-education opportunities for established design professionals to conduct original investigations using design practices, cases, and methods. D.Des. students pursue practice-based design research in support of professions creating the artifacts, communications, environments, organizing structures, and systems of the future.

Both programs provide a forum for connecting design research to the needs of society, by promoting the application of new knowledge in design and addressing design impacts on larger systems.

Admission Requirements

For admission to both the Ph.D. and D.Des. programs, submit official transcripts from earned undergraduate and graduate degrees (two minimum); three letters of reference; TOEFL scores (for international students); residency statement (US residents only); College of Design personal data form; statement of research intent; and portfolio. GRE scores are required for all Ph.D. applicants, however, if reasoning and writing ability is clearly demonstrated through previous graduate degrees, or professional or academic work products and impact, D.Des. applicants may ask for a waiver of GRE scores.

Doctoral Degree Requirements

Both programs of study require a minimum of 54 credit hours of graduate work beyond the Master’s degree.

Graphic Design

Overview
The Masters of Graphic Design (MGD) program helps move the passionate student toward a deeper knowledge of graphic and experience design and purposeful, individually driven design practices. Inquiry into contemporary and emergent design issues prepares graduates of the program for leadership positions that both evolve the profession and advance the discipline. Successful completion of the MGD results in a terminal degree, equal to the MFA, and qualifies graduates to teach at the university level or to pursue a PhD in Design.

Faculty charge graduate students to closely examine the cultural and technological situatedness of graphic design and its products, and to seek understanding of the people who use and interact with the things that graphic designers make. Coursework acquaints students with relevant theories and design research methods that frame and ground the design of propositional visual communication systems.

Varied topics prompt students to explore contemporary design concerns: the cultural contexts of design, the influence and experiences of end users, the social and technological environments within which designed artifacts operate. Subtopics within these broad concerns allow faculty and students the opportunity to frame, research, and respond to current and future design challenges.

The MGD program is consistently recognized as one of the top NASAD accredited graduate graphic design programs in the country and one of the few with STEM Classification (CIP). The faculty is nationally and internationally recognized (see Faculty at a Glance). Alumni are designers in leading professional offices around the world, faculty members in colleges and universities throughout the US and Canada, and doctoral students in PhD programs worldwide.

Affordable NC State tuition usually makes the cost of attending NC State well below that of equivalent graduate institutions. For out-of-state students, North Carolina residency laws recognize graduate students as residents after their first year.

MGD II: Two-year Master of Graphic Design Program
The MGD II program targets applicants who have earned a BFA or equivalent in graphic design and are practiced in visual communication,
user interaction design (UI), user experience design (UX) and/or related design fields.

Integrated graduate studios, seminars, and workshops expose students to histories, design-related theories, and research methods relevant to current and emerging practices. Students investigate questions individually and collaboratively around the design of communication and interaction in several ways: through making (visualizations, visual diagrams, and functioning prototypes, for instance); assigned and independent reading and research; discussion and critique; and writing. Students also enroll in at least one elective offered in the college, university, or our affiliate universities, Duke University and UNC, Chapel Hill.

Students create a body of work as they explore a research interest area within studio and seminar subtopics. The experience of creating this work, coupled with researching and writing, positions students to identify a design investigation in their final year, which culminates in the required Final Project. For this work, students comprehensively research an area of interest, design propositional artifacts (findings), document the research and findings in a written thesis, and present the project in a public forum.

**MGD III: Three-year Master of Graphic Design Program**

The MGD III program targets applicants who have some professional experience but who have not earned a first degree in graphic design or have earned a BA with a graphic design concentration. (Note that applicants aiming for a qualifying professional degree in graphic design should apply to the Bachelor of Graphic Design program.)

MGD III students enroll in two semesters of specialized and advanced undergraduate coursework prior to matriculating to the MGD II program. The curriculum includes two studio--based courses and at least two lecture/seminar courses. The 6 credit studios cover systems thinking in design for user experience, visual communication, and other professional graphic design topics while they prepare the student for graduate level inquiry. Additional three credit courses focus on subjects such as mobile interaction, typography, graphic design theory and history, coding and modeling for interface design.

**Admissions Requirements**

Applications for Priority Admission are due to the Graduate School by January 5. Applications are reviewed until all seats are filled. In addition to Graduate School requirements, the Department asks for department personal data forms, a written personal statement, and a website or accessible online PDF portfolio that demonstrates experience and skills in visual communication.

**Degree Requirements**

The MGD (II) degree requires successful completion of 48 total credits, however students typically take advantage of additional coursework during their time at NC State.

The core curriculum consists of a 9-credit studio and a 3-credit seminar -- either Design Methods, Design Frameworks, or Final Project Research -- in each of the first three semesters of study. Students are encouraged to augment their study during this time with 400 or 500 level design coursework that enhances skills and/or investigates topics of interest. For instance, the program offers seminars on Graphic Design Pedagogy, Design Discourse and Typography, and Special Topics in Social Innovation. Students are required to enroll in a 3-credit 400 or 500 level elective within another college at NC State or at nearby Duke University or UNC/Chapel Hill under NC State tuition. The fourth semester is devoted to the final project for 6 credits, under the supervision of three Graphic Design faculty members comprising each student’s graduate committee.

Industrial Design

Industrial Design is the professional service of creating and developing concepts and specifications that optimize the value, function and appearance of products and product systems to the mutual benefit of both user and manufacturer. This service is often provided in the context of a cooperative working relationship with other members of a development group.

Typical groups include management, marketing, engineering and manufacturing specialists. Industrial designers place special emphasis on human characteristics, needs and interests. These require particular understanding of visual, tactile, safety and convenience criteria. Industrial designers combine these considerations with practical concern for technical processes and requirements for manufacture; marketing opportunities and economic constraints; and distribution, sales and servicing arrangements. Industrial designers are guided by the awareness of their obligations to protect and promote public safety and well-being; to respect the environment; and to observe ethical business practices. Augmenting transdisciplinary practices, emerging areas of industrial design include design research and experience design.

Graduates with a Master of Industrial Design have career opportunities in four general areas; corporate design offices in manufacturing companies, design consulting firms, governmental agencies and educational institutions.

Admissions Requirements

Students must make application to the Department of Graphic Design and Industrial Design by January 5. In addition to Graduate School requirements, the Department requires department personal data forms, a digital portfolio of design work, resume, and a statement of intent. The GRE is required for students whose first degree is not in Industrial Design.

Master’s Requirements

The Master of Industrial Design degree requires a minimum of

- 48 credit hours for applications with a Bachelor’s degree in Industrial Design (Track II), or
- 78 credit hours for applications with Bachelor’s degrees in an area other than Industrial Design (Track III).

The program generally does not accept transfer credits in lieu of required coursework at NC State. Studio credits presented for elective transfer must be accompanied by a portfolio of work from the courses under consideration.

Student Financial Support

The Department has limited provisions for tuition remission and assistantships. Assistantships are awarded on the basis of student and departmental needs. Assistantship requests should be made to the Department of Graphic Design and Industrial Design and should be
submitted with the application for admission (for incoming students) or by advertised deadline (for continuing students).

Landscape Architecture

Course offerings or research facilities are available in the following areas: site planning and design, landscape history, urban public spaces, community design, regional design, resource management, outdoor learning environments, international urban and rural landscapes, and specialized landscapes.

Admission Requirements

The best-qualified applicants are accepted up to the maximum number of spaces that are available for new students. Exceptions to the minimum 3.00 GPA may be made for students with special backgrounds, abilities and interests.

Master's Degree Requirements

• Accredited First Professional Degree in Landscape Architecture: Candidates follow an 82-hour sequence of courses over a six-semester period. Three semesters of the program of study are determined by the required curriculum. The last three semesters of study are outlined by the student's Chair of the Department, Director of Graduate Programs, and/or advisor. Research and case studies lead to the final project and design application. The investigative direction is set in collaboration with the chair of the faculty committee. A formal presentation of findings to the faculty, student body and local professionals is required. The summary research and project report must be submitted to the College of Design faculty to meet the graduation requirements.

• Advanced Studies in Landscape Architecture: Candidates with an accredited undergraduate Landscape Architecture degree follow a 48-hour sequence of courses. Twenty-seven hours of electives are chosen through advising with the Director of Graduate Programs, advisors and faculty committee. Comprehensive research work is required for a final project with a final report is required. A formal presentation of findings to the faculty, student body and local professionals is also required.

Other Relevant Information

Students have the option of including a graduate minor in their course of studies. Minors can be in any other graduate program offered at NC State, UNC-CH and Duke University. Some examples of graduate minors are: natural resources, parks, recreation and tourism management, architecture, education, planning, civil engineering, and art and design. The College of Design includes the Center for Universal Design, the Office of Research, Extension & Engagement, and the Natural Learning Initiative.

Adult and Community College Education

The Adult and Community College Education program area is a unique program in its emphasis on serving the spectrum of both formal and informal adult learning organizations, and its inclusion of administrative, instructional and technology-related leadership within a practitioner preparation program. Based on a land-grant, Research Extensive University, the department reflects the tripartite commitment to quality instruction, research scholarship and service outreach.

The Master’s degree in Adult and Community College Education is one-of-a-kind as its primary commitment is to part-time students who are full-time working professionals. Full-time students are eligible for consideration to receive full funding through scholarships, fellowships and research and teaching assistantships, which allow our students to work with top faculty on cutting-edge projects. To meet the needs of full- and part-time students, most courses are offered once a week during late afternoon or evening hours. Some courses are regularly available during summer sessions and weekends and through distance education technologies. The Master in Adult and Community College Education provides opportunities to specialize in one of three areas: Adult and Continuing Professional Education, Community College Teaching, or Health Professions Education.

Admission Requirements

Applications for admission are submitted through the Graduate School, accepted year-round and are applicable for the first available term. We accept students from a wide range of disciplinary backgrounds. To qualify for admission, applicants must have a bachelor’s degree from an accredited institution of higher education in any field. International applicants must also have a TOEFL score of 100 or higher. Admission decisions are based on several criteria, including undergraduate GPA, work history and interest in the field.

Student Financial Support

To be eligible for financial aid, students must be enrolled in Master’s or Doctoral degree programs offered by the University. Unfortunately there is no financial aid available for Graduate Certificate students. Occasionally graduate assistantships are available for full time students in our degree programs. Please check with your advisor about assistantship opportunities. We recommend that you contact the Office of Scholarships and Financial Aid to find out what other options are available.

Community College Leadership (EdD)

All doctoral degrees in the College of Education require a minimum of 72 graduate credit hours beyond the bachelor’s degree. Most doctoral programs in the College of Education require a minimum of 60 graduate credit hours beyond an approved master’s degree.

Our doctoral program takes three-and-a-half years to complete, including a dissertation that begins in the first semester.

Thematic Research Areas
Select from the following six areas in which to conduct research:
- Completion and Transfer
- Learning Outcomes
- Equity
- Labor Market Outcomes
- Technology
- Culture/Organizational Behavior

**Clinical Mental Health Counseling**

The Department of Counselor Education offers three programs of study (concentrations) leading to the Master of Education Degree: Clinical Mental Health Counseling, College Counseling and Student Development, and School Counseling.

All master’s degree programs (on-campus and online deliveries) are accredited by the Council for Accreditation of Counseling and Related Educational Programs until October 31, 2020. Because of the impact of
COVID-19 pandemic, the accreditation review has been delayed. We expect to receive a one-year extension of accreditation from CACREP to complete the review process.

Admission Requirements
Admissions Requirements for Master’s Programs (on-campus and online programs):

- Completed online application, resume, personal statement/goals, and non-refundable application fee
- GRE Scores/MAT Scores
- 3 recommendations from people who know your academic record and potential for graduate study (letters should be uploaded online)
- Official transcripts of all post-secondary education
- Official** statement of English Proficiency (TOEFL) for international students

Applicants are expected to have an undergraduate GPA of 3.0 or higher.

Master’s Degree Requirements
For master's degree concentrations, admission is limited in order to maintain faculty student interaction in didactic classes, for supervision in practica and for informal contact. Generally, class size averages between 20 and 25 in didactic, 4-5 in practica, and the advising ratio is approximately 1 to 10.

The Master’s of Education Degree (M.Ed.) is primarily a practitioner-oriented master’s and is offered in the on-campus program or DE online program (same degree). There are three concentrations: (a) school counseling (elementary and middle or secondary), (b) college counseling and student development, and (c) clinical mental health counseling.

These concentrations require a minimum of 60 credits. Students who complete the program will be eligible to sit for the National Counselor Examination (NCE).

The Master’s of Science Degree (M.S.) is primarily oriented to the practitioner-researcher and is also offered in the three concentrations. The program requires 66 hours of course work, including a thesis, and an oral examination. Generally, the same criteria for admission are applied as for the M.Ed. except that the candidate needs to show clearer evidence of research competency in addition to the requisite professional and academic competencies. M.S. option is not offered in DE online program.

Student Financial Support
At NC State, our goal is to assure that no student who can benefit from an NC State education be denied that opportunity due to finances. We are committed to allocating our financial aid resources to help the broadest range of students.

Graduate students may apply for Federal Subsidized and Unsubsidized Stafford Loans, and for Federal Work-Study employment. Qualified graduate students pursuing masters or doctoral degrees may also apply for fellowships, assistantships and other awards offered through individual colleges and the Graduate School.

Curriculum and Instruction

The department of Teacher Education and Learning Sciences offers master’s degrees in multiple areas of curriculum and instruction: Curriculum Development and Supervision, Educational Psychology, and New Literacies and Global Learning (with sub-concentrations in English education, general studies, middle grades, reading/literacy education, and secondary social studies).

For more please see https://ced.ncsu.edu/graduate/graduate-programs/masters/

The NC Department of Public Instruction has conferred accreditation to the graduate programs in Teacher Education and Learning Sciences. The College of Education is approved any the Council for the Accreditation of Educator Preparation (CAEP).

Admission Requirements

Curriculum and Instruction: A 500-800 word statement describing professional goals is required, along with transcripts and reference letters. Some areas of study require that applicants be qualified to hold a baccalaureate-level teaching license or have teaching experience. The Graduate School requires a 3.0 in the undergraduate program. Students from diverse backgrounds are welcome to apply. Admission is competitive. The best qualified applicants will be accepted up to the limited number of spaces available for new students. TOEFL or IELTS scores for international applicants whose first language is not English. GRE scores not more than five years old are required for the Educational Psychology program area.

Master’s Degree Requirements

Curriculum and Instruction: A minimum of 30 course credit hours. For the M.S. degree, a minimum of 36 hours is required. The M.S. degree requires a thesis and final oral examination approved by the graduate committee.

Student Financial Support

Teaching Assistantships are available on a limited basis.

Counselor Education (Certificate)

Our innovative online program prepares school teachers, administrators, staff, advisors, tutors in schools and universities, human service workers, and individuals interested in counseling work to advocate and support students, their families, clients and local communities. Our certificate program allows students to learn in a flexible environment, with flexible online classwork, without the hassle of traffic and on-campus parking. Students will meet online each week for a 90-minute interactive discussion with the professor, instructors and classmates, in order to stay connected and challenged. The certificate program alone does not prepare students to work as professional counselors. In order to work in professional counseling, additional classes, training and licensure will be required through a master’s degree program.

Admission Requirements

- Completed online Graduate School application and admission fee
- Resume outlining education and work experience

Admission to the GCCE online program takes place in the spring for a summer start. Rolling base admissions are possible if seats are available. Email us at ncsu_gcce@ncsu.edu with any questions.

Graduate Certificate in Counselor Education Requirements

Students admitted to this program are required to complete four online courses: ECD 510 Orientation to Professional Counseling, Identity, and Ethics, ECD 530 Theories of Counseling, ECD 524 Career Counseling, and ECD 525 Multicultural Counseling.

Plan Requirements

Educational Administration and Supervision

NC State’s Ed.D. in Educational Administration & Supervision program is tied for #14 in U.S. News & World Report’s rankings of 393 graduate programs in the U.S. and ranked #1 in North Carolina! The program is designed to prepare systems-level leaders to improve the quality of K-12 schools by preparing the next generation of superintendents dedicated to educational excellence and equity. Graduates are empowered with...
leadership strategies that improve student performance in environments that are dynamic, interactive, and culturally diverse.

Program Description
The Ed.D. in Educational Administration & Supervision leads to district/superintendent licensure and requires core courses in educational leadership, research methods (9 hours), an internship (6 hours), and a dissertation (12 hours). Students must be officially admitted to the Ed.D. program to enroll in doctoral classes. Please be aware that a Ph.D. in Educational Evaluation and Policy Analysis is also offered, but only the Ed.D. leads to superintendent licensure.

Course of Study
The program requires a minimum of 54 credit hours beyond the master’s degree. Students complete 27 hours of core and elective courses, 9 credit hours of research methods, a two-semester internship (6 hours), and 12 hours of dissertation research.

Admission Requirements
Applicants must hold a North Carolina Principal’s license or be eligible to receive one; transcripts; three letters of reference (at least one must be from your current supervisor); resume (including teaching assignments, leadership experiences, and trainings); personal statement of interest and fit with career goals; and official score report from either the Miller Analogies Test (MAT) or the Graduate Record Exam (GRE). Test should have been taken within the last five years.

Degrees
• Educational Administration and Supervision (EdD) (p. 240)
• Educational Administration and Supervision (Minor) (p. 241)

Educational Leadership, Policy and Human Development

The Adult, Workforce, and Continuing Professional Education specialization with the Ph.D. in Educational Leadership, Policy, and Human Development is unique in its emphasis on serving the spectrum of both formal and informal adult learning organizations, and its inclusion of administrative, instructional and technology-related leadership within a practitioner preparation program. Based on a land-grant, Research Extensive University, the department reflects the tripartite commitment to quality instruction, research scholarship and service outreach.

The Ph.D. in Educational Leadership, Policy, and Human Development with a specialization in Adult, Workforce, and Continuing Professional Education, is one-of-a-kind as its primary commitment is to part-time students who are full-time working professionals. Full-time students are eligible for consideration to receive full funding through scholarships, fellowships and research and teaching assistantships, which allow our students to work with top faculty on cutting-edge projects. To meet the needs of full- and part-time students, most courses are offered once a week during late afternoon or evening hours. Some courses are regularly available during summer sessions and weekends and through distance education technologies.

Admission Requirements

Applications for admission are submitted through the Graduate School. We accept students from a wide range of educational backgrounds. To qualify for admission, applicants must have a master’s degree from an accredited institution of higher education in any field. International applicants must also have a TOEFL score of 100 or higher. Admission decisions are based on several criteria, including undergraduate GPA, work history and interest in the field.

Student Financial Support

To be eligible for financial aid, students must be enrolled in Master’s or Doctoral degree programs offered by the University. Unfortunately there is no financial aid available for Graduate Certificate students. Occasionally graduate assistantships are available for full time students in our degree programs. Please check with your advisor about assistantship opportunities. We recommend that you contact the Office of Scholarships and Financial Aid (https://studentservices.ncsu.edu/contact-us/) to find out what other options are available.

For doctoral students either part-time or full-time who are working on their dissertation: Writing the dissertation requires a major commitment of time and effort on both the part of the doctoral student and the faculty advisor. There should be consultation between the student and the dissertation chair about what is expected to be accomplished, and how much time is to be invested before the student registers. The College of Education strongly recommends that students who are registering for EAC 895 Doctoral Dissertation Research or EAC 899 Doctoral Dissertation Preparation register for at least 3 semester hours per semester, when appropriate.

1 Prerequisites: (number of credits: zero to variable) 600 hour internship and masters level course work equivalent to those of a CACREP accredited program. Because of the impact of COVID-19 pandemic, the accreditation review has been delayed. We expect to receive a one-year extension of accreditation from CACREP to complete the review process.

2 A thesis equivalent is a program requirement for those not having completed a thesis during their master’s program.

3 For doctoral students either part-time or full-time who are working on their dissertation. Writing the dissertation requires a major commitment of time and effort on both the part of the doctoral student and the faculty advisor. Teaching, Training, and Educational Technology (Certificate)

Delivered 100% online, the Certificate consists of five 3-credit courses focused on teaching, training, and the use of technology in a variety of educational environments. Students can tailor the program to meet their needs and gain the knowledge and skills necessary to design and deliver course-related content through face-to-face, technology-enhanced, and e-learning environments. The program is designed for mid-career individuals who may be without academic preparation for their current positions, or for those choosing to increase their knowledge and skills in the field for future job opportunities.

Students may choose one of the following specialty areas: Training and Development, Instructional Design, E-Learning, Community College Teaching, and Community College Leadership.

In order to be awarded the Certificate, all required courses must be taken and one elective is allowed. Transfer credit from other institutions is not allowed.

Please see the department website for the specific required and elective courses for each specialization. For course descriptions, please refer to the NC State listing of courses. For further information, see the Certificate in Teaching, Training, and Educational Technology website (https://ced.ncsu.edu/programs/teaching-training-educational-technology-certificate/).

Plan Requirements

Students can choose courses from the following specializations:

- Talent Development
- Instructional Design
- E-Learning / Educational Technology
- Community College Teaching
- Community College Leadership

Certificates earned will be distributed as: “Graduate Certificate in Teaching, Training, and Educational Technology” without focus area specifications.

Elementary Education

The Elementary Education program in the TELS department offers a Master of Education (M.Ed.) degree in Elementary Education with a concentration in either mathematics or science education. The Master’s program prepares teacher leaders who possess strong specialized content knowledge in mathematics or science and a deep understanding of how elementary students learn. The program, designed for those who already hold a current teaching license, is especially tailored to provide candidates with leadership and application skills to transfer their knowledge to their work with elementary school teachers and students.

The program is considered Distance Education (DE) and offered off campus at school sites in the region to take advantage of reduced DE tuition rates.

For more information please see https://ced.ncsu.edu/programs/elementary-education-master/

The coursework for the mathematics and science concentrations are approved by the North Carolina State Board of Education. Therefore, graduates of the M.Ed. program are eligible to receive the elementary mathematics or elementary science specialist add-on to their North Carolina K-6 teaching license from the Department of Public Instruction. The College of Education is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

Admission Requirements

Elementary Education Master’s program: Application requirements include a 500-800 word statement describing professional goals, transcripts and reference letters, and a teaching license. The Graduate School requires a 3.0 GPA in an undergraduate program. The best qualified applicants will be accepted up to the limited number of spaces available for new students.

For the M.S. degree, a minimum of 33 hours is required. The M.S. degree requires a thesis and final oral examination approved by the graduate committee. It is the responsibility of MS students to secure an advisor in advance to supervise their thesis research.

Learning Design & Technology

The department of Teacher Education and Learning Sciences offers master’s degrees in Learning Design and Technology. These master’s programs prepare education professionals to lead digital learning
programs, design digital learning environments, and inquire into digital learning solutions to continuously refine instruction and improve student learning.

For more please see https://ced.ncsu.edu/programs/learning-design-technology-master/

The NC Department of Public Instruction has conferred accreditation to the graduate programs in Teacher Education and Learning Sciences. The College of Education is approved by the Council for the Accreditation of Educator Preparation (CAEP). Graduates of this program holding a North Carolina teaching license are eligible to add the 079 computer teacher endorsement and/or 077 technology specialist endorsement to their license.

Admission Requirements

Learning Design & Technology: A 500-800 word statement describing professional goals is required, along with transcripts and reference letters. The Graduate School requires a 3.0 in the undergraduate program. TOEFL or IELTS scores for international applicants whose first language is not English.

Master’s Degree Requirements

Learning Design & Technology: A minimum of 30 course credit hours. For the M.S. degree, a minimum of 36 hours is required. The M.S. degree requires a thesis and final oral examination approved by the graduate committee.

Mathematics Education

Our mission is to prepare master's degree-seeking students for positions of instructional leadership in Mathematics Education as master teachers of mathematics in middle grades (6-9), high school (9-12) or post-secondary institutions such as community colleges. A master's program is offered that leads to initial teaching licensure. Master's programs are also offered leading to North Carolina M-licensure as a teacher of technology at grades 6-12. Programs are also available for those seeking advanced graduate-level certification as a teacher. Finally, students may choose a program to prepare for teaching careers in post-secondary education.

• Master of Education in STEM Education – Mathematics Concentration
• Master of Arts in Teaching – Mathematics Education

Admission Requirements

Applicants for M.S., degrees in mathematics education must submit a completed application specific to the program. Please see the Science, Technology, Engineering and Mathematics (STEM) Education website for details. The deadlines for submission of an application, and academic and professional background necessary for admission differ by specific program.

Master's Degree Requirements

The Master of Science Degree requires a minimum of 36 semester hours of graduate work.

Student Financial Support

A small number of teaching and research assistantships are available, and out-of-state tuition remission may be available for one year for students on assistantships. Please discuss these opportunities directly with program area faculty.

School Administration

NCSU’s Master of School Administration (MSA) program is the top-ranked school leadership program in North Carolina and one of only six programs nationally to have been designated as exemplary by the University Council for Educational Administration. The cohort-based program prepares graduates to assume building-level leadership positions in schools (public, private, and charter) as assistant principals and principals and leads to principal licensure.

Admission Requirements
Personal statement including career goals and aspirations; transcripts; teaching experience in K-12 schools (three years preferred); resume; three letters of recommendation (one recommendation is to be from current supervisor); minimum 3.0 undergraduate GPA (preferred); participate in Candidate Assessment Day.

All application materials must be submitted through the Graduate School’s online application process only. No hard copies will be accepted. Because this program is cohort-based, no deferrals of admission are permitted.

School Counseling

The Department of Counselor Education offers three programs of study (concentrations) leading to the Master of Education Degree: Clinical Mental Health Counseling, College Counseling and Student Development, and School Counseling.

All master’s degree programs (on-campus and online deliveries) are accredited by the Council for Accreditation of Counseling and Related Educational Programs until October 31, 2020. Because of the impact of COVID-19 pandemic, the accreditation review has been delayed. We expect to receive a one-year extension of accreditation from CACREP to complete the review process.

Admission Requirements

Admissions Requirements for Master’s Programs (on-campus and online programs):

- Completed online application, resume, personal statement/goals, and non-refundable application fee
- GRE Scores/MAT Scores
- 3 recommendations from people who know your academic record and potential for graduate study (letters should be uploaded online)
- Official transcripts of all post-secondary education
- Official** statement of English Proficiency (TOEFL) for international students

Applicants are expected to have an undergraduate GPA of 3.0 or higher.

Master’s Degree Requirements

For master’s degree concentrations, admission is limited in order to maintain faculty student interaction in didactic classes, for supervision in practica and for informal contact. Generally, class size averages between 20 and 25 in didactic, 4-5 in practica, and the advising ratio is approximately 1 to 10.

The Master’s of Education Degree (M.Ed.) is primarily a practitioner-oriented master’s and is offered in the on-campus program or DE online program (same degree). There are three concentrations: (a) school counseling (elementary and middle or secondary), (b) college counseling and student development, and (c) clinical mental health counseling. These concentrations require a minimum of 60 credits. Students who complete the program will be eligible to sit for the National Counselor Examination (NCE). Students in the school counseling track are also eligible for licensure as school counselors in North Carolina (providing they pass the counseling PRAXIS examination).

The Master’s of Science Degree (M.S.) is primarily oriented to the practitioner-researcher and is also offered in the three concentrations. The program requires 66 hours of course work, including a thesis, and an oral examination. Generally, the same criteria for admission are applied as for the M.Ed. except that the candidate needs to show clearer evidence of research competency in addition to the requisite professional and academic competencies. M.S. option is not offered in DE online program.

Student Financial Support

At NC State, our goal is to assure that no student who can benefit from an NC State education be denied that opportunity due to finances. We are committed to allocating our financial aid resources to help the broadest range of students.

Graduate students may apply for Federal Subsidized and Unsubsidized Stafford Loans, and for Federal Work-Study employment. Qualified graduate students pursuing masters or doctoral degrees may also apply for fellowships, assistantships and other awards offered through individual colleges and the Graduate School.

Science Education

The Science Education Program offers a Master’s of STEM Education (MEd) Distance Education with a Concentration in Science Education. We prepare educators and researchers for positions as teachers, leaders, and university faculty of the highest quality. We are particularly proud of our emphasis on the use of technology to enhance teaching. Students take courses in their educational specialty in Science Education, and in academic discipline areas including: biological sciences, chemistry, earth science, environmental science, interdisciplinary science or physics.

Our STEM Ed Master’s program (MEd) leads to North Carolina M-licensure as a teacher of science at grades 6-12 or advanced credentials for informal educators. Programs are also available for those seeking advanced graduate-level certification as a teacher. Finally, students may design a program to prepare for teaching careers in post-secondary education.

Some of our elect to move directly from our master’s into our doctoral program in Learning and Teaching in STEM – Science Education. These students are knowledge-seekers and are eager to pursue educational problems and develop critical thinking skills in a collaborative environment. The programs prepare individuals for positions in their fields of study related to:

1. scholarly inquiry and discourse in science education,
2. preparation of K-12 teachers and informal science educators,
3. instruction and development issues in K-16, and
4. leadership positions.

Admission Requirements

Applicants for the STEM M.Ed. degree with a concentration in science education must submit a completed application specific to the program. No GRE is required. Please see the Science Education website for details. The deadlines for submission of an application, and academic and professional background necessary for admission differ by specific program.

Student Financial Support

A small number of scholarships may be available through the College of Education or NC State University. For those who apply for financial aid, there may be some grants available through the university. Please discuss these opportunities directly with program area faculty.

Mathematics Teaching and Learning (Certificate)

The Graduate Certificate in Mathematics Teaching and Learning is an online program that focuses on developing knowledge and instructional approaches in teaching mathematics. The program will primarily serve practicing teachers in middle school through college settings, or those preparing for careers in such settings, who want to expand their expertise related to teaching and learning mathematics. Students will learn how to apply research-based understandings of students’ thinking, pedagogical approaches, and broader educational issues (e.g., discourse and equity) to inform practices of teaching content such as geometry, algebra, and statistics.

Special Education

The department of Teacher Education and Learning Sciences offers master’s degrees in Special Education. The Special Education program at NC State prepares students for excellence in teaching, assessment, curriculum development, classroom and behavior management, teaching students with high incidence disabilities, evaluation and professional leadership, as well as other areas of service to students with disabilities and to schools and agencies. Our nationally recognized faculty provides excellent teaching, leadership opportunities, and high standards of performance.

For more please see https://ced.ncsu.edu/programs/special-education-master/

The NC Department of Public Instruction has conferred accreditation to the graduate programs in Teacher Education and Learning Sciences. The College of Education is approved any the Council for the Accreditation of Educator Preparation (CAEP).

Admission Requirements

Special Education: A 500-800 word statement describing professional goals is required, along with transcripts and reference letters. Some areas of study require that applicants be qualified to hold a baccalaureate-level teaching license or have teaching experience. A match to resources and faculty areas of interest and expertise is necessary, since the program is competitive. The Graduate School requires a 3.0 in the undergraduate program.

Teacher Education and Learning Sciences

The Ph.D. program in the Department of Teacher Education and Learning Sciences is primarily designed to prepare students for roles as researchers and educators in higher education and industry, or for instructional leadership at school district and state levels. Six program areas of study (focus) are offered by the department: Educational Equity; Educational Psychology; Elementary Learning Sciences; Learning, Design, & Technology; Literacy & English Language Arts; and Social Studies Education.

The NC Department of Public Instruction has conferred accreditation to the graduate programs in Teacher Education and Learning Sciences. The College of Education is approved by the Council for the Accreditation of Educator Preparation (CAEP).

Admission Requirements

Teacher Education and Learning Sciences: A 500-800 word statement describing professional goals and research interests is required, along with transcripts and reference letters. Some areas of study require that applicants be qualified to hold a baccalaureate-level teaching license or have teaching experience. A match to resources and faculty areas of interest and expertise is necessary since the program is competitive. The Graduate School requires a 3.0 in the undergraduate program. GRE scores not more than five years old are required for the doctoral program.

Doctoral Degree Requirements

Teacher Education and Learning Sciences: A minimum of 72 course credit hours beyond a bachelor's degree is required. For students with a master's degree, at least 60 new hours must be taken after the student matriculates into the doctoral program. The 60-hour program includes 12 hours of scholar leader courses (college and departmental levels), 15 hours of research, 24 hours of program area specialty courses, and 9 hours of dissertation credit.

Student Financial Support

Teaching and Research Assistantships are available on a limited basis.

TEXT

Teaching

The Master of Arts in Teaching (MAT) program is an accelerated program with a 100% online option that will prepare you to apply your experience to make a difference from your first day in the classroom, whether you're teaching in-person, remotely or both. The content areas being served by the MAT program are Secondary Math, Science, Social Studies, and English; Middle Grades Math, Science, Social Studies, and Language Arts; English as a Second Language; Special Education; Technology Education and Elementary Education.

For more please see https://ced.ncsu.edu/academics/professional-education/master-of-arts-in-teaching/

The NC Department of Public Instruction has conferred accreditation to the graduate programs in Teacher Education and Learning Sciences. The College of Education is approved any the Council for the Accreditation of Educator Preparation (CAEP).

Admission Requirements

Applicants must have (1) a four-year degree from a college or university that holds regional accreditation, such as SACS; (2) 3.00 GPA or higher in prior work, as required by the Graduate School; (4) an undergraduate degree in the content area/discipline or 24 semester hours/credits in content relevant to the area in which you wish to teach (if you have fewer than 24 hours in a relevant content field, or if your course work does not prepare you adequately to teach the North Carolina curriculum, you may be assigned additional coursework to overcome the deficiency).

Applications require original transcripts, 3 letters of recommendation (one of which should speak to teaching potential), a personal essay stating applicant’s background and goals, GRE scores are only required if undergraduate GPA is below 3.0 (and TOEFL if you have international citizenship), and a completed online application.

Master's Degree Requirements

A total of 30-33 credit hours must be earned for completion of the degree, depending on the particular licensure area. These hours include student teaching for non-lateral entry students.

Student Financial Support

Financial aid is available. Interested students should complete a Financial Aid Federal Student Aid (FAFSA) (http://www.fafsa.ed.gov/) form.

Degrees

- Teaching (MA) (p. 263)
- Teaching (MA): Elementary Education Concentration (p. 264)
- Teaching (MA): English as a Second Language Concentration (p. 265)

Technology Education

The Technology Education Program offers a Master’s of Education – Distance Education concentration in Technology Education. We prepare educators and researchers for positions as teachers, leaders, and university faculty of the highest quality. We are particularly proud of our emphasis on the use of technology to enhance teaching. Students take courses in their educational specialty, in general professional education, and in academic discipline areas including: computer science, engineering, graphic arts, and statistics.

Our master’s program can lead to initial teaching licensure. The program can be designed to lead to North Carolina M-licensure as a teacher of technology at grades 6-9 and/or 9-12. Programs are also available for those seeking advanced graduate-level certification as a teacher. Finally, students may choose a program to prepare for teaching careers in post-secondary education.

Some of our elect to move directly from our master’s into our doctoral program in Learning and Teaching in STEM – Technology Education.
These students are knowledge-seekers and are eager to pursue educational problems and develop critical thinking skills in a collaborative environment. The programs prepare individuals for positions in their fields of study related to:

- scholarly inquiry and discourse in their discipline,
- preparation of K-12 teachers,
- instruction and development issues in K-16, and
- leadership positions.

Admission Requirements

Applicants for the Master of Education – Distance Ed degree in Technology Education must submit a completed application to the Graduate School. Please see the Technology Education website (https://ced.ncsu.edu/programs/technology-education-master/) for details. The deadlines for submission of an application, and academic and professional background necessary for admission differ by specific program.

Master’s Degree Requirements

Master’s Degree programs require a minimum of 30 semester hours of graduate work. Students who choose the M.S. degree may be able to substitute up to six semester hours of thesis research for part of the course load. The M.Ed. degree is online only.

Student Financial Support

A small number of teaching and research assistantships are available, and out-of-state tuition remission may be available for one year for students on assistantships. Please discuss these opportunities directly with program area faculty.

Elective Courses 12

Select 12 hours of the following courses:

- TED 530 Foundations for Teaching Technology
- TED 532 Current Trends in Technical Graphics Education
- TED 534 Instructional Design in Technical and Technology Education
- TED 536 Scientific and Technical Visualization: Theory and Practice
- TED 641 Internship in Technology Education
- TED 646 Field-based Research in Technology Education
- TED 709 Seminar in Technology Education
- TED 801 Practicum in Technology Education
- TED 810 Special Topics in Technology Education
- TED 821 Special Problems in Technology Education

Research Courses 24-27

Select two of the following courses:

- ED 700 Introduction to Research Design in Education
- ED 710 Applied Quantitative Methods in Education I
- ST 507 Statistics For the Behavioral Sciences I
- ST 508 Statistics For the Behavioral Sciences II
- TED 895 Doctoral Dissertation Research
- ED 711 Applied Quantitative Methods in Education II
- ED 730 Introduction to Qualitative Research in Education
- ED 731 Advanced Qualitative Research and Data Analysis in Education
- ED 750 Mixed Methods Research in Education
- ST 505 Applied Nonparametric Statistics

Minor 9-12
Select 9-12 hours from a cognitive area of study approved in conjunction with the academic committee

<table>

Training & Development

The Master of Education (M.Ed.) degree in Training and Development, a fully online program, is based on a reflective practice approach offering practitioners opportunities to integrate their professional experiences with human resource development knowledge and practice skills. Completing this master’s program will give you the professional knowledge and skill required for entry or advancement in instructional design, and instructional, administrative, or evaluation positions that involve performance-based training. Our courses are in alignment with the Association of Talent Development’s Core Competency Model.

Our program emphasizes:

• Interaction
• Collaboration
• Team Learning
• Reflective Practice
• Adult Learning

Admission Requirements

Applicants for the M.Ed. degree in Training and Development must complete an application through the Graduate School, submit a personal statement, post-secondary transcripts, and three letters of recommendation. GRE scores are not required. Please see the Training and Development Program website for complete details.

• Nano-Systems Engineering (Certificate) (p. 354)
• Nanobiotechnology (Certificate) (p. 296)
Aerospace Engineering

Graduate students in the Aerospace Engineering program focus on aircraft and space systems design, analysis, and manufacturing. Students can select course offerings and research programs in aerodynamics and applied aerodynamics; aerospace propulsion; computational fluid dynamics; dynamics and design of spacecraft and space systems; flight dynamics and control; and multifunctional materials and smart structures. Sub-areas include acoustics, sprays, composite materials, reactive and multiphase flows, stability, and transition to turbulence.

Admission Requirements

An applicant to the master's program must be a graduate of an accredited undergraduate program with a B.S. degree in either mechanical or aerospace engineering. Graduates of other accredited programs in engineering, physical sciences and mathematics may be considered but may be required to make up undergraduate deficiencies without graduate credit. Provisional admissions, as well as exceptions, are sometimes granted under special circumstances. The most qualified applicants are accepted first. Applicants to the Ph.D. program must have met the M.S. admission requirements and additionally must satisfy the Ph.D. admissions requirements. Applicants to the online, distance education M.S. program in mechanical or aerospace engineering are not required to take the GRE exam.

