About Us

North Carolina State University (https://www.ncsu.edu/) (NC State) began as a land-grant institution grounded in agriculture and engineering. Today, we’re building a leading public research university that excels across disciplines.

NC State is a powerhouse in science, technology, engineering and math. We lead in agriculture, education, textiles, business and natural resources. We’re at the forefront of teaching and research in design, the humanities and the social sciences. And we’re home to one of the planet’s best colleges of veterinary medicine.

Our more than 36,000 undergraduate and graduate students learn by doing. They pursue research and start new companies. They forge connections with top employers and serve local and global communities. And they enjoy an outstanding return on investment.

Introduction

Founded March 7, 1887 by the North Carolina General Assembly under the provisions of the national Land-Grant Act, North Carolina State University is now one of the nation’s preeminent research institutions and the university of choice for accomplished, high-performing students from around the world.

NC State’s extensive public and private partnerships create a unique culture of collaboration to address the grand challenges facing society. The university’s solution-driven research, technology and scholarship lead to new ideas, products and services. It’s no wonder NC State is known for its forward-looking philosophy: Think and Do.

With more than 35,000 students and 8,000 faculty and staff, NC State is a comprehensive university known for its leadership in interdisciplinary innovation. As a leader in experiential education, NC State provides remarkable opportunities for students to put learning into practice and to develop career-ready skills.

The university is consistently ranked as a top-tier university by U.S. News & World Report and is regularly named by Kiplinger’s as a top-10 best value in public higher education, a ranking that combines academic quality and affordability. Because of this value, NC State students graduate with lower-than-average debt, according to U.S. News.

Beginning their freshman year, NC State students are able to explore their major right away — by conducting research alongside faculty or starting a challenging co-op or internship. NC State has a large and diverse student population with the feel of a tight-knit community.

NC State is located in the Research Triangle region, home to many of the country’s leading Fortune 500 technology, research and pharmaceutical companies. NC State’s Centennial Campus is home to more than 150 corporate and government research partners, incubator companies and NC State research units.

Mission, Vision and Values

Mission

As a research-extensive land-grant university, North Carolina State University is dedicated to excellent teaching, the creation and application of knowledge, and engagement with public and private partners. By uniting our strength in science and technology with a commitment to excellence in a comprehensive range of disciplines, NC State promotes an integrated approach to problem solving that transforms lives and provides leadership for social, economic, and technological development across North Carolina and around the world.

Vision

NC State University will emerge as a preeminent technological research university recognized around the globe for its innovative education and research addressing the grand challenges of society.

Values

Consonant with our history, mission, and vision, North Carolina State University affirms these core values:

- Integrity—in the pursuit, creation, application, and dissemination of knowledge
- Freedom—of thought and expression
- Respect—for cultural and intellectual diversity
- Responsibility—for individual actions and service to society
- Stewardship—in sustaining economic and natural resources
- Excellence—in all endeavors

History

Founded March 7, 1887 by the North Carolina General Assembly, the school—then known as the North Carolina College of Agriculture and Mechanic Arts—embodied ideals that were rapidly transforming the field of higher education. Chief among them was the belief that colleges should not be reserved for a select few and that the children of farmers, mechanics and other workers should have access to the opportunities and benefits of higher education.

NC State was established under the provisions of the Morrill Act of 1862, which allowed the U.S. government to donate federally owned land to the states for the purpose of establishing colleges that would teach “agriculture and the mechanic arts.” The brand-new school held its first classes in the fall of 1889 with 72 students, six faculty members and one building. In the early 1900s, a new federal program sparked an era of outreach work at the college. The 1914 passage of the Smith-Lever Act created an educational partnership between land-grant colleges and the U.S. Department of Agriculture. Under this new cooperative extension program, the colleges would send staff to meet with farmers around the state and provide practical agricultural instruction. This led North Carolina to establish the Cooperative Agricultural Extension Service (now the North Carolina Cooperative Extension Service (http://www.ces.ncsu.edu/)) at NC State.

By the 1920s