Master's Degree Requirements

The thesis-option M.S. degree programs in mechanical engineering and aerospace engineering require 21 hours of course credit and nine hours of thesis research. The non-thesis M.S. degree programs in mechanical engineering and aerospace engineering require 27 hours of course credit and a three credit-hour project. The non-thesis M.S. degree programs in mechanical engineering and aerospace engineering are offered on campus and off campus through distance education.

Ph.D. Degree Requirements

A minimum of 72 hours of credit are required to obtain the Ph.D. degree. A direct path to the Ph.D. from the B.S. is also available with which the student is granted the M.S. degree “enroute” to the Ph.D. The enroute Ph.D. (direct to Ph.D. path) requires a minimum of 3.5 undergraduate GPA.

Student Financial Support

Various types of assistantships and fellowships are available. Awards are made to the most qualified applicants first and generally are not available for all students.

Other Relevant Information

Each new student chooses an area of specialty, selects an advisor and committee, customizes a program of study and begins research in the first semester of residence. The Director of Graduate Programs acts as a temporary advisor initially and should be contacted with questions.

Degrees

- Aerospace Engineering (MS) (p. 284)
- Aerospace Engineering (PhD) (p. 285)
- Aerospace Engineering (Minor) (p. 286)

1 “Required Courses” must consist of a minimum of two 700-level courses, and may consist of up to five non-MAE courses approved in conjunction with the academic committee.

Additional Requirements

- Students with a previous MS degree from NCSU:
  - without minor – may transfer up to 18 credit hours
  - with minor – may transfer up to 30 credit hours
- Students with a previous MS from outside NCSU:
  - without minor – may transfer up to 18 credit hours
  - with minor – may transfer up to 18 credit hours

Biomanufacturing
The Golden LEAF Biomanufacturing Training and Education Center (BTEC) offers two graduate degrees: a thesis-based Master of Science (MS) in Biomanufacturing and a Master of Biomanufacturing (MR). Both are Professional Science Master's (PSM) degrees, which provide advanced education and training in a specific discipline while simultaneously developing business skills highly valued by employers.

Both degrees offer students the choice of upstream (fermentation) or downstream (purification) concentrations to accompany courses in global regulatory affairs, protein characterization techniques, case studies in cGMP manufacturing of influenza vaccine, case studies in monoclonal antibody production, advanced biomanufacturing and biocatalysis, and an industry internship. Both degrees also include professional skills training in effective oral, electronic, and written communications for both technical and business careers. All MBA courses are taught by faculty from the Jenkins Graduate School of Management, a part of NC State's Poole College of Management.

Admission Requirements
Admission to the BIOM program requires completion of an undergraduate degree in engineering, life science or physical sciences, letters of recommendation, and a statement of career goals. A minimum overall grade point average of 3.0 and GRE scores in the 80th percentile are also required. Applicants with previous industry experience or working professionals are strongly encouraged to apply.

Master’s Degree Requirements
Master of Biomanufacturing: BIOM students will complete a minimum of 36 total credit hours including a summer biomanufacturing industry internship, 3 credits of industry practicum case studies, 3 credits of global regulatory affairs and 9 credits of MBA courses in project management, biosciences management and business foundations.

Master of Science: The Master of Science degree requires a minimum of 36 credit hours. Similar to the MR, the BIOM Master of Science curriculum will combine interdisciplinary coursework with 6 MBA credits including a course in project management. In addition, the BIOM Master of Science program will provide more experience in bioprocess development research to familiarize students with the methods, ideals and goals of independent investigation, the concepts of quality by design (QbD), and methods used in industry for design of experiments (DoE) to define design space for industrial processes. As a consequence of the stronger focus on research, BIOM Master of Science students will complete 4 credit hours of industry-focused process research mentored by their BIOM graduate advisor. Each student will submit a written thesis, which will be presented to the student’s BIOM graduate advisory committee.

Student Financial Support
A limited number of full-time participants in the Master of Biomanufacturing program may be eligible for teaching assistantships or industry-sponsored graduate scholarships.

Other Relevant Information
BIOM accepts students in spring and fall semesters. A 10 credit hour graduate minor is also available for NCSU students currently enrolled in thesis-based graduate programs. Two unique 12 credit Graduate Certificates: Upstream Biomanufacturing and Downstream Biomanufacturing are also offered for students currently enrolled in other non-thesis graduate programs. Individuals interested in the BIOM program looking for more information should contact: Dr. Danny Monroe, BIOM Academic Program Coordinator, dsmonroe@ncsu.edu.

Degrees

Downstream Biomanufacturing (Certificate)

Graduate students and working professionals can now earn a new credential to kick-start or advance their career in the biopharmaceutical industry. The Downstream Biomanufacturing graduate certificates offer NC State graduate students* and working professionals the opportunity for hands-on learning in BTEC’s industry-scale simulated cGMP facilities.

Each certificate requires 12 hours of graduate coursework, which can be transferred to the Master of Biomanufacturing program. The majority of BTEC’s graduate courses are offered in the evening or online to better accommodate working professionals.

The certificate can be completed in two part-time semesters.

*Graduate students" includes current NC State graduate students and working professionals enrolled in the Biomanufacturing program.
Biomedical Engineering

The Joint Biomedical Engineering Graduate Program is administered by the combined biomedical engineering graduate faculty from both North Carolina State University and University of North Carolina at Chapel Hill. The joint program also has close working relations with the Research Triangle Institute and industry within the Research Triangle area. These associations enable students to obtain research training in a wide variety of fields and facilitate the selection and performance of dissertation research. The department, thus, provides students with excellent opportunities to realize the goal of enhancing medical care through the application of modern technology.

Biomedical engineering is a dynamic field stressing the application of engineering techniques and mathematical analysis to biomedical problems. Faculty research programs are key to the program, and they include five primary research directions: rehabilitation engineering, regenerative medicine, biomedical imaging, microsystems engineering, and pharmacoeengineering. The department offers graduate education in biomedical engineering leading to the master of science and doctor of philosophy degrees.

Students enter this program with backgrounds in engineering, physical science, mathematics or biological science. Curricula are tailored to fit the needs and develop the potential of individual students. In addition, courses in statistics, mathematics, life sciences and engineering sciences provide a well-rounded background of knowledge and skills.

Admission Requirements

Students must satisfy all entrance requirements for The Graduate School of the University of North Carolina at Chapel Hill or the Graduate School at North Carolina State University, and must demonstrate interest and capability commensurate with the quality of the biomedical engineering program. Prospective students may apply to the graduate school at either UNC-Chapel Hill or NC State. All applicants are considered together as a group. Generally, applications should be submitted by December 11 for consideration for admission in the coming fall semester. Applicants are expected to present Graduate Record Examination (GRE) scores; verbal scores should be at or above the 50th percentile and quantitative scores should be at or above the 70th percentile to be competitive. Admitted students are expected to have an average grade of B (cumulative GPA 3.30) or better and are encouraged to have undergraduate research experience. The program requires that a one-to-three page personal statement about research interest and background be submitted.

Students should have a good working knowledge of mathematics at least through differential equations, plus two years of physical or engineering science and basic courses in biological science. Deficiencies in preparation can be made up in the first year of graduate training.

Doctoral Degree Requirements

A minimum of 52 semester hours of graduate work is required (beyond the Bachelor’s degree). Degree candidates in this program are expected to obtain experience working in a research laboratory during their residence and to demonstrate proficiency in research. The Ph.D. dissertation should be judged by the graduate committee to be of publishable quality. The student must meet the Graduate School’s residency requirement at UNC-CH or NC State as appropriate. Further information on the BME Ph.D. program can be found on the department website.

Required and highly recommended courses

Students are required to take a BME Seminar each semester which is offered at both UNC-CH and NC State. Students must also complete six credits of graduate engineering topics, six credits of graduate life science topics, three credits of engineering mathematics, and three credits of statistics. Students may choose from a number of courses to meet these requirements. Such choices are made in consultation with the student’s academic advisor and the Director of Graduate Programs/Studies.

Comprehensive and Qualifying Examinations

Doctoral students qualify for the Ph.D. degree by meeting grade requirements in their core courses, and then advance on to written and oral preliminary exams before admission to candidacy. Details can be found on the department website.

Degrees

- Biomedical Engineering (MS) (p. 292)
- Biomedical Engineering (MS): Translation Innovation and Entrepreneurship Concentration (p. 293)
- Biomedical Engineering (PhD) (p. 294)
- Biomedical Engineering (Minor) (p. 295)
- Nanobiotechnology (Certificate) (p. 296)

Nanobiotechnology (Certificate)

With financial support from the North Carolina Biotechnology Center, UNC-Chapel Hill and NC State University offer graduate certificates in nanobiotechnology. Tremendous advances in development of nanoscale, nanostructured, and nano-enabled materials for biotechnology applications are currently taking place. In particular, the development of advanced materials (e.g., electronic materials, optical materials, biologically-derived materials, and nanoscale materials) will allow for the development of next generation systems for use in medicine, homeland defense, and agriculture. These systems will provide integration of multiple functions, miniaturization of devices, an increase in stability, and a decrease in cost. In order for universities, companies, and governmental agencies to pursue this highly specialized work, students must be trained at the graduate level to perform work at the interface of nanoscale science and biotechnology. The nanobiotechnology certificates are aligned with the need for highly trained professionals to nurture rapid growth of nanobiotechnology infrastructure in North Carolina. The keystone of the certificates at both universities is a core nanobiotechnology course (BME 540, 3 credit hours), in which lectures, open discussion, and student presentations will be used to introduce students to this area of study.

Chemical Engineering

Research activities in the department include: computational nanoscience and biology; biomolecular engineering and biotechnology; catalysis, combustion, kinetics and electrochemical engineering; biofuels and renewable energy technology; green chemistry and engineering; innovative textiles, polymers and colloids; nanoscience and nanoengineering; and thermodynamics and molecular simulation.

Admissions Requirements

Students admitted to the graduate program normally have a Bachelor’s degree in chemical engineering or its equivalent. Students with undergraduate degrees in chemistry, physics or other engineering disciplines may be admitted but will be required to make up undergraduate course work deficiencies in chemical engineering without graduate credit. The most promising candidates will be accepted up to the number of spaces available.

Master of Science Degree Requirements

The M.S. degree requires a minimum of 30 credit hours. A set of four core courses is required. Two options are provided. In the thesis option, the thesis must be defended in a final public oral examination. In the
non-thesis option, the student must satisfactorily complete a total of 10 graduate courses. A unique feature of the non-thesis option is the availability of a Distance Education Masters in which the students can complete all 30 credit hours remotely through online courses offered via streaming videos without being on campus.

Master of Chemical Engineering Degree Requirements

The M.Ch.E. degree requires a minimum of 30 credit hours. A set of four core courses is required. A three-credit project is also required.

Doctor of Philosophy Degree Requirements

Students normally take a set of five core courses, two advanced courses and at least 6 credits of dissertation research. A thesis is required; this must be defended in a final public oral examination. In addition, the candidate must: (1) submit and defend an original written proposition in any area of chemical engineering, and (2) submit and defend a proposal to perform his/her thesis research.

Degrees

- Chemical Engineering (MR) (p. 298)
- Chemical Engineering (MS) (p. 299)
- Chemical Engineering (PhD) (p. 300)
- Chemical Engineering (Minor) (p. 302)

Civil Engineering

Graduate programs are offered in coastal and water resources engineering, computing and systems, construction engineering and management, environmental engineering, geotechnical and geoenvironmental engineering, mechanics and materials, structural engineering and mechanics, transportation engineering and materials.

Admission Requirements

Normal minimum GPA requirements include 3.0 overall and in the major. Students who do not meet these academic requirements may take graduate courses through the Non Degree Studies program to demonstrate academic ability, but consultation with the Director of Graduate Programs is strongly advised. Applicants without academic experience in civil engineering, construction engineering, or environmental engineering may be required to take undergraduate courses to remove deficiencies, but graduate credit is not given for these courses. The Graduate Record Examination is required for all international applicants and all applicants to the MSCE or MSENE degree programs.

Master's Degree Requirements

Four Master's degrees, requiring a minimum of 30 or 31 credit hours, are available. At least two-thirds of a Master's program should be in a well-defined major area of concentration. The MCE is a non-thesis (Option B) degree with other requirements, such as independent projects or core courses, specified in some areas of specialization. A formal minor is not permitted. The MCE is available both on-campus and through distance education. The MSCE degree requires a thesis and a formal minor is optional. Requirements for the MENE and MSENE are the similar to those for the CE degrees.

Doctoral Degree Requirements

The Ph.D. typically requires one year of full-time course work beyond the master's degree and research culminating in a dissertation. The program must develop a well-defined major area of concentration and may include supporting courses outside the major or a formal minor in a related field. All specialty areas, including Environmental Engineering, are included in the one Ph.D. program.

Student Financial Support

Departmental teaching and research assistantships are available including coverage of tuition and health insurance. Fellowships -- full or supplemental to an assistantship -- are available for exceptional applicants. All financial aid recipients are selected on merit-based competition with other applicants. Applications requesting financial aid (both U.S. and international) should be submitted early: February 1 for Fall admission and by July 15 for Spring admission.

Degrees

- Civil Engineering (MR) (p. 304)
- Civil Engineering (MS) (p. 308)
- Civil Engineering (PhD) (p. 311)
- Civil Engineering (Minor) (p. 313)

Civil Engineering (PhD)

Degree Requirements
Students may choose from the specializations below to complete coursework within a focus area.
Degrees earned will be distributed as: “Doctor of Philosophy in Civil Engineering” without specialization specifications.

- 54 graduate credit hours beyond master's
- Areas of Specialization
  - Computing and Systems
  - Construction Engineering
  - Environmental, Water Resources, and Coastal Engineering
  - Geotechnical/Geoenvironmental Engineering
  - Mechanics and Materials
  - Structural Engineering and Mechanics
  - Transportation Materials and Systems

Alex Albert
Tarek Aziz
Eleni Bardaka
Ashly Margot Cabas Mijares
Douglas Franklin Call
The Master of Science in Computer Engineering may be earned with thesis option or through the non-thesis option. Either option may be used as preparation for further graduate study or employment in industrial research, development or design.

Also a strong Ph.D. program is available for those who wish to pursue a research and/or teaching career in Industry, Government or Academia.

Admissions Requirements

Admission to the M.S. program requires a B.S. in electrical engineering, computer engineering or computer science, and an overall undergraduate GPA of at least 3.0. For non-native English speakers, the minimum acceptable TOEFL score for admission to the M.S. program is 90 (minimum 18 in each area, with minimum of 19 on Speaking). The GRE is required for all programs of study but may be waived upon request for graduates from US Universities (see below). Admission is further limited by available room in the elected program of study. Meeting the above minimum requirements alone does not guarantee admission.

Applicants to the Master’s and PhD programs who do not have a Bachelor’s degree in Electrical Engineering or Computer Engineering, but have a closely related degree from an accredited college or university, must have taken the following pre-requisite courses: courses equivalent to ECE 109, ECE 209, ECE 212, ECE 220, ECE 301, ECE 302, ECE 309 and CSC 226.

GRE scores within the last four years of the date of anticipated admission. Guideline for minimal GRE percentile scores are 70 percentile verbal, 90 percentile quantitative, and 50 percentile analytical or writing. GRE scores for students who are graduates from NCSU may be waived. They also might be waived for graduates from US ABET accredited programs with good GPAs.

All international applicants from non English speaking countries must submit TOEFL scores. The TOEFL must have been taken within two years of the date of anticipated admission. On the TOEFL IBT, students must have a minimum of 18 on each section of the test with a minimum total of 90. Scores on previous versions of the TOEFL are considered with the same qualitative standard. On the IELTS, we require a minimum score of 6.5 in each section. This requirement also applies to US citizens whose principal language of instruction has not been English (for example, most applicants from Puerto Rico and the Virgin Islands).

TOEFL - institution code 5496; department code 66
GRE - institution code 5496; department code 1203

Admission to the Ph.D. program requires a B.S. or M.S. in electrical engineering, computer engineering or computer science with an
expectation of an overall GPA of at least 3.25. The minimum acceptable TOEFL score for admission to the Ph.D. program is 90 (minimum 18 in each area, with minimum of 19 on Speaking). The GRE is required for all programs of study but might be waived for NCSU graduates or graduates from other US ABET accredited schools with good GPAs. Admission is further limited by available room in the elected program of study, and meeting the minimum requirements as given above does not guarantee admission.

**Master's Degree Requirements**

Thirty-one (31) credit hours; a thesis is optional. Students must have at least 21 hours of ECE courses that cover at least three specialty areas and have at least three credit hours of advanced-level (700-level) ECE courses. Students electing the Option B non-thesis option must meet core course requirements; have ECE courses that cover at least three specialty areas' and have at least three credit hours of 700-level ECE courses.

The Master's degree is offered online through Engineering OnLine. Applications to these MS on-line programs are through the ECE Department and all students must comply with ECE program requirements.

**Doctoral Degree Requirements**

Approximately 54 credit hours are required beyond the M.S. degree or 72 credit hours beyond the B.S. degree. For those with an NCSU MS degree in our department, no additional courses are required. For those with an NCSU MS degree in another department, 6 credit hours are required in our department. For those with a non NCSU MS degree, 12 credit hours of coursework are required. For those with only a Bachelors degree 30 credit hours of coursework are required. The remaining credit hours are research.

The department wishes to evaluate a Ph.D. student's research potential as quickly as possible. Consequently, all Ph.D. students are required to pass a qualifying review before the end of their third semester of study. This review is based on the student’s academic performance to date and the results of a project with one of their committee members. Results are presented to the committee in both written and oral form. Based on this review, the committee will decide if the student may continue in the Ph.D. program.

**Student Financial Support**

The department offers financial support to qualified students in the form of teaching assistantships, research assistantships, and fellowships. These sources of support generally include coverage of tuition and fees.

**Computer Networking**

The Master of Science in computer networking may be earned through the M.S. with thesis option or through the non-thesis option. Either option may be used as preparation for further graduate study or employment in industrial research, development or design environment, although students planning to continue on for a Ph.D. should discuss the option selected with their advisors.

The Master of Science in Computer Networking is also available as an online degree program. This degree has a non-thesis option, does not require on campus attendance, and may be used in preparation for further graduate student or employment in an industrial research, development or design environment. The program is available to USA residents and to United States military personnel serving...
overseas and it is offered online through Engineering Online (https://www.engineeringonline.ncsu.edu/).

Admission Requirements
Admissions criteria will adhere to those currently listed on the program website (https://www.networking.ncsu.edu/).

Master's Degree Requirements
Computer networking core courses constitute 9 of the 30 minimum credit hours. Students take 12 additional credit hours of computer networking courses from one of four currently defined technical concentration areas: network design, network hardware, network software, or networking services. The remaining 9 credit hours may be taken from an approved management concentration sequence, as additional courses in the computer networking technical concentration areas, or as 6 hours of thesis and 3 credit hours from the list of approved computer networking courses. At least 6 of the 30 credits must come from the 700 level, and non-letter graded courses such as individual studies courses may account for a maximum of 3 credit hours.

Select a minimum of one course below:

- CSC 505  Design and Analysis Of Algorithms 3
- CSC 565  Graph Theory 3
- CSC 579  Introduction to Computer Performance Modeling 3
  or ECE 579  Introduction to Computer Performance Modeling 3
- CSC/ECE 776  Design and Performance Evaluation of Network Systems and Services 3
- ECE 766  Signal Processing for Communications & Networking 3
- CSC/ECE 777  Telecommunications Network Design 3

### Faculty

#### Full Professors
- B. Jayant Baliga
- Mesut E. Baran
- Salah M. A. Bedair
- Subhashish Bhattacharya
- Alper Yusuf Bozkurt
- Gregory T. Byrd
- Rada Yuryevna Chirkova
- Mo-Yuen Chow
- Huaiyu Dai
- William Rhett Davis
- Alexandra Duel-Hallen
- Michael James Escuti
- Do Young Eun
- Brian Allan Floyd
- Paul D. Franzon
- John J. Grainger
- Edward Grant
- Brian L Hughes
- Iqbal Husain
- Ki Wook Kim
- Frederick Anthony Kish Jr.
- Robert Michael Kolbas
- Hamid Krim
- Ning Lu
- Srdjan Miodrag Lukic
- Leda Lunardi
- Thomas Kenan Miller III
- Veena Misra
- Rainer Frank Mueller
- John F. Muth
- H. Troy Nagle Jr.
- Arne Nilsson
- Omer Oralkan
- Mehmet Cevdet Ozturk
- Harilaos George Perros
- Douglas Stephen Reeves
- Eric Rotenberg
- Mihail Lorin Sichitiu
- Daniel D. Stancil
- Michael B. Steer
- J K Townsend
- James Tuck
- Daryoosh Vashaee
- John Victor Veliadis
- Ioannis Viniotis
- Wenye Wang
- Huiyang Zhou

#### Associate Professors
- Jacob James Adams
- Samuel T. Alexander
- Dror Zeev Baron
- Michela Becchi
- Aranya Chakrabortty
- Alexander G. Dean
- Ismail Guvenc
- Khaled Abdel Hamid Harfoush
- Michael W. Kudenov
Computer Science

The flagship degree is the Ph.D. in Computer Science, which prepares students for leadership positions in academia, industry research labs, and government. Alternatively, the master's degree program offers the Master of Science (thesis) and the Master of Computer Science (non-thesis, available via either distance learning or on-campus enrollment). There is also a Master of Computer Networking degree provided jointly through the Computer Science and the Electrical and Computer Engineering departments (see Computer Networking). Our graduate students also benefit from access to specialized career services. This includes the Corporate & Career Services suite, with opportunities for on-campus interviews, small group career workshops, virtual practice interviews, and individual career advising.

Admissions Requirements

Minimum application requirements include an accredited Bachelor’s degree with at least a B average and, for non-Computer Science majors, strong academic performance in computer science and mathematics. Applicants must also submit the GRE General Test scores and international applicants must provide TOEFL or IELTS scores, as proof of English proficiency. We also ask for a Statement of Purpose to be included with the application as well as three professional or academic recommendations.

Those interested in developing their computer science knowledge and skills, but not ready to commit to a degree program, might consider one of our graduate certificates. Refer to the Graduate Certificate Programs listed in the selection under Computer Science.

Student Financial Support

Financial aid is offered to all admitted PhD students. Masters students are not eligible for graduate assistantships until they have completed their first or second semester with a 3.0 or higher average. However, students in our masters program have the opportunity to secure rewarding summer and winter internships.
For additional information about our degree programs, visit our Future Students (https://www.csc.ncsu.edu/academics/graduate/future-students.php) page.

**Degrees**

- Computer Science (MR) (p. 329)
- Computer Science (MS) (p. 332)
- Computer Science (PhD) (p. 334)
- Computer Science (Certificate) (p. 335)
- Data Science Foundations (Certificate) (p. 336)

**Faculty**

**Full Professors**
Tiffany M. Barnes  
Donald L. Bitzer  
Rada Yuryevna Chirkova  
Jon Doyle  
Rudra Dutta  
Edward F. Gehringer  
Xiaohui Gu  
Christopher Graham Healey  
James C. Lester II  
Timothy James Menzies  
Rainer Frank Mueller  
Harilaos George Perros  
Michael A. Rappa  
Douglas S. Reeves  
Gregg Evan Rothermel  
Georgios N. Rouskas  
Nagiza Faridovna Samatova  
Carla Diane Savage  
Xipeng Shen  
Munindar P. Singh  
Matthias F. M. Stallmann  
Mladen Alan Vouk  
Laurie A. Williams

**Associate Professors**
Dennis R. Bahler  
Min Chi  
William H. Enck  
Vincent W. Freeh  
Khaled Abdel Hamid Harfoush  
Steffen Heber  
Arnav Harish Jhala  
Noboru Matsuda  
K. Anyanwu Ogan  
David L. Roberts  
Donald R. Sheehy  
Ranga Raju Vatsavai  
Benjamin Allen Watson

**Assistant Professors**
Anupam Das  
Guoliang Jin  
Alexandros Kapravelos  
Xu Liu  
Collin Francis Lynch  
Christopher Robin Martens  
John-Paul William Ore  
Christopher Joseph Parnin  
Thomason William Price  
Bradley Galloway Reaves  
Alessandra Scafuro  
Muhammad Shahzad  
Kathryn Thomasset Stolee  
Ruozhou Yu

**Practice/Research/Teaching Professors**
Bita Akram  
Suzanne M. Balik  
Tzvetelina Battestilli  
Ignacio Xavier Dominguez  
Patrick A. Dreher  
Sarah Smith Heckman  
Jamie Allison Jennings
## Computer Science (MR)

### Degree Requirements

Degrees earned will be distributed as: "Master of Computer Science" without track specifications. Students may request a department letter upon successful completion of a track curriculum.

### Master of Computer Science (MR)

## Additional Requirements

1. At least 21 hours must be in graduate 500- and 700-level Computer Science courses (note: the Graduate School does not allow 500- and 700-level courses to be taken pass-fail).
2. "Restricted elective" courses may be any graduate letter-graded (500- or 700-level) course within the College of Engineering (including Computer Science), or within the College of Sciences. Exceptions that will "not" count towards graduation:
   - ST 511 (if taken after Spring 2014)
   - special topics courses (including EGR 590) in departments other than Computer Science (if taken after Fall 2012).
3. All Computer Science credits must be at or above the 500 level.
4. To graduate, a student must have at least a 3.00 grade point average (GPA). In addition, for students beginning their degree on or after Fall 2013, the GPA in the group of courses used to satisfy the core course requirement must be at least 3.0 as well. For additional Graduate School requirements regarding degree completion see the Graduate School Handbook (https://grad.ncsu.edu/students/rules-and-regulations/handbook/3-7-masters-degree-summary-of-procedures/).
5. A maximum of four special topics courses (either CSC 591 or CSC 791) may be counted towards graduation (for students beginning Fall 2012 or later).
6. Registration by MCS students in Independent Study (CSC 630) requires approval by the faculty member who will supervise the work, followed by submission to the DGP of a one page written description of the topic and expected outputs, and approval of the DGP. A grade of “S” will require submission of a report describing the work done, and the results obtained. A maximum of three credits of CSC 630 may be counted towards graduation.
7. Minors are neither required nor permitted.

## Faculty

### Full Professors
- Tiffany M. Barnes
- Donald L. Bitzer
- Rada Yuryevna Chirkova
- Jon Doyle
- Rudra Dutta
- Edward F. Gehringer
- Xiaohui Gu
- Christopher Graham Healey
- James C. Lester II

Computer Science (Certificate)

Those interested in developing their computer science knowledge and skills, but not ready to commit to a degree program, might consider the online/on-campus Computer Science Graduate Certificate. Students who complete the certificate will gain in-depth knowledge in Computer Science concepts, methods and tools. Applicants are expected to have an accredited Bachelor of Science degree in Computer Science or any sciences or engineering discipline. A minimum GPA of 3.0, on a 4-point scale, is also expected. The GRE is not required for admission.

Financial aid is not available through our program. Interested applicants will need to review other means of assistance, if needed.

For additional information, visit our Certificate Program in Computer Science (https://www.csc.ncsu.edu/academics/graduate/degrees/cs.php) page.

**Data Science Foundations (Certificate)**

This online/on-campus program is well suited for working professionals who have some formal training in Computer Science and/or Statistics and wish to acquire a basic understanding of data science. Applicants are expected to have an accredited Bachelor of Science degree in either a sciences or engineering discipline, Computer Science or Statistics. A minimum GPA of 3.0, on a 4-point scale, is also expected. The GRE is not required for admission.

Financial aid is not available through our program. Interested applicants will need to review other means of assistance, if needed.

For additional information, visit our Certificate Program in Data Science Foundations (https://www.csc.ncsu.edu/academics/graduate/degrees/dsf.php) page.

Electric Power Systems Engineering

The Master of Science in Electric Power Systems Engineering (MS-EPSE) gives students a thorough understanding of the tools, methods, and practice of electric power engineering. It is both focused and practical in its orientation, with the goal of providing an education that is directly applicable to a career in industry.

The MS-EPSE degree is an accelerated program suitable for a new or recent graduate, as well as experienced professionals who want to receive the necessary retraining to change careers. The program is offered both in-class and as an online degree.

Admission Requirements

Students must have a bachelor's degree from an accredited college or university in electrical engineering with an overall GPA of at least 3.0. Students who do not have a bachelor's degree from an accredited college or university in electrical engineering must satisfy:

1. Completion of the following ECE courses (or electrical engineering courses equivalent to ECE 200, 211, 220, 301, and 303.
2. Applicants must have also completed the following courses or equivalent courses: three semesters of calculus, one semester of probability/statistics, two semesters of physics, and one semester of chemistry.

GRE scores within the last four years of the date of anticipated admission. Guideline for minimal GRE percentile scores are 70 percentile verbal, 90 percentile quantitative, and 50 percentile analytical or writing. GRE scores for students who are graduates from NCSU may be waived.

Three strong recommendations from persons able to comment on the applicant's qualifications for graduate study.

All non-US citizen applicants (i.e., non-resident aliens and permanent residents) must demonstrate proficiency in English at a level necessary to be successful in a graduate program at NC State University. The TOEFL or IELTS test must have been taken within two years of the date of anticipated admission. On the TOEFL iBT, students must have a minimum score of 18 on the Listening, Reading and Writing sections, 19 on the Speaking section, and a minimum Overall Band Score of 6.5. Scores on previous versions of the TOEFL and IELTS are considered with the same qualitative standard. The TOEFL and IELTS tests will be waived if the applicant is a citizen of a country where English is an official language and the language of instruction in higher education or if the applicant has successfully completed at least one year of full-time study in a degree program at a four-year US college or university.

TOEFL - institution code 5496; department code 66.
GRE - institution code 5496; department code 1203.

Master’s Degree Requirements

The MS-EPSE program requires 30 credit hours of graduate coursework. Twenty-seven credits include four core electric power engineering courses; two interdisciplinary courses on power electronics, data communications, cyber security and environmental issues associated with electric power systems; professional skills training on project management, communication skills, and the business aspects of electric power utilities, and solid hands-on experience through laboratories and a capstone project. This program provides a one-to-one interaction with industry partners.

Student Financial Support: Student scholarships are available through an application process. Please contact the program manager for further information.

Other Relevant Information

To further promote integration of concepts and provide hands on experience, the program includes a capstone project. The project will be an industry sponsored smart grid application, and the students will be asked to prototype a method or device and implement it on the 1 MW Green Hub available at the FREEDM Systems Center for smart grid applications.

Degrees

• Electric Power Systems Engineering (MS) (p. 339)
• Electric Power Systems Engineering (MS): Wide Bandgap Power Electronics Concentration (p. 339)

Electrical Engineering

The Master of Science in Electrical Engineering may be earned with thesis option or non-thesis option. Either option may be used as preparation for further graduate study or employment in industrial research, development or design.

Also a strong Ph.D. program is available for those who wish to pursue a research and/or teaching career in Industry, Government or Academia.

Admissions Requirements

Admission to the M.S. program requires a B.S. in electrical engineering, computer engineering or computer science, and an overall undergraduate GPA of at least 3.0. For non-native English speakers, the minimum acceptable TOEFL score for admission to the M.S. program is 90 (minimum 18 in each area, with minimum of 19 on Speaking). The GRE is required for all programs of study but may be waived upon request for graduates from US Universities (see below). Admission is further limited by available room in the elected program of study. Meeting the above minimum requirements alone does not guarantee admission.

Applicants to the Master’s and PhD programs who do not have a Bachelor’s degree in Electrical Engineering or Computer Engineering, but have a closely related degree from an accredited college or university, Bachelor’s degree in Electrical Engineering or Computer Engineering, but meeting the minimum requirements as given above does not guarantee admission.

Master’s Degree Requirements

Thirty-one (31) credit hours; a thesis is optional. Students must have at least 21 hours of ECE courses that cover at least three specialty areas and have at least three credit hours of advanced-level (700-level) ECE courses. Students electing the Option B non-thesis option must meet core course requirements; have ECE courses that cover at least three specialty areas and have at least three credit hours of 700-level ECE courses.

The Master’s degree is offered online through Engineering OnLine. Applications to these MS on-line programs are through the ECE Department and all students must comply with ECE program requirements.

Doctoral Degree Requirements

Approximately 54 credit hours are required beyond the M.S. degree or 72 credit hours beyond the B.S. degree. For those with an NCSU MS degree in our department, no additional courses are required. For those with an NCSU MS degree in another department, 6 credit hours are required in our department. For those with a non NCSU MS degree, 12 credit hours of coursework are required. For those with only a Bachelors degree 30 credit hours of coursework are required. The remaining credit hours are research.

All international applicants from non English speaking countries must submit TOEFL scores. The TOEFL must have been taken within two years of the date of anticipated admission. On the TOEFL iBT, students must have a minimum of 18 on each section of the test with a minimum total of 90. Scores on previous versions of the TOEFL are considered with the same qualitative standard. On the IELTS, we require a minimum score of 6.5 in each section. This requirement also applies to US citizens whose principal language of instruction has not been English (for example, most applicants from Puerto Rico and the Virgin Islands).

All international applicants from non English speaking countries must submit TOEFL scores. The TOEFL must have been taken within two years of the date of anticipated admission. On the TOEFL iBT, students must have a minimum of 18 on each section of the test with a minimum total of 90. Scores on previous versions of the TOEFL are considered with the same qualitative standard. On the IELTS, we require a minimum score of 6.5 in each section. This requirement also applies to US citizens whose principal language of instruction has not been English (for example, most applicants from Puerto Rico and the Virgin Islands).

GRE scores within the last four years of the date of anticipated admission. Guideline for minimal GRE percentile scores are 70 percentile verbal, 90 percentile quantitative, and 50 percentile analytical or writing. GRE scores for students who are graduates from NCSU may be waived. They also might be waived for graduates from US ABET accredited programs with good GPAs.

Admission to the Ph.D. program requires a B.S. or M.S. in electrical engineering, computer engineering or computer science with an expectation of an overall GPA of at least 3.25. The minimum acceptable TOEFL score for admission to the Ph.D. program is 90 (minimum 18 in each area, with minimum of 19 on Speaking). The GRE is required for all programs of study but might be waived for NCSU graduates or graduates from other US ABET accredited schools with good GPAs. Admission is further limited by available room in the elected program of study, and

Student Financial Support

The department offers financial support to qualified students in the form of teaching assistantships, research assistantships, and fellowships. These sources of support generally include coverage of tuition and fees.

Total Hours 15

Renewable Electric Energy Systems (Certificate)

The Graduate Certificate in Renewable Electric Energy Systems provides graduate students with the opportunity to develop expertise in renewable electric energy systems and advanced electric power grid technology in addition to their major area of graduate study.

Admissions

Applicants with appropriate background must meet one of the three following requirements:

* be a graduate of an accredited four-year college or university, and have a GPA of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study;
* be a degree student in good standing in an NC State University graduate program; or
* have a Master’s degree in a related field of study.

A student may obtain more than one graduate certificate in a different field. Each certificate must have at least nine (9) credit hours that are unique to it.
Requirements

The Graduate Certificate in Renewable Electric Energy Systems requires a minimum of 12 hours, including one 3-hour core course and 9 credit hours of electives to be selected from a list that contains relevant courses for the certificate. Students must maintain a minimum overall GPA of B (3.0).

Total Hours 12

Engineering

The Master of Engineering (MR) distance education degree program is designed for students with an undergraduate degree in engineering or a closely related field who wish to pursue a graduate degree in engineering. The program was created to address the needs of students whose schedule or location does not allow on-campus study, working professionals who wish to obtain an advanced degree or those who wish to change fields within engineering.

Convenience and flexibility are the key advantages of this interdisciplinary degree program that can be earned totally at a distance with no GRE, thesis, or final oral exam requirements. The Master of Engineering degree allows students to choose from different subplans from the many disciplines of engineering within the College of Engineering or to design their own degree plans that best meet their career or employment goals. For additional information please look at our Master of Engineering (https://www.engr.ncsu.edu/academics/grad/degrees/master-of-engineering/) program site.

The program does not offer financial assistance. The Office of Scholarships and Financial Aid (OSFA) (https://studentservices.ncsu.edu/your-money/financial-aid/) assists students in applying for and securing financial assistance for educational expenses. OSFA can help with all questions about financial aid, and guide students to available scholarships, grants, and loans.

Degrees

- Engineering (MR) (p. 356)
- Engineering (MR): Aerospace Engineering Concentration (p. 356)
- Engineering (MR): Chemical Engineering Concentration (p. 356)
- Engineering (MR): Computer Engineering Concentration (p. 356)
- Engineering (MR): Computer Science Concentration (p. 357)
- Engineering (MR): Engineering Management Concentration (p. 357)
- Engineering (MR): Industrial Engineering Concentration (p. 357)
- Engineering (MR): Materials Science and Engineering Concentration (p. 357)
- Engineering (MR): Mechanical Engineering Concentration (p. 358)
- Engineering (MR): Nuclear Engineering Concentration (p. 358)

- 3-6 courses from Nuclear Engineering

Environmental Engineering

Graduate programs are offered in coastal and water resources engineering, computing and systems, construction engineering and management, environmental engineering, geotechnical and geoenvironmental engineering, mechanics and materials, structural engineering and mechanics, transportation engineering and materials.

Admission Requirements
Normal minimum GPA requirements include 3.0 overall and in the major. Students who do not meet these academic requirements may take graduate courses through the Non Degree Studies program to demonstrate academic ability, but consultation with the Director of Graduate Programs is strongly advised. Applicants without academic experience in civil engineering, construction engineering, or environmental engineering may be required to take undergraduate courses to remove deficiencies, but graduate credit is not given for these courses. The Graduate Record Examination is required for all international applicants and all applicants to the MSCE or MSENE degree programs.

Master's Degree Requirements
Four Master's degrees, requiring a minimum of 30 or 31 credit hours, are available. At least two-thirds of a Master's program should be in a well-defined major area of concentration. The MCE is a non-thesis (Option B) degree with other requirements, such as independent projects or core courses, specified in some areas of specialization. A formal minor is not permitted. The MCE is available both on-campus and through distance education. The MSCE degree requires a thesis and a formal minor is optional. Requirements for the MENE and MSENE are similar to those for the CE degrees.

Doctoral Degree Requirements
The Ph.D. typically requires one year of full-time course work beyond the master's degree and research culminating in a dissertation. The program must develop a well-defined major area of concentration and may include supporting courses outside the major or a formal minor in a related field. All specialty areas, including Environmental Engineering, are included in the one Ph.D. program.
Student Financial Support
Departmental teaching and research assistantships are available including coverage of tuition and health insurance. Fellowships -- full or supplemental to an assistantship -- are available for exceptional applicants. All financial aid recipients are selected on merit-based competition with other applicants. Applications requesting financial aid (both U.S. and international) should be submitted early: February 1 for Fall admission and by July 15 for Spring admission.

**Industrial Engineering**

The graduate faculty of the Edward P. Fitts Department of Industrial and Systems Engineering supports academic and research interests in four areas:

1. manufacturing systems (manufacturing processes, medical device manufacturing systems, CAM, CIM, robotics, automation, rapid prototyping and concurrent engineering);
2. production systems (logistics systems, supply chain management, scheduling, inventory control, materials handling, facility design, furniture manufacturing and management, quality control, and engineering economics);
3. systems analysis and optimization (health systems, stochastic processes, simulation, mathematical programming, and soft computing); and
4. ergonomics (human performance, occupational safety, and biomechanics). The department faculty actively supports independent graduate degree programs in operations research, integrated manufacturing systems engineering, textile technology and management, and financial mathematics.

**Admission Requirements**

Applications are accepted from undergraduate majors in engineering and in the behavioral, physical and mathematical sciences who meet prerequisites in calculus and linear algebra, computer science, and statistics.

**Master's Degree Requirements**

The M.S. degree requires 30 credit hours and involves depth of study in a specified area of concentration, nine hours in a minor, and six hours of research credit. The Master of Industrial Engineering (M.IE.) degree may be obtained by course work only; project work is optional. A minimum of 33 credit hours is required for the M.IE.

**Doctoral Degree Requirements**

This degree requires 72 credit hours of course and research work beyond the Bachelor's degree. Undergraduate students with superior credentials may apply directly to the doctoral program and bypass the master's degree. For students who have completed the Master's degree, typically 30 to 36 hours of additional course work are required. A departmental written qualifying examination is required.

**Student Financial Support**

Research and teaching assistantships are available on a competitive basis to early applicants. Fellowships that supplement assistantship stipends are available to U.S. applicants with superior credentials. Award priority is given to Ph.D. and then to M.S. applicants.

**Degrees**

- Industrial Engineering (MR) (p. 364)
- Industrial Engineering (MS) (p. 365)
- Industrial Engineering (PhD) (p. 367)
- Industrial Engineering (Minor) (p. 368)

Integrated Manufacturing Systems Engineering

The Integrated Manufacturing Systems Engineering (IMSE) Institute was established in 1984. IMSE provides multidisciplinary graduate-level education and practical training opportunities in the theory and practice of integrated manufacturing systems engineering at the masters level. IMSE focuses on providing a manufacturing presence and a program environment in the College of Engineering where faculty, graduate students, and industry can engage cooperatively in multidisciplinary graduate education, basic and applied research, and technology transfer in areas of common interest related to modern manufacturing systems technology. The objective of the IMSE program is to offer students with traditional discipline backgrounds in engineering and the physical sciences an opportunity to broaden their understanding of the multidisciplinary area of manufacturing systems. Core areas of concentration are offered in manufacturing systems, logistics, mechatronics, and advanced manufacturing.

Admission Requirements

Admission to the IMSE master's program requires a B.S. degree from an accredited institution in engineering, physics, mathematics, or computer science. Check with the Institute if your degree is in a field other than these listed.

Master's Degree Requirements

The IMSE program requires a minimum of 27 hours of graduate course work and six hours of research project. The graduate course work includes five required core courses that provide a multidisciplinary overview of subject materials basic to manufacturing systems, logistics, mechatronics, and advanced manufacturing. Specialization is provided in the student's elective courses. The six hours of research project is performed either individually or in teams in areas that compliment and reinforce the graduate course work.

The IMSE degree is now available through Engineering Online as a distance program. Application to the IMSE Distance Education program is the same as the on-campus program. More information is available via the IMSE Institute (https://www.imsei.ncsu.edu/) (wjirwin@ncsu.edu, 919-515-3808).

Student Financial Support

Assistantships and internships are available to qualified students. The full financial support package covers tuition and health insurance. Internships are also undertaken directly with host companies.

Internship

The IMSE internship program was established to provide a cooperative industrial and academic experience for some IMSE students and our industrial sponsors. Several Internship awards are made available every year for special training in IMSE host companies. Students who are selected to participate in the internship program may receive financial support for up to four semesters and one summer. Typically, the student attends classes for two semesters (fall and spring), works at the sponsor company for the following summer and fall semester, and completes the IMSE course requirements the following spring semester. The student uses the experience at the sponsor company as the basis for their IMSE research project.

Other Relevant Information

IMSE Students are supported by companies across the country during their internships. Both full-time and part-time internship support is provided depending on availability. These companies have included: ABB, ABCO Automation, Applied Materials, AT&T, Bayer, BSH, Bosch, Biogen, Castle Hill Technologies, Caterpillar, Closure Medical, Corning Cable Systems, CSX, Cummins, Disney, Dupont, Daimler Trucks, Eljay, Ford, GE, GKN, GSK, IBM, Ingersoll Rand, Intel, John Deere, Mack Trucks, Mayne Pharma, Michelin, Morganite, MTS Systems, Nepton Technologies, Rubbermaid, RxMedic, Samsung Semiconductor, Schwanns, Snap-On, Tesla, UPS, Volvo Trucks, and ZF Corporation and many others.

Materials Science & Engineering

Materials enable all of the engineering and high-technology fields that are an integral part of our society. Graduate programs in this department focus on understanding the structure, structure modification and properties of materials and the development of new or improved materials and advanced processing methods that are critical links between the design and the realization of new systems for manufacturing, nanotechnology, energy, and biomaterials.

The M.S. and Ph.D. programs are research-based degree programs focusing on faculty-mentored, state-of-the-art materials research that leads to a thesis or dissertation.

The Master of Materials Science and Engineering is a non-thesis degree program designed for students from a variety of technical backgrounds interested in furthering their understanding of materials processing, characterization and properties. This program is appropriate for distance-education Masters students.

The Master of Nanoengineering is a multidisciplinary non-thesis degree program designed so students can declare a concentration in one of the following three areas:

1. Materials Science in Nanoengineering;
2. Nanoelectronics and Nanophotonics; or
3. Biomedical Sciences in Nanoengineering.

This program is appropriate for distance-education Masters students.

Admission Requirements

In addition to the general admission requirements as set by the Graduate School, the department requires submission of GRE scores. Non-native English speakers also require a minimum TOEFL score as established by the Graduate School.

Master’s Degrees Requirements

The Master of Science degree (M.S.) requires 30 credit hours of coursework/research and a research thesis. The Master of Materials Science and Engineering degree (M.M.S.E.) requires 30 credit hours of coursework only. The Master of Nanoengineering (M.NAE.) requires 30 credit hours of coursework only.

Doctoral Degree Requirements

The doctoral degree (Ph.D.) requires 72 credit hours of coursework/research, a qualifying exam, and a research dissertation.

Student Financial Support

Students in the M.S. and Ph.D. graduate programs normally receive financial support in the form of research or teaching assistantships or fellowships.

Other Relevant Information

The department reflects the interdisciplinary nature of the field of Materials Science and Engineering. A substantial number of current graduate students majored in fields other than but related to materials, and the department has associated graduate faculty from other departments supervising thesis and dissertation research.

Materials Science and Engineering (Certificate)

The Graduate Certificate Program (GCP) in Materials Science and Engineering (MSE) is designed for working professionals who do not have formal training in MSE, but wish to acquire a basic understanding of materials science to improve their on-the-job experience and knowledge. Most people will enroll in this program as distance education students through the Engineering Online (EOL) office at NC State University. Students can customize their particular certificate programs to focus on specific areas of materials science that interest them.

Program of Study

The MSE GCP requires a total of 12 credit hours, including MSE 500 (3 credit hours) and three MSE elective courses (9 credit hours) selected by the student. MSE 500 is a fast-paced overview of the field of materials science and engineering and is designed for students who do not have a formal background in MSE, such as those with BS degrees in chemistry, physics and other fields of engineering. MSE 500 also provides the foundation for more specialized MSE graduate courses.

The courses available to students in the MSE GCP are shown here. Each course is 3 credit hours and most courses are offered at least once per year through the EOL office. By judicious selection of elective courses, students can customize their GCP to focus on areas of interest to them.

Requirements for admission

To be admitted to the MSE Graduate Certificate Program, a student must have a BS degree in the sciences or engineering from a regionally accredited four-year college or university, and have an overall (or major) GPA of at least 3.0 on a 4-point scale.

All new students must complete the NCSU Graduate School application for admission to the MSE GCP. The GRE exam is NOT required for admission to the GCP. Application deadlines are March 1 for summer and fall admission, and October 1 for spring admission. Students can begin study in the fall, spring or summer semester immediately following their acceptance into the program. Registration procedures, registration dates and course availability for each semester can be found on the NCSU Registration and Records webpage. Information regarding Engineering Online can be found on the EOL webpage.

Academic success in the MSE GCP might have a strong bearing on admission to a graduate degree program. However, completion of a graduate certificate program IN NO WAY guarantees entry into a graduate degree program, which must be done through a separate application process.

Mechanical Engineering

The Mechanical Engineering graduate program prepares students in all aspects of mechanical and thermal systems design and manufacturing. Course offerings and research programs for mechanical engineering students are available in applied mechanics; biomechanics; combustion; design and manufacturing; dynamic systems and control; energy conversion and systems; experimental mechanics; fluid dynamics; heat transfer; mechanics of materials; micro, nano and MEMS; and vibration and acoustics. Sub-areas include adaptive and auto adaptive structures, controls and system identification, CFD, energy conversion and renewable energy, materials processing and tribology, mechatronics, precision engineering, and reactive and multiphase flows.

Admission Requirements
An applicant to the master's program must be a graduate of an accredited undergraduate program with a B.S. degree in either mechanical or aerospace engineering. Graduates of other accredited programs in engineering, physical sciences and mathematics may be considered but may be required to make up undergraduate deficiencies without graduate credit. Provisional admissions, as well as exceptions, are sometimes granted under special circumstances. The most qualified applicants are accepted first. Applicants to the Ph.D. program must have met the M.S. admission requirements and additionally must satisfy the Ph.D. admissions requirements. Applicants to the online, distance education M.S. program in mechanical or aerospace engineering are not required to take the GRE exam.

Master's Degree Requirements
The thesis-option M.S. degree programs in mechanical engineering and aerospace engineering require 21 hours of course credit and nine hours of thesis research. The non-thesis M.S. degree programs in mechanical engineering and aerospace engineering require 27 hours of course credit and a three-credit-hour project. The non-thesis M.S. degree programs in mechanical engineering and aerospace engineering are offered on campus and off campus through distance education.

Ph.D. Degree Requirements
A minimum of 72 hours of credit are required to obtain the Ph.D. degree. A direct path to the Ph.D. from the B.S. is also available with which the student is granted the M.S. degree “enroute” to the Ph.D. The enroute Ph.D. (direct to Ph.D. path) requires a minimum of 3.5 undergraduate GPA.

Student Financial Support
Various types of assistantships and fellowships are available. Awards are made to the most qualified applicants first and generally are not available for all students.

Other Relevant Information
Each new student chooses an area of specialty, selects an advisor and committee, customizes a program of study and begins research in the first semester of residence. The Director of Graduate Programs acts as a temporary advisor initially and should be contacted with questions.

Total Hours 72

1 “Required Courses” must consist a minimum of two 700-level courses, and may consist of up to five non-MAE courses approved in conjunction with the academic committee.

Additional Requirements

- Students with a previous MS degree from NCSU:
  - without minor – may transfer up to 18 credit hours
  - with minor – may transfer up to 30 credit hours
- Students with a previous MS from outside NCSU:
• without minor – may transfer up to 18 credit hours
• with minor – may transfer up to 18 credit hours

Total Hours | 30

* “Technical Electives” may be ones in the MNAE program not used to satisfy other degree requirements or other technical courses approved by the Director of Graduate Program, Nanoengineering.

---

Nuclear Engineering

The discipline of nuclear engineering is concerned with the development of nuclear processes for energy production and with the applications of radiation for the benefit of society. Representative topics of investigation include analytical, computational and experimental research in the neutronics, materials, thermal-hydraulics and control aspects of fission reactors; radiation detection and measurement of basic physics parameters; nuclear safety and security; applications of radioisotopes and radiation in industry, medicine and science; and plasma science, plasma engineering and design aspects of fusion reactors.

### Admission Requirements

Bachelor's degree graduates in any of the fields of engineering or physical sciences may be qualified for successful advanced study in nuclear engineering. Prior experience or course work in nuclear physics, partial differential equations and basic reactor analysis is helpful but may be gained during the first year of graduate study. GRE scores (general test) are needed for on-campus graduate study.

### Master's Degree Requirements

A total of 30 credit hours (at least nine semester hours of interdisciplinary breadth and 21 Nuclear Engineering) is required for both the M.S. and MNE degrees. An engineering project is required for the MNE degree and a formal thesis is required for the M.S. degree.

### Doctoral Degree Requirements

A total of 72 credit hours which includes a minor (at least 12 hours) is required. Students must pass a departmental qualifying exam in three core areas of nuclear engineering, and they can (if they so choose and
if their advisor approves) prepare for the exam by enrolling during their first year in three corresponding graduate courses comprising radiation fundamentals, reactor engineering, and radiation detection. Students who already earned a masters degree may count some of their credits towards the required PhD hours; consult <grad manual posted online> for details.

Student Financial Support

Teaching assistantships, research assistantships, and fellowships are available for qualified applicants. Opportunities are also available for graduate traineeships with utility companies, reactor and fuel vendors, and national laboratories providing a valuable combination of financial support and learning in the classroom, the research laboratory and on the job.

Other Relevant Information

The department has many excellent facilities including the one-megawatt PULSTAR fission reactor (soon to be uprated to 2MW), ultra cold neutron source, intense low-energy positron source, neutron scattering facility, neutron radiography unit, neutron activation analysis laboratory, nuclear materials laboratory, plasma laboratories, instrumentation and controls equipment, radiation analyzers and tomography systems, Generic PWR simulator and access to extensive computer facilities ranging from workstations to a supercomputer.

Anthropology

We offer a 30-hour, two-year long graduate program culminating in the Master of Arts degree with specializations in cultural anthropology, biological anthropology, and archaeology. Our faculty conduct research across the globe and prepare our students to enter top-ranked doctoral programs and to find satisfying careers in non-academic and applied settings. Students have the option to complete a master’s thesis, which we recommend for those considering going on to a PhD program, or a non-thesis project for those considering non-academic careers.

Financial Support

A limited number of Graduate Student Assistantships are available on a competitive basis.

Admissions Requirements

In addition to general Graduate School requirements, applicants are required to provide a completed application, including transcripts, three letters of recommendation, a personal statement, and a writing sample. CV or resume is optional but encouraged. GRE scores are not required. The deadline for completed applications is January 10. The curriculum is set for fall admission only.

Master’s Degree Requirements

The M.A. degree requires a total of 30 credit hours. All students take an introduction to anthropological research course in their first semester (ANT 501) and select a specialty area, such as archaeology, bioarchaeology, or cultural anthropology. Students who write a master’s thesis will take six hours of thesis research credit (ANT 695). Students completing a non-thesis project (also known as Option B) take one
independent study (ANT 598) and one additional course in place of the six hours of ANT 695 credit.

Communication

The Master of Science program in communication is designed to provide graduate-level expertise for solving problems in modern organizations and social systems from a communication perspective. The curriculum addresses issues concerned with interpersonal, relational and technologically mediated communication systems essential to modern, networked organizations and societies. Its graduates will acquire advanced-level expertise in communication theory, research, and applications that will improve processes and enhance outcomes within and across diverse social systems. The degree prepares students for higher-level positions in communication professions and for advanced degree programs (e.g., Ph.D. programs).
Admission Requirements
Applicants should have a minimum 3.0 GPA in the undergraduate major and a minimum of 3.0 over the last 60 hours of undergraduate work.

Master's Degree Requirements
The degree requires 36 credit hours with a minimum of 27 credit hours taken in communication. Students will be required to complete 9 hours of core requirements, and 27 hours of electives, 9 of which can be taken outside of the department with the approval of the graduate advisor. Students can also take up to 6 internship or independent study credit hours. Students on the thesis track can take up to 6 thesis credit hours.

Communication, Rhetoric, and Digital Media

The Ph.D. Program in Communication, Rhetoric, and Digital Media prepares doctoral students to analyze the social, cultural, rhetorical, philosophical, and political dimensions of information technologies, new communication media, and digital texts, and to actively engage digital media through research, criticism, production, and practice.

Students work with program faculty from the departments of Communication and English and with affiliated faculty from departments across the university and the broader UNC system to study oral, written, visual, computational, and multimodal forms of communication and rhetoric; to examine the transformation of communication in the context of converging digital media and communication networks; and to address the theoretical and practical challenges of innovative, interdisciplinary research.

Faculty guide students in their work by using a broad range of social scientific and humanistic methods in which they specialize. The program offers comprehensive mentoring for professional development, diverse opportunities for teaching experience, and research assistantships associated with grant-funded faculty projects. CRDM faculty and students collaborate with colleagues in science and technology fields across the university and the Research Triangle.

Our graduates have been very successful finding employment in a variety of positions in academia (both at research-intensive universities and at teaching-oriented liberal arts colleges), government and corporate
organizations, where there is a growing demand for the interdisciplinary skill sets developed in CRDM.

See our website (http://crdm.chass.ncsu.edu/) for more details.

**Admission Requirements**

Master’s degree in Communication, English, Rhetoric, or other relevant field with GPA of 3.0 or better. Master’s level work should include one quantitative or qualitative methods course, as well as three courses in an approved disciplinary area. These hours do not count toward the doctoral degree. Disciplinary areas include: composition studies, including writing across the curriculum, interpersonal/group communication, media studies, organizational communication or public relations, rhetorical studies, and technical communication.

Applicants who are otherwise well qualified may make up these courses after admission. Three reference letters, a statement of goals and interests, a resume of work experience, and a writing sample are also required for application to the program. GRE is not required. The application deadline is January 15th.

**Ph.D. Degree Requirements**

A minimum of 56 hours beyond the Master’s degree are required to complete the Ph.D. program: 15 credit hours of core courses, 3 hours of research methods, 6 hours of professional preparation, 12 hours in an elective focus area, and 20 hours of research and dissertation.

**Student Financial Support**

The CRDM program offers a limited number of Teaching Assistantships, with a stipend, health insurance, and tuition (excluding fees). Teaching Assistants will be assigned according to their interests and qualifications, as well as departmental needs, to either the Communication or the English Department with the possibility of teaching in both departments during their course of study. Those who do not have sufficient qualifications to teach in the first semester will participate in a training program. Some Research Assistantships may also be available.

Creative Writing

The Department of English offers a two-year studio/academic program in fiction or poetry leading to the Master of Fine Arts degree. The program provides an opportunity for students of superior and demonstrated ability in imaginative writing to develop their skills and critical judgment through the practice of writing and the study of literature. The aim of the program is to prepare talented students for careers in writing. Degree candidates are expected to produce a book-length work of literary value and publishable quality.

Admission Requirements

Overall GPA of 3.0 or higher; applicants should submit GRE scores (general aptitude and analytical writing); one official transcript of all undergraduate and graduate work; three letters of recommendation; and two writing samples, one creative, one critical. Creative sample: for fiction, two short stories, or for a novel, three chapters (or one chapter and a short story) totaling 25-40 pages; for poetry, 12 complete poems. Critical sample: no more than 15 pages of writing demonstrating your ability to succeed in graduate-level literature classes, a required part of the MFA curriculum.

Requirements for the MFA in Creative Writing

Candidates for the MFA degree must complete a total of 36 credits. Eighteen of these are taken in the area of writing specialization. These include workshop courses (12 credits) and thesis (6 credits). The remaining credits are taken in literature (6 credits) and elective areas (12 credits, including 6 credit hours of teaching preparation for those on a composition teaching assistantship). In their final semester, students must pass a comprehensive written examination on writing craft, based on a book list selected jointly by the student and the faculty. The final thesis must be a book-length manuscript in the student's field of interest. In fiction, an approximate 200 pages are expected; in poetry, 60 pages. See program website for specific requirements by concentration.

Student Financial Support

All students admitted to the MFA program are eligible for teaching assistantships. TAs in the MFA train to teach undergraduate composition courses, and a few selected creative writing classes.

Other Relevant Information

Application deadline is February 1. Students are admitted for the fall semester only.

The English department has a long tradition of academic and literary excellence, including its heritage of writers from Guy Owen to Lee Smith. The strength of NCSU in the sciences offers students the opportunity to do creative work that engages with issues of technology and its effect on individuals and institutions that are not typically addressed in fine arts programs.

Through the NC State Literary Readings Series, the department sponsors readings and visits by distinguished poets, fiction and non-fiction writers.

English

The M.A. is a 33-hour program offered in four concentrations: literature, rhetoric and composition, linguistics and film studies. Regardless of which path you choose, you'll select from a broad array of courses that will help you meet your personal and professional goals.

Admissions Requirements

Students must submit a personal statement, writing sample, and three letters of recommendations. The application deadline is June 15 for fall semester admission and November 1 for spring. The application deadline to be considered for a teaching assistantship is February 1. Students are admitted for either the fall or spring semesters.

Requirements for MA in English

We offer four areas of concentration that represent distinct dimensions of our discipline. While all options share an emphasis on research and critical thinking, each provides diverse pathways for exploring culture and language. You'll hone your expertise through each concentration's core and elective curriculum (https://english.chass.ncsu.edu/graduate/ma/#degree-requirements). At the end of the 33-hour program, you'll fine-tune and showcase your knowledge through a capstone project.

Student Financial Support

Teaching assistantships (https://english.chass.ncsu.edu/graduate/teaching_assistantships.php) are available for a limited number of promising students. Assistantships are awarded upon admission and are only available for full-time students who begin their graduate work in the fall semester. These students will work with an experienced faculty member during their first year in the program before teaching classes during their second year. Most TAs will teach composition in the First-Year Writing Program while a few others may teach linguistics or film studies.

12

Select one of the following courses in British Literature before 1660:

- ENG 509 Old English Literature
- ENG 510 Middle English Literature
- ENG 529 16th-Century Non-Dramatic English Literature
- ENG 520 Science Writing for the Media
- ENG 551 Chaucer
- ENG 558 Studies In Shakespeare
- ENG 561 Milton
- ENG 578 English Drama To 1642
- ENG 582 Studies in Literature (when topic applies)

Select one of the following courses in British Literature after 1660:

- ENG 550 English Romantic Period
- ENG 560 Victorian Poetry and Critical Prose
- ENG 562 18TH-Century English Literature
- ENG 563 18TH-Century English Novel
- ENG 564 Victorian Novel
- ENG 570 20TH-Century British Prose
- ENG 571 20TH-Century British Poetry
- ENG 572 Modern British Drama
- ENG 579 Restoration and 18th-Century Drama
- ENG 582 Studies in Literature (when topic applies)

Select one of the following courses in American literature:

- ENG 531 American Colonial Literature
- ENG 548 African-American Literature
- ENG 555 American Romantic Period
- ENG 565 American Realism and Naturalism
- ENG 573 Modern American Drama
- ENG 575 Southern Writers
- ENG 576 20TH-Century American Poetry
- ENG 577 20th-Century American Prose
- ENG 580 Literary Postmodernism
- ENG 582 Studies in Literature (when topic applies)

Select one of the following courses in Rhetoric, Linguistics, Composition, Film Studies, Criticism, or Theory:

- ENG 539 Seminar In World Literature
- ENG 549 Modern African Literature
- ENG 532 Narrative Analysis
- ENG 540 History Of Literary Criticism
- ENG 541 Literary and Cultural Theory
- ENG 580 Literary Postmodernism
- ENG 582 Studies in Literature
- ENG 586 Studies In Theory
- ENG 523 Language Variation Research Seminar
- ENG 524 Introduction to Linguistics
- ENG 525 Variety In Language
- ENG 527 Discourse Analysis

**Elective Courses**

15

Select three literature courses approved in conjunction with the academic committee

Select two elective courses in English or complementary fields of study approved in conjunction with the academic committee

Total Hours 33

**Rhetoric and Composition Track**

The Certificate in Digital Humanities is designed for students from any discipline to construct a curriculum in digital humanities training and project work. The certificate is currently coordinated in the English department with participation across CHASS and other colleges.

The Graduate Certificate consists of a student-proposed curriculum of four 3-credit courses which must collectively satisfy the program’s three requirements: contexts, training, and applications. In consultation with the coordinator, students can propose their own tracks through the certificate drawing from a broad array of approved courses at NC State as well as at UNC and Duke, as part of the Triangle Digital Humanities Network. Rather than insisting on a prescriptive definition and preset curriculum for “digital humanities,” this certificate program encourages students to adapt course offerings in digital humanities or digital media to their own evolving research and professional interests in any variety of fields.

To qualify for admission to the Graduate Certificate in Digital Humanities, students must be enrolled in, or have completed, a Master’s or PhD program at an accredited university. Applicants can be either non-degree or degree students. Degree students must have a 3.00 grade point average in their graduate degree program. Non-degree students must have a final grade point average that is at least 3.00. Current degree students in History can apply up to nine (9) towards a doctorate. Students seeking the certificate from other programs must consult with those graduate coordinators to confirm allowed credits toward degree. The certificate will accept up to three hours of transfer credit from courses included in the curriculum. All GCP requirements must be completed within three (3) calendar years beginning on the date the student commences applicable courses.

Foreign Language and Literature

The Master's degree in Foreign Languages and Literature offers concentrations in both French Language and Literature and Spanish Language and Literature.

Admission Requirements

- A baccalaureate degree from an accredited college or university
- Undergraduate GPA of 3.0 or above
- Narrative statement of professional and personal objectives (in English, 300 words).
- Language proficiency as determined by a writing sample and a speaking sample in the target language (French or Spanish). Follow the specific sample guidelines (https://fll.chass.ncsu.edu/graduate/application_information.php#Sample).
- Some applicants may be given provisional admittance. Students admitted provisionally must complete at least 9 hours of 500-level courses in the target language, earning grades of B or higher in order to receive full graduate standing.
- Visit the program’s web site (https://fll.chass.ncsu.edu/graduate/) for complete admissions information.

Degree Requirements

The program requires at least 30 hours of course work and a culminating project. Each student’s program is tailored to enhance his or her career objectives. Students who plan to pursue a Ph.D. or teach in a college community or university receive the requisite training and assistance. K-12 teachers who already have “Initial” or “A” licensure may earn “M” licensure by taking 30 hours in specified disciplines and completing an Action Research Project as their culminating project. K-12 teachers who already hold “A” licensure can add-on English as a Second Language (ESL) licensure by taking 36 hours in specified disciplines. Visit the program web site (https://fll.chass.ncsu.edu/graduate/plans_of_study.php) for complete departmental course requirement information.

Student Financial Support

Graduate assistantships are available to students in both the French and Spanish concentrations and are awarded by open competition and based on the strength of the admissions application.

Other Relevant Information

Students are admitted for the fall semester only. February 1 is the application deadline for students interested in receiving full consideration for a teaching assistantship. (Interest is indicated on the Graduate School Admissions application.) February 15 is the deadline for international students and May 1 for domestic students.

History

Admission Requirements

Admission to the M.A. in History and Public History programs require: a bachelor’s degree from an accredited college or university; transcripts; personal statement, listing career goals, historical interests, and potential advisor; letters of recommendation; and a writing sample of...
approximately ten pages. Admission to the Ph.D. in Public History requires a bachelor’s degree from an accredited college or university; transcripts; scores from the Graduate Record Exam (GRE); personal statement, listing career goals, historical interests, and potential advisor; letters of recommendation; and a writing sample of approximately ten pages.

**Master’s Degree Requirements**

Master of Arts Degree in History: This program requires a total of 30 credit hours, including 6 hours in core courses, 12 credit hours in a major field, 6 credit hours in a minor field, and 6 credit hours in thesis work. Each student’s program is tailored to enhance his or her career objectives. Social studies teachers, for example, may earn advanced competency on completion of the M.A. in history with additional course work in education. Similarly, students who plan to pursue a Ph.D. degree receive the requisite training and assistance. Master of Arts Degree in Public History: This program requires 36 credit hours of course work. Students may take a non-thesis or thesis option. Half the hours fall in historical studies, the rest in applied history classes, including innovative courses in museum studies and heritage studies. Students perform internships in their own special areas of interest.

**Doctoral Degree Requirements**

The Ph.D. program in Public History requires 72 credit hours. Students complete 21 credit hours in a public history field, including an internship; 21 credit hours in a history field; 6 credit hours in an outside field; and 24 credit hours of dissertation work.

**Student Financial Support**

Graduate teaching assistantships are available to students in all programs and are awarded by open competition.

**Other Relevant Information**

The application deadline for fall semester is January 15; students are admitted for the fall semester only.

International Studies

The Master of International Studies (MIS) is a 36 credit, non-thesis professional degree program that prepares students for careers in government service, non-profit administration, international business, and international student services and study abroad. Located in the School of Public and International Affairs, the MIS degree draws upon faculty and courses from colleges and departments across the university. Approximately half of the course work for the degree is devoted to developing international knowledge and competencies. The remaining coursework is comprised of regional, topical, professional or technical specializations designed by students in consultation with their faculty advisors. The program has an excellent internship program that contributes to job placement upon graduation.

Admission Requirements

Applicants must provide GRE scores and a current resume in addition to other application materials required by the Graduate School.

Degree Requirements

The requirements for the MIS degree are as follows:

1. 36 credit hours of course work;
2. Core Curriculum (15 hours). One course from each of the following five groups:
   - Group A - International Relations
   - Group B - Comparative Politics/Societies
   - Group C - International Law and Organization
   - Group D - International Economy/Development
   - Group E - Research Methods
3. Individualized specialization (12-15 hours). The specialization may be in a geographical region (e.g., Europe, Latin America), an international topic (e.g., security, global governance, sustainable development), a professional field (e.g., public administration, non-profit management), or a technical specialty (e.g., Geographic Information System-GIS);
4. Capstone seminar (3 hours) and oral presentation of work to faculty and peers;
5. International experience or study abroad; and
6. Competency in a foreign language as determined by the Department of Foreign Languages and Literatures (FLL).
International Studies (MR)

Degree Requirements

Students may choose from a specialization to complete coursework within a focus area.

Degrees earned will be distributed as: "Master of International Studies" without specialization specifications.

Liberal Studies

The Master of Arts in Liberal Studies (MALS) program is an interdisciplinary graduate program administered by the College of Humanities and Social Sciences. This is a broad, interdisciplinary program of part-time or full-time graduate study that integrates and expands the student’s knowledge and awareness and that is geared to the student’s personal interests. Each student, in consultation with an academic advisor, designs an individual program of study around an interdisciplinary theme or topic that is of intrinsic interest to the student or that relates to the student’s professional or vocational interests. Students take graduate courses across a range of NC State departments as well as MALS seminars designed specifically for the program.

Admissions Requirements

Students entering the Master’s program in liberal studies must have an undergraduate degree. In addition to the material required by the Graduate School, students applying are asked to submit a four to five page statement describing their objectives in doing a degree in liberal studies and a resume. GRE scores are not required. All applicants are interviewed.

Master’s Degree Requirements

Thirty hours of course work made up of:
1. three MALS seminars or two MALS seminars and a research methods course,
2. 18 hours representing the student’s interdisciplinary theme or concentration, and
3. a three-hour culminating project.

Examples of concentrations that are well supported by graduate courses in the NC State curriculum are: science, technology and society, the American experience and leadership.

Total Hours 9

Psychology

The Department of Psychology offers five courses of study (concentrations) leading to the Ph.D.: applied social and community psychology, human factors and applied cognition, industrial-organizational psychology, lifespan developmental psychology, and school psychology. An additional master’s degree program is available for school psychology.

Admission Requirements
With the exception of the school psychology master’s degree program, admitted students enter doctoral training programs. Applicants must be graduates of accredited institutions. Although a degree in psychology is not required, applicants must demonstrate that their academic backgrounds have prepared them for doctoral training in their specialty area. A strong academic record, competitive scores on the GRE (General Test) and three satisfactory letters of recommendation are required for admission. Research experience is important. Match of applicants' research interests with current faculty research is an important consideration. See https://psychology.chass.ncsu.edu/graduate/apply.php for additional information.

Master’s Degree Requirements

The department offers the master’s degree in school psychology; students in the other concentrations are admitted only to the doctoral program. Students completing the school psychology master’s program are eligible for licensure as public school psychologists in North Carolina. The program requires a total of 60 credit hours, including two years of course work, a summer practicum program, and a full-time internship in the third year.

For students entering doctoral programs, the master’s degree is awarded only in special circumstances, typically when a student in good standing chooses not to continue in the doctoral program.

Doctoral Degree Requirements

The graduate program for each doctoral student is determined in conjunction with the student's graduate advisory committee and tailored to the needs, interests, and accomplishments of the individual. Requirements vary across concentrations, but all doctoral plans of work include at least 72 credit hours. See https://psychology.chass.ncsu.edu/graduate/ for information about requirements for different concentrations.

Student Financial Support

Many graduate students receive financial support in the form of teaching or research assistantships. All admitted applicants are considered for assistantships.

Public Administration

Public Administration students at NC State are prepared for a career in public service. They will develop the leadership tools and knowledge they need to serve, manage and lead public or nonprofit organizations or to conduct cutting-edge academic research.

Admission Requirements

A list of required application documents can be found on the Public Administration page (https://spia.ncsu.edu/graduate/public_administration.php). The deadline to apply to the MPA program is May 15 (March 1 for International applicants) for Fall admission and November 1 (March 1 for International applicants) for Spring admission. The deadline to apply to the Ph.D. program is March 15 (March 1 for International applicants) for Fall admission. Completed applications
Master’s Degree Requirements

The MPA degree requires the completion of 40 graduate credit hours:

- 24 credit hours of core coursework
- 18 credit hours of elective coursework
- Students lacking the equivalent of one year of full-time public service experience must complete a 3 credit hour internship as part of their elective coursework.

Prerequisites for the program are an undergraduate course in microeconomics and an intermediate statistics (equivalent to ST 311) course. Students who do not have one or both of these prerequisite courses must successfully complete equivalent coursework prior to graduation. The MPA is an Option B Master’s degree with a one-person committee and no final oral examination. Details on the degree requirements can be found on the Master of Public Administration page (https://spia.ncsu.edu/graduate/mpa.php).

The mission of the MPA program is to develop principled and skilled public service professionals who fulfill leadership roles within governmental and nonprofit organizations. We focus on practical and problem-solving skills and emphasize public service values -- including efficiency, effectiveness, equity and accountability.

To accomplish this mission, the MPA program offers elective coursework in public management, nonprofit management, urban management, financial management, organizational leadership, public policy and justice administration.

Doctoral Degree Requirements

The Ph.D. degree requires the completion of 72 graduate credit hours:

- 60 credit hours of coursework (18 hours of relevant graduate credit from a prior Master’s degree may be used; total degree hours must include at least 36 hours at the doctoral level)
- 12 credit hours of dissertation research

Details on the degree requirements can be found on the Ph.D. in Public Administration page (https://spia.ncsu.edu/graduate/phd.php).

Each student will select or develop one or two fields of specialization.

Student Financial Support

A limited number of fellowships and graduate assistantships are offered by the Department of Public Administration. Contact the Department for more information. Other forms of student aid are described in the financial aid section of the Graduate Catalog.

Other Relevant Information

The Department of Public Administration also offers Graduate Certificates in Public Policy and Nonprofit Management, either of which can be taken alone or in conjunction with a graduate degree.

Public Administration (PhD)

Degree Requirements
The Ph.D. in Public Administration requires the completion of 72 graduate credit hours, including 60 credit hours of coursework and 12 credit hours of dissertation research. Students having obtained a master's degree in a relevant discipline prior to enrollment in the PhD program may be approved for up to an 18-credit hour reduction, reducing the total to 54 graduate credit hours.

Nonprofit Management (Certificate)
A Graduate Certificate in Nonprofit Management is available to students, including NC State degree students, who have a Bachelor’s degree from an accredited university. The Certificate requires 15 credit hours of course work and substantive nonprofit experience. The courses are designed to provide the basic management knowledge and skills needed in nonprofit organizations. For applications and a description of program requirements go to https://spia.ncsu.edu/graduate/nonprofit_cert.php.

Public History

Admission Requirements
Admission to the M.A. in History and Public History programs require: a bachelor’s degree from an accredited college or university; transcripts; personal statement, listing career goals, historical interests, and potential advisor; letters of recommendation; and a writing sample of approximately ten pages. Admission to the Ph.D. in Public History requires a bachelor’s degree from an accredited college or university; transcripts; personal statement, listing career goals, historical interests, and potential advisor; letters of recommendation; and a writing sample of approximately ten pages.

Master’s Degree Requirements
Master of Arts Degree in History: This program requires a total of 30 credit hours, including 6 hours in core courses, 12 credit hours in a major field, 6 credit hours in a minor field, and 6 credit hours in thesis work. Each student’s program is tailored to enhance his or her career objectives. Social studies teachers, for example, may earn advanced competency on completion of the M.A. in history with additional course work in education. Similarly, students who plan to pursue a Ph.D. degree receive the requisite training and assistance. Master of Arts Degree in Public History: This program requires 36 credit hours of course work. Students may take a non-thesis or thesis option. Half the hours fall in historical studies, the rest in applied history classes, including innovative courses in museum studies and heritage studies. Students perform internships in their own special areas of interest.

Doctoral Degree Requirements
The Ph.D. program in Public History requires 72 credit hours. Students complete 21 credit hours in a public history field, including an internship; 21 credit hours in a history field; 6 credit hours in an outside field; and 24 credit hours of dissertation work.

Student Financial Support
Graduate teaching assistantships are available to students in all programs and are awarded by open competition.

Other Relevant Information
The application deadline for fall semester is January 15; students are admitted for the fall semester only.

Public History (Minor)
Plan Requirements
- 9 (MS student) or 12 (PhD student) credit hours
The mission of the MSW program is to prepare students for practice that is sensitive to the social, economic, cultural, demographic and political contexts that shape our state and beyond. Within a framework emphasizing professional ethics, social justice, diversity, strengths and community engagement, the Department seeks to equip students for leadership roles and effective practice.

**Admission Requirements**

*(scroll down to see additional requirements for Advanced Standing applicants)*

- Bachelor's degree (any major) from an accredited liberal arts college or university.
- GPA of 3.0 or higher for the last 60 hours of academic work. Students with a GPA less than 3.0 but greater than 2.5 for the last 60 hours of academic course work must have official Graduate Record Exam (GRE) or Miller Analogies Test (MAT) scores forwarded to the Graduate School.
- Liberal arts coursework in the social sciences, humanities, biology, and statistics.
- Four courses in the social sciences (e.g. anthropology, economics, ethnic studies, political science, psychology, social work, sociology), with a grade of C or better.
- Three courses in the humanities (e.g. comparative religions, history, linguistics, literature, modern or classic languages, philosophy and ethics, visual and performing arts), with a grade of C or better.
- A biology and a statistics course, with a grade of C or better.
- A variety of life and work experience in human services, paid or volunteer. Note: In accordance with the CSWE standards, students cannot receive academic credit based on life and work experience.

**Additional Requirements for Advanced Standing**

In addition to the above admissions requirements, the following applies to Advanced Standing applicants:

- Applicants with a BSW degree from an accredited program and a GPA of at least 3.5 (on a 4.0 scale) for the last 60 credit hours of academic work are eligible to apply for Advanced Standing status. Students with a GPA less than 3.5 but greater than 2.5 for the last 60 hours of academic course work must have official Graduate Record Exam (GRE) or Miller Analogies Test (MAT) scores forwarded to the Graduate School.
- BSW students who graduate prior to the first semester of Advanced Standing coursework will be considered for admission.
- Applicants must have grades of "B" or better in all social work courses.
- One of three references must be from Field/Task Supervisor or Field Director/Liaison.

**Master’s Degree Requirements**

The MSW Program provides two options: The Traditional 60-credit program, and the 39-credit Advanced Standing Program, which is designed for BSW graduates only.

We do not offer a part-time curriculum at this time.

**Other Relevant Information**

The MSW program is accredited by The Council on Social Work Education (CSWE).

Technical Communication

The Master of Science in technical communication is designed to prepare professional communicators for advanced positions in industry and research organizations; with appropriate electives, students can prepare for careers in web design and development, software documentation, environmental communication, medical writing, industrial training in writing and editing, publications management and related areas.

Admission Requirements

Applicants should submit a resume and a writing sample. The application deadline is June 15. Those who wish to be considered for teaching assistantships should complete the application by February 1. Students are admitted for either the fall or spring semesters.

Requirements for MS in Technical Communication

The program requires 33 semester hours: 15 hours in the fields of technical writing, publication management, rhetoric and a projects course; the remaining hours are taken in applications, theory and methods and cross-disciplinary courses. Students must also satisfy a requirement for one semester of professional work experience.

Student Financial Support

Teaching assistantships (https://english.chass.ncsu.edu/graduate/teaching_assistantships.php) are available for a limited number of promising students. These students work with an experienced teacher in their first year to assist in 300-level professional writing courses. They devote half time in subsequent semesters to teaching technical communication.

Graduate Certificates - College of Humanities and Social Sciences

Certificates

- Digital Humanities (Certificate) (p. 406)
- Nonprofit Management (Certificate) (p. 423)
- Nuclear Nonproliferation Science and Policy (Certificate) (p. 435)
- Policy Analysis (Certificate) (p. 423)
- Professional Communication and Managerial Skills (Certificate) (p. 435)
- Public Policy (Certificate) (p. 436)

Nuclear Nonproliferation Science and Policy (Certificate)

The objective of the program is to educate students about nuclear nonproliferation, safeguards, and security from both the global and the technical perspectives. Students will be exposed to state-of-the-art techniques and will develop an understanding of the technical and policy challenges to maintain and support a robust nuclear nonproliferation regime. This process will be supported by assignments designed to reinforce understanding of the individual subject areas covered, class projects which cover key areas such as proliferation case studies and physical security simulations, as well as interactions with subject matter experts in nuclear nonproliferation technology and policy.

Professional Communication and Managerial Skills (Certificate)

This online certificate program is designed to provide graduate students and professionals with a common platform of courses that will enhance their communication skills and professional development. In particular, professional science master’s program students in the program will gain the management and communication training that will allow them to transfer success in the laboratory to success in the marketplace.

Admission Requirements

Students not attending NC State must apply through the regular application process (https://applygrad.ncsu.edu/apply/). Proof of completion of a bachelor’s degree is necessary. A minimum undergraduate GPA of 3.0 is required for admission to the certificate program. However, GRE scores are not required.

Students currently in a degree program at NC State may add the certificate program to their degree program by completing the application for currently enrolled graduate students. For applications and description of program requirements, see the program web site (https://communication.chass.ncsu.edu/academics/pcms/).

Student Financial Support

Other Relevant Information

The interdisciplinary certificate requires a total of 12 credit hours, with 6 hours taken in the Poole College of Management and 6 hours taken in the College of Humanities and Social Sciences. Two required classes are BUS 590 (Management Foundations) and BUS 554 (Strategic Project Management). Two of the three following classes should also be taken: COM 521 (Communication and Globalization), COM 527 (Seminar in Organizational Conflict Management), or COM 530 (Interpersonal Communication in Science/Technology Organizations). To earn the certificate students must achieve a minimum 3.0 GPA in the program.

Certificates

- Environmental Assessment (Certificate) (p. 462)
- Geographic Information Systems (Certificate) (p. 462)
- Renewable Energy Assessment and Development (Certificate) (p. 463)
- Sport and Entertainment Venue Management (Certificate) (p. 461)

Environmental Assessment

The Master of Environmental Assessment (EA) is an interdisciplinary program focused on understanding the adverse impacts that pollutants and naturally occurring substances pose on human health and the environment. Through the program, students combine multiple fields of study to tackle complex environmental problems. The EA program can be completed entirely online. This allows professionals the flexibility to complete their degree while still working.

Admission Requirements

Admissions to the Master of Environmental Assessment program requires an undergraduate GPA of 3.0 or better in a natural resources, environmental science and management, engineering, or related field, a professional resume, a personal statement describing the applicants professional ambitions and how the EA program will assist in accomplishing those goals. Students with less than a 3.0 undergraduate GPA may be considered for provisional admission to the EA program or referred to the EA certificate program to enhance their skills before reapplying. Graduate Record Exam (GRE) results are NOT required for admittance to the program.

Master’s Degree Requirements

The EA program requires students to complete 30 credit hours of graduate coursework, including a 6 credit hour Project Course. Eighteen hours will be in required courses with the six hours selected from the list of elective courses or equivalent.

Students in the Master of Environmental Assessment program are generally self-supported, however students may also apply for financial aid.

Self-supported students may take up to 9 credit hours of course work per semester. However, students who are employed full time may find it advantageous to enroll in one or two courses per semester.

Other Relevant Information

The EA program also offers a Graduate Certificate in Environmental Assessment (12 credit hours). Certificate students may transfer up to 12 credits into the EA degree. Students enrolled in other NC State graduate programs may enroll in the Certificate program.

Degrees

- Environment Assessment (MR) (p. 437)

Full Professors

Stith Thompson Gower
Stacy Arnold Charles Nelson
Elizabeth Guthrie Nichols
Admission Requirements

Requirements listed here are in addition to graduate school requirements stated elsewhere. To be admitted, a student should have earned a B.S. degree with a major in wood and paper science or another suitable science or engineering degree. Students with a 3.0 GPA and with appropriate course backgrounds will be considered for admission. The GRE test scores are required except for the Master of Forest Biomaterials offered through Distance Education.

Master of Science Degree Requirements

The M.S. degree requires a minimum of 30 credit hours. In addition, there are WPS core course requirements, which vary depending on the field of study. Six hours of research (WPS 695) must be taken. Two hours of Seminar (WPS 591) must be passed. A qualifying exam must be passed.

Master of Forest Biomaterials Degree Requirements

The Master of Forest Biomaterials is a non-thesis, professional degree for students not interested in a thesis-based research program. The Master of Forest Biomaterials degree is offered both on campus and through Distance Education. For the on-campus program a minimum of 36 course credits is required. The regulations regarding credits are the same as for the M.S. degree except that no credit for WPS 695 is required or given and up to six credits of 400-level courses in the major field may be included. A technical report, which demonstrates the student’s ability to gather, analyze and report information is required.

In addition to Graduate School requirements, the Distance Education program requires that the student be employed professionally in a wood or paper science or allied field, have one year of professional experience, and take required WPS core courses, which vary depending on the field of study. A minimum of 30 course credits is required of students who have relevant professional experience, including one hour of Seminar (WPS 591) and five hours of an independent project (WPS 625). For distance students without relevant professional experience, 36 hours is required.

Doctoral Degree Requirements

In addition to Graduate School requirements, Ph.D. candidates must present two departmental seminars (WPS 791) before their final oral examination. Candidates must also write and defend a research proposal on their intended research (first proposition) and a research proposal on an area outside of their dissertation/thesis research (termed a second proposition) and pass qualifying exams.

Student Financial Support

A number of research assistantships and fellowships are available.

Other Relevant Information

Graduate students should select a committee chair and other advisory committee members and submit a plan of graduate work by the end of their first semester of residence. They are also required to take the qualifying examination as part of a Research Methods course. These examinations are to ensure that the student has the basic abilities to think independently as a scientist within the context of the forest biomaterials literature. The department believes M.S. and Ph.D. students should
select a research topic and begin their dissertation or thesis research as early as possible.

As the field of forest biomaterials is a derived science, students are urged to develop a strong secondary area of excellence in one or more of the supporting disciplines such as organic chemistry, polymer chemistry, chemical engineering, mathematics, statistics, biology, engineering mechanics, mechanical engineering, physics, and economics or business administration.

Total Hours 82
Forestry and Environmental Resources

The department offers training in all of the major sub-disciplines of forest, natural resources, and environmental-related science and management. Considerable flexibility is allowed in developing graduate programs tailored to the student's objectives.

Admission Requirements

All parts of the application, including the GRE general test, are considered in making decisions. Admission is competitive and depends on the willingness of at least one member of the faculty to serve as major professor. An undergraduate degree in forestry is not required.

Master's Degree Requirements

The Master of Forestry is now accredited by the Society of American Foresters. It requires 40 credits, with a 1 credit project. The Master of Science course work requirements range from 30 to 36 credits. Students without an appropriate background will require additional preparatory work. For the M.S. degree, a minor is required.

Doctoral Degree Requirements

As a rule, students must complete a master's degree before entering the Ph.D. program. However, exceptionally well-prepared students may petition to have their degree objective changed to Ph.D. before completing the master's degree. In addition to the dissertation, Ph.D. programs require 36 to 54 credits of course work beyond the master's degree. A minor is required.

Student Financial Support

Stipend levels allow students to graduate without incurring significant debt. Those who begin without an assistantship are considered for funding as projects become available. Additional funding is available through a limited number of teaching assistantships.

Other Relevant Information

MS and PhD graduate students must meet the following requirements:

1. take a one-credit research methodology course, FOR 603 or 803, early in his/her program;
2. take a seminar course (typically FOR 601/801), and
3. begin the final oral exam with a seminar to the department based on work accomplished during the graduate program.
Degrees

- Forestry (MR) (p. 442)
- Forestry (MS) (p. 444)
- Forestry and Environmental Resources (PhD) (p. 445)
- Forestry (Minor) (p. 447)

</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Total Hours 1</td>
<td>36-72</td>
</tr>
</tbody>
</table>

1. 72 total hours beyond a Bachelor's degree. Students with a Master's degree from another university can count 18 credit hours from their Master's. Students with a Master's degree from NC State can count 18-36 credits from their masters, following the Graduate School rules and regulations.

The Center for Geospatial Analytics innovative Ph.D. program brings together departments from across NC State University to train a new generation of interdisciplinary data scientists skilled in developing novel understanding of spatial phenomena and in applying new knowledge to grand challenges.

This one-of-a-kind degree focuses on integrative thinking and experiential learning:

- Multidisciplinary advising unites expertise from across complementary academic departments
- Cross-cutting curriculum spans core classes in solution-driven analytics and discipline-specific electives
- Geospatial externship enriches practical understanding through a one-week internship with an external partner

If your research goals intersect geospatial problem-solving from any number of fields, you will find your fit here. Our Faculty Fellows (https://cnr.ncsu.edu/geospatial/people/fellows/) advise students interested in a range of disciplines—from design, to cognitive science, natural resources and the environment, computer science, engineering and more—and approach their work in a range of geospatial research areas. Students with strong backgrounds in quantitative methods in geography, geomatics/informatics, remote sensing and earth sciences are strongly encouraged to apply.

**Admission Requirements**

**Minimum requirements include:**

- Undergraduate GPA ≥ 3.0
- Graduate GPA ≥ 3.0 (if entering with a Master’s degree)
- GRE Scores (within last 5 years). There is no minimum, but students accepted for Fall 2019 admission earned the following average scores: Quantitative: 159 (73rd percentile), Verbal: 158 (80th percentile), Writing: 4 (60th percentile)
- IBT TOEFL Score ≥ 80 overall (18 in each section) (International Applicants; the Office of International Services offers additional helpful information)

**Required supporting documents**

- Official NC State Graduate School application.
- Unofficial transcripts from all colleges/universities attended (official transcripts will be required if admitted to the program).
• A personal statement, not to exceed 2 pages. We encourage you to consider the following:
  • Your academic and career goals
  • Special interests and prior research in the area of geospatial analytics
  • What makes you well-suited to our program
  • Describe any computational, quantitative, and/or geospatial training
  • You are encouraged to suggest prospective advisor(s) and describe shared research interests
• 3 letters of recommendation. Submit the names and contact information for your recommenders through the online application, and they will receive an email with instructions for submitting their letters online.
• Curriculum vitae/resume.

Degree Requirements
The Ph.D. program consists of:

• 72 credit hours beyond the Bachelor’s degree. The core required courses comprise 18 credit hours. The remaining 54 credit hours are devoted to an individually tailored selection of electives and research.
• an off-campus professional experience. By the beginning of their third year in the program, students participate in an experiential learning activity within government (local, state, federal), industry, private and academic research institutions, or other organizations in the geospatial arena.
• a comprehensive exam. The written exam is required by the end of the 4th semester, followed by an oral exam consisting of the dissertation proposal defense, typically before the start of the 5th semester.
• a written dissertation and final dissertation oral defense required to complete the degree.

Geospatial Information Science & Technology

The Master of Geospatial Information Science and Technology (MGIST) equips students with the necessary knowledge and tools to become high-end geospatial professionals using a unique curriculum that leverages NC State’s strengths in computational and data sciences, information technology, and interdisciplinary training in combination with professional skills development in areas of project management, technical writing, and communications. The MGIST can be completed entirely online, allowing flexibility for both students just entering the work force and working professionals.

Through a combination of geospatial theory, hands-on applications, and client-based service-learning experiences, students graduate from the program with a solid foundation to provide a wide range of geospatial expertise for local, state, national, and international organizations.

**Admissions Requirements**

Admission to the program requires an undergraduate GPA of 3.0 or better, a professional resume, a personal statement describing the applicant’s professional ambitions and experience, and 3 letters of reference. Students with less than a 3.0 undergraduate GPA may be considered for provisional admission into the MGIST or referred to the GIS Certificate program to enhance skills and prepare for reapplication to the MGIST.

**Master’s Degree Requirements**

The MGIST degree requires 33 course credit hours including a 3-credit-hour Capstone course and development of a professional portfolio highlighting geospatial analytic skills and competencies. A cumulative GPA of 3.0 or better is required in order to graduate. Specific course requirements are listed on the MGIST web site.
Student Financial Support

Students in this program are eligible for financial aid and may compete for program assistantships and internships.

Other Relevant Information

The GIS program also offers a Graduate Certificate in GIS (https://online-distance.ncsu.edu/program/graduate-certificate-in-geographic-information-science/) (12 credit hours). Certificate students may transfer up to 12 credits of B or better grades upon application and acceptance into the MGIST program.

Natural Resources

The natural resources program is an interdepartmental program designed to prepare students for positions in both private and public natural resource organizations. A selection of technical options couple core courses in natural resources issues and management with a series of related courses in a variety of related technical disciplines. The purpose of the natural resources core curriculum is to educate professionals at a Master's level who are well-versed in policy and regulation and who have skills in quantitative assessments. Currently approved technical options include: assessment and analysis, ecological restoration, economics and management, policy and administration, international resources, hydrology, and geographic information systems in the Department of Forestry and Environmental Resources; outdoor recreation management in the Department of Parks, Recreation and Tourism Management; and landscape architecture in the Department of Landscape Architecture.

Each option is available as either the M.S. in NR or as the non-thesis Master of NR.

Admissions Requirements

Students should have an undergraduate degree in natural resources or a related field. Experience in natural resources management and administration will be considered in lieu of an appropriate undergraduate degree. Admission is contingent upon meeting departmental requirements and acceptance by an advisor.

Master’s Requirements

The M.S. degree requires a research thesis based on completion of a research project. The Master of NR degree requires a practical project which develops and demonstrates problem-solving skills. Students enrolled in the Department of Forestry and Environmental Resources must take FOR 603 in the first or second semester. The minimum number
of credit hours varies by technical option, but is generally 36 credit hours including research or project credits and core courses.

NR 601 Graduate Seminar

Select a graduate-level Statistics courses in conjunction with the academic committee

Additional Courses

"Additional Courses" are approved in conjunction with the academic committee to meet 36 total hours

Total Hours 36

1 Equivalent seminar course may be accepted determined in conjunction with the academic committee.

Technical Options

Assessment and Analysis

This option allows students to develop a project incorporating field course components with decision making tools and the opportunity to develop depth in a specific subject matter focus. Focused on planning and conservation processes and efforts, the option aims to hone the abilities of people who will function as part of NEPA process teams, NGOs aiming to preserve and protect land and its biodiversity, or professionals performing Phase I, protected species investigations, and related assessment roles.

Ecological Restoration

This option prepares students to assist in the recovery of ecosystems that have been degraded, damaged, or destroyed. This requires extensive knowledge of the abiotic environments that sustain the biota of ecosystems, community structure, sustainable cultural practices, and performance monitoring, among other skills. Emphasis is on the actual craft of restoring natural ecosystems, and the social and philosophical elements that mandate restoration.

Economics and Management

Economics and Management option graduate students study the trade-offs associated with how society interacts with natural resources in order to assess and improve natural resource policy and management. Students focus on trade-offs at many different spatial and temporal scales. Examples include non-market valuation of ecosystem services, optimal management of forest stands with changing climate, carbon and market consequences of using biomass energy, sustainable development and long-term projections of ecological and economic sustainability.

GIS

This option provides students with a thorough background in the spatial sciences including spatial modeling, remote sensing, geographic information systems, and spatial databases. Students completing this option will be prepared for positions in a variety of federal agencies such as the USDA Forest Service, EPA, NOAA, or Corps of Engineers; with state agencies; with regional or local planning organizations; and with private consulting firms.

Hydrology

This option promotes understanding the hydrologic processes of watersheds and wetlands and prepares students for conducting hydrologic studies and directing watershed management programs. Courses also focus on water resources policy and regulation. Students are prepared for positions with private consulting firms as well as with many other public and private organizations that deal with the hydrologic impacts of land use and climate change.

International Resources

This option is designed to enhance students’ understanding of international forestry and natural resource management and to prepare them for careers abroad or with internationally oriented institutions and companies in the US. Courses in this option are taught in several different departments and provide a broad background with rigorous technical emphases.

Landscape Architecture

This option is a non-thesis professional degree program. Students who complete all courses required for the technical option will receive a Master of Landscape Architecture and the Natural Resources Landscape Architecture with the Technical Option, curriculum code (NRD). No previous LAR degree is required. Students who are interested in becoming physical planners in municipalities, federal government, park and recreation planning as well as housing development and transportation planning will require a first professional degree in landscape architecture and are primary candidates for this second degree in the natural resources.

Outdoor Recreation

This technical option develops the knowledge and skills needed for planning and managing natural resource-based outdoor recreation opportunities and resources. Students are prepared for positions with federal, state, regional, county and municipal parks, recreation and land management agencies as well as with private firms and non-profit organizations.

Policy and Administration

This option develops knowledge and skills about policy processes and sciences, public and private organizations, natural resource law and policy, public governance and involvement, and their applications to natural resource management and conservation.

The Doctoral degree allows students to match their particular research interests and career aspirations with departmental research activities and faculty expertise. The primary areas of interest for students include health and well-being, human dimensions of the natural and built environment, sustainable and equitable tourism, and geospatial methods and modelling with a substantive area of study in another discipline.

The Master's degree provides students the opportunity to develop and enhance their critical understanding of both the conceptual foundations of parks, recreation and tourism management and the procedures of systematic inquiry and critical problem solving as applied to planning and management issues. The department offers educational opportunities and resources for the preparation of professionals concerned with planning, organizing, managing and directing parks, recreation, sport, and tourism programs, areas, and facilities. Several Master's Degree options (https://cnr.ncsu.edu/prtm/graduate-programs/) are available: MS in Parks, Recreation and Tourism Management, MS in Natural Resources-Outdoor Recreation Technical Option, Master of Natural Resources (MNR)-Outdoor Recreation Technical Option (non-thesis), and Online Professional Master of Parks, Recreation, Tourism and Sport Management (MPRTSM) (non-thesis). The Department also administers the Graduate Certificate in Sport and Entertainment Venue Management.

The general emphasis areas at the Master's level include: parks and recreation management, tourism development and management, geographic information systems, recreational sport management, and natural resource recreation management. The MS-NR and MNR (Outdoor Recreation Technical Option) develops the knowledge and skills needed for planning and managing natural resource-based outdoor recreation opportunities and resources.

The online MPRTSM degree provides students with a solid professional and business education designed to advance their career development in parks, recreation, tourism, and sport industries. The online degree program operates on a cohort model and admits students in fall and spring semester.

Doctoral Degree Requirements

Although each doctoral course of study will be unique to the individual student, the usual course of study will include a minimum of 54 hours beyond the Master's. These credit hours are distributed among the core courses, statistics and research methods, a minor or substantive area consisting of 15 hours of course work approved by the student's faculty advisor, and the dissertation. Students are expected to have completed a Master's degree, preferably one with a thesis. Students without research experience will have to demonstrate an ability to produce scholarly work in PRTM.

Master's Degree Requirements

Each Master's Degree has specific requirements (https://cnr.ncsu.edu/prtm/graduate-programs/). The minimum credit hours range from 30 for MS in PRTM Degree, to 34 for MNR-Outdoor Recreation Technical Option Degree. Doctoral and M.S. application deadline is January 15 for both U.S. and international students. Online Degree-MPRTSM application deadline is May 15.

Student Financial Support

Graduate assistantships are available to students in PhD and MS degree program on a competitive basis.

Sport and Entertainment Venue Management (Certificate)

Whether you are interested in managing stadiums, amphitheaters, performing arts centers or sport arenas, this immersive facilities management program is right for you.

This one-year online graduate certificate program was designed in collaboration with industry experts to either advance your career or facilitate entry into this exciting field.

The 12-credit-hour graduate certificate program can be completed entirely online. Students are admitted as a cohort and complete all required courses as a group. Using an 8-week accelerated course format, students take one course at a time and finish the program in two semesters.
Graduate Certificate - College of Natural Resources

Certificates

- Environmental Assessment (Certificate) (p. 462)
- Geographic Information Systems (Certificate) (p. 462)
- Renewable Energy Assessment and Development (Certificate) (p. 463)
- Sport and Entertainment Venue Management (Certificate) (p. 461)

Environmental Assessment (Certificate)

The graduate certificate program in Environmental Assessment provides students and professionals the opportunity to develop recognized academic credentials and advanced expertise in Environmental Assessment. The certificate program provides excellent opportunities for practicing environmental professionals to stay abreast of new technologies and current government regulations.

The curriculum consists of 12 credit hours selected from the required course listing for the MEA degree. Students may transfer up to 12 credit hours from the Certificate into the Masters of Environmental Assessment (MEA). Students may earn the Certificate as a stand-alone credential or as part of a graduate degree and may apply for entry into the MEA degree while in the Certificate program.

Admission Requirements

Baccalaureate degree. Application information and requirements for award of a certificate are listed on the Environmental Assessment Certificate website (https://online-distance.ncsu.edu/program/graduate-certificate-in-environmental-assessment/). Students can start this certificate in Fall or Spring semesters.

Certificate Requirements

Award of a certificate requires a GPA of 3.0 or better for the certificate courses (required and elective) and a grade of B- or better in all of the certificate courses.

Other Relevant Information

The Certificate is entirely online.

Geographic Information Systems (Certificate)

Building on NC State's strengths in technology, computational methods, and geographic information systems (GIS), this program provides professional, graduate-level academic preparation in the advanced application of GIS technologies to a wide spectrum of disciplines, including economics, public health, emergency planning and response, land use planning, environmental resources, etc. The certificate, which is also available to current NC State students enrolled in non-GIS graduate programs, forms the basis for the Master of Geospatial Information Science and Technology (https://online-distance.ncsu.edu/program/master-of-geospatial-information-science-and-technology/).

Admissions Requirements

Admission to the certificate program requires a baccalaureate degree from an accredited college or university with at least a 3.0 GPA. Students with less than a 3.0 undergraduate GPA may still be considered for admission based on the remaining criteria, including other graduate coursework. These determinations will be made on a case-by-case basis. All applicants must submit:

- Transcript showing Bachelor's degree conferred
- A clear and concise personal statement/statement of interest
- A resume/CV

Current NC State students in other degree programs may also be eligible to earn the certificate. These students should contact the Center for Geospatial Analytics for more information on how to apply.

Other relevant information

Up to 12 credit hours of B or better grades from the Certificate can transfer into the MGIST (https://online-distance.ncsu.edu/program/master-of-geospatial-information-science-and-technology/) program if/when a student applies and is accepted into that program.

Renewable Energy Assessment and Development (Certificate)

The Graduate Certificate in Renewable Energy Assessment and Development at NC State University provides students with graduate level academic credentials in renewable energy assessment and development. The program is designed for students who wish to enhance their knowledge of renewable energy assessment practices and obtain a background for certification. The Certificate can be completed entirely online. The certificate is available to current NC State students enrolled in graduate degrees. The entire program requires 12 credits hours. Students in the Renewable Energy Assessment and Development Certificate program may wish to continue on to a Graduate degree. Students may transfer up to 6 credit hours from the Renewable Energy Assessment and Development Certificate into the Master of Environmental Assessment upon application and acceptance into the program.

- Statistics Education (Certificate) (p. 523)

Applied Mathematics

The Department of Mathematics offers programs leading to the degrees of Master of Science and Doctor of Philosophy in Mathematics and in Applied Mathematics. Students may opt for the Concentration in Computational Mathematics, which is attached to the program in applied mathematics. The Concentration in Interdisciplinary Mathematics (MAI) is available to Ph.D. students in either Mathematics or Applied Mathematics. It is not available to Masters Students. Joint research endeavors with industrial and governmental partners are facilitated and encouraged. The Department of Mathematics also offers a Certificate.

Admissions Requirements

Applicants for admission should have an undergraduate or Master’s degree in mathematics or applied mathematics. This should include courses in advanced calculus, analysis, modern algebra and linear algebra. Applicants with degrees in other subjects may be admitted but may be required to take certain undergraduate courses in mathematics without receiving graduate credit. GRE general scores are required. The GRE Subject Test in Mathematics is not required but a good score can be a positive factor in admission.

Master of Science Requirements

The M.S. degree requires a minimum of 30 credit hours with courses chosen to satisfy certain requirements to cover material from three different areas in the department, and some level of depth of material.

Ph.D. Requirements

The Ph.D. requires a minimum of 72 credit hours. A student will typically take 50-60 semester hours of course credits for the Ph.D. The written preliminary examination consists of examinations in three areas of mathematics chosen by the student from 12 possibilities. The research dissertation should represent a substantial contribution to an area of mathematics or its applications.

Student Financial Support

Teaching assistantships and some research assistantships are available. Teaching assistants benefit from a structured program of training in university-level teaching.

Biomathematics

Biomathematics is an interdisciplinary graduate program offering courses and research opportunities in basic and applied mathematical biology. Degree programs are flexible to accommodate students with backgrounds in the biological, mathematical or physical sciences. The program also offers Ph.D. and master's-level minors. Additional information on requirements, courses, faculty and current research can be found at the website www.ncsu.edu/biomath.

Admission Requirements

Applicants should have either a Bachelor's degree in biology with evidence of aptitude and interest in mathematics, or a bachelor's in a mathematical science with evidence of aptitude and interest in biology. Advanced (multivariate) calculus, linear algebra and general biology are prerequisites for all BMA courses, and deficiencies in these should be remedied during the first year of graduate study. The application must include a narrative statement (1-2 pages) of the applicant's goals and reasons for interest in the BMA program.

Master's Degree Requirements

The M.S. and M.BMA. degrees require BMA 771-772 and one other BMA course; two upper-level biology courses; and three courses from the mathematical sciences or statistical sciences. The M.S. degree requires a thesis, and the M.BMA. requires two additional courses and a written project.

Doctoral Degree Requirements

Course requirements consist of a "core" and a "concentration" in some area of biology or mathematical sciences. Core requirements are: BMA 771-772, 773 and 774; three upper-level biology courses from at least two areas (e.g., physiology and evolution); and additional courses from the mathematical or statistical sciences. Concentration consists of either a Ph.D. co-major in a biological or mathematical science or a coherent series of five graduate courses approved by the student's committee, which must include a two-semester sequence and at least one 700-level course.

Financial Assistance

TAs (generally in the Departments of Mathematics or Statistics). RAs and internships are available. Awards are based on GRE scores, transcripts, letters of recommendation, and the personal statement. RAs usually are held by continuing students. To receive full consideration for financial aid, the completed application must be received by January 15.

Other Relevant Information

All students are required to participate in the BMA Graduate Seminar. Course requirements can be met by examination or by demonstrating that an equivalent course was completed at another university.

The Department of Chemistry offers programs of study leading to the Doctor of Philosophy and Master of Science degrees. These degrees are based on coursework and original research. Many research projects merge disciplines such as chemical/synthetic biology, biophysics/physics, computational science, informatics, photonics/photophysics and materials science with chemistry. General courses as well as advanced and special topics courses are offered.

**Admission Requirements**

Applicants should have an undergraduate degree in chemistry or in a closely related field with a strong chemistry background. A GPA of at least 3.0 in the sciences is needed for consideration. GRE General Test scores are not required. Admission decisions are made as completed applications are received. For most favorable consideration for the Fall term, all application materials should be received by January 15 (both domestic and international students).

**Master's Degree Requirements**

The Master of Science (M.S.) degree in chemistry is a research degree that requires six graduate courses, a minimum of 30 credit hours, and research leading to a thesis.

**Doctoral Degree Requirements**

In the doctoral program, emphasis is placed on original research and a comprehensive knowledge of one's chosen field.

**Student Financial Support**

Incoming graduate students are supported by departmental teaching assistantships. Outstanding applicants are eligible for supplemental fellowships during their first year of study. Research assistantships are normally available to second-, third-, and fourth-year students. The department also has fellowships for students interested in the area of electronic materials, biotechnology and pharmaceutical and synthetic organic chemistry, as well as travel funds to attend and deliver an oral presentation professional meeting(s).

**Other Relevant Information**

The Chemistry Department forms part of the College of Sciences. More than one dozen new faculty members have been added in the last ten years, thereby greatly enhancing opportunities for graduate research especially in cutting edge interdisciplinary programs.

Marine, Earth and Atmospheric Sciences

Graduate programs are offered in Atmospheric Science, Earth Science, and Marine Science. Within marine sciences the subdisciplines include: biological, chemical, geological and physical oceanography.

Admission Requirements

A Bachelor’s degree with research experience or a Master’s degree is required for entry into the Ph.D. program. A Bachelor’s degree in a science, mathematics or engineering is required for entry into the M.S. program in Atmospheric science, Earth Science, and Biological, Chemical, Geological or Physical Oceanography. Undergraduate field camp is required of all students in the M.S. program in earth science; this requirement may be fulfilled before or after admission. An M.S. degree with a non-thesis option for students is available and admission to this option must be requested at the time of application.

Master’s Degree Requirements

The M.S. degree requires a minimum of 30 credit hours. Specific course requirements are determined by the advisory committee of each student. However, MEA 601 Seminar is required of all thesis M.S. students no
later than the third semester in residence. Marine science students are required to take core courses in two of the three subdisciplines other than their own.

**Doctoral Degree Requirements**

Specific courses are determined by the student's advisory committee. Registration in seminar, MEA 801, is required of all Ph.D. students no later than the fourth semester in residence. Marine science students are required to take core courses in all three subdisciplines other than their own; this requirement may be fulfilled at the M.S. level.

**Student Financial Support**

Research and teaching assistantships are available.

**Other Relevant Information**

Students are assigned initial advisors upon admission. It is the student's responsibility to secure the consent of a faculty member to serve as the permanent advisor who will chair or co-chair the advisory committee.

**Degrees**

- Marine, Earth, and Atmospheric Sciences (MS) (p. 489)
- Marine, Earth, and Atmospheric Sciences (PhD) (p. 491)
- Marine, Earth, & Atmospheric Sciences (Minor) (p. 493)
- Climate Adaptation (Certificate) (p. 495)

Marine, Earth, and Atmospheric Sciences (MS)

Degree Requirements
Graduate programs are offered in Atmospheric Science, Earth Science, and Marine Science. Specific course requirements are determined by the advisory committee of each student.

Degrees earned will be distributed as: "Master of Science in Marine, Earth, and Atmospheric Sciences" without track specifications.

Marine Science Track
Within marine sciences the subdisciplines include:

- Biological Oceanography
- Chemical Oceanography
- Geological Oceanography
- Physical Oceanography

Climate Adaptation (Certificate)
The Graduate Certificate in Climate Adaptation program at NC State University provides accredited, academic training in the emerging field of climate adaptation. The online, twelve credit program is designed to provide mid-career professionals and entry-level students with technological skills and specialization in climate adaptation. The certificate is a fully accredited credential and a potential path toward the Climate Adaptation degree program. Coursework includes Fundamentals of Climate Change Science, Climate Risk Analysis, Climate Communication and Introduction to Geographic Information Systems.

Admission Requirements
Applicants must meet one of the 3 following requirements:

- Be a graduate of an accredited four-year college or university, and have a GPA of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study.
- Have a Master's degree.
- Be a degree student in good standing in a NC State University graduate program.

We recommend that students in a NC State University graduate program may apply after completing two of the courses required for the graduate certificate program with at least B grades. The graduate certificate program Director will manage the admissions process in consultation with the MEAS Director of Graduate Programs.

Adjunct Faculty
William Howard Battye
Geoffrey Weszely Bell
Scott Anthony Braun
Michael Brennan
Subrahmanyam Bulusu
Brian A. Colle
Johannes Michael Leopold Dahl
Kathie Dello
David R. Easterling
Scott Howard Ensign
Peter Hamilton
Russel S. Harmon
Provisional Admission

Applicants who do not meet the graduate certificate program requirements for full admission may be admitted provisionally based on the quality of their letters of recommendation and other criteria at the discretion of the Certificate Program Director and MEAS Director of Graduate Programs. Students who are admitted provisionally must maintain a 3.0 GPA in order to obtain full admission into the certificate program.

Total Hours 12

Mathematics

The Department of Mathematics offers programs leading to the degrees of Master of Science and Doctor of Philosophy in Mathematics and in Applied Mathematics. Students may opt for the Concentration in Computational Mathematics, which is attached to the program in applied mathematics. The Concentration in Interdisciplinary Mathematics (MAI) is available to Ph.D. students in either Mathematics or Applied Mathematics. It is not available to Masters Students. Joint research endeavors with industrial and governmental partners are facilitated and encouraged. The Department of Mathematics also offers a Certificate.

Admissions Requirements

Applicants for admission should have an undergraduate or Master's degree in mathematics or applied mathematics. This should include courses in advanced calculus, analysis, modern algebra and linear algebra. Applicants with degrees in other subjects may be admitted but may be required to take certain undergraduate courses in mathematics without receiving graduate credit. GRE general scores are required. The GRE Subject Test in Mathematics is not required but a good score can be a positive factor in admission.

Master of Science Requirements

The M.S. degree requires a minimum of 30 credit hours with courses chosen to satisfy certain requirements to cover material from three different areas in the department, and some level of depth of material.

Ph.D. Requirements

The Ph.D. requires a minimum of 72 credit hours. A student will typically take 50-60 semester hours of course credits for the Ph.D. The written preliminary examination consists of examinations in three areas of mathematics chosen by the student from 12 possibilities. The research dissertation should represent a substantial contribution to an area of mathematics or its applications.

Student Financial Support

Teaching assistantships and some research assistantships are available. Teaching assistants benefit from a structured program of training in university-level teaching.

Degrees

- Mathematics (MS) (p. 498)
- Mathematics (PhD) (p. 500)
- Mathematics (PhD): Interdisciplinary Mathematics Concentration (p. 501)
- Mathematics (Minor) (p. 503)
- Mathematics (Certificate) (p. 506)

The Graduate Certificate in Mathematics is a one-year program that focuses on two groups of students. It is designed for students who have some mathematical training but do not have a full bachelor's degree in mathematics. It also targets students who have a bachelor's degree in mathematics but do not feel they are ready for graduate school.

The goal of the certificate is to prepare and motivate students through courses and careful mentoring. The program will deepen and broaden students' understanding of mathematics, the mathematics profession, and the mathematical community. Students will learn how the mathematics discipline can solve significant problems for government, industry, other scientists, and ultimately, society at large.

Admissions
Application to the program requires an online application form, three (3) letters of recommendation (two need to be academic), transcripts of all academic work after high school, and a written statement. GREs are highly desirable but not required for admission. Admission will be on a competitive basis.

Requirements
Students take a combination of graduate and undergraduate mathematics courses that are tailored to the individual student. The certificate requires 12 hours of mathematics courses, taken for a grade, and to be taken at NC State. There is no specific list of courses for the certificate.

Of the 12 hours, three (3) hours may be at the 400 level with prior approval of the Director of Graduate Programs. The other nine (9) hours will be at the 500 level or above. Students must take at least two (2) courses per semester to remain in good standing. A grade of C- is required for a course to count toward the certificate. A 3.00 GPA is required to earn the certificate.

Total Hours 12

* Students must maintain an average 3.0 GPA in all MA courses.

Physics

Research opportunities in theoretical/computational physics are available in astrophysics, biophysics, chaos, condensed matter, nanoscience/nanomaterials, nuclear and particle physics, and relativity. Research opportunities in experimental physics are available in astronomy, atomic and molecular physics, biophysics, emergent phenomena, materials physics, nanoscale science, nonlinear systems, nuclear and particle physics, optics, soft-condensed-
matter physics and technology, and surface physics.

**Admission Requirements**

Bachelor's degree in physics or equivalent and related. General GRE and the GRE Physics subject test are accepted, but not required.

**Master's Degree Requirements**

A minimum of 30 credit hours beyond the Bachelor's degree with demonstrated mastery of aspects of the physics curriculum. Thesis and nonthesis options.

**Doctoral Degree Requirements**

A minimum of 72 credit hours beyond the Bachelor's degree with demonstrated mastery of the core physics curriculum (PY721, PY782, PY783 and PY785); pass an oral preliminary exam, prepare a dissertation, and an oral final defense.

**Student Financial Support**

Graduate teaching assistantships are available for new and continuing students. Research assistantships are available to continuing students and occasionally to new students. More than 95% of students are supported by assistantships.

**Degrees**

- Physics (MS) (p. 508)
- Physics (PhD) (p. 509)

Admission Requirements

The well-prepared applicant to the department's Master's programs has good grades in a three-semester calculus sequence, a two-semester advanced calculus sequence, a semester of linear algebra, and a two-semester sequence in probability and statistics. Some of these courses may be taken as part of the program, but this may result in lengthening the stay. Students may apply to either the Master's or PhD program directly from a Bachelor's degree. GRE General Test scores are required for the in-person program, but Subject Test scores are not. Due to the differences in student backgrounds, there is a separate admissions process for the online and in-person programs.

The written statement should not exceed two pages and should describe the applicant's academic and career goals as well as special interests in the area of statistics. Applicants may also submit a resume. Individuals applying for fall enrollment and who wish to be considered for financial aid should have their completed applications in by no later than December 15 of the preceding year. Applications arriving after that will be considered but may be assigned lower priority. Starting Summer of 2013, we will begin to offer courses to allow a student to complete the Master of Statistics degree in one calendar year. The one year masters program has the same requirements as the current Master of Statistics program. Since courses start in the summer, the deadline to submit completed applications is January 15 of the same year, and student should apply for 'Summer 1’ admission. Students are not normally admitted for spring.

Master's Degree Requirements

All Master's programs in statistics require a minimum of 34 credit hours, of which 12 are first-year core (ST 512, ST 521, ST 522, ST 552 and their labs), one is supervised consulting (ST 641). The remainders are statistics and/or supporting electives.

Doctoral Degree Requirements

The Ph.D. program in statistics requires 22 course credit hours beyond the Master's, of which 9 are Ph.D. core courses (ST 779, ST 793, and ST 758), one is supervised consulting (ST 841), and 12 are Ph.D.-level statistics electives.

Student Financial Support

Departmental assistantships and fellowships are awarded to students in the Ph.D. program each year on a competitive basis.

Other Relevant Information

With a large graduate faculty representing virtually all major statistical specializations, the department is recognized as a world leader in graduate education and research in statistics. The Department provides a dynamic environment for teaching, core research and collaborative research across disciplines, with formal program concentrations in biostatistics, bioinformatics, environmental, financial and mathematical statistics.

Degrees

- Statistics (MR) (p. 513)
- Statistics (MR): Biostatistics Concentration (p. 514)

Applied Statistics and Data Management (Certificate)

In the Graduate Certificate in Applied Statistics and Data Management, students will learn statistical methods and how to apply them in real world settings and about statistical programming techniques that are required for managing data in a typical workplace environment.

Admissions

The application process is very simple, there are no official prerequisites except for an undergraduate degree. Applicants should demonstrate an appropriate level of mathematical maturity to allow them to succeed in the certificate program. Examples of this would include successful completion of undergraduate coursework or professional work in a quantitative field. Note that the GRE is not required to apply and we only accept students living in North America.

Plan Requirements

</tr>
</tbody>
</table>

Total Hours 12

* The course sequence ST 511 and ST 512 is similar to that of ST 513 and ST 514. The main difference is that ST 511 and ST 512 focus more heavily on analysis of designed experiments, where ST 513 and ST 514 focus more heavily on the analysis of observational data.

Statistics Education (Certificate)

In the Graduate Certificate in Statistics Education, students will learn statistical concepts, methods, and pedagogical techniques for teaching these statistical topics at the college (or high school) level. The emphasis of the program is on the effective use of modern technology for teaching statistics. The courses required for this graduate certificate are listed below.

- Statistical Methods I: ST511 (or ST513)
- Statistical Methods II: ST512 (or ST514)
- Teaching and Learning of Statistical Thinking: ST519
- Teaching Statistics with Technology: ST557

Admissions

The application process is very simple, there are no official prerequisites except for an undergraduate degree. Applicants should demonstrate an appropriate level of mathematical maturity to allow them to succeed in the certificate program. Examples of this would include successful completion of undergraduate coursework or professional work in a quantitative field. Note that the GRE is not required to apply and we only accept students living in North America.

Requirements

The certificate will be earned by successful completion of four courses listed above with an average GPA of at least 3.0.

Total Hours 12

Toxicology

The Toxicology Program provides course work and research training to prepare prospective toxicologists and environmental health scientists for careers in academia, government, and industry. Research in the program spans an array of topics ranging from the molecular to population level consequences of toxicant exposure. Areas of research excellence within the program include elucidating relationships among cell signaling processes and stressor-induced disease and toxicity, establishing mechanisms of system-specific toxicity, using physiological and genomic approaches to understand differences in species and individual susceptibility to environmental contaminants, and unraveling gene-environment interactions. Some specific research areas include: apoptosis, endocrine disruption, trace metal bioaccumulation and detoxification, oxidative stress/gene regulation/cell toxicity, asthma and lung fibrosis, cancer and mutagenesis, ecotoxicology, developmental abnormalities, chemical exposure assessment and environmental epidemiology. Some examples of the types of environmental agents that are being investigated include chemical carcinogens, trace metals,
pesticides, particulates metals, endocrine disruptors, nanoparticles and UVB radiation.

**Admission Requirements**

Prospective students should have a strong background in the biological and physical sciences with a minimum undergraduate grade point average of 3.0 (on a 4.0 scale) and a minimum Quantitative GRE score in the 70th percentile. GRE subject tests are not required. International students whose primary language is not English must submit TOEFL scores. A written statement should describe the applicants academic and career goals as well as their area of interest. All applications are reviewed by an admissions committee. Students are encouraged to submit applications no later than December 15 for Fall admission.

**Master of Science Degree Requirements**

The M.S. is a research-oriented degree requiring a minimum of 30 credit hours and a written thesis. At least 20 credit hours must be graduate-level courses and a core curriculum is required.

**Master of Toxicology Degree Requirements**

The MTOX degree is a non-research degree designed for those interested in pursuing non-research careers in toxicology and environmental health science, and/or working professionals seeking to further their education and advance their careers. To accommodate working professionals the MTOX degree can be pursued on a part-time basis. A minimum of 30 credit hours is required, with at least 14 credit hours in toxicology courses.

**Doctoral Degree Requirements**

The Ph.D. program is designed to train students to become independent scholars capable of conducting unsupervised and original research. Students enroll in a core curriculum similar to that of the M.S. degree and additional courses as determined by his/her advisory committee. Normally a total of 72 credit hours is required, with the majority of these credits being dissertation research. Students must pass both a written and oral preliminary exam prior to advancing to Ph.D. candidacy. A doctoral dissertation presenting the students original research is written and defended in a final oral examination.

**Student Financial Support**

Financial assistance is available for qualified applicants through traineeships, fellowships, teaching assistantships and research assistantships.

**Other Relevant Information**

Students pursuing either the M.S. or Ph.D. degree may elect to specialize in General Toxicology, Environmental Toxicology, or Molecular and Cellular Toxicology. More details can be obtained on the Environmental and Molecular Toxicology web site.

**Degrees**

- Toxicology (MR) (p. 525)
- Toxicology (MS) (p. 525)
- Toxicology (PhD) (p. 526)

### Graduate Certificates - College of Sciences

**Certificates**

- Applied Statistics and Data Management (Certificate) (p. 523)
- Biology for Educators (Certificate) (p. 528)
- Climate Adaptation (Certificate) (p. 495)
- Mathematics (Certificate) (p. 506)
- Statistics Education (Certificate) (p. 523)

**Biology for Educators (Certificate)**

The Graduate Certificate in Biology for Educators will provide additional training in biological sciences to K-12 teachers and other educators. The certificate will provide recognition to those individuals who complete 12 credit hours of coursework in graduate level biology, with the option to complete up to 18 credit hours for those interested in teaching AP courses or teaching at the community college level (dependent on individual community college credential requirements). All students will choose between four and six courses (3 credits each) in topic areas that align with their own goals, including a capstone course in the science of learning. Course topics will include animal behavior, communicable and non-communicable diseases, toxicology, evolution, genetics and microbiology. Faculty are continuing to develop new courses to increase options.

Applicants must meet at least one of these three requirements:

- have earned a bachelor’s degree from an accredited college or university with minimum 3.0 GPA in the last 60 credit hours of undergraduate study
• be a graduate student in good standing in an education-related masters or doctoral program
• have earned a master's degree from an accredited college or university

In addition, applicants will be required to submit a one-page statement describing how this program will benefit their personal or professional development and career goals.

Financial aid support is not typically offered to students seeking certificates. However, we encourage prospective students to pursue the possibility of tuition reimbursement programs through their employer. Additionally, courses taken during the fall and spring terms can be paid for using the NC State payment plan (https://studentservices.ncsu.edu/your-money/bill/pay-your-bill/enroll-in-a-payment-plan/).

Plan Requirements

• Option One: Select 12 credits
• Option Two: Select 18 credits, gives Educators enough graduate-level courses to teach Advanced Placement (AP) classes at the high school level or to teach in community college

• Comparative Biomedical Sciences (PhD): Pharmacology Concentration (p. 546)
• Comparative Biomedical Sciences (PhD): Population Med and Vet Public Health Concentration (p. 548)
• Nutrition (PhD) (p. 156)

Minors

• Comparative Biomedical Science (Minor) (p. 550)
• Nutrition (Minor) (p. 158)
• Physiology (Minor) (p. 163)

Comparative Biomedical Sciences

Course offerings and research topics currently include, but are not limited to: cell biology, genomics, infectious diseases, developmental biology, immunology, cardiology, pharmacokinetics, oncology, toxicology, gastroenterology, neuroscience, reproductive physiology, biotechnology, microbiology, aquatic/wildlife biology, biomedical engineering, endocrinology, molecular biology, pulmonary biology, epidemiology, population medicine, health systems monitoring, transplantation and radiology.

Admission Requirements

All applications are reviewed by the Graduate Studies Committee of the CBS Program, composed of faculty members representing each area of the graduate program and a graduate student representative. Scores from the GRE are required for admission by all applicants except for applicants with a DVM degree. Candidates who do not have a DVM degree must have a baccalaureate degree or advanced degree from a college or university recognized as standard by a regional or general accrediting agency. Students with a 3.0 (on a 4.0 scale) undergraduate or DVM curriculum with appropriate course background will be considered for admission.

Doctoral Degree Requirements

Credit hour requirements for the Ph.D. degree are determined by the graduate student's committee with approval of the Director of Graduate Programs and the Graduate School.
Student Financial Support

Research assistantships are awarded to qualified candidates on the competitive basis by the College. These are for 12-month periods, and stipends are competitive with those of other programs. These positions are funded by the grants of individual faculty members and the state appropriations to the College and departments.

Other Relevant Information

The program is organized as seven areas of concentration which include: cell biology, immunology, population medicine, infectious diseases, pathology, pharmacology, and neuroscience. These provide extensive interdisciplinary training and maintain a highly effective liaison with graduate programs in other colleges of the university, as well as those of nearby Duke University and the University of North Carolina at Chapel Hill.

Institute for Advanced Analytics

Programs

- Analytics (p. 552)

Degree Programs

Master of Science (MS)

- Analytics (MS) (p. 552)

Analytics

The Master of Science in Analytics (MSA) is uniquely designed to equip students for the task of deriving and effectively communicating actionable insights from a vast quantity and variety of data. It is an intensive 10-month degree with a strong practical orientation focused on the tools and methods used by data scientists. It is a fully integrated course of study taught exclusively to MSA students and designed to produce well-rounded professionals. Student teams tackle genuine problems with data provided by industry and government sponsors.

Admission Requirements

Admission to the MSA program is highly competitive. The best-qualified applicants will be accepted up to the limited number of seats available for students each year. The Admissions Committee evaluates candidates on criteria such as:

- overall academic record and grade point average;
- academic performance in analytical/quantitative subjects;
- relevant employment experience and potential to succeed in the profession; and
- leadership potential, integrity, and other personal character traits.

The Institute welcomes applications from highly motivated individuals of exceptional talent regardless of undergraduate major. Applicants without prior coursework in statistics and/or experience with computer programming would need to complete a set of prerequisite courses before qualifying as a candidate for admission. More information can be found on the MSA website (http://analytics.ncsu.edu/).

Master’s Degree Requirements

Students complete 30 credit hours of defined coursework in a period of ten months beginning in Summer Session II and ending the following Spring semester. The integrated curriculum is designed to provide a focused education in the software tools, methods and applications of data analytics.

Other Relevant Information

Students must begin the degree program in the first semester (Summer Session II) and complete all 30 credit hours of the curriculum. The program is designed for full-time students only. Applications for admission are reviewed between September and April.

Poole College of Management

Programs
• Accounting (p. 553)
• Business Administration (p. 555)
• Economics (p. 564)
• Management (p. 572)

Degree Programs
Master’s (MR)
• Accounting (MR) (p. 554)
• Business Administration (MR): Full Time (p. 559)
• Business Administration (MR): Part Time (p. 560)
• Economics (MR) (p. 565)
• Management (MR): Global Luxury and Management Concentration (p. 573)

Minors
• Business Administration (Minor) (p. 561)
• Economics (Minor) (p. 570)

Certificates
• Finance (Certificate) (p. 562)
• Marketing (Certificate) (p. 563)
• Operations and Supply Chain Management (Certificate) (p. 563)
• Tax Analytics and Technology (Certificate) (p. 555)
• Technology Entrepreneurship and Commercialization (Certificate) (p. 563)

Accounting
The Jenkins Master of Accounting (MAC) program provides exceptional education and real-world experience that equip students to take their careers to the next level. Whether pursued on campus and in-person or taken entirely online, the program’s curriculum (https://poole.ncsu.edu/mac/academics/concentrations/) in Enterprise Risk Management, Information Technology or Tax Strategy.

The curriculum is focused on both preparing you for the CPA exam and developing real-world skills, and learning doesn’t stop in the classroom. MAC students can study abroad in Prague, lead financial literacy courses on campus or in the community, work with real companies in practicum exercises and take advantage of innovative learning opportunities.

Admission Requirements
Admission to the MAC program is competitive. The best-qualified applicants will be accepted up to the number of spaces available for new students. The Admissions Committee evaluates candidates on three criteria:

• undergraduate academic record and grade point average;
• GMAT score*;
• “Engagement & Leadership” -- relevant activities and/or work experience, student athletics, volunteer work/community involvement, study abroad, in-person MAC interview, overall presence, leadership experience and integrity.

[*The Admissions Committee requires all applicants who score below 530 on their first attempt to retake the GMAT exam prior to the application deadline.]

Individuals with a Bachelor's degree in any major may apply to the program; however, any applicant without a Bachelor's degree in Accounting must complete a series of undergraduate Accounting prerequisites before qualifying as a MAC degree candidate. These prereqs are available to take online (https://poole.ncsu.edu/mac/admissions/qualifications/accelerated-summer-accounting-prerequisite-program-asap-program/). More complete information can be found on the MAC website (https://poole.ncsu.edu/mac/admissions/).

Fellowships (On-campus)
As a part of the admissions process, applicants may be considered for Jenkins Graduate School's merit-based MAC fellowships. Students may qualify for a firm-sponsored or an academic fellowship. A fellowship may provide financial support for educational expenses and also may include an offer of employment upon graduation (firm-sponsored option). All required application materials must be submitted by the February 1st application deadline to be considered for a fellowship.

Scholarships
MAC scholarships are merit-based and are made possible through a partnership between sponsoring CPA firms, the NC State Graduate School, alumni and the Poole College of Management’s Department of Accounting. All students who submit an application no later than February 1st are considered for a scholarship award. Recipients of MAC scholarships are selected based on their scholarship, leadership, service, experience, presence and integrity. Scholarships range from $2,000 to $19,000.

Master’s Degree Requirements
Students complete an 11-course sequence that includes eight graduate-level Accounting courses and three elective courses (31 total credit hours). The curriculum is designed to provide a broad-based professional education. Students have the opportunity to focus their education by choosing one of our three optional concentrations: enterprise
risk management, information technology or tax strategy. These concentrations provide an additional depth of knowledge that can give students a leg up as they enter their chosen profession.

Other Relevant Information

On-Campus (https://poole.ncsu.edu/mac/academics/on-campus-mac/)
MAC

We accept applications starting in the fall but encourage interested applicants to apply early to be eligible for our many scholarship and fellowship opportunities.

- December 1: Early admission deadline
- February 1: Deadline for MAC scholarship and fellowship consideration
- March 1: Final admission deadline

Online (https://poole.ncsu.edu/mac/academics/online-mac/) MAC

Contact Jay Arrington, jmarring@ncsu.edu or 919-515-0223, for more information regarding online MAC applications.

Mark S. Beasley
The Graduate Certificate in Tax Analytics and Technology is currently a two to three year online program that targets for enrollment MAC and MBA graduate students at NC State, graduate students at other universities and working professionals in the Research Triangle, national and global community. They will learn knowledge and skills to extract, manipulate, analyze, and summarize tax data to solve tax problems, identify opportunities for tax savings, and to effectively communicate actionable tax and business strategies to organizations.

Admissions Requirements
Graduate students at NC State must be in good standing. Students not enrolled at NC State must have completed a baccalaureate degree and have either taken some introductory/intermediate accounting and tax courses or have work experience in these areas. All students must submit an application to the certificate program which will be reviewed and evaluated by the coordinator. A minimum GPA of 3.0 (in undergraduate and/or prior graduate work) is required for admission to the program.

Program Requirements
The certificate program requires students to complete twelve (12) one-credit hour online courses with an overall 3.0 GPA in all courses. No transfer credits will be accepted in the program and it must be completed within four years.

Business Administration

The Master of Business Administration (MBA) program develops business leaders for tomorrow’s global markets and technologies. The Jenkins MBA program provides students with the requisite foundation in general business management, while also allowing time to focus on an area of particular interest. In pairing academic excellence with real-world experience, Jenkins MBA students are ready to meet global challenges head-on with practical, technology-driven solutions.

Students may choose to pursue an MBA through one of four platforms: the Full-time program on NC State’s main campus; the Professional Evening program with locations on NC State’s main campus as well as a RTP location; or the Online program.

Admission Requirements
In addition to the basic Graduate School admission requirements, full-time MBA applicants must submit recent GMAT/GRE scores, unless approved for a test waiver. Admission decisions for both full-time and working professional applicants are based on academic performance and potential, GMAT or GRE scores (when applicable), essays, recommendations, relevant work experience and an interview. Students must have previous coursework in statistics before entering the program. For further information, please visit the MBA website (https://mba.ncsu.edu/).

Master of Business Administration

The MBA program requires every student to complete the core curriculum that includes coursework in accounting, economics, finance, marketing, operations / supply chain, organizational behavior, statistics and strategy, as well as communications and critical thinking and writing. Full-time students must complete a minimum of 54 credit hours; Professional Evening and Online students must complete a minimum of 40 credit hours.

Additional Requirements

Full-time
In addition to the core curriculum, students must complete a minimum of 12 elective hours within a concentration; an advanced analytics course; and a practicum. Students then have the opportunity to choose from a variety of elective courses to meet the 54 credit hour minimum.
Professional Evening and Online
In addition to the core curriculum, students must complete a minimum of 6 elective hours within an area of emphasis; an advanced analytics course; and a practicum. Students then choose from a variety of elective courses to meet the 40 credit hour minimum.

Minor in Management
Students enrolled in Master's and doctoral programs can complete the minor by taking courses that meet requirements within the MBA degree. Master's students must take 9 hours; doctoral students must take 15 hours.

Total Hours: 40

1 "Depth Area Courses" must be a minimum of two courses in life sciences management, entrepreneurship, finance, innovation management, marketing, or operations.
2 "Analytics / Quantitative Course" must be at least one course that builds upon the core statistics course. Offerings include electives in: applied statistics, finance, information technology, marketing, and operations.
3 "Practicum Course" is a semester-long course where students serve as a consulting team for an actual organization. Offerings include: applications in analytics, consulting, entrepreneurship, finance, marketing, product innovation, operations and supply chain, and risk management.
4 "Elective Courses" may include any graduate course in the Poole College of Management; courses outside the College must be approved by the academic director of the NC State MBA.

Economics

The graduate program in economics is a joint program of the Department of Agricultural and Resource Economics in the College of Agriculture and Life Sciences and the Department of Economics in the Poole College of Management. Emphasis is placed on economic theory and quantitative economic analysis and their application to economic problems. Master’s students can choose between the terminal master’s track and the PhD-prep track. In both tracks, they may further tailor their experience by choosing to concentrate in one or multiple of the four fields: financial/macro econometrics; international trade and development; natural resource and environmental economics and economic policy. Students can also choose between engaging in a research project culminating in a thesis (the Master of Science in economics degree) and simply pursuing a coursework only option (the Master of Economics degree). The major fields of specialization for doctoral students are: agricultural economics, development and labor economics, econometrics, environmental/resource economics, international economics, macro-monetary economics and microeconomic theory and industrial organization.

Admission Requirements

Minimum background for admission for Master’s study includes intermediate microeconomics and intermediate macroeconomics, calculus I and calculus II, and one semester of statistics (econometrics courses included). For doctoral study, prerequisites are intermediate microeconomics, intermediate macroeconomics, intermediate microeconomics, intermediate macroeconomics, calculus I-III, linear algebra, and a course in mathematical statistics. GRE scores are required for doctoral applicants only.

Master’s Degree Requirements

Both the Master of Science in economics and the Master of Economics degrees require core courses in microeconomics, macroeconomics and econometrics. Each degree also carries additional elective requirements. The M.S. degree requires a thesis. Both degrees offer two tracks: a terminal master’s track and a PhD-prep track. Specific course requirements for both the Master of Science and the Master of Economics can be found on the Graduate Program in Economics website (https://poole.ncsu.edu/gradecon/academics/master-degree-programs/). Both Master’s degrees require a total of 30 credit hours. Accelerated Bachelor’s/Master’s degree programs are available for non-thesis options.

Doctoral Degree Requirements

The Ph.D. program requires a minimum of 72 hours and at least six semesters of work beyond the Bachelor’s degree. Students must pass written comprehensive examinations in microeconomics and macroeconomics. Course requirements include two semesters of econometrics and six field courses.

Student Financial Support

Fellowships, research and teaching assistantships are available and are awarded competitively on a merit basis. These fellowships and assistantships go to Ph.D. students only; there is no financial support for Master’s students. Prospective doctoral students who wish to be considered for fellowships and assistantships should apply for fall admission by January 1.

Other Relevant Information

Graduate students on financial support are provided office space or study carrels. Other students may be assigned study carrels if available. All students have access to the economics graduate student computer lab.

The Jenkins Graduate School of Management, part of the North Carolina State University Poole College of Management, in partnership with the Skema Business School in Paris, France, offers a Master's degree in Management (MM) as part of the Global Luxury and Management program. The curriculum is designed to give students with a range of backgrounds a strong exposure to core business management skills while providing in-depth exposure to the global luxury industry. It was designed specifically for students who are looking to create a personal competitive advantage for today's global luxury job market.

Students in the program come from around the world and classes will be held in both the United States and France. Students are taught by international professors who are leaders in their fields. Interactions with global luxury firms will occur in the classroom, study tours and via internships.

Admission Requirements

Applicants are required to complete the standard NC State Graduate School application process. Applicant assessments will be done on an individual-by-individual basis. Concurrent acceptance activities will be at both Skema and NC State. GMAT or GRE scores are not required of applicants. International applicants must complete the TOEFL or IELTS. U.S. applicants will need a valid U.S. passport and visa for traveling to France. Upon acceptance to the program, students can apply for a visa. Applicants should also be prepared for additional program costs (airfare to and from Europe and travels within Europe, lodging and meals while in France).

Master's Degree Requirements

The MM degree requires 33 credit hours and can be completed in one year. It does not require courses in subject areas such as economics and operations management which are required in the MBA. This one-year program awards two master degrees: (1) a Master of Management degree with a concentration in Global Luxury from NC State University and (2) a Master of Science in Global Luxury Management degree from Skema Business School.

Other Relevant Information

After two years of full-time work experience, qualified students who earn the dual master degree in Management are eligible to apply to the NC State MBA program. This would require an additional 30 hours of study. Students must complete a separate application to the MBA program.

- Nonwoven Science and Technology (Certificate) (p. 595)
- Textile Brand Management and Marketing (Certificate) (p. 595)
- Textile Supply Chain Management (Certificate) (p. 585)
Fiber & Polymer Science

This multidisciplinary program brings together the disciplines of mathematics, chemistry, physics, and engineering for the development of the independent scholars versed in the fields of polymer, fiber, and textile science. The program is coordinated by the Wilson College of Textiles and leads to the degree of Doctor of Philosophy.

The polymer, fiber, and textile sciences are concerned with polymeric materials and fibers produced from them; textile assemblies in one, two, and three-dimensional forms; and the chemistry of dyeing, finishing, and other wet processes. This broad field of study permits a wide range of useful concentrations. The candidate is expected to concentrate in one area and to acquire a reasonable perspective in other relevant areas. Generally, a student specializes in the areas of (1) polymer chemistry and synthesis, (2) fiber and polymer physics and physical chemistry, (3) the production, processing and properties of fibrous materials, or (4) chemistry of dyes, finishes, and their processes. The student’s research is usually based within one of these areas or another suitable one.

Admission Requirements

Students with a Master of Science (M.S.) degree in a related field may apply to the Fiber and Polymer Science program. Typically the minimum acceptable overall grade point average (GPA) is a 3.0 out of 4.0, based on most current U.S. universities. Students without a master’s degree may also apply if met the following conditions:

1. the undergraduate degree from a well-known and robust research active program with a cumulative GPA of 3.5 or above;
2. strong recommendation letters from faculty adviser(s) indicating research experience or suggesting research potential; and
3. strong publication record/experience or extensive industry experience in related industry/profession.

Applicants should plan to take the GRE or GMAT examination, which is required for all applicants. The GRE/GMAT scores should be sent to NC State University electronically and be available online.

For International students, TOEFL or IELTS is required for the application. Students must rank in a competitive percentile in order to be considered for acceptance into NC State University.

- TOEFL: A total score of 80+ on IBT. Minimum scores of 18 points for each section; or
- IELTS: An overall band score of 6.5+. Minimum scores of 6.5 points for each section

Scholarships and Assistantships

Competitive scholarships and assistantships from the program as well as the University are available to incoming new students. All incoming students will be considered for the funding opportunities. No separate application for assistantships/scholarships is needed.

Fiber and Polymer Science (PhD)

Degree Requirements

The Ph.D. degree in Fiber and Polymer Science symbolizes the ability of the recipient to undertake original and scholarly work at the highest levels without supervision. The degree is, therefore, not granted simply upon the completion of a stated amount of course work but rather upon demonstration by the student of a comprehensive knowledge base and high attainment in scholarship. The student demonstrates this ability by passing a series of courses, creating a written critical literature review and original research proposal, defending an oral preliminary examination, writing a dissertation reporting the results of an original investigation, and making a final oral defense of the research before the student’s advisory committee and other interested members of the University community.

Additional Courses 58

"Elective Courses" that will be applied to reach 72 credit hours will be determined in conjunction with the academic committee

Total Hours 72

1 All students must take two (2) semesters of FPS 801 Seminar.
2 Every student must obtain a grade of B or better in each of the four qualifying courses chosen.

Additional Requirements

- A minimum of 72 credit hours is required of students entering the program with a B.S. degree, or a minimum of 54 credit hours beyond the M.S. degree is required. (Students, who enter the Ph.D. program directly upon completion of an M.S. at NC State, may be allowed credit for up to 30 hours of their M.S. and thus would require 42 additional credit hours to complete the Ph.D.)
- Most of these credit hours are expected to be research credits (FPS 893 Doctoral Supervised Research or FPS 895 Doctoral Dissertation Research).
- Following successful course completion, the student needs to pass the defense of a research proposal to obtain the candidacy for the Ph.D degree.
- The final examination is an oral exam where the student presents and defends her/his research procedures, results and conclusions. The presentation will be made to an examining committee consisting of the student’s advisory committee and is open to interested faculty, staff and students. After the presentation the student will be orally examined by the examining committee. The final oral examination can be scheduled once all coursework requirements have been fulfilled and the committee is satisfied that the dissertation is complete, but not earlier than one semester after admission to candidacy.
- The anticipated time for completion of the Ph.D. program is four years for a student entering from a B.S. degree and three years for entry from an M.S. degree. The minimum time required (in exceptional cases) is two years beyond entry if the student obtained an M.S. degree from NC State.

M.S. TC Option B (Non-Thesis Degree) Program Requirements

MS TC Option B (Non-Thesis) requires a minimum of 32 credit hours, with a minimum of 24 credit hours (8 courses) meeting the following requirements:

- At least 12 credit hours of courses with substantial chemistry content, mostly CH or TC, or from the approved TC offerings table. Substitutions must be approved by the Director of Graduate Programs;
- A minimum of 15 credit hours of courses that are offered by the TECS Department, which may have the following prefixes: TC (PCC), TE, TMS, NW, TT, FPS, and TTM. Note: not all courses with these prefixes are offered by the TECS Department;
- Two semesters of TC601 (Graduate Seminar) are required;
- At least six credit hours of project-related work in textile chemistry at the 600 level or above, such as TC 630 (Independent Study) or an internship, which will be advised by and evaluated by at least one Graduate Faculty Member in Textile Chemistry.

Textile Engineering

Degree Requirements Master of Science in Textile Chemistry (MS/TE)
The Masters of Science in Textile Engineering (MS TE) has two options, a thesis option (Option A) and a non-thesis option (Option B).

M.S. TE Option A (Thesis Degree) Program Requirements
MS TE Option A (Thesis) requires a minimum of 32 credit hours, with a minimum of 24 credit hours (8 courses) meeting the following requirements:
• At least 12 credit hours of courses with substantial engineering content, including courses with TE and
TMSS prefixes. Substitutions must be approved by the Director of Graduate Programs;

- A minimum of 15 credit hours of courses that are offered by the TECS Department, which may have the following prefixes: TC (PCC), TE, TMS, NW, TT, FPS, and TTM. Note: not all courses with these prefixes are offered by the TECS Department;
- Two semesters of TE601 (Graduate Seminar) are required;
- For the thesis a minimum of six hours of thesis related research is required (TE 695, TE693 or TE693).

Master’s Thesis. The Master’s thesis should be a research exercise that necessitates expertise at the M.S. level and is concentrated in the textile engineering area on a well-defined topic that has a restricted scope.

M.S. TE Option B (Non-Thesis Degree)

Program Requirements

MS TE Option B (Non-Thesis) requires a minimum of 32 credit hours, with a minimum of 24 credit hours (8 courses) meeting the following requirements:

- At least 12 credit hours of courses with substantial engineering content, including courses with TE and TMSS prefixes. Substitutions must be approved by the Director of Graduate Programs;
- A minimum of 15 credit hours of courses that are offered by the TECS Department, which may have the following prefixes: TC (PCC), TE, TMS, NW, TT, FPS, and TTM. Note: not all courses with these prefixes are offered by the TECS Department;
- Two semesters of TE601 (Graduate Seminar) are required;
- At least six credit hours of project-related work in textile engineering at the 600 level or above, such as TE 630 (Independent Study) or an internship, which will be advised by and evaluated by at least one Graduate Faculty Member in Textile Engineering.

Degrees

- Textile Engineering (MS) (p. 583)
- Textile Engineering (Minor) (p. 584)
- Textile Supply Chain Management (Certificate) (p. 585)

Admission

Applicants must meet one of the 3 following requirements:

• Be a graduate of an accredited four-year college or university, and have a GPA of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study;
• Be a degree student in good standing in a NC State University graduate program; and
• Have a Master’s degree.

Provisional Admission

Applicants who do not meet the GPA requirements may be admitted provisionally based on past work experiences as a professional in textiles or a textile related field. Supporting documentation of professional experience in textiles should be submitted for provisional admission. Students who are admitted provisionally must earn at least a “B” average in the first three courses of the certificate program in order obtain full admission into the certificate program.

Textile Technology Management

The Ph.D. in Textile Technology Management program is designed to educate students for research and management careers in textile technology management in the fiber, textile, apparel, retail and related industries complex, as well as for positions in government and academe.

Numerous competitive challenges are facing the global textile complex. There is a need for industry and government leaders who can provide knowledge of products, processes and business strategies to effectively position companies to compete in this global marketplace. The Ph.D. in Textile Technology Management program is designed to educate students for research and management careers in textile technology management in the fiber, textile, apparel, retail and related industries complex, as well as for positions in government and academe.

The graduates of this program are expected to play several roles in industry, government, and other institutions, including:

1. Carrying out research on issues that relate to the technologies of design, characterization, and manufacture of fibers and fibrous products, management of production and sourcing activities,
marketing and distribution of products, international trade, and information requirements. The plethora of raw materials and product specific technologies extant in the industry coupled with the rapid rate at which these technologies are changing challenge students in the program to be innovative in approaches to product development, processes, and strategic business practices. Graduates assume positions in the industry with prime responsibilities for developing policy alternatives for strategic and long range planning.

2. Contributing to the teaching and research in institutions concerned with fiber, textile, apparel, and retail programs.

3. Developing policies at the highest level where broad technical and managerial expertise is required to ensure proper decision-making.

The educational objectives of the TTM Ph.D. program are two-fold:

1. To prepare managers for the research and technological enterprises within the fiber, textile, apparel, retail and related industries. To achieve this objective, the programs of study will be designed for each student to acquire and integrate knowledge of the materials and technologies used in the industrial complex by applying those quantitative, qualitative, and analytical techniques of management that would be most useful for their career goals.

2. To prepare graduates to be faculty members in the numerous international colleges and universities.

Admission Requirements

Students with a Master of Science (M.S.) degree in a related field may apply to the Textile Technology Management program. Typically the minimum acceptable overall grade point average (GPA) is a 3.0 out of 4.0, based on most current U.S. universities. Students without a master's degree may also apply if met the following conditions:

1. the undergraduate degree from a well-known and robust research active program with a cumulative GPA of 3.5 or above;
2. strong recommendation letters from faculty adviser(s) indicating research experience or suggesting research potential; and
3. strong publication record/experience or extensive industry experience in related industry/profession.

Applicants should plan to take the GRE or GMAT examination, which is required for all applicants. The GRE/GMAT scores should be sent to NC State University electronically and be available online.

For International students, TOEFL or IELTS is required for the application. Students must rank in a competitive percentile in order to be considered for acceptance into NC State University and our department.

- TOEFL: A total score of 80+ on IBT. Minimum scores of 18 points for each section; or
- IELTS: An overall band score of 6.5+. Minimum scores of 6.5 points for each section

Scholarships and Assistantships

Competitive scholarships and assistantships from the program as well as the University are available to incoming new students. All incoming students will be considered for the funding opportunities. No separate application for assistantships/scholarships is needed.

1 All students must complete two (2) semesters of TTM 801 Seminar (which may be waived for students who have taken TC 601 Seminar, TE 601 Seminar, or TT 601 Seminar during their master's program at NC State).

2 Additionally, all students need to take a minimum of two (2) additional courses, which should be selected with input from the advisory committee and can be part of an "official minor", which will require approval from the Minor Director of Graduate Programs, or can be courses chosen to provide a better foundation for the research work.

Additional Requirements

- A minimum of 72 credit hours is required of students entering the program with a B.S. degree, or a minimum of 54 credit hours beyond the M.S. degree is required. (Students, who enter the Ph.D. program directly upon completion of an M.S. at NC State, may be allowed credit for up to 30 hours of their M.S. and thus would require 42 additional credit hours to complete the Ph.D.) Most of these credit hours are expected to be research credits (TTM 893 Doctoral Supervised Research or TTM 895 Doctoral Dissertation Research).
- Following successful course completion, the student needs to pass the defense of a research proposal to obtain the candidacy for the Ph.D. degree.
- The final examination is an oral exam where the student presents and defends her/his research procedures, results and conclusions. The presentation will be made to an examining committee consisting of the student’s advisory committee and is open to interested faculty, staff and students. After the presentation the student will be orally examined by the examining committee. The final oral examination can be scheduled once all coursework requirements have been fulfilled and the committee is satisfied that the dissertation is complete, but not earlier than one semester after admission to candidacy.
- The anticipated time for completion of the Ph.D. program is four years for a student entering from a B.S. degree and three years for entry from an M.S. degree. The minimum time required (in exceptional cases) is two years beyond entry if the student obtained an M.S. degree from NC State.

Textiles

NC State’s College of Textiles, and the Department of Textile and Apparel, Technology and Management (TATM), prepares future leaders for the textile, apparel, home/furniture, fashion and retail industries. Based in Raleigh, North Carolina, undergraduate and graduate programs (Fashion and Textile Management; Fashion and Textile Design) incorporate global marketplace dynamics with a strategic management focus. Our graduates incorporate “art/design” + “science/technology” + “management” concepts in creative problem-solving. Our program
is equipped with access to and experiences utilizing the latest industry technologies. The majority of the students have an enriching and intensive study abroad experience. Our program faculty works closely with industry partners, including the Department’s 24-member Industry Advisory Board, to develop academic and experiential “real world” learning experiences. Student internships combined with a global alumni network provide an additional “value-added” experience, with our students prepared to make an immediate impact in diverse companies throughout the global supply chain. Career paths of our graduates are in the areas of: brand marketing, merchandising, retail, sourcing, private brand development, market analyst, design, product development, supply chain, and public relations and communications.

Master of Science in Textiles Degree

The objective of the Master of Science (MS) in Textiles is to prepare students for careers that require independent research skills, including designing, planning, and carrying out research projects. Students can choose to focus their studies in one of the following areas of specializations: Textile and Fashion Design, Retail and Brand Management, Textile Technology, and Textile Management. The MS degree requires a minimum of 36 hours of study including a thesis and typically takes 2 years to complete. Students interested in continuing with a Ph.D. in Textile Technology and Management (TTM) or Fiber and Polymer Science (FPS) are encouraged to pursue the MS degree.

Master of Textiles Degree

The Non-Thesis Master of Textiles (MT) program offers preparation and career advancement for students with interests in the design, management, and technological perspectives of the textile industry. The program is available on campus and online via Distance Education (DE) with flexibility to accommodate a breadth of student needs. The MT degree requires a minimum of 30 credit hours and can be completed in only two semesters (1 year) of full-time on campus study or up to a maximum of six (6) years for part time on-campus or DE students.

Accelerated Bachelor’s and Master’s Degrees

The Accelerated Bachelor’s and Master’s (ABM) degrees in the Department of Textile and Apparel, Technology and Management (TATM) are designed to provide exceptional undergraduate students in the Fashion and Textile Management (FTM) and Fashion and Textile Design (FTD) programs with the opportunity to complete a BS degree (in FTM or FTD) and a TATM Master’s degree in 5 to 5 1/2 years. Students in the ABM program can choose to pursue a non-thesis track in which they can potentially complete a Master of Textiles (MT) degree within 12 months after obtaining a Bachelor’s (BS) degree in FTM or FTD. Alternatively, students can choose the thesis track in which they can potentially complete a Master of Science in Textiles (MS) degree within the 18 months following obtaining a BS degree in FTM or FTD.

Admission Requirements

Students with a Bachelor of Science or a Bachelor of Arts degree may apply to either of the degree programs. Students apply with degrees in textiles, engineering, management, or design. The minimum acceptable overall Grade Point Average (GPA) is a 3.0 out of 4.0, based on most current U.S. universities. Students should have 20 credit hours in mathematics and natural sciences in their undergraduate degree. Degrees must be obtained from a four-year, accredited university. Graduate transfer credits can only be from other U.S. universities, and must be approved by the student’s graduate committee. Certificates and diplomas are not recognized as undergraduate degrees.

Click Application (https://textiles.ncsu.edu/tatm/application-procedure/) for more information on application procedures and requirements.

Student Financial Support

Competitive financial aid in the form of assistantships may be available for full-time Master of Science students.

Other Relevant Information

The Department of Textile and Apparel, Technology and Management houses a Digital Design lab which specializes in 3D Body Scanning, Direct Digital Printing, Whole Body Knitted Garments, and Computer Aided Apparel and Fabric Design. Additionally, the department includes the Fashion Studio, The Textile Management Sciences Lab, Textile Design Studio, Braiding Lab, Three-Dimensional Weaving Lab, and an Advanced Testing Lab that will allow students to experience hands-on advanced textile technology and management.

**Textile and Apparel Management (Minor)**

**Plan Requirements**

- 9 (MS student) or 12 (PhD student) credit hours
Consumer Textile Product Design and Development (Certificate)

The Graduate Certificate in Consumer Textile Product Design and Development (GCCTPDD), offered by the Department of Textile and Apparel, Technology and Management, will provide NC State graduate students the opportunity to develop recognized academic credentials in Consumer Textile Product Design and Development in addition to their major area of graduate study. Also it will offer non-degree graduate-level students the opportunity to develop recognized advanced expertise in Consumer Textile Product Design and Development.

Applications

New applicants to the university must submit a Program Application, a resume identifying educational preparation and work experiences, and official transcripts of all undergraduate and graduate course work. You must apply online through the Graduate School application portal. Prior to completing the first course after being accepted into the program, students prepare and submit two copies of a contract using the Certificate Contract Application. The contract includes a statement of career goals, a rationale for completing the certificate program, and a timeline for certificate completion. Students can always elect to review their application with the Certificate Coordinator prior to contract preparation.

Academic Requirements

Applicants must meet one of the three following requirements:

- Be a graduate of an accredited four-year college or university, and have a GPA of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study;
• Be a degree student in good standing in an NC State University graduate program;
• Have a Master’s degree.

Total Hours: 15

Textile Brand Management and Marketing (Certificate)

The Graduate Certificate Program in Textile Brand Management and Marketing provides graduate students with the opportunity to develop academic credentials in branding fundamentals and theories for a globalized industry and market research while complementing this knowledge with topics of strategic management, product development, supply chain management and technology management. The program also provides non-degree graduate-level students with the opportunity to develop recognized advanced expertise in Textile Brand Management and Marketing.

Admission

Applications must meet one of the following three requirements:

• Be a graduate of an accredited four-year college or university and have a grade point average of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study;
• Be a degree student in good standing in an NC State University graduate program; or
• Have a Master’s degree.

Applicants who do not meet the GPA requirements may be admitted professionally based on past work experience as a professional in textiles or a textile related field. Supporting documentation of professional experience in textile should be submitted for provisional admission. Students who are admitted provisionally must earn at least a “B” average in the first three courses of the certificate program in order to obtain full admission into the certificate program.

Requirements

A minimum of 15 credit hours is required to complete the certificate program and student must have a minimum 3.0 grade point average on all certificate course work. Transfer credit from other universities is not allowed. All work must be completed in four (4) calendar years, beginning from the time the student begins course work for the Certificate.

Graduate Certificate - Wilson College of Textiles

Certificates

• Consumer Textile Product Design and Development (Certificate) (p. 594)
• Nonwoven Science and Technology (Certificate) (p. 595)
• Textile Brand Management and Marketing (Certificate) (p. 595)
• Textile Supply Chain Management (Certificate) (p. 585)

Nonwoven Science and Technology (Certificate)

The Nonwovens Institute offers a University Graduate Certificate in Nonwovens Science and Engineering through the Wilson College of Textiles. The program is available to students currently enrolled in a graduate degree program at NC State as well as non-degree seeking graduate level students. Any student seeking a certificate in Nonwovens Science and Engineering must be a graduate of an accredited four-year college or university. The goal of this certificate is to provide recognized academic credentials in Nonwoven Science and Engineering.

Eligibility

Applicants must apply through the Graduate School for the Graduate Certificate in Nonwovens Science and Engineering. Applicants submit a resume identifying educational preparation and work experiences and official transcripts of all undergraduate and graduate coursework.

Applicants must meet one of the three following requirements:

1. Be a graduate of an accredited four-year college or university, and have a GPA of at least 3.0 on a 4-point scale in their last 60 credit hours of undergraduate study
2. Be a degree student in good standing in an NC State University graduate program
3. Have a master’s degree

The certificate must be completed within four (4) calendar years from the date the student starts the first course. Awarding of the certificate requires a minimum GPA of 3.0 or better in all of the required courses.

- Operations Research (Minor) (p. 632)
- Water Resources (Minor) (p. 637)
- Women's and Gender Studies (Minor) (p. 638)

Bioinformatics

Genomic sciences has two components. Functional genomics, the generation of large bodies of data relating to organism function, encompasses gene discovery, gene expression, protein and nucleic acid structure and function, gene and gene product interactions, and genomic approaches to breeding and comparative studies relevant to ecology and evolutionary biology. Bioinformatics is the analysis of these vast and complex data sets including methods to analyze extremely large sets of genomic information such as DNA sequences and expression from DNA microarrays. Students register in either of these two fields but also receive a solid grounding in the other through core courses common to both programs. Unique and exceptional resources include the Bioinformatics Research Center and the Genome Research Laboratory.

Admission Requirements

Students should have an undergraduate major in the biological or physical sciences, mathematics, statistics or computer science and have completed calculus and other comparable courses. In addition to the other application requirements, a student should submit a statement of interests and career goals.

Master's Degree Requirements

Students take a 15-credit core curriculum of courses common to both programs followed by courses specific to the degree and discipline. The Master's of Bioinformatics requires a minimum of 33 credit hours. The Master's of Functional Genomics requires a minimum of 30 credit hours, and the Master's of Science in Functional Genomics requires a minimum of 36 credit hours.

Doctoral Degree Requirements

The Ph.D. program requires a total of 72 credits, and all students participate in a journal club, monthly seminar series and research ethics training. A co-mentoring system exists between bioinformatics and functional genomics through which each student has advisors from both disciplines. Throughout the program they will have the opportunity to gain practical experience in the Genome Research Laboratory, Bioinformatics Research Center and DNA Sequencing Facility.

Student Financial Support

A significant number of fellowships are available through the genomics program, and students may also be supported by research grant funds awarded to genomics faculty members.

Financial Mathematics

The Departments of Mathematics, Agricultural and Resource Economics, Economics, Industrial and Systems Engineering, Statistics and Business management offer a program leading to the degree of Master of Financial Mathematics. Students choose core courses and electives to suit their individual needs and interests.

Admissions Requirements

Applicants for admission should have an undergraduate degree that would preferably include courses in advanced calculus, linear algebra, probability and statistics.

Master of Financial Mathematics Requirements

In addition to course requirements (six core courses and five electives), the Master of Financial Mathematics degree requires completion of a 1-credit internship or research project.

Student Financial Support

Some funding is available through a limited number of fellowships. Consideration for the support is automatic. There are no teaching assistantships or research assistantships for this Professional Science Masters.

**Select at least three courses listed below:** 9

#### Risk Management Track
- FIM/MA 549 Financial Risk Analysis 3
- ISE 519 Database Applications in Industrial and Systems Engineering 3
- MBA 518 Enterprise Risk Management 3
- MBA 521 Advanced Corporate Finance 3

#### Data Science for Finance Track
- ISE 519 Database Applications in Industrial and Systems Engineering 3
- ST 503 Fundamentals of Linear Models and Regression 3
- ST 516 Experimental Statistics For Engineers II 3
- ST 540 Applied Bayesian Analysis 3
- ST 590 Special Topics (Applied Time Series) 1-6
- ST 562 Data Mining with SAS Enterprise Miner 3
- ST 555 Statistical Programming I 3

#### Portfolio Management Track
- OR/MA 504 Introduction to Mathematical Programming 3
- OR/ISE 505 Linear Programming 3
- OR 506 Algorithmic Methods in Nonlinear Programming 3
- MBA 523 Investment Theory and Practice 3
- MBA 524 Equity Valuation 3
- MA 531 Dynamic Systems and Multivariable Control I 3
- ISE 519 Database Applications in Industrial and Systems Engineering 3

#### Actuarial Science Track
- ECG 701 Microeconomics I 3
- ECG 702 Microeconomics II 3
- ECG/ST 750 Introduction to Econometric Methods 3
- ECG/ST 751 Econometric Methods 3
- ECG/ST 752 Time Series Econometrics 3
- ECG/ST 753 Microeconometrics 3
- MA/ST 747 Probability and Stochastic Processes II 3
- MBA 518 Enterprise Risk Management 3

#### PhD Preparation Track
- OR/ISE 505 Linear Programming 3
- ECG/ST 751 Econometric Methods 3
- ECG/ST 752 Time Series Econometrics 3
- MA 523 Linear Transformations and Matrix Theory 3
- MA 540 Uncertainty Quantification for Physical and Biological Models 3
- MA/ST 546 Probability and Stochastic Processes I 3
- ST 730 Applied Time Series Analysis 3
- ST 740 Bayesian Inference and Analysis 3
- MA 791 Special Topics In Real Analysis (Functional Analysis) 1-6

#### Other
- CSC 505 Design and Analysis Of Algorithms 3
- CSC 522 Automated Learning and Data Analysis 3
- CSC 540 Database Management concepts and Systems 3
- CSC 541 Advanced Data Structures 3

- Sujit Ghosh
- Kazufumi Ito
- Negash Medhin
- Tao Pang
- Tom Vukina
- Mark Walker
Master’s Degree Requirements
The M.S. degree program requires a minimum of 30 credit hours, including 1-2 hours of seminar and no more than six hours of research. A research-based thesis is required, as is a minor (usually 9-10 hours). The Master of Fisheries, Wildlife, and Conservation Biology degree requires a minimum of 36 credits, including 4-6 hours of special problems and 1-2 hours of seminars, and a professional paper is required. For either degree, further requirements may be imposed by the advisory committee and/or department.

Doctoral Degree Requirements
The Ph.D. program requires 36 to 54 credits of course work beyond the Master’s degree, including two seminars and an ethics course, and a dissertation. Exceptionally well-prepared students may petition to have their degree objective changed to Ph.D. before completing the Master’s degree.

Student Financial Support
Graduate research and teaching assistantships are offered for qualified students through participating departments. Commitments for assistantships are normally made at the time of admission to graduate study.

Other Relevant Information
Research near campus is facilitated by excellent field, laboratory and computer resources. Off-campus research is conducted at the Pamlico Aquaculture Field Laboratory, research and extension centers in eastern and western NC, The Center for Marine Sciences and Technology in Morehead City, Bull Neck Swamp, Hill Forest, and at facilities of state and federal agencies and private organizations. For additional information, see the Fisheries, Wildlife, and Conservation Biology graduate webpage (http://cnr.ncsu.edu/fer/grad/future/).

Functional Genomics

Genomic sciences has two components. Functional genomics, the generation of large bodies of data relating to organism function, encompasses gene discovery, gene expression, protein and nucleic acid structure and function, gene and gene product interactions, and genomic approaches to breeding and comparative studies relevant to ecology and evolutionary biology. Bioinformatics is the analysis of these vast and complex data sets including methods to analyze extremely large sets of genomic information such as DNA sequences and expression from DNA microarrays. Students register in either of these two fields but also receive a solid grounding in the other through core courses common to both programs. Unique and exceptional resources include the Bioinformatics Research Center and the Genome Research Laboratory.

Admission Requirements

Students should have an undergraduate major in the biological or physical sciences, mathematics, statistics or computer science and have completed calculus and other comparable courses. In addition to the other application requirements, a student should submit a statement of interests and career goals.

Master's Degree Requirements

Students take a 15-credit core curriculum of courses common to both programs followed by courses specific to the degree and discipline. The Master's of Bioinformatics requires a minimum of 33 credit hours. The Master's of Functional Genomics requires a minimum of 30 credit hours, and the Master's of Science in Functional Genomics requires a minimum of 36 credit hours.

Doctoral Degree Requirements

The Ph.D. program requires a total of 72 credits, and all students participate in a journal club, monthly seminar series and research ethics training. A co-mentoring system exists between bioinformatics and functional genomics through which each student has advisors from both disciplines. Throughout the program they will have the opportunity to gain practical experience in the Genome Research Laboratory, Bioinformatics Research Center and DNA Sequencing Facility.

Student Financial Support

A significant number of fellowships are available through the genomics program, and students may also be supported by research grant funds awarded to genomics faculty members.

Degrees

- Functional Genomics (MR) (p. 609)
- Functional Genomics (MS) (p. 610)
- Functional Genomics (PhD) (p. 612)
- Functional Genomics (Minor) (p. 614)

Genetics

The Genetics Graduate Program is a University wide program. Current faculty are in 14 Departments and four Colleges. The Genetics Program provides a well-balanced program of graduate course work and research training. The faculty conducts basic research in all areas of genetics, including molecular, cellular and developmental genetics; behavioral genetics, biomedical genetics, evolutionary, population and quantitative genetics, statistical genetics, and bioinformatics. Faculty research utilizes both traditional model organisms (fruit flies, mice and Arabidopsis) and non-traditional systems (cats, cockroaches, dairy cattle, dogs, maize, pigs, pine trees and more). Interdisciplinary research is encouraged.

Admission Requirements

Applicants may come from a number of undergraduate programs that include biological, agricultural, physical and mathematical science training. All applications are screened by an admissions committee, and the best qualified applicants will be accepted up to the number of spaces that are available for new students. The program uses the requirements set by the Graduate School to evaluate applications (GRE, unofficial transcripts from each previously attended college or university, three letters of recommendation, personal statement, and proof of English proficiency for non-US citizens). Competitive applicants will include research and other relevant experience as well as their interest and fit for the program in their personal statement.

Master's Degree Requirements

The M.S. degree requires a minimum of 30 credit hours, of which 14 hours are core course requirements, three hours are additional elective graduate courses with substantial genetics content, and three hours are other elective graduate courses. M.S. students majoring in Genetics are required to complete dissertation research with three credit hours of Master's Supervised Research, six credits of Master's Thesis Research, one credit of Master's Thesis Prep, and one credit of Master's Examination. M.S. students are also required to teach one semester of undergraduate courses and may enroll in three credits of Master's Supervised Teaching. 12 hours of required courses are required for Genetics minors. The Master's of Genetics requires a minimum of 31 credit hours, of which 17 hours are core course requirements, six hours are additional elective genetics courses and eight hours are elective graduate courses.

Doctoral Degree Requirements

A total of 18 hours of seven core courses and 12 hours of elective graduate courses, nine of which have substantial genetics content, is required of all majors. Ph.D. students majoring in Genetics are required to complete dissertation research with three credit hours of Doctoral Supervised Research and a combination of Doctoral Dissertation Research, Doctoral Preliminary Examination, and Doctoral Dissertation Prep to total 39 hours. Students are also required to and teach two semesters of undergraduate courses and may enroll in six credits of Doctoral Supervised Teaching to be used toward the remaining 39 credit hours. 12 hours of required courses are required for Genetics minors.

Student Financial Support

Genetics graduate students are supported on Research and Teaching Assistantships (RAs and TAs). Specific pay varies depending on the assistantship, and students are paid bi-weekly. More information will be provided at the time of acceptance into the program.

Other Relevant Information

All M. S. and Ph. D. students rotate through three laboratories during their first semester. At the end of the semester, they choose a laboratory for their research activities consistent with their interests and available research projects. Provisions are available for a co-major and collaborative research in more than one laboratory.

Other Electives

See "Elective Courses" listed below

Other Electives

"Other Electives" are approved in conjunction with the academic committee

Total Hours 31

1 Only three hours of these courses may be counted toward the primary elective requirement.
2 Other courses that do not appear on this list may be counted if they have substantial genetics content. Please consult with the Director of Graduate Programs if you would like to count a course as an elective that is not on this list.

Operations Research

Operations Research (OR) is a graduate program of an interdisciplinary nature, governed by an administrative board and the program committee, and administered through the office of the program director.

Admission Requirements
Applications are accepted from undergraduate majors in all technical disciplines. Applicants should have had at least four math courses beyond calculus (e.g., courses in differential equations, linear algebra, probability and statistics, and mathematical analysis). Knowledge of a computer programming language is recommended, but not required. GRE scores are required of all new applicants.

Master’s Degree Requirements
The Master of Operations Research degree is a terminal graduate degree for students who seek careers as OR practitioners in either the private or public sector. The M.S. degree is designed to prepare students for careers in research and development.

Doctoral Degree Requirements
The Ph.D. degree is intended for students to be research scientists in industry or teachers and researchers in academia. This degree requires a minimum of 72 hours of graduate credit beyond the bachelor’s degree, including coursework in major and minor areas of concentration together with credit for doctoral research and dissertation preparation. A departmental written qualifying examination is required. For students who have completed a Master’s degree from another institution prior to joining the Ph.D. program, a minimum of 54 hours of additional graduate credit are required. Please consult the Operations Research website (http://www.or.ncsu.edu/) for more details of degree requirements.

Student Financial Support
Both teaching and research assistantships are available to qualified applicants. Award priority is given to Ph.D. then M.S. applicants. Outstanding students who are U.S. citizens and who shall be enrolled in the NC State Graduate School for the first time are eligible for the Engineering Dean’s Graduate Fellowship Program.

Degrees
• Operations Research (MR) (p. 628)
• Operations Research (MS) (p. 629)
• Operations Research (PhD) (p. 631)
• Operations Research (Minor) (p. 632)

Interdisciplinary Minors

Minors

- Bioinformatics (Minor) (http://catalog.ncsu.edu/graduate/interdisciplinary/bioinformatics/bioinformatics-minor/)
- Biotechnology (Minor) (p. 634)
- Ecology (Minor) (p. 635)
- Environmental Remote Sensing & Image Analysis (Minor) (p. 635)
- Food Safety (Minor) (p. 635)
- Functional Genomics (Minor) (p. 614)
- Genetics (Minor) (p. 624)
- Geographic Information Systems (Minor) (p. 636)
- Interdisciplinary (Minor) (p. 637)
- Operations Research (Minor) (p. 632)
- Water Resources (Minor) (p. 637)
- Women's and Gender Studies (Minor) (p. 638)

Biotechnology (Minor)

M.S. and Ph.D. minors in biotechnology are available to students who successfully complete at least eight credit hours in selected laboratory core courses and conduct their graduate thesis research in an area of biotechnology. At least one member of the student's thesis committee must be a member of the Biotechnology faculty (http://biotech.ncsu.edu/faculty/). Research in biotechnology is focused in three main areas: recombinant DNA technology, bioprocessing/bioanalytical techniques, and in vitro culture techniques. The multidisciplinary nature of biotechnology means that a wide range of research topics and techniques are applicable. For more information contact Dr. Robert Kelly (rmkelly@ncsu.edu).

Students wishing to pursue graduate studies leading to either a M.S. or Ph.D. minor in biotechnology must enroll and conduct their research in a participating department. For specific information about enrollment requirements, contact the participating departments (http://www.grad.ncsu.edu/catalog/default.asp#DEGREES) of interest to you directly. For general information about graduate education at NCSU contact the Graduate School (http://www.ncsu.edu/grad/), 1020 Main Campus Drive, Box 7102, NCSU, Raleigh, NC 27695.

Additional courses will be determined in conjunction with the academic committee

Total Hours 8

1 Students may place out of BIT 510 if they have had either a similar course as an undergraduate or if they have substantial practical experience and conceptual knowledge of the material covered. The approval to place out of BIT 510 is made by the Academic Advisor of the Biotechnology Program, in conjunction with consultation with the student's thesis advisor. If placing out of BIT 510, the student will instead take one additional 2-credit BIT lab course for a total of three (and will complete the minor requirements with 6 credits of coursework rather than 8).

1 Courses must be outside the student's major discipline

Additional Requirements

- Must maintain an average of 3.0 (B) for courses taken to complete the Ecology minor.
- A graduate faculty member who conducts research in Ecology must serve on the students graduate advisory committee. This committee member should be chosen in consultation with the Ecology minor DGP.*
- The student must obtain approval from the Ecology minor DGP to enroll in the minor.
- If the student is doing a non-thesis degree program, the student must obtain approval from the Ecology minor DGP for their minor program of study (Graduate Student Plan of Work).

Environmental Remote Sensing & Image Analysis (Minor)

This minor provides graduate students the opportunity to develop a recognized academic credential in remote sensing and image analysis in conjunction with their major program of graduate study. Twelve credit hours, 6 credit hours of required courses and 6 credit hours of elective courses, is required to complete the minor.

Other Requirements: A GIST graduate faculty member must be on the student’s graduate committee. A list of currently approved faculty members can be provided to students upon request. If no graduate committee is required by the student’s program, the student must obtain approval of his or her minor program. Students enrolled in Option B Masters programs are not eligible to declare a minor. Certificate coursework and Minor coursework must be completely independent.

Food Safety (Minor)
### Geographic Information Systems (Minor)

The Geographic Information Systems (GIS) minor provides an academic credential for students who want to develop some GIS application skills while pursuing a graduate degree in another discipline. It is designed for students who wish to master the basics of GIS analysis and to develop more advanced skills in a particular application area.

Other Requirements: A GIST graduate faculty member must be on the student’s graduate committee. A list of currently approved faculty members can be provided to students upon request. If no graduate committee is required by the student’s program, the student must obtain approval of his or her minor program. Students enrolled in Option B Masters programs are not eligible to declare a minor. Certificate coursework and Minor coursework must be completely independent.

Interdisciplinary (Minor)

Plan Requirements
The interdisciplinary minor requires two or more areas of coursework to be represented with a faculty member representing one of the areas of coursework. Students who are interested in an interdisciplinary minor should contact their Directors of Graduate Programs for more information.

Water Resources (Minor)
The interdisciplinary, interdepartmental graduate minor in water resources is designed for students majoring in the many disciplines of natural resources, science, engineering, technology, and social sciences that are relevant to water resources. The minor exposes students to water resources courses and faculty members within and outside their major fields of study.

The graduate minor in water resources (WR) requires successful completion (“B-” or better in each individual WR course, GPA of 3.0 or better across all WR courses counted toward the minor) of at least 9 credits of WR courses chosen from the lists below. At least 3 of the 9 credits must be from outside the student’s major department. For M.S. students (not Ph.D. students), up to 3 credits at the 400-level may be included if these credits are from outside the student’s major department. Students earning an M.S. before enrolling in a Ph.D. program can be counted toward a WR minor in the subsequent Ph.D. program. However, WR courses taken during the M.S. program may count toward a WR minor in the subsequent Ph.D. program if the M.S. program did not include a WR minor.

Plan Requirements

- At least 3 (MS) or 6 (PhD) credit hours must be from outside major

Women's and Gender Studies (Minor)

The minor provides graduate students in the humanities, social sciences and sciences with the theories and methodologies to study women and gender relations. The minor is intended to support and further students' research in their own field.

- Nine hours of graduate credit are required with a B or better in each course.
- No more than three hours of coursework may overlap between the major department coursework requirement and the Women's and Gender Studies minor. Students may choose from the courses listed on the website and/or a list of approved special topics courses.
- Because the Minor is an interdisciplinary one, at least one of the courses needs to be in a field different from that of the graduate program in which the student is enrolled.
- All courses must be taught by the Women's and Gender Studies Affiliated Faculty.
- An Affiliated Faculty member (not in the field of the degree graduate program) must sit on the master's or dissertation committee.

NC State Graduate Handbook

The Graduate Handbook provides an overview of Graduate School functions and resources, as well as the rules, regulations, and procedures administered by the Graduate School.

It is the responsibility of all graduate students to know and understand their degree requirements. Students are responsible for the fulfillment of those requirements.

NC State also lists official policies, regulations and rules (PRRs) on the university’s PRR website (https://policies.ncsu.edu/). Links to pertinent PRRs are found in the Graduate Handbook sections that contain PRR information.

- 3.12 Accelerated Bachelor's/Master's Programs (p. 659)
- 3.13 Graduate Certificate Programs (p. 660)
- 3.14 Minimum Enrollment Requirements (p. 661)
- 3.15 Course Registration (p. 662)
- 3.16 Withdrawal from the University (p. 663)

Special topics courses in a variety of disciplines are offered each semester and may be taken with the approval of the Women's and Gender Studies Director.
The Graduate Handbook defines the minimum requirements in place at that time or any subsequent versions, and students who readmit must use an entire set of requirements; they may not piece together a set of requirements approved during their continuous enrollment. Students must adhere to either the requirements in place at the time they matriculate at NC State or any subsequent versions of the requirements of their specific programs.

Students are expected to adhere to either the requirements in place at the time they matriculate at NC State or any subsequent versions of the requirements approved during their continuous enrollment. Students must use an entire set of requirements; they may not piece together a set of requirements from various versions. If a student is readmitted, they must use the requirements in place at that time or any subsequent versions, but they cannot choose requirements from their previous enrolled status.

Individual program requirements may be found in the Graduate Catalog (p. 63) and should be available through the department office or its website.

All students must also abide by standards of conduct established by NC State. The Graduate Handbook section on Codes of Conduct provides web links to Policies, Procedures, and Rules (https://policies.ncsu.edu/).

### 1.3 Graduate Faculty

Faculty participation in graduate education is a critical element of university life. The engagement with students as advisors and mentors plays a critical role in developing future researchers and instilling in them the qualities required for degree completion. Membership in the graduate faculty is a privilege.

#### A. Graduate Faculty

- All full-time tenured and tenure-earning faculty will be granted Graduate Faculty status based on a majority vote of a department’s graduate faculty at the time of hire. Emeritus faculty and those on phased retirement retain their Graduate Faculty status.
- Full-time faculty in non-tenure positions (e.g., clinical, extension, practicum, research, teaching, professor of practice, and federal contractual employees, such as USDA, DOI, U.S. Forest Service) may be granted Graduate Faculty status upon a majority vote of the graduate faculty in the department/program in which they are employed.
- Graduate faculty at another university who are in a joint department/program with one at NC State are considered graduate faculty at NC State.
- If a chair of an advisory committee leaves NC State for another position, s/he may continue as chair for one more year. After that period, s/he can only co-chair with another member of the Graduate Faculty.

#### B. Affiliate Graduate Faculty

- All non-tenure-line faculty who are on temporary appointments or are not paid by the university and who are expected to serve on master’s or doctoral advisory committees and/or teach graduate courses will be granted Affiliate Graduate Faculty status by departmental vote (see Section E). Such faculty include those who are adjunct, visiting, and interinstitutional (Duke and UNC-Chapel Hill). Faculty at other universities or others seeking Affiliate Graduate Faculty status require a majority vote of approval by the graduate faculty in the department/program they are to be affiliated with.

#### C. External members and technical consultants

- Affiliate Graduate Faculty status is not required for the participation of external members of committees and technical consultants (see 3.2 Advisory Committees (p. 651) for definitions and credentials of these roles).

#### D. Responsibilities of Graduate Faculty

The responsibilities associated with membership in the Graduate Faculty include:

- teaching courses at the graduate level (i.e., courses at the 500-900 levels)
1.4 Directors of Graduate Programs

Appointment Process

Each department offering graduate study is required to appoint a Director of Graduate Programs (https://grad.ncsu.edu/about/people/dgp/) (DGP) from among its Graduate Faculty. The Department Head, or Dean in the case of interdisciplinary programs, submits this designation in writing to the Graduate Dean. The Director of Graduate Programs plays a critical role in overseeing graduate education at the department/program level in variety of arenas as outlined below.

Responsibilities

Communication

• Handles all correspondence between the graduate program and the Graduate School and between the Graduate School and the program;
• Transmits information from the Graduate School to students;
• Submits requests for scheduling preliminary and final oral examinations and graduation checkouts;
• Communicates with the Office of International Services (OIS) and serves as a critical academic authority for matters that may affect students’ visa status.

Oversight

• Conducts the daily administration of departmental graduate programs;
• Recommends admission or denial of graduate applicants;
• Approves students’ Graduate Plans of Work after approval by the student’s Graduate Committee; submits plans to the Graduate School.

Interaction with Students

• Plays a lead role in recruiting graduate students;
• Conducts orientation of new graduate students;
• Serves as the program’s point of contact for concerns that students may have;
• Assigns graduate students to assistantships.

Advising

• Advises students requesting admission to the graduate program;
• Serves as temporary advisor to new graduate students, providing them information and advice including but not limited to course selection and scheduling, faculty interests, procedural matters, and University resources;
• Monitors graduate students’ progress and graduation credits;
• Assists new students in selecting a major advisor;
• Advises students on various aspects of program progress and completion as needed.

Fellowship Support

• Assists the Graduate School in developing fellowship proposals, including recruitment of graduate faculty to draft proposals and participate in proposed fellowship project;
• Nominates eligible students for individual fellowships and transmits their applications to the Graduate School;

E. Application for Graduate Faculty and Affiliate Graduate Faculty status

• Because new tenured or tenure-track faculty become members of the graduate faculty at the time of hire, there is no separate application process for membership in the Graduate Faculty. To ensure that Graduate Faculty status is granted, the Graduate Faculty Nomination form must be submitted to the Graduate School for processing.
• Before members of the Graduate Faculty can serve in another department/program, however, their membership generally should be voted on by the Graduate Faculty in that department/program. It may be approved by the given program’s DGP in consultation with the program’s faculty.
• For non-tenure-line faculty seeking Affiliate Graduate Faculty status, the department head or DGP forwards the Graduate Nomination Form along with a current CV to the Graduate School. As part of that process, members of the Graduate Faculty of the appropriate department/program vote and those results must be included on the Affiliate Graduate Faculty Nomination Form.

F. Requirements to Teach Graduate Courses at NC State

The Request to Teach Graduate Courses form should be completed and submitted to the Graduate School for instructors who are not members of the Graduate Faculty. For instructors who do not have a terminal degree in the discipline in which they will be teaching, a thorough justification outlining their alternative credentials is required for approval by the Graduate School.

G. Removal of Graduate Faculty/Affiliate Graduate Faculty Members

• Members of the Graduate Faculty of a specific department or program may initiate removal of a current Graduate Faculty member based on the failure to carry out the responsibilities (see Section D) or for other good cause. The department must vote on this recommendation and consult with the college dean, and if it is decided that a faculty member should be removed from the Graduate Faculty, the head or DGP (in the case of non-departmental programs) makes this recommendation in the form of a memo to the Dean of the Graduate School. The memo should include the vote of the members of the department’s/program’s Graduate Faculty. The dean of the Graduate School is then authorized to remove the person from the Graduate Faculty.
• If the member has Graduate Faculty status in more than one department/program, the status would be maintained unless all relevant entities voted to remove the member.
• Supports the Graduate School in managing fellowship awards to the program's graduate students.

**Program Development and Evaluation**

• Initiates program-related proposals to the Administrative Board of the Graduate School (Admin Board), either informally through contact with Graduate Deans or formally through written proposals to be considered at Admin Board meetings; seeks approval of College Graduate Studies Committee and College Associate Dean for Academic Affairs prior to submitting to Admin Board;

• Assists the Graduate School in conducting the annual and 8-year (or shorter as required by accrediting bodies) reviews of the graduate program, by initiating the self-study process upon notification by the Graduate School.

**1.5 Graduate Services Coordinators**

The Graduate Services Coordinators (https://grad.ncsu.edu/about/people/gsc/) serves as the principal administrative liaisons between the student, the Graduate Program Director, the graduate program, and the Graduate School. In this capacity, the Graduate Services Coordinator:

1. Processes admissions applications, collects all supplemental documents required by individual programs, and submits the materials and recommendations to the Graduate School;

2. Prompts students to meet critical Graduate School milestones to promote retention and timely completion, including preparing Plans of Work, appointing advisory committees, adding and dropping courses, maintaining continuous registration, monitoring graduation applications, and requesting the scheduling of oral exams;

3. Assists students and Director of Graduate Programs in preparing and submitting various forms and documents that require Graduate School approval. These include, but are not limited to, requests for leaves of absence, Graduate Plans of Work, committee appointments, requests for preliminary and final oral exams, grade changes, transfer requests, and reinstatements;

4. Develops proficiency in using the Student Information System (SIS), the Graduate School Information System databases, and other information systems to facilitate all graduate-student-related correspondence with the Graduate School.

**1.6 Graduate School Representatives**

The Graduate School Representative has a unique role on the doctoral examination committee. The Representative protects the interests of the student, the advisory committee, and the Graduate School. The Graduate School Representative is also an "unbiased person" to whom the Dean may turn for judgment and counsel. [Recommended by the Administrative Board of the Graduate School and approved by the Dean of the Graduate School on 10/27/86.]

**A. Appointment Process**

If a doctoral graduate committee has no representation outside of the student's graduate program, a Graduate School Representative is required. Co-chairs can never be considered unbiased, even if they are from outside the student’s graduate program, and would therefore never be able to substitute for the Graduate School Representative.

The Dean of the Graduate School chooses Representatives at random from the Graduate Faculty. Each member of the Graduate Faculty is expected to serve in this capacity. The Dean appoints the Graduate School Representative after the doctoral student’s Plan of Graduate Work is approved. An effort is also made to make no more than two such assignments to a faculty member at any one time. It is the responsibility of the student to schedule preliminary and final examinations that are satisfactory to the Graduate School Representative and to provide the Representative with a copy of the dissertation one week before the final oral.

**B. Responsibilities**

The primary responsibility of the Graduate School Representative is that of an observer. Consequently, the Representative should be invited to participate in both the preliminary and final oral examinations, but should never take a dominant role in the exams. The Representative is expected to contribute to the scholarly atmosphere of the examination. Moreover, the experiences of faculty members who serve as Graduate School Representatives should improve the overall quality of graduate education.

The Graduate School Representative also signs the official examination form and may include comments. The Representative expected to express concerns (if they exist) and encouraged to note any exceptional strengths of the examination. The Graduate School Representative should:

1. Sign the form without comment;

2. Sign the form and note any specific comments; or

3. Sign the form and note that a letter to the Graduate School Dean will follow (with copies to the committee).

The Representative may wish to comment on:

1. the appropriateness of the committee;

2. the adequacy of the Plan of Graduate Work;

3. the appropriateness of the examination questions and procedures;

4. the quality of the student’s performance; and/or

5. reservations about the dissertation.

A signature with no comments indicates that the Representative believes that the examination was properly conducted and does not take exception to the findings of the committee. The signature does not imply the Representative’s approval of the substance of the examination or dissertation. In the event the Graduate School Representative indicates any substantive reservation, the Dean of the Graduate School will investigate and decide the course of action.

**Note:** Serving as a Graduate School Representative is a requirement of Graduate Faculty status. Exceptions are made only on an individual basis and in cases of emergency.
1.7 Administrative Board of the Graduate School

A. Mission

The Administrative Board of the Graduate School advises the Dean of the Graduate School on all matters pertaining to graduate education at NC State.

B. Membership

Voting Members

The Administrative Board is comprised of 23 voting members. The voting members consist of elected as well as appointed members and represent all colleges, interdisciplinary graduate programs, the Faculty Senate and the Graduate Student Association (GSA). Each college is represented by two Graduate Faculty members. One representative is elected by the college’s Graduate Faculty as coordinated by the Associate Dean or college designee responsible for graduate education. The second representative is appointed by the College Dean. The interdisciplinary member is appointed by the Dean of the Graduate School. Board members representing the Faculty Senate and GSA are appointed annually by the Chair/President of those organizations.

Terms of elected members and interdisciplinary representative are three years starting on July 1, and these members may serve for two consecutive terms, although they may serve subsequent terms following a hiatus. The terms for each college’s representatives should be staggered so that both members do not exit the Board simultaneously. Although the expectation is that members will complete their entire term, if that is not possible, then a replacement may be identified by the respective college or unit to complete the remainder of the term. The Board’s Coordinator will notify university units in April of a Board member’s ending term. The unit should provide the name of the new Board member to the Administrative Board Coordinator no later than May 15.

Non-Voting Members

Non-voting members represent and provide insight from other important university offices including one representative from the Distance Education and Learning Technology Applications (DELTA), the Southeastern SACS Liaison, and Registration and Records. The Graduate School is also represented by non-voting members to provide insight about Graduate School administration and policies.

The current list of Board members and their contact information can be found at https://grad.ncsu.edu/about/people/admin-board/ (https://grad.ncsu.edu/about/people/admin-board/).

C. Meetings

The Administrative Board is chaired by the Dean of the Graduate School and meets biweekly during the academic year.

Agendas and minutes from previous meetings will be posted to the Graduate School website (https://grad.ncsu.edu/about/people/admin-board/minutes/ (https://grad.ncsu.edu/about/people/admin-board/minutes/)) at least one week prior to each meeting.

A quorum (12 voting members) must be present to hold a meeting of the Administrative Board. If a quorum is not met, the meeting and all agenda items will be postponed until the next scheduled meeting.

Given the nine-month appointments of many faculty members, board members are expected to be available from August 1 through May 15 to review action items for the academic year, but are generally not expected to review items over the summer.

1.8 Common Administrative Board Actions

A. Course Actions

The Board reviews and recommends for approval course actions for the creation, deactivation, and revision of all graduate and professional (#500-level) courses. These course proposals may be submitted at any time. However, if the desired effective term for a new course is the immediately following semester, the Administrative Board Coordinator must receive proposals by the following deadlines:

<table>
<thead>
<tr>
<th>Date Due to Administrative Board</th>
<th>Desired Effective Term</th>
</tr>
</thead>
<tbody>
<tr>
<td>February 1</td>
<td>Summer</td>
</tr>
<tr>
<td>March 15</td>
<td>Fall</td>
</tr>
<tr>
<td>September 15</td>
<td>Spring</td>
</tr>
</tbody>
</table>

B. Program Actions

The Board reviews and recommends the following program actions:

- new graduate degree programs, concentrations, and certificates
- discontinuation of degree programs, concentrations, or certificates
- revision of degree program curriculum requirements
- changes to the title or in the CIP code of an existing degree program or concentration

C. Workflow

All items reviewed by the Administrative Board follow the following steps (for a more comprehensive listing of the steps see https://grad.ncsu.edu/faculty-and-staff/program-development/ (https://grad.ncsu.edu/faculty-and-staff/program-development/)):

1. Proposals are initiated in the program/department;
2. Upon program/department approval, the proposals are routed through the college for review by the respective Graduate Studies Committee and the college dean; interdisciplinary programs may require the approval of multiple colleges;
3. Upon college dean approval, the proposals are sent to the Administrative Board Coordinator in the Graduate School;
4. Proposals are reviewed by the Assistant Dean for Program Development;
5. Proposals are reviewed by three Administrative Board voting members;
6. Proposals are placed on the meeting agenda for review and vote by the full Board;
7. After Board recommendation and Graduate Dean approval, no additional approvals are required for curriculum revisions and concentrations. Course actions are sent to Registration & Records for implementation and program actions are sent to the Provost’s
office to continue through the university and, where applicable, UNC system routing processes.

Note: at any point in this process, the proposal may be sent back to the instructor, program, or department for revision.

D. Graduate Policies
Reviews, revises, and recommends for approval revisions to graduate policies contained within the Graduate Handbook.

E. Memoranda of Agreement/ Understanding
Reviews and recommends degree-related agreements, including both domestic and foreign, that pertain to the graduate academics. The routing for these memoranda is identical to that for new programs (see above).

F. Extensions to Time Limits beyond Two Years
Although the Graduate School recommends extensions to the time limits of up to two years, for extensions exceeding these limits, students accompanied by their major professor and DGP must present the rationale for a continued extension to the Administrative Board. The Board will determine whether or not a further extension should be granted.

G. Degree Conferral
Each semester recommends the conferral of graduate degrees for both master’s and doctoral degrees, with the exception of the Doctor of Veterinary Medicine.

H. Posthumous Degrees
Posthumous degrees may be requested for graduate students who are close to completing their degree requirements (see 3.20 – Graduation for additional details (p. 651)).

2.1 Applications
A. Receiving the Application
All applicants to graduate programs and/or certificates must submit the online NC State University Graduate School Application Form (https://grad.ncsu.edu/apply/), including a statement of purpose and the North Carolina Residency Form (if necessary for tuition purposes). Recommenders identified by the applicant during the online application process also submit references online. An unofficial transcript from each college or university previously attended should be uploaded. The Graduate School encourages applicants to pay all application fees by credit card.

Required Documents
Applications for degree-seeking graduate students are not complete until the Graduate School receives a non-refundable application fee and the following documents (for Certificate applications see Section x.x).

- An unofficial transcript from all colleges and universities where they have or will obtain a degree; (Note: Applicants currently attending or who have previously attended NC State are not required to provide an NC State transcript.)

- Three recommendations from people who know the prospective student’s academic record and potential for graduate study;
- Online North Carolina Residency Form if claiming NC residence for tuition purposes submitted within one (1) week of application submission;
- Additional program requirements, such as official GRE or other standardized test scores, statements of purpose, portfolios or other work samples (documentation of these additional programmatic requirements can be linked to through the Fields of Graduate Instruction website); and
- Where applicable, official TOEFL or IELTS scores. All supporting documents should be uploaded to the application prior to submission, and cannot be updated after submission. Other than official transcripts, paper documents should not be mailed to the Graduate School.

Transcript Requirements
Legible, unofficial copies of transcripts should be uploaded to the application for review purposes. Upon recommendation of admission, the University requires that official transcripts that document all prior conferred/awarded degrees be on file in the student’s permanent record at NC State. The transcript(s) must include a statement of any degree(s) awarded. At the time of application, some students are enrolled in a degree program and can only provide an incomplete official transcript at the time an admission decision is reached. The official, complete transcript(s), including statements of all degrees awarded, must be submitted to the Graduate School no later than the last day of classes of the first semester they are enrolled. An initial hold will be placed on a student’s registration if they fail to supply the transcripts with possible termination should they not be provided.

Deadlines for Applications
The Graduate School must receive the application and all supporting documents no later than the deadlines specified by the Graduate School and/or the program; numerous programs have earlier deadlines than those established by the Graduate School. Applicants are responsible for meeting any earlier deadline established by a graduate program to which the prospective student is applying (see the Fields of Graduate Instruction website for links to program deadlines).

Conditions of Admission
Final acceptance at NC State is contingent upon completion and official documentation of any degree (bachelor’s or master’s) listed in an applicant’s application. It is the applicant’s responsibility to maintain a level of academic performance that meets university and program admission standards. Poor performance during the last semester(s) could jeopardize an applicant’s admission. Likewise, students currently enrolled in Post Baccalaureate Studies (PBS) or who request an admissions deferral and take PBS coursework must also maintain a level of academic performance that meets the university’s and program’s admission standards. Failure to comply with these conditions could, at the discretion of the program and/or Graduate School, be grounds for changing the admission status.

Length of Application Validity
An application is valid for 12 months from the date it was submitted by the applicant.
Number of Programs for Which Applicant Can Be Considered

An application is only valid for admission consideration by one graduate program. If an applicant wants to be considered for admission to additional programs, they must re-apply and pay an additional application fee for each program they apply to.

B. Waiving the Application Fee

Under exceptional circumstances, the Graduate School may waive the application fee. (https://ncsu.service-now.com/gradschool?id=kb_article&sys_id=5eab88dbdbce4f40de08f1a51d9619cf/)

C. Processing Applications

All Applications

Applicants must ensure that all of the required materials are submitted. When the Graduate School receives a completed application and the application fee, an admission record is created for the applicant and their application is made available to the program of interest. The DGP and the graduate program review the completed files of all applicants in accordance with the Graduate School’s guidelines for final admission or denial decisions. The DGPs then submit their recommendations to the Graduate School.

The Graduate School reviews the departmental recommendations and, in cases where the Graduate School concurs with an admission decision, requests official transcripts. Once the official transcripts are received and verified, the Graduate School posts the final admission decision. When the Graduate School denies a program’s recommendation for admission, the program has the option of supplying further justification to the Graduate School. However, the Graduate School has the final decision.

International Applications

Before international applicants’ admission status can be finalized, they will need to submit a completed Certificate of Financial Responsibility (CFR) and/or a Visa Clearance Form (VCF), depending upon their visa status, directly to the Graduate School. Once the CFR and/or VCF are approved, applicants must accept the offer of admission before a Certificate of Eligibility (Form I-20 or DS-2019) will be created (see Section x.x for detailed information on International Applications).

D. Reapplication

Students denied admission into a graduate program may be reconsidered for admission at a later time upon submission of a new application and supporting materials.

2.2 Application Deadlines

A. U.S. Applicants and Permanent Residents

The following dates are Graduate School application deadlines. Many programs have earlier deadlines (see URL). Applicants should submit applications and all supporting documents on or before the Graduate School or program deadline, whichever is earlier.

<table>
<thead>
<tr>
<th>Semester</th>
<th>Deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>June 25</td>
</tr>
<tr>
<td>Spring</td>
<td>November 25</td>
</tr>
<tr>
<td>Summer I</td>
<td>March 25</td>
</tr>
<tr>
<td>Summer II</td>
<td>May 10</td>
</tr>
</tbody>
</table>

B. International Applicants

The following dates are Graduate School application deadlines for international applicants. Many programs have earlier deadlines (see URL). International applicants should submit applications and all supporting documents on or before the Graduate School or program deadline, whichever is earlier.

<table>
<thead>
<tr>
<th>Semester</th>
<th>Deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>March 1</td>
</tr>
<tr>
<td>Spring</td>
<td>July 15</td>
</tr>
<tr>
<td>Summer I</td>
<td>December 15</td>
</tr>
<tr>
<td>Summer II</td>
<td>December 15</td>
</tr>
</tbody>
</table>

C. Late Applications

1. Departments are under no obligation to review or consider any applications received past their program deadlines.
2. Should departments wish to consider late applications, they may do so without requesting special waivers from the Graduate School.

2.3 Graduate School Admissions

A. Types of Admission

The criteria used for admissions decisions vary by program, reflect an evaluation of the applicant’s potential for graduate work, and consider the ability of a program to accommodate additional students. Departmental admissions committees consider requests for admission and forward their recommendations to the Graduate School. However, Graduate School regulations govern the criteria for the classification of graduate student status. Programs should first determine the appropriate status of the student before forwarding their admission recommendations to the Dean of the Graduate School.

There are three types of admission to graduate study at NC State:

- Full-graduate standing
- Provisional
- Graduate-unclassified

B. Full Graduate Standing

To be considered for admission in full graduate standing, applicants must have:

- (a) a four-year bachelor’s degree (or equivalent) from a regionally accredited college or university. Exceptions to standard accreditation may be granted for applicants with international degrees, including
applicants with three-year degrees from institutions in Europe participating in the Bologna Process.

- (b) a GPA of at least 3.00 (on a 4.00 scale) in their undergraduate degrees.

C. Provisional Admission

Students may be granted provisional status when they do not fully meet all the necessary requirements for admission to the Graduate School, but their circumstances warrant provisional admission.

1. Students with related bachelor’s degree and overall bachelor’s GPAs that fall below 3.00 on a four (4)-point scale) Provisional admission may be granted to students with related bachelor’s degrees from regionally accredited institutions whose GPAs fall below 3.00 standards for admission to full graduate standing when:
   a. unavoidable, extenuating circumstances affected their undergraduate averages, or
   b. progressive improvement in their undergraduate work warrants provisional admission. Students can attain full-graduate standing after completing nine or more graduate credit hours with a minimum 3.00 GPA. Courses taken for S/U grade cannot be used as part of the minimum. A graduate student is not eligible for appointment to an assistantship or fellowship while on provisional status.

2. Students with non-related bachelor’s degrees (from accredited institutions) The Graduate School may grant provisional admission to applicants with bachelor’s degrees from accredited institutions who lack undergraduate work considered essential for graduate study in a major field. The Graduate School grants full-graduate standing when the deficiencies responsible for the provisional status are corrected through additional coursework. The student must also maintain a satisfactory academic record (3.000 GPA) on all coursework taken in a graduate classification. The graduate program must also recommend that full graduate standing be granted to the student seeking admission.

D. Graduate-Unclassified Status

The Graduate-Unclassified status is a temporary classification for students, such as foreign visitors (see Section 2.4), who are not candidates for degrees. Students may take courses for graduate credit but may not apply more than 12 credits to any program leading to an advanced degree at NC State.

Unclassified graduate students must meet the same admissions requirements that apply to graduate students in full standing. Individuals interested in applying for admission as Graduate-Unclassified Students should contact the graduate program of interest.

E. Eligibility for Student Status in a Graduate Program

Students who graduate from a degree program can no longer register as students in that program unless they are formally admitted to a new graduate classification (e.g., from a master’s to a doctoral degree). Students with specific educational goals not encompassed by traditional degree programs may request admission in the “Graduate-Unclassified Status” or register in the “Post-Baccalaureate Studies” program through Registration and Records (https://registrar.ncsu.edu/).

F. Process of Admission or Denial

Using the online DGP Decision Recommendation form, the Director of Graduate Programs (DGP) indicates via a checkbox on the form that all information is accurate (including GPA information) and that the decision recommendation is ready for communication to the applicant.

After reviewing the applicant’s file and, if necessary, consulting with the appropriate DGP, the Graduate School notifies the applicant of acceptance or denial of admission. The DGP and the applicant will have access to this letter via the online system. DGPs should only notify an applicant regarding admission after the official notification of admission is posted online by the Graduate School. A template departmental admission letter is available for that use.

G. Advanced Enrollment Deposits

1. Some graduate programs require a deposit for newly admitted masters and doctoral students to enroll. Admitted students must confirm their intent to enroll via the link in their online decision letter by filling out the enrollment form and paying their enrollment deposit. Payment options include credit card and check. The non-refundable deposit will be credited toward tuition for the student’s admit term; there is also a processing charge. The deadline to submit the enrollment deposit will be June 15 for Fall and Summer terms/sessions, and November 15 for Spring, or within two weeks of an admission decision rendered after these deadlines.

2. Advanced enrollment deposits are term specific. Should a student receive approval for deferment of their admission to a future term after having paid the advanced enrollment deposit, they must request a deferral of their enrollment deposit by notifying the Graduate School by September 1 of the year in which they were originally admitted. Failure to request a deposit deferral by the due date will result in forfeiture and a new deposit will be required for the future term. Exceptions cannot be granted to this policy.

3. Sponsored students (research assistants, teaching assistants and fellows) are required to pay the enrollment deposit. When tuition awards are posted to these students’ financial accounts, the amount of the advanced enrollment deposit will go toward student fees. If student fees are covered under the sponsorship, then the deposit amount will be refunded by the University Cashier’s office.

H. Exceptions to Standard Admission

1. Doctoral applicants with previous doctoral degrees. An individual who has a doctoral degree will be denied admission to a doctoral program at NC State. The Dean of the Graduate School may make exceptions based upon departmental recommendations.

2. Applicants to graduate programs without bachelor’s degrees but with professional degrees. The Graduate School may consider an applicant who does not possess a bachelor’s degree, but who has earned a D.D.S., D.V.M., J.D., PharmD, or M.D. degree from a regionally accredited institution for admission to a graduate program.

3. Applicants who have a previous Master’s degree in the program to which they are seeking admission. The Graduate School will not admit or transfer a student to a Master’s program if the student already holds a Master’s degree in the same discipline. Exceptions may be considered if a statement of justification is provided by the DGP and is then approved by the Dean of the Graduate School.
I. Date of Admission

1. Deferral of Admission. Registration is automatically canceled when students do not enroll for the semester or summer session for which they received admission. Any applicant wishing to defer the admission date must submit a written request to the graduate program. Both the graduate program and the Graduate School must approve the request. The maximum time that a student may be granted a deferral is one year.

2. Ineligibility for leave of absence prior to enrollment. Leaves of absence are available only to currently enrolled students or students already on an approved leave of absence. Students who are admitted for an upcoming semester, but are unable to register, must request a deferment in writing to their graduate program and Director of Graduate Programs.

J. Readmission

Students must reapply if they are terminated at NC State because of non-compliance with the continuous registration policy and wish to resume study in their original graduate program. The student must submit a new application and pay the application fee, submitting all materials as if applying for the first time. However, letters of recommendation and GRE scores less than five years old that are on file in the Graduate School or department may be transferred to the second application, upon request.

If the program approves the student’s request for readmission, the Director of Graduate Programs must submit both a letter of justification and an online DGP Decision Recommendation form to the Graduate School on the student’s behalf. The Graduate School makes the final decision on the student’s readmission.

K. Contractual Readmission for Master’s Students

In rare circumstances, a program may request that the Graduate School contractually readmit a student. Contractual readmission permits students, who had previously enrolled in a master’s program at NC State and obtained GPAs below a 3.00, to pursue a master’s degree in another field and have their GPAs reset. The program requesting this readmission must be different from the one in which the student was originally enrolled. Students must complete the Graduate Contractual Readmission form and this must be approved by the new program’s DGP and the Graduate School. This process will not remove the previous coursework from their NC State transcript, but it will allow the calculation of the graduate GPA to commence when they enroll in the new program. Furthermore, this process requires a break in enrollment; the coursework for the prior program must have been completed at least two years prior to the term in which the student will re-enroll.

L. International Admission Pending Receipt of Certain Documents

International students cannot be admitted until the Graduate School receives additional documentation required by both the US Citizenship and Immigration Services (https://www.uscis.gov/) (USCIS) and the Graduate School (see Section xx).

M. NC State Faculty Enrollment in Degree Programs

Any NC State faculty member, regular or special, may enroll in an NC State program to pursue an advanced degree, provided they have the prior approval of their Department Head and Dean. Annual renewal or rescinding of approval must occur by letter in the faculty member’s personnel file. The Department Head and Dean are responsible for ensuring that no conflict of commitment, conflict of interest, unethical or improper actions, or privileges are incurred in this process.

N. Post-Baccalaureate Studies (PBS) Classification

Those who wish to undertake academic work beyond the bachelor’s degree, but are not currently admitted to a graduate degree program, may enroll under the Post-Baccalaureate Studies (PBS) classification. This classification is open only to US citizens, permanent residents, and international students who are sponsored by an agency of the US government or are married to an NC State student. Registration is through Registration and Records.

Rules for Participation in PBS

The following are university minimum requirements, although home departments may have more restrictive requirements.

1. All applicants must have a bachelor’s degree from a regionally accredited institution of higher education.

2. All classes taken for credit by PBS students will be graded in the usual manner that applies for the particular course (A+ through F or S/U). All courses taken at NC State will appear on the student’s transcript.

3. Registration is limited to a maximum of two courses per semester. Individuals who are employed full-time should limit their PBS registrations to one course per semester.

4. The GPA of a graduate student who has credits in the PBS category will be based on all courses taken at the 400-800 level. If PBS courses are included in a student’s degree program, his/her degree clock for time-to-completion starts with the first course approved for inclusion in the Plan of Work.

5. If a student’s graduate degree program is terminated, he/she cannot use courses taken in PBS status after termination for credit toward the same graduate degree program.

6. The student’s advisory committee must approve all coursework accepted for degree credit. Requests for degree credit for courses completed in the PBS classification are considered after admission to a graduate degree program when the student’s Plan of Graduate Work is filed with the Graduate School.

7. The PBS classification carries with it no implication that the student will be admitted to the Graduate School in any degree classification or that courses taken will be accepted for degree credit.

8. PBS students are required to familiarize themselves with Graduate School and departmental policies and to seek further advice or clarification as needed.

O. Teaching Certificate Renewal

Public-school personnel who are primarily interested in “certification credit” may enroll in the PBS program without forwarding transcripts of previous work to the Graduate School. However, these students must be admitted in the Graduate–Unclassified status before completing their certification. The College of Education determines the applicant’s qualifications for enrollment.
P. English Proficiency Requirements for International Applicants

To be eligible for admission to graduate study at NCSU, all non-US citizen applicants (i.e., non-resident aliens and permanent residents) must demonstrate proficiency in English at a level necessary to be successful in a graduate program at NC State. This requirement can be met for most applicants in one of the following ways; however, some programs may require additional evidence of English proficiency:

1. Provide Test of English as a Foreign Language (https://www.ets.org/toefl) (TOEFL) with a total score of at least 80 on the Internet-based Test (iBT), and with minimum test scores for each section of:
   - Listening 18 points
   - Reading 18 points
   - Writing 18 points
   - Speaking 18 points – for admission, 23 points – for TA appointment where TA has direct verbal interactions with students, 26 points – for TA appointment where TA presents lectures in the class or laboratory NOTE: The current computer- and paper-based versions of the TOEFL test will be given until the iBT version is implemented in a particular location. Computer-based TOEFL scores must be 213 or higher (with at least 17 on three sections and no section score below 13). The paper-based test requires a score of 550 or higher (with scores of 50 on at least two of the three sections and no section score below 45).
2. Provide International English Language Testing System (https://www.ielts.org/) (IELTS) scores with an overall band score of at least 6.5. Minimum test scores for each section are listed below:
   - Listening 6.5
   - Reading 6.5
   - Writing 6.5
   - Speaking 6.5 – for admission, 7.0 – for TA appointment
3. be a citizen of a country where English is the official language (https://projects.ncsu.edu/grad/handbook/docs/official_language_english.htm) and the language of instruction in higher education;
4. have successfully completed at least one year of full-time study in a degree program at a regionally accredited four-year US College or university.

TOEFL or IELTS test scores must be no older than two years (24 months) prior to the beginning of the requested entry term.

2.4 International Student Admissions

The Graduate School can inform an international student of academic acceptance, but cannot grant official admission until certain critical documents are received and approved either by the International Admissions Specialist at the Graduate School or by the Office of International Services (https://internationalservices.ncsu.edu) (OIS). International students (non-resident aliens) are those who have neither United States citizenship nor permanent resident status in the United States. U.S. permanent residents will be required to show proof of valid permanent residency if recommended for admission.

Applicants who are overseas internationals, U.S. permanent residents, or international students already residing in the U.S. on a visa that allows study, must send their paperwork to the International Admissions specialist at the Graduate School. Those applicants who will need to change their visa status to F-1 or J-1 prior to enrolling must send their paperwork to OIS. The OIS staff members also provide immigration and cross-cultural assistance to students on nonimmigrant visas throughout their program at NC State.

A. Types of Admission for International Students

International graduate students are admitted to either full-time study in a specific graduate program or into the Graduate-Unclassified category as an international visitor. In addition to admission requirements listed elsewhere for graduate admission, applicants who are not U.S. citizens must complete and submit a Visa Clearance Form and/or a Certificate of Financial Responsibility (see additional sections below) before a final admission decision can be made. Criteria for international visitors are as follows:

1. International student visitors must state their educational objectives at NC State and the time expected to accomplish those objectives (normally one semester or one academic year). The educational objective may not be to seek a graduate degree at NC State.
2. They are expected to meet the same minimum academic admission requirements that apply to graduate students in full standing.
3. They are expected to meet the same TOEFL requirements that apply to international students who are admitted to Master’s and doctoral programs if they plan to take courses. If they plan to register for research only, they are not required to take the TOEFL.
4. They must be recommended by the DGP of the program in which they plan to take courses or do research.
5. Special admission status may apply for a period not to exceed one year.
6. They may hold a research assistantship but may not hold a teaching assistantship (provided their nonimmigrant status allows on-campus employment).
7. They will not be eligible for out-of-state tuition remission.
8. Those in F-1 or J-1 status must maintain full-time enrollment and all other requirements based on their particular nonimmigrant status.

B. English Proficiency Requirements

In order to be eligible for admission to the Graduate School all non-US citizen applicants (i.e., non-resident aliens and permanent residents) must demonstrate proficiency in English at a level necessary to be successful in a graduate program at NC State (see English Proficiency Requirements (p. 644)).

C. Visas

Under immigration law, international students are divided according to their immigration classification. Each visa type has its own eligibility requirements and restrictions.

1. F-1 Student – is a resident of a foreign country who plans to return to their home country and who is coming to the U.S. temporarily and solely for the purpose of attending a school previously determined by the student. An F-1 student is required to demonstrate full financial support to obtain the F-1 visa and be admitted to the U.S. as a student. There are numerous requirements and restrictions regarding enrollment, employment, travel, etc., and detailed information is available from OIS.
2. J-1 Exchange Visitor – is a classification that serves a variety of educational purposes. Under this status, students, scholars, professors, and researchers may come to the U.S. temporarily for the purpose of educational exchanges under the sponsorship of an approved organization or institution. Students often enter the U.S. in J-1 Exchange Visitor status when they are participants in sponsored activities such as the Fulbright program.

3. Other Visa Types- in addition to F-1 and J-1, there are other visa types represented among the international student population at NC State, such as H-1B, TN, O, and E visas.

International applicants already in the U.S. who wish to study at NC State must indicate on the Visa Clearance Form (see below) whether they wish to remain in their current nonimmigrant status or wish to change their status. Because processing times at the U.S. Citizenship and Immigration Services are sometimes long and there are many factors that must be taken in to consideration when deciding to change one’s status, those in dependent status (F-2) are recommended to contact an OIS advisor early in the admission process. A link to the online Visa Clearance Form is issued when the Graduate School sends the academic acceptance letter; if the applicant is a foreign national in the U.S. The applicant should complete and return this form to the appropriate office listed on the form as soon as possible to enable the Graduate School to grant official admission. To finalize an international student’s application, the Graduate School must receive a completed Certificate of Financial Responsibility (CFR) and/or a Visa Clearance Form (VCF) depending on their status. Once approved, the Graduate School or OIS will then issue Certificate of Eligibility Form I-20 for an F-1 visa or Form DS-2019 for a J-1 visa. The Certificate of Eligibility can be used as partial documentation to: apply for a visa overseas; request admission/inspection at a U.S. port of entry; and as proof of nonimmigrant status when applying for certain benefits. International applicants can check on the status of their application/admission, including when the Certificate of Eligibility was issued by going to: http://www.ncsu.edu/applygrad (http://www.ncsu.edu/applygrad/). A lawful permanent resident of the U.S. (“Green Card holder” or “resident alien”) is not required to demonstrate financial ability on the CFR and needs only to complete and submit the Visa Clearance Form.

D. Certificate of Financial Responsibility

The Certificate of Financial Responsibility (CFR) requires the candidate to provide evidence of ability to cover all expenses, including those of any accompanying dependents, for each year of study. Students must return the complete CFR to the Graduate School. Once the CFR and/or VCF are approved, the applicant will receive a Certificate of Eligibility Form I-20 (or DS-2019) and an official admission letter. Scholarship award letters are not acceptable substitutes.

E. Health Insurance Requirement

Hospitalization costs in the U.S. are high and having appropriate health insurance is a requirement for all international students at NC State in F-1 or J-1 status. All international students in F-1 or J-1 status must purchase the University student health and accident insurance plan (or opt out through the universities hard-waiver program if other acceptable health insurance has already been purchased) throughout their program of study at NC State. Those who do not maintain this required insurance will have a hold placed on their ability to register.

F. Letters of Assurance for Research Participation

The Board has determined that no international students are required to sign Letters of Assurance, such as those occasioned by the Export Control Act, as a condition of participating in research activities.

G. Full-time Status Requirement

International students in F-1 or J-1 status must carry a full course load in each regular semester to comply with the US Citizenship and Immigration Services (https://www.uscis.gov/) (USCIS) regulations. Please refer to Section 3.15 for information on determining full- and part-time status.

H. Assistantship Limitations

International students in F-1 or J-1 status may not hold assistantships or a combination of assistantships that exceed 20 hours of service work per week during Fall and Spring semester since this jeopardizes their student status with USCIS. However, these students can have appointments up to 1.0 FTE during the Summer sessions.

I. Employment

International students should consult with OIS before accepting any type of employment. Employment regulations vary by visa type.

2.5 Medical History and Immunizations Requirements

All graduate students admitted to a degree program are required by State law to submit a report of medical history and immunization documentation prior to initial registration. Both forms are available online through the HealthyPackPortal (https://healthypack.dasa.ncsu.edu/healthweb/). This report must document immunization against tetanus/diphtheria, measles, German measles, polio, and for international students from a high risk country, show results of a tuberculin skin test (must be completed at U.S facility) or TB blood test. Graduate students who have recently completed their undergraduate work at NC State must update their medical history. Student Health Services (https://healthypack.dasa.ncsu.edu/) must receive the required reports at least 30 days before registration. If the student does not meet this requirement, dismissal from school is mandatory under the law.

3.1 Graduate School Minimum Requirements

A. Master of Arts and Master of Science

All Master of Science and Master of Arts degree programs are planned with the objective of making possible a reasonable, comprehensive mastery of the subject matter in a chosen field. In most cases, the Master of Science and Master of Arts programs provide training and experience in research in order to familiarize the student with the methods, ideals and goals of independent investigation. In these cases, representative of most Master of Science and Master of Arts degree programs, a thesis is required. A small number of Master of Science and Master of Arts programs do not require a thesis.
Students in the Master of Arts or Master of Science programs follow the individual program and the Graduate School requirements that were in effect when they entered the program.

The following are minimum requirements for a degree in Master of Science or Master of Arts degree programs:

1. A minimum of 30 semester hours of graduate work in the degree program, unless the specific program requires more hours.
2. A reading knowledge of a foreign language (in a few programs; see Section 3.5 (p. 653))
3. A comprehensive written examination (in some programs)
4. A thesis (in most programs)
5. A comprehensive oral examination (except Option B programs)

Note: Requirements for ALL master’s degrees must be completed within six (6) calendar years. For further information about the time limited for degrees, see Section 3.4 (p. 653).

B. Master’s Degree in a Designated Field

A number of departments and programs offer master’s degrees in designated fields. These are professional degrees and do not require a thesis. Master’s Thesis Research (XXX 695) may not be included as part of the Plan of Work.

Requirements include the following:

1. A minimum of 30 semester hours of graduate work in the degree program (unless the specific program requires more hours).
2. A comprehensive written examination (in some programs)
3. A comprehensive oral examination (except Option B programs)

C. Option B Master’s Degree

The Option B Master’s degree requires that students adhere to the general guidelines for a Master of Arts or Master of Science degree with the following exceptions:

1. A comprehensive oral exam is not required
2. A thesis is not required
3. Master’s Thesis Research (XXX 695) may not be included as part of the Plan of Work
4. Individual departments define other requirements for their Option B program, such as additional course work or final projects
5. Option B Master’s degree programs cannot carry an officially designated minor
6. Students have a single assigned advisor rather than an advisory committee.

Changing Master’s Programs to “Option B”

Master’s degree programs that require final oral examinations may petition the Graduate School for permission to operate the program with a single advisor and to eliminate the final oral examination (Option B). Option B Master’s degree programs may not carry an officially designated minor.

Petitions need the approval of school/college-level Graduate Studies Committees and must be made for an entire degree program, rather than for individual students. The Administrative Board of the Graduate School will review each petition and make appropriate recommendations to the Dean of the Graduate School. The petition form is entitled Proposal for Changing Non-Thesis Graduate Degree Program Requirements to Option B.

D. Credit Hour Requirements for Master’s Degrees

[Recommended by the Administrative Board of the Graduate School and approved by the Dean of the Graduate School on 6/17/2009]

A minimum of 30 semester credit hours is required for all master’s degrees. Students may take more than the minimum hours required by their programs. The Graduate School does not give credit for non-credit course work (i.e. non-departmental seminars, workshops, short courses, conferences, and any “life experience” offerings). Furthermore, the Graduate School does not allow credit by examination.

The following are specific credit-hour limitations:

1. At least 18 credit hours must be graduate credits earned while the student is enrolled in the graduate program.
2. The remaining 12 credit hours or more, depending on the requirements of the specific program, may be transferred from any of the sources or any combination thereof set forth below as transfer credit.
3. At least 18 credit hours of letter-graded courses (“A,” “B,” “C”, etc.) must be included in the program. These must be NC State or inter-institutional courses.
4. No more than six credit hours of 400-level (undergraduate) courses may be included in the program, and they may not come from the major field.
5. Credit hours for the following courses may NOT be used to satisfy the 30-credit hour requirement: Non-Thesis Master’s Examination (XXX 689), Non-Thesis Master’s Continuous Registration (XXX 688 and XXX 689).
6. No more than 12 credit hours may be used to satisfy degree requirements for another master’s degree program at NC State, unless the student did not complete the other program. (See Section 3.11A, Multiple Master’s Degrees).
7. Courses at the 900 level may not be counted toward a master’s degree.

Transfer of Credits

1. Transfer of graduate credits earned at other universities. A course that was completed at another college or university may be considered for transfer to a master’s program provided that:
   a. The course is classified as a graduate course.
   b. It was completed while the student was in a graduate or post-baccalaureate classification.
   c. It was not taken as a part of a previous master’s degree program at another institution.
   d. The grade in the course is B or better. Courses with grades of B- or lower will not be allowed to transfer.
   e. The college or university is accredited by one of the following six U.S. regional accrediting agencies: the Southern Association of Colleges and Schools, the Middle States Association of Colleges and Schools, the New England Association of Colleges and Schools, the North Central Association of Colleges and Schools, the Northwest Association of Colleges and Schools, or the Western Association of Colleges and Schools.
Exceptions are allowed for transfer from international institutions if the department or program provides the Graduate School with adequate documentation that the course is relevant to the graduate degree and comparable to an equivalent course at NC State, and that the course was taught by faculty who are qualified to teach at the level of a master's degree. Where the grading system and grading culture in such institutions differ from that at NC State, students may (with the help of the Study Abroad Office) provide a letter to the Graduate School establishing the minimum average grade required for a graduate degree from that institution. That grade will be taken as the minimum grade for transfer in lieu of the “B” noted in 1(d) above.

2. Transfer of graduate credits earned while enrolled in an undergraduate program at NC State University. A course that was completed while the student was enrolled as an undergraduate at NC State University may be considered for transfer to a master's program provided that it is at the 400-level or higher, that the earned grade is B or better, that it was not counted toward fulfillment of undergraduate requirements, and that it is verified by the undergraduate coordinator and recommended by the DGP. No credit will be allowed for a course completed in an undergraduate classification at another institution. Credit hours at the 400 level are subject to the restrictions stated in subsection D.4 above. Courses with grades of B- or lower will not be allowed to transfer. (NOTE: Students admitted to the Accelerated Bachelor’s/Master’s program may use up to 12 hours of graduate credit [500 or 700 level] to satisfy requirements for both the bachelor’s and the master’s degrees.)

3. Transfer of graduate credits earned while enrolled in a previous graduate degree program at NC State University. A graduate course that was completed while the student was enrolled in a previous graduate program at NC State University may be considered for transfer to a master’s program provided that:

(a) The course was a letter-graded (“A,” “B,” “C,” etc.) 500- or 700-level course and that the grade is B or better. Courses with grades of B- or lower will not be allowed to transfer. (b) It was not taken as a part of a previous master’s degree at another institution.

4. Transfer of Post-Baccalaureate Studies (PBS) graduate credits earned at NC State University. A graduate course that was completed while the student was enrolled in PBS status at NC State University may be considered for transfer to a master’s program provided that it is at the 500 level or higher and that the grade is B or better. Courses with grades of B- or lower will not be allowed to transfer. All PBS credits that are used to satisfy requirements of a specific master's degree must be earned before the student is admitted to that degree program. A maximum of 12 credit hours taken while in PBS status may be transferred into a master’s degree program. See Section 2.3 (p. 644) for information on admission to PBS classification. If a student's graduate degree program is terminated, he/she cannot use courses taken in PBS status after termination for credit toward the same graduate degree program.

**Submitting Transfer Credit for Graduate School Approval**

When the graduate program submits the online Plan of Graduate Work through MyPack Portal, the DGP submits a letter requesting that any transfer credit be accepted as part of the student’s master’s program. An official transcript indicating the work to be transferred must accompany the letter.

**E. Doctor of Philosophy and Doctor of Education**

Doctoral students must demonstrate their ability to undertake scholarly research by writing a dissertation reporting the results of an original investigation, by passing a series of written and oral preliminary examinations in the field of specialization and related areas of knowledge, and by successfully defending the dissertation.

The following are requirements for the Doctor of Philosophy and Doctor of Education degree programs:

1. At least two (2) residence credit points secured in continuous semesters’ residence as a graduate student at the University (see Section 3.15 (p. 662) for scale).

2. Doctoral degrees at North Carolina State University require a minimum of 72 graduate credit hours beyond the bachelor’s degree.

3. Students cannot take 400-level courses or lower as part of the credit-hour requirement.

4. Students cannot use 900-level courses to satisfy the credit-hour requirement.

5. For a student who has a master’s degree from a university other than NC State, a maximum of 18 hours of relevant graduate credit from the master’s degree may be applied toward this minimum, upon the recommendation of the student’s Graduate Advisory Committee. Therefore, the minimum credit-hour requirement in this case is 54 credit hours. Students whose previous master’s was combined with a three-year bachelor’s degree from a non-Bologna institution to meet the minimum requirements for admission will not be entitled to this 18 credit allowance and will not be considered to have a previous master’s.

6. If a student completes a master’s degree at NC State and continues for a doctoral degree without a break in time, up to 36 relevant credit hours taken while in master’s status may be used to meet minimum requirements for the doctoral degree. If there is a break in time between completing the master’s (at NC State) and beginning the doctorate (at NC State), the allowance is limited to 18 hours. Either allowance may include those 400-level courses taken as an approved part of the master’s degree.

7. A graduate course that was completed while the student was enrolled in PBS status at NC State University may be considered for transfer to a doctoral program provided that it is a 500- or 700-level course and that the grade is B or better (see Section 2.3 (p. 644) for information on admission to PBS classification). Courses with grades of B- or lower will not be allowed to transfer. All PBS credits that are used to satisfy requirements of a specific doctoral degree must be earned before the student is admitted to that degree program. These courses must be evaluated and recommended by the student’s advisory committee on the basis of appropriateness and currency of the course material. In such cases, the student’s degree clock starts with the first of these courses approved for inclusion in a plan of work (POW). Final approval is given by the DGP upon submission of the POW to the Graduate School. A maximum of 12 credit hours taken while in PBS status may be transferred into a doctoral degree program.

8. Students who hold a Ph.D. are generally not admissible for a second Ph.D. unless a “special exception” is requested and granted (see Section 2.3 (p. 644) and REG 2.15.01).

9. A successful preliminary comprehensive examination (written and oral components)
10. A dissertation.
11. A successful final comprehensive oral examination (dissertation defense).

Note: Doctoral students must attain candidacy for the degree within six (6) calendar years. The time limit for completing all requirements for the Doctor of Philosophy and Doctor of Education degrees is noted in Section 3.4 (p. 653).

3.2 Advisory Committees

The primary function of the committee is to advise the student in all aspects of the educational program and to monitor and evaluate progress toward and completion of the degree. Thus, the committee must be active throughout students’ programs, beginning with helping students prepare their Plans of Work. The committee should provide an intellectually stimulating foundation for the student’s professional as well as scholarly development and should be sensitive to any difficulties in the student’s progress. The committee certifies whether the student has met NC State’s standards for a graduate degree. Advising and guiding the student on how best to fulfill the degree requirements is a critical element of this responsibility.

It is the students’ responsibility, in consultation with their graduate advisors, to select graduate advisory committees. The graduate advisor(s) serves as chair or co-chair of the committee. The Director of Graduate Programs approves and electronically submits the advisory committee names to the Graduate School for final approval as part of the Plan of Work.

A. Advisory Committee Requirement and Composition

1. Committee administrative structure
   a. Every committee shall have a chair or co-chairs.
   b. The co-chair designation implies equally shared responsibilities in guiding the student through to degree completion.

2. Master’s students
   a. For master’s students in all programs except Option B, the committee consists of a minimum of three graduate faculty members, inclusive of the committee chair. The Graduate School verifies the committee when the DGP submits the Plan of Work that includes the committee information.
   b. If a minor has not been declared, it is up to the individual program whether to require external representation on the committee.
   c. If a minor has been declared, one member of the committee must be from the minor field.
   d. In a master’s program in which the minor is classified as interdisciplinary, the minor must be represented by a committee member.
   e. Option B master’s students do not have a committee. The Graduate School will verify the appropriate major advisor when the DGP submits the students’ Plans of Work.

3. Doctoral students
   a. Doctoral committees require a minimum of four graduate faculty members
   b. If a doctoral graduate committee has no outside representation beyond the student’s graduate program by a member of the graduate faculty, a Graduate School Representative is required. This representative is not a voting committee member.
   c. If the student has declared a minor, one of the committee members must be from the minor field.
   d. The committee membership is submitted for approval as part of the Plan of Work
   e. At the time that the committee is approved, the Graduate School appoints the Graduate School Representative (see Section 1.6 (p. 641)) to serve on the doctoral committee, if required.

B. Functions, Responsibilities and Requirements of the Advisory Committee

The chair/co-chair and the other members of the advisory committee are responsible for the following aspects of the thesis or dissertation and the associated research experience:

1. approval of the subject matter and methodology of the thesis or dissertation research;
2. approval of the organization, content, and format of the thesis or dissertation according to NC State required and optional formatting guidelines as provided in the Thesis and Dissertation Guide;
3. review of and comment on drafts of various sections of the thesis or dissertation, including:
   a. the quality of data and evidence,
   b. logical reasoning, and
   c. the editorial, linguistic and bibliographic quality;
4. evaluation of the thesis or dissertation as a basis for certification that the student has fulfilled that portion of the degree requirements for which he or she is a candidate.

For non-thesis master’s degrees that require a final examination, the advisory committee is responsible for administering that exam.

C. Committee Members from Other Institutions

The selection of outside committee members will generally depend upon the student’s major interest and research. If the program recommends the appointment of a committee member who is not an NC State graduate faculty member, it should be made clear to that person that he or she will be expected to participate as a full committee member.

There are three types of non-NC State faculty who may be appointed to a graduate committee: inter-institutional faculty, external (voting) members, and technical consultants.

1. Interinstitutional Graduate Faculty
   a. Graduate Faculty from UNC-CH and Duke. A member of the graduate faculty from the University of North Carolina at Chapel Hill or Duke University may serve as one of the required committee members when appropriate. These are automatic appointments, although the members are vetted by the DGP of the program, the Associate Dean of the College involved, and the Dean of the Graduate School. Members of professional programs at these institutions, such as faculty at the School of Law or Medical School at UNC or Duke, cannot serve automatically unless their appointment at their respective institution explicitly states that they are on the graduate faculty. A Graduate Advisory Committee Appointment Form for Interinstitutional Member must be completed for faculty from these institutions. Should their appointment be for that professional school only, then they must
follow the guidelines discussed for External Members and/or Technical Consultants (see below).

b. Cooperative Doctoral Program Graduate Faculty from UNC-System Institutions. In addition to the non-degree-specific interinstitutional arrangement of NC State, UNC, UNC-G and Duke, NC State has established cooperative doctoral programs with other UNC-system institutions.

2. External Members. A faculty member from another university (who is not an interinstitutional graduate faculty member) or a professional from industry or government with credentials comparable to those required for membership on the graduate faculty, may serve as an external member, in addition to the number of committee members normally required (four for doctoral degrees and three for master’s degrees).

a. Appointment. To appoint an external member, the DGP must submit a Graduate Advisory Committee Appointment Form for External Member/Technical Consultant along with the proposed external member’s curriculum vitae.

b. Responsibilities. External members will have full voting privileges and are expected to participate in the student’s preliminary and final examinations. They will also be consulted in the development of the student’s Plan of Graduate Work and will approve the thesis or dissertation.

3. Technical Consultants. A person from industry, a governmental agency, or a university may, upon recommendation of the committee and the DGP, serve as a technical consultant along with the required committee members.

a. Appointment. To appoint a technical consultant, a Graduate Advisory Committee Appointment Form for External Member/Technical Consultant must be submitted to the Graduate School, along with a statement describing the Technical Consultant’s potential contribution to the student’s research or project.

b. Responsibilities. Technical consultants serve in an advisory capacity to students in the conduct of research for their dissertation, thesis or master’s project. Technical consultants are expected to participate in the student’s preliminary and final examinations and may sign the thesis. However, they will not vote on the outcome of the examinations.

D. Substitution of Committee Members for Exams

Under extenuating circumstances, it may be necessary for a member of a graduate advisory committee to have a substitute at committee meetings or an exam. The substitution of a committee member on an oral examination must be requested in writing by the DGP and approved by the Graduate School in advance of the examination. It is extremely important to have clear communication between committee members and substitutes so that new expectations or concerns do not arise at the time of the final oral examination.

E. Permanent Changes in Committee Members

1. Changes before Final Examinations for Master’s Students and before the Preliminary Examination of PhD Students. Should students, in consultation with their advisors, wish to change any of the committee members, they must submit a revised Plan of Graduate Work with the new members, indicating that this change has been approved by the advisor and by the DGP. Approvals of the students, the committee members, and the DGP must be included. The DGP must submit the revised Plan of Work to the Graduate School. Disagreements within committees or between students and committee members over the quality of students’ performance are not grounds for reconstituting the committee. If students believe that they have been unjustly or unfairly treated in efforts to resolve committee conflicts, they have the right to grieve this issue, according to the current University Grievance Procedures for Graduate Students.

2. Changes after the Preliminary Examination. Changes in doctoral committee membership after preliminary exams requires signatures of both outgoing and incoming committee members and the student, as well as justification for the committee change. Approval by the Graduate School is required before holding any examinations.

3.3 Graduate Plan of Work

A. Description

The Graduate Plan of Work is a document that serves both as a guide to successful degree completion and a contract between students and their programs. In this way, it serves to reduce the potential for misunderstandings about degree requirements and outlines the expected academic progress students should make. It is especially helpful when it is evaluated on at least an annual basis by students with their advisor(s), and, where applicable, their advisory committees, with any needed modifications recorded at that time. It should be viewed as a “living document” that reflects changes that may occur as students continue to develop and refine their academic programs.

B. Contents of a Graduate Plan of Work

At the time of final submission Graduate Plan of Work must include:

1. a list of the coursework to be undertaken
2. accurate information about any transfer credits to be used for the degree. Any request to include transfer credit should be submitted to the Graduate School prior to the start of the student’s graduate program or no later than before the end of the first semester
3. the thesis or dissertation topic (except in non-thesis master’s programs)
4. the name of the student’s major professor
5. the members of the student’s advisory committee

C. Formulation and Submission Process

The Graduate Plan of Work must be:

1. developed by the student in collaboration with his/her major professor and, where applicable, advisory committee
2. approved by the committee and the Director of the Graduate Program (DGP) or department head prior to submission to the Graduate School for approval
3. submitted online through MyPack Portal
4. evaluated by the Graduate School, which will inform the program as to whether or not the Graduate Plan of Work meets the Graduate School requirements. The Graduate School will deny approval of any student’s Graduate Plan of Work until all documents necessary to complete that student’s permanent file are received (e.g., signed Patent Agreement, Transfer of Credit form, if applicable). If any materials are missing, the Graduate Plan of Work will be denied with the reason for the denial communicated to the DGP and the student.
D. Timing of Submission

As the Graduate Plan of Work serves as a guide to promote successful progression through a given graduate program, it is important that various components of it be completed in a timely manner. Failure to complete the various components of the Graduate Plan of Work may result in a registration hold being placed on a student’s record.

1. All Graduate Students: Course Component of the Graduate Plan of Work
   • By the end of their first term, and preferably earlier than that, students in all graduate programs must submit at least a preliminary course schedule using “place holders” where necessary, defining the specific courses or, at a minimum, courses in a curricular area, including electives, required to fulfill the degree requirements for their respective degree programs.

2. Thesis Master’s/Doctoral Students: Committee and Other Milestone Components of the Graduate Plan of Work
   • By the completion of 18 hours, but no later than the third term of enrollment, those graduate students enrolled in master’s programs that require a thesis or in doctoral programs must submit additional elements of the Graduate Plan of Work that include the topic of their thesis/dissertation research, their committee chair(s), committee members, and estimated completion times for important milestones, such as the preliminary and final oral examinations. Students in Option B master’s programs requiring projects should also submit their topic and the name of their project advisor.

3. Submission of Final Graduate Plan of Work
   • The final version of the Graduate Plan of Work must be submitted before a master’s student’s final examination and before a doctoral student’s preliminary oral examination. For Option B students, this should be submitted prior to the completion of their Application to Graduate in their final semester.

E. Revising a Graduate Plan of Work

The expectation is that the Graduate Plan of Work will be reviewed and revised annually to reflect students’ academic trajectories as they become better defined during their academic careers. Given that an annual progress report is required (Section 3.4 (p. 653)) as part of this process, the student’s major professor and, where appropriate, advisory committee should review the Graduate Plan of Work to evaluate progress, suggest potential revisions, and provide guidance as necessary.

F. Annual Progress Evaluation

The Graduate School requires all graduate programs to complete an annual evaluation of progress toward degree for each graduate student. This evaluation process should involve the student, at least one academic advisor/committee chair, and the DGP. As part of each annual evaluation, the student’s major advisor should review the POW to evaluate progress, suggest potential revisions, and provide guidance as appropriate. Each evaluation must include the following items:

1. the student’s report of activities and achievements for the preceding year (e.g., courses, honors, milestones achieved, and professional development);
2. the student’s own evaluation of his or her progress;
3. an evaluative response to the student’s progress report by at least one faculty advisor/committee chair; and
4. a completed POW (see POW requirements).

3.4 Time Limits

A. Master’s Degrees

Students must complete all requirements for the master’s degree within six calendar years. The student’s degree clock for time to completion starts with the first course approved for inclusion in the plan of work or the date of admission to the program, whichever comes first. The time limit remains at six years even if a student was on approved leave of absence during the six-year period.

B. Doctoral Degrees

All doctoral students must complete all degree requirements within ten calendar years; for information about the time limits for completing the preliminary oral examination, see Section 3.5 (p. 653). The time limit remains at ten years even if a student was on approved leave of absence during the ten-year period. The student’s degree clock for time-to-completion starts with the first course approved for inclusion in the Plan of Work or the date of admission to the program, whichever occurred earlier. Academic colleges/schools or programs may have more restrictive requirements than the above stated University policy.

C. Time-Limit Extensions

The Graduate School may grant exception to the above time limits for a period of up to two years, which can include, but is not limited to: military obligations, family and medical circumstances, and life events. The Dean, or designee, will consider and evaluate the specific nature of the circumstances, the reasons that prompted the advisor and DGP to make the request, the impact the proposed extension would have on the validity of coursework and research, as well as a detailed timeline outlining how and when various degree requirements completed (see Time Limit Extension form (https://grad.ncsu.edu/faculty-and-staff/forms/graduate-school-forms/)).

For requests beyond two years, the Graduate School will undertake an initial review to determine if they should go forward. If a positive decision is reached, such appeals must be presented to the Administrative Board of the Graduate School by the advisor or their designee. That body will render decision as to whether or not the request should be granted.

3.5 Comprehensive Examinations

Comprehensive examinations are a critical step in degree completion in evaluating the relevant breadth of knowledge in master’s and doctoral students. Throughout the process, the chair of the candidate’s advisory committee has the obligation to maintain a scholarly atmosphere and to keep academic integrity and the student’s best interest foremost.

A. Doctoral Students

• Doctoral students schedule their oral preliminary and final examinations in consultation with their advisory committees. It is the responsibility of doctoral students to contact committee members and, where appropriate, the appointed Graduate School Representative to establish a date and time convenient to all members before officially requesting that the examination be scheduled. The Graduate School, upon approval, will send
B. Master’s Degree

1. Written examinations (Optional)
   • A degree program may require written examinations covering the subject matter of the major and minor in which the student is enrolled. When required, such examinations must be successfully completed prior to the submission of a Request for a Permit to Schedule the Master’s Oral Examination. Information concerning written examination schedules should be obtained from the student’s program.

2. Oral examinations
   • Candidates for master’s degrees (except those in Option B programs) must pass a comprehensive oral examination to demonstrate to the advisory committee that they possess a reasonable mastery of the subject matter of the major and minor fields and that this knowledge can be used with promptness and accuracy.

a. Scheduling an exam – Master’s students schedule their oral examinations in consultation with their advisory committees. To do this, students must submit a Request for a Permit to Schedule the Master’s Oral Examination to their DGP’s who approve and submit it to the Graduate School two weeks prior to the date of the examination. The two-week window does not commence until all other requirements are completed, including a final, approved Plan of Work and a Patent Agreement.

b. Format of the exam – This exam takes the form of a traditional thesis defense in those programs requiring theses. This examination may not be held until all other requirements, except completion of the coursework taken during the final semester, are satisfied. After obtaining DGP approval, a student must file a Request to Schedule Master’s Oral Examination with the Dean of the Graduate School only after the above conditions are met. For students in non-thesis, non-Option B master’s, the program determines the format of the oral exam.

c. Passing the oral examination – Within a week of completing the exam, the student’s DGP must forward a permit form (Admission to the Final Master’s Oral Examination) that displays the date that the exam was conducted, the result of the examination, and the signatures of all advisory committee members to the Graduate School. A unanimous vote of approval of the advisory committee is required for passing the oral examination.

d. Conditional pass – Students may get a conditional pass contingent upon completion of additional work to the satisfaction of the advisory committee. A formal re-examination may not be required in this case. The DGP must notify the Graduate School within a week after the exam of the conditional pass, the reasons for the conditional pass, and also when the conditions have been removed. The date upon which the Graduate School is notified of the pass establishes the student’s graduation date.

e. Failure to pass the oral examination – A student who fails the oral examination is terminated from graduate work at NC State unless the graduate advisory committee unanimously requests a re-examination. Only a single re-examination will be allowed. If the DGP or the Graduate School denies the request, the student’s program is terminated.

C. Doctoral Degree

1. Preliminary written examinations
   • Each doctoral student is required to take a preliminary examination, consisting of written and oral components, after they have completed their coursework. As indicated in Section 3.4, all doctoral students must attain candidacy for the degree within four years of starting their program or after they have completed 48 hours of coursework, whichever is later.

   a. Format of the exam. The written portion of the examination may be conducted in one of two ways.
      • If applicable, the written portion of the examination may be conducted in one of two ways.
      • The committee decides on the specific format of this exam, and each member of the advisory committee prepares a set of questions for the student’s response, and the answers to each set are returned to the appropriate faculty member for evaluation.
      • Standardized departmental examinations may be used for all students in a program. These examinations are given at specified times during the year, and scheduled dates must be announced at least a semester in advance. Where written departmental examinations of this kind are used, the student will be expected to notify the department of their intent to sit for this examination. Regardless of which method is employed, the questions involved may cover any phase of the coursework taken by the student during graduate study or any subject logically related to an understanding of the subject matter in the major and minor areas of study. The questions are designed to measure the student’s mastery of his/her field and the adequacy of preparation for research.

   b. Notification of completion. Committee chair(s) must notify the DGP when a student has completed the written examination.

2. Preliminary oral examinations
   • The oral examination is designed to test the student’s ability to relate factual knowledge to specific circumstances, to use this knowledge with accuracy and promptness and to demonstrate a comprehensive understanding of the field of specialization and related areas.

   a. Format of the exam. Though the format of the oral preliminary examination may vary according to the culture of
individual graduate programs, as a general guideline such examinations generally include the following three elements.

• Presentation by the candidate. The candidate makes a presentation of a research proposal. This presentation may be open if the program wishes it to be, but NC State graduate faculty may not be excluded, and the committee chair or Graduate School Representative can restrict the session to all but graduate faculty as deemed necessary.

• Questioning of the candidate. Anyone attending the presentation will be allowed to ask questions of the candidate at the conclusion of the presentation.

• Deliberation and decision. Only the advisory committee and the Graduate School Representative, if one has been appointed, will be allowed to participate in the deliberation and decision."

b. Outcomes

• Passing the preliminary examination. A unanimous vote of approval of the advisory committee is required for passing the preliminary examination. Approval may be conditional, however, and require students to meet specific requirements prescribed by their advisory committee. These conditions must be written in a clear and distinct way and communicated in such a manner that the student clearly understands what is expected; they must also be submitted to the DGP and the Graduate School.

• Failure to pass the preliminary examination. A student who fails the preliminary examination is terminated from graduate work at NC State unless the graduate advisory committee unanimously requests a re-examination. Only a single re-examination will be allowed; it can encompass written, oral, or both components as determined by the advisory committee. If the DGP or the Graduate School denies the request, the student’s program is terminated.

3. Candidacy

• A doctoral student is admitted to candidacy by the Graduate School upon successfully passing the preliminary examinations. This does not include students receiving a conditional pass.

4. Final Oral Examination

• As with the preliminary oral examination, the chair of the student’s advisory committee oversees the final oral examination. Students in consultation with their advisors submit a Request to Schedule the Doctoral Oral Examination to their DGP, indicating that they wish to schedule the final oral examination.

• The final oral examination is scheduled after the dissertation is complete except for such revisions as may be necessary as a result of the examination, but not before all required coursework has been completed.

• After the Graduate School has approved the scheduling of the final oral examination, the signed and dated request form is emailed to the committee chair, committee members, Graduate School Representative, and graduate student listed on the form. A file copy of the approved request form will be sent to the DGP.

• The student should be sure to include the most current title of the dissertation, as the Graduate School mails information about the scheduled examination to the NC State Official Bulletin for publication.

a. Format of final examination. Though the format of the doctoral examination may vary according to the culture of individual graduate programs, all examinations include three elements:

• Presentation by the candidate. The candidate typically presents the methodology used, the data collected, and the conclusions reached as reported in the dissertation. For the purpose of dissemination of research, it is required that the presentation of the dissertation be open to the university community.

• Questioning of the candidate. Any member of the university community is allowed to ask questions of the candidate. The questioning phase may continue with a closed session in which the advisory committee questions the candidate.

• Deliberation and decision. Only the advisory committee and the Graduate School Representative are present. Throughout the process, the chair of the candidate’s advisory committee has the obligation to maintain a scholarly atmosphere and to keep academic integrity and the student’s best interest foremost.

b. Outcome of final examination

• Passing the final oral examination. A unanimous vote of approval of the advisory committee is required to pass the final oral examination. In the case of a conditional pass, the specific requirements must be submitted to the student as well as the Graduate School attached to the Exam Results form. Final approval by the advisory committee is dependent upon a student’s successful completion of those conditions.

• Failure to pass the final oral examination. Should a student fail the final examination, this terminates a student’s academic program unless the advisory committee recommends a re-examination.

D. Format for Remote Oral Exams

It is expected that oral examinations be conducted with all parties in the same room; however, it is recognized that circumstances may prevent this from happening. While technology can provide solutions for such situations, it should never be the case that remote exams are held simply as a matter of convenience. The student and major professor or at least a co-chair must be present in person.

When members attend examinations remotely, it is the responsibility of the chair of the committee to maintain the academic integrity of the exam and to ensure that the spirit of the requirements outlined in 3.6.B or 3.6.C above are followed. The technology used must allow all parties to interact visually and aurally to accomplish this. Failure of the technology during the exam will require that the exam be suspended until it is in functioning order or rescheduled for a later time.

It is the DGP’s responsibility to ensure that the reasons for a remote exam are valid and to submit a request to conduct the exam to the Graduate School in conjunction with the Request for a Permit to Schedule the Master’s or Doctoral Oral Examination.

3.6 Theses and Dissertations

A. Theses

In degree programs requiring preparation of a thesis, master’s students must undertake an original investigation into a subject that has been approved by the student’s advisory committee. All theses must be submitted in accordance with the Electronic Thesis and Dissertation (ETD) Guide (https://grad.ncsu.edu/students/etd/). Theses should be
submitted to the advisory committees at least two weeks prior to the final defense.

B. Dissertations

The doctoral dissertation must present the results of the student’s original investigation in the field of primary interest. It must represent a contribution to knowledge, adequately supported by data, and be written in a manner consistent with the highest standards of scholarship. All dissertations must be submitted in accordance with the ETD Guide. Publication is expected and encouraged. Dissertations should be submitted to the advisory committees at least two weeks prior to the final defense.

C. Company-Funded Research

For thesis or dissertation research that is funded by a company, students and their advisors must ensure that there is a clear agreement as to the ability to place the results in an ETD and, should there be proprietary information, that a mechanism be in place to ensure that the ETD remains viable. Furthermore, if a company’s requires approval of the document prior to a defense, this will require additional lead time to insure that only the appropriate information is included.

D. Submission Procedures for Theses and Dissertations

1. All advisory committee members must approve the thesis/dissertation prior to submission to the library for publication.
2. After receiving an unconditional pass on the final oral exam, the student must submit the thesis/dissertation electronically to the ETD system.
3. A thesis/dissertation must be submitted by the ETD deadlines as published in the Graduate School Calendar.
4. At the time of dissertation submission, students are also required to submit the required forms and fee as outlined on the ETD website. The Graduate School will not award the degree until these forms and fees have been submitted.

E. Publication in Compliance with Nondisclosure Provisions

Theses and dissertations containing disclosures of patentable discoveries may be embargoed by submitting a request through the ETD system. They may be granted for up to one year. Placing an embargo on a thesis or dissertation until a patent application is filed will not prevent a student from graduating on time.

3.7 Master’s Degree: Summary of Procedures

A. Requirements for All Master’s Degree Students

1. Application materials and required fees received.
2. Application materials reviewed by graduate program.
3. Graduate program forwards recommendation regarding applicant’s admisibility to the Dean of the Graduate School.
4. The Dean of the Graduate School reviews the recommendation and the student is notified of the action taken on the request for admission.

B. Option B Programs

The student must Apply to Graduate via MyPack Portal and the DGP set the Graduation Approval page to “Departmental Review Complete” no later than the “apply to graduate deadline” in the term in which they plan to graduate.

C. Master’s of Discipline or Non-thesis Programs (excluding Option B)

1. Graduate advisory committee of three or more Graduate Faculty members is appointed by the DGP.
2. When all requirements except completion of the course work in the final semester are satisfied, DGP submits to the Graduate School the Request for a Permit to Schedule the Master’s Oral Examination.
3. If Graduate School requirements are met, a Request for a Permit to Schedule the Master’s Oral Examination is approved by the Graduate School within 10 working days of receipt of the request and the permit, Admission to the Final Master’s Oral Examination, is issued.
4. Final examination is scheduled and conducted.
5. Final examination report, including date and result of the examination, submitted to the Graduate School by the DGP. The Graduate School should receive the report within five working days of the examination.
6. The deadline date for unconditionally passing the final examination in order for the student to graduate in a given semester or summer session appears in the Graduate School Calendar.
D. Thesis Programs

1. Graduate advisory committee of three or more Graduate Faculty members is appointed by the DGP.
2. A preliminary copy of the thesis is submitted to the chair of the student’s advisory committee.
3. When all requirements except completion of the course work in the final semester are satisfied and after the thesis is complete except for such revisions as may be necessary as a result of the exam, the DGP submits to the Graduate School the Request for a Permit to Schedule the Master’s Oral Examination.
4. If Graduate School requirements are met, the Request for a Permit to Schedule the Master’s Oral Examination is approved by the Graduate School within 10 working days of receipt of the request, and the permit, Admission to the Final Master’s Oral Examination, is issued.
5. At least two weeks prior to the final oral examination, the chair of the student’s advisory committee submits the thesis, if required, to the other members of the advisory committee for review.
6. Final examination is scheduled and conducted.
7. The Admission to the Final Master’s Oral Examination form is completed by the committee members, including date and result, and submitted to the Graduate School by the DGP. The Graduate School should receive the report within five working days of the examination.
8. Student submits the required PDF file into the Electronic Thesis and Dissertation (https://grad.ncsu.edu/students/etd/) (ETD) Submission System for the thesis review within 24 hours of passing the defense. The date the student properly submits the required PDF file into the ETD Submission System is the date of the thesis review.
9. The deadline for submitting the thesis to the Graduate School in order for the student to graduate in a given semester or summer session appears in the Graduate School Calendar.
10. The thesis is reviewed by the Graduate School to ensure that the format conforms to the specifications prescribed in the Thesis and Dissertation Guide.
11. The thesis must then be approved by the advisory committee members prior to publication by the library.

3.8 Doctoral Degree: Summary of Requirements

1. Application materials and required fees received.
2. Application materials reviewed by graduate program.
3. Graduate program forwards recommendation regarding applicant’s admissibility to the Graduate School.
4. The Graduate School reviews the recommendation and the student is notified of the action taken on the request for admission.
5. Outstanding official transcripts, if any, showing any or all post-secondary degrees conferred since application should be submitted by student to the Graduate School prior to matriculation.
6. Student matriculates, is assigned a graduate advisor, and develops a Plan of Work with the advisor/DGP.
8. Student formulates an advisory committees of at least four members of the Graduate Faculty. The Graduate School also selects a Graduate School Representative, if required.
9. Plan of Work is prepared by the student in consultation with the advisory committee.
10. Preliminary oral examinations in the major and, where required, minor fields are scheduled. The results are sent to the Graduate School.
11. At least two weeks prior to the final oral examination, the chair of the student’s advisory committee submits the dissertation to advisory committee members for review.
12. The chair submits, through the DGP, the request to Schedule the Doctoral Oral Examination (https://grad.ncsu.edu/faculty-and-staff/forms/graduate-school-forms/) at least two weeks prior to the examination. Upon approval of the request, the student and the examining committee, including the Graduate School Representative are notified of the time and place of the examination.
13. Students must submit their dissertation to the ETD System. Deadlines appear in the Graduate School Calendar. In addition, they must submit all required forms and fees prior to final approval.
14. Student must apply to graduate in MyPack Portal by the deadline in the term in which they plan to graduate to be placed on the graduation list, have their name printed in the graduation program, have the diploma ordered, and the transcript posted.
15. All coursework scheduled in a graduate degree classification must be completed prior to graduation.
16. The cumulative and program GPA must be at least 3.000 to graduate.
17. All degree requirements must be completed within ten calendar years of the admission term or the date of the first course used in the Plan of Work, whichever is earlier, unless a program has a more restrictive time limit.

3.9 Change in Degree Level or Program

Graduate students in good academic standing may change their degree level or degree program after the completion of one semester.

A. Requirements for Changing Degree Level/Program

1. Graduate students are not required to re-apply to change their degree level or program.
2. Students must consult with their advisors and current Director of Graduate Programs (DGP).
3. The student must sign a Request for Change of Degree Status or Curriculum form and submit it to the DGP of the program in which the student is currently enrolled.
4. No change in level/program will be effective without the approval of:
   a. the DGP of the program in which the student is currently enrolled;
   b. the DGP of the new program into which the student is requesting transfer; and
   c. the Graduate School. Upon approval of the request, the Graduate School will notify both departments, where applicable, and transfer the student’s records to the appropriate department.

B. Final Semester Transfers

If students request a change in degree level/program in their final semester, the deadline for submission is six weeks after the first day of classes in that semester.
C. Process for International Students

International students who have had a degree level/program approved must obtain a new I-20 from the Office of International Services (https://internationalservices.ncsu.edu/). The U.S. Citizenship and Immigration Services (https://www.uscis.gov/) requires a new visa when an academic program changes.

3.10 Dual Master’s Degrees

Students enrolled in a master’s degree program at NC State University may pursue additional master’s degrees simultaneously provided that:

1. the Director of Graduate Programs (DGP) of each program approves the pursuit of multiple degrees;
2. an approved Plan of Work for each master’s degree is submitted;
3. 18 hours are unique to each degree program; and
4. all other requirements and Graduate School rules are met for each degree;
5. the time limits in place for the initial degree apply to all others.

3.11 Master’s Degrees while in Doctoral Status

A. Master’s Degrees in the Same Field as the Doctoral Degree

Students admitted to doctoral programs at NC State may be awarded a master’s degree in the same field as the doctoral program provided that all of the following conditions are satisfied:

1. The student does not already have a master’s degree in the same field.
2. All Graduate School, College, and Department/Program requirements for the master’s degree are satisfied.
3. The graduate program may require students to transfer into the master’s program from the doctoral program (or other master’s). Once a doctoral student is transferred into a master’s program, the student must complete the requirements for the master’s degree before returning to the doctoral program.
4. All requirements must be completed before the six-year time limit for master’s degrees.
5. The minimum of 72 credit hours required for the doctoral degree is met, including the credits used for the master’s degree.
6. International doctoral students who wish to obtain a master’s degree in a different program from their doctoral program with the intention of applying for Optional Practical Training in the field of the master’s degree must be satisfied.
7. In rare instances where a student wishes to enroll in more than one master’s degree, the requirements for the master’s degree by submitting:
   • an approved patent agreement (via Student Self-Service in MyPack Portal) that includes the names of the members of the
master's advisory committee (or advisor for Option B programs), and
* a Plan of Work or a list of courses that are to be used to satisfy the master's requirements.

2. It is the responsibility of the student to meet all deadlines for graduation with a master's degree. The master's degree should be awarded when the degree requirements are fulfilled.

E. Eligibility for Graduate Student Support Plan Tuition Support

The number of semesters of eligibility for tuition support under the Graduate Student Support Plan does not change as a result of the student's electing to pursue a master's degree in another program along the way to the Ph.D. The Graduate School maintains current online information and requirements for the Graduate Student Support Plan (https://grad.ncsu.edu/students/gssp/).

3.11a Co-Majors and Minors

Co-Majors

Graduate students wishing to co-major must obtain approval from both programs. Co-majors must meet all requirements for majors in both programs. A representative from each program must also be included on the student's advisory committee. A student may not co-major in two different degree levels, i.e. a master's in one discipline and a doctoral in another.

One degree is awarded and the co-major is noted on the transcript. Enrolled co-majors will be classified in only one program for record purposes. [Recommended by the Administrative Board of the Graduate School and approved by the Dean of the Graduate School on 9/23/93.]

1. Master's Students: Students may co-major at the master's level in programs with identical degrees, although the degrees do not necessarily have to have identical requirements (e.g., two Master of Science programs, one with a thesis requirement and one without). No student is required to declare a minor.

2. Doctoral Students: Students may co-major at the doctoral level with the approval of both programs and with the appointment of a co-chair from each program on the advisory committee. The co-chairs will have equal responsibilities for directing and mentoring the student (see Section 3.2 Advisory Committees, A.1.c). Co-majors are not permitted between Doctor of Philosophy and Doctor of Education degree programs.

Minors

The Graduate School does not require a minor, although individual programs may require one. If a program does not require a minor, the graduate student has the option of choosing one, except in an Option B master's program in which a minor is not allowed. The minor work will usually be from a single discipline or field that in the judgment of the advisory committee provides relevant support to the major field. However, the committee has the alternative of developing an interdisciplinary minor if it best serves the needs of the student. [Recommended by the Administrative Board of the Graduate School and approved by the Dean of the Graduate School on 12/12/91.]

When a student selects a minor, the advisory committee must include a representative from the minor field. The minor credits on the Plan of Graduate Work must be approved by the graduate advisory committee member representing the minor, and, in some cases, the Director of Graduate Programs (DGP) from the minor program.

Minors That Require Approval of DGP of Minor Program

Students wishing to minor in Biotechnology, Plant Physiology, Statistics, and Water Resources, must obtain the approval from the respective DGP.

1. Doctoral Students: For doctoral students, this approval must be obtained from the minor field's DGP and then indicated on the Plan of Graduate Work submitted after the completion of 12 graduate hours at NC State.

2. Master's Students: For master's students, this approval must be obtained from the minor field's DGP at the onset of course work in the minor field so that they are able to meet any specific requirements in that minor well before the time they wish to schedule their final oral examination.

3.12 Accelerated Bachelor's/Master's Program

The Accelerated Bachelors/Master's (ABM) degree program allows exceptional undergraduate students at NC State an opportunity to complete the requirements for both the bachelor's and master's degrees at an accelerated pace. These undergraduate students may double count up to 12 graduate-level credits (500 or 700 level) and obtain a master's degree within 12 months of completing the bachelor's degree.

ABMs provides an opportunity for the Directors of Graduate Programs (DGPs) to recruit rising juniors to their graduate programs. However, approval to pursue an ABM degree program does not guarantee an admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

A. Creating an Accelerated Bachelor's/Master's Program

There are two options for creating ABM programs. The first option is a disciplinary model in which a bachelor's program and a master's program in the same department or in departments of closely related disciplines establish an ABM degree. Prior to admission of any student into such a degree program, the program must be developed by the undergraduate and graduate units and approved by the associated college(s) Deans, the Administrative Board of the Graduate School, and the Dean of the Graduate School.

The other option is an individualized model in which a student is in a department that has not established a formal ABM program or is in a department in one discipline and wants to pursue a master's degree in a different discipline. For this option, an ABM arrangement must be made between the student and the Director of Graduate Programs the graduate degree program and must be approved by the coordinator of the undergraduate program in which students are obtaining their bachelor’s. The Director of Graduate Program must recommend admission to the Graduate School and this must be approved by the Dean of the Graduate School.
B. Student Eligibility Requirements

1. Students may apply once they have completed a minimum of seventy-five credit hours in their undergraduate programs, including credits earned from advanced placement, but prior to the completion of their bachelor’s.
2. Transfer students must have completed a minimum of 24 hours as a full-time student at NC State.
3. Students must have a minimum overall undergraduate grade point average (GPA) of 3.500 at NC State at the time of admission into the ABM program. This GPA must be maintained throughout their undergraduate program to remain in an ABM program.
4. Students must receive a grade of B or better in the double counted graduate-level courses (500 or 700 level) while maintaining a 3.500 GPA. Courses with a grade of B- or below cannot be double counted between the two degrees.
5. If students’ undergraduate GPAs drop below 3.500, the DGP must inform the directors of their undergraduate programs and the students in writing of their ineligibility. A copy of this letter must also be sent to the Graduate School.
6. A student who is ineligible to participate in or withdraws from the ABM program, cannot double count any courses for both bachelor's and master's degrees.
7. Students in the ABM must receive the bachelor’s degree prior to entering graduate status.

C. Application to the Accelerated Bachelor’s/Master’s Program

1. Interested students that meet the GPA requirement should schedule a meeting with their Directors of Undergraduate and Graduate Programs to develop tentative academic plans for the bachelor’s and master’s degree programs. The Graduate School requires an approved ABM Plan of Work form to admit a student into an ABM program. The ABM Plan of Graduate Work should clearly indicate:
   • the courses (a maximum of 12 graduate credit hours, 500 or 700 level) that will be double counted for both bachelor’s and master’s degrees,
   • the courses that will be taken after matriculating into the graduate program,
   • the graduation date for the master’s degree that meets the time limit for the ABM program.
2. While still an undergraduate, students must submit the standard application for admission to the Graduate School including an application fee and other documents/standardized test scores required by individual programs.
3. Any deviations from the approved ABM Plan of Work form, require that the updates be approved by the Directors of Undergraduate and Graduate Programs as well as the Graduate School.

D. Withdrawal

Student may withdraw at any time from an ABM program by informing the Directors of Undergraduate and Graduate programs in writing. A copy of this request must also be sent to the Graduate School.

3.13 Graduate Certificate Programs

A. Definition

A Graduate Certificate Program (GCP) is a prescribed set of related graduate-level academic courses, designed by an academic department or program. To receive a certificate, non-degree-seeking students must submit an application and fee through the Graduate School and obtain admission, whereas enrolled graduate students are required to submit the Graduate Certificate Plan Entry form. Certificates cannot be conferred retroactively for students not continuously enrolled in a graduate degree program when the required coursework was completed. Upon completion, the GCP will be designated on the student’s transcript and the student shall receive a certificate from Registration and Records entitled “Graduate Certificate in….” In most cases, certificate students are not eligible for federal financial aid, although some students in teaching certificate programs may be eligible (contact the Financial Aid Office for specific eligibility requirements).

B. Minimum Requirements for Graduate Certificate Programs

1. All students enrolled in a GCP must have a bachelor’s degree from a regionally accredited institution of higher education; the transcript of this degree indicating conferral date must be submitted to the Graduate School.
2. All GCP coursework must be taken at NC State. Transfer credit from other institutions is not allowed.
3. The minimum number of credits required for a GCP is 12.
4. For most GCP, required courses must be regular graduate-level academic courses; 400-level courses may only be used for those certificates where a course at that level has been approved by the Administrative Board as part of the GCP’s approval process.
5. All courses should be letter graded, although three credits of S/U-graded coursework can be used where the courses are relevant to the certificate and S/U is the only grading option.
6. GCP students do not have the option of taking the courses for “credit only” if they intend for the course to be part of their GCP.
7. To receive a Graduate Certificate, a student must have a minimum 3.000 grade point average (GPA) on all course work. All grades on courses taken towards the certificate program in courses numbered 400 and above are included in the GPA.
8. A minimum grade of a C- is required to receive certificate credit for a course, although departments/programs may require a higher minimum and the overall GPA requirement must still be maintained.
9. GCPs must be completed within four years, beginning with the date the student commences courses applicable to the GCP, unless a more restrictive time limit has been established by the program or academic college/school.
10. Students can obtain multiple certificates from NC State. Each certificate must have at least nine credit hours that are unique to it; see Section C for certificates taken by students in a degree program.
C. Graduate Certificates and Graduate Degree Program

1. Internal and Shared Credit
   a. Graduate certificate courses taken while enrolled in a degree program may be double-counted with the degree courses to the extent that the courses unique to the degree remains eighteen hours for a master’s or thirty-six hours for a doctorate.
   b. Interinstitutional courses count as NC State courses.
   c. Certificate and graduate minor coursework shall not be shared, i.e., a student getting a minor using a set of coursework may not also get a certificate using that same coursework.

2. Transferring Certificate Coursework into a Degree Program
   a. Up to 12 hours of certificate credit taken prior to enrollment in an NC State master’s or doctoral degree program may be transferred into that degree program so long as eighteen hours remain unique to the master’s and thirty-six hours to the doctorate.

3.14 Minimum Enrollment Requirements

A. Requirements of Continuous Enrollment

After students are admitted to the Graduate School and enroll for the first time, they are required to maintain continuous enrollment. This mandates that students enroll each Fall and Spring semester, excluding Summer terms, until they graduate. Failure to maintain continuous enrollment results in termination of academic program. To re-enroll following termination, students must reapply for admission, pay the admission fee, and be granted admission by the program and the Graduate School (see Readmission, Section 2.3 (p. 644))

Exceptions

1. Leave of Absence
   Students in good academic standing who must interrupt their enrollment may, with a strong justification, request a leave of absence from graduate study for up to two semesters within a given graduate degree program. Students should initiate the request with their advisor and have it approved by their DGP before its submission to the Graduate School. The time spent on an approved leave of absence will be included in a degree’s time limit; i.e., the degree “clock” does not stop, nor is it reset.

2. Withdrawal
   • Withdrawal prior to Census. An approved Leave of Absence is required of any graduate student who withdraws prior to Census.
   • Withdrawing after Census. Withdrawal following Census constitutes continuous enrollment; therefore, a Leave of Absence is not required.

Required Summer Enrollment

All students who take their final oral examination or submit their thesis/dissertation to the Graduate School during the Summer must be registered for at least one of the two summer sessions.

No Registration Requirement related to ETD Submission

To be eligible for no registration, students must have been registered in the preceding semester or Summer term. Furthermore, they must have unconditionally passed their final oral exam and submitted their ETD for review prior to the first day of a subsequent term (inclusive of Summer) are not required to register for that semester/term (see the Table below for more details).

<table>
<thead>
<tr>
<th>Term Enrolled</th>
<th>Last Date for ETD Submission</th>
<th>No-Registration Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>The last business day prior to the start of Spring semester</td>
<td>Spring</td>
</tr>
<tr>
<td>Spring</td>
<td>The last business day prior to the start of the first Summer term</td>
<td>Summer (either I or II)</td>
</tr>
<tr>
<td>Summer I or II</td>
<td>The last business day prior to the start of the Fall term</td>
<td>Fall</td>
</tr>
</tbody>
</table>

*If students do not complete the ETD process by the term denoted here, they will be required to register for additional coursework to graduate.

Graduation without Registration

Students who complete all degree requirements prior to the first day of the Fall or Spring semester or the first Summer term may graduate during the next semester or Summer term without being registered provided:

1. they were registered in the immediately preceding semester or summer session; and
2. they apply to graduate during that subsequent term.

Students whose only remaining requirement for graduation is removal of an “IN” (Incomplete) grade are not required to be registered in the following semester or term to complete the work and graduate; however, only one registration-free semester or term is allowed. See Section 3.18 for more details.

B. Requirements for Full-/Half-Time Registration

Fall and Spring Semesters

Thesis master’s or doctoral students

• Full-Time: To be full-time, students must be enrolled in at least 9 hours per semester. If they have accumulated or will accumulate sufficient hours to meet the degree requirements (a minimum of 30 and 72 for master’s and doctoral degrees, respectively), they will be considered full-time until they complete their thesis or dissertation provided they enroll for at least 3 credit hours.

• Half-Time: To be half-time, students must enroll in a minimum of 4.5 but not more than 8.5 hours a semester unless they have fulfilled the hours required for program (see details above).

Master’s students enrolled in a program not requiring a thesis

Master’s students enrolled in plans allowing both a thesis and a non-thesis option will be classified as “non-thesis” students and subject to
these rules until such time as a graduate Plan of Work designating the
thesis-option is approved by the Graduate School.

- Full Time: To be full-time, students must be enrolled in at least 9
  hours per semester.
- Half Time: To be half-time, students must enroll in a minimum of 4.5
  but not more than 8.5 hours a semester.

International Students

The U.S. Citizenship and Immigration Services (USCIS) (https://
www.uscis.gov/) requires international students on F-1 or J-1 visas to
carry a full-time course of study to remain in status. Students in their final
semester who have completed the minimum hours required for a degree
can use the Reduced Course Load form to enroll in fewer hours.

Co-op Students

Co-op students registered for COP 500 will be considered full-time.
Students registered for only COP 501 will be considered half-time.

Waiver of Hours

Graduate students who meet certain prescribed special conditions,
may be certified as either a full-time or half-time in cases where they do
not meet the requirements for such as outlined above. A waiver of the
uniform academic load rules requires attestation on behalf of the student
by their committee chair, academic advisor, or their Director of Graduate
Program and approval by the University.

Summer Terms

- Graduate students are not required to register during the summer.
- Students not enrolled in the Summer maintain their access to the
  library, but other facilities that are funded by students fees, such as
  the gym and Student Health Services, cannot be accessed without
  paying for a summer membership.
- Students who are employed as Graduate Research Assistants, but
  who are not enrolled in the University during a period of at least five
  weeks, are subject to Social Security tax withholding. Specifically,
given Federal tax law as it relates to employment outside of student
status, Social Security taxes will be withheld in June for RAs who
are not registered in Summer Session I and in July for RAs who are
not registered in Summer Session II. The source of funds that pays
the stipend must pay the same amount of Social Security tax as is
withheld from the student’s paycheck during these months.
- Two special registration categories are available for Graduate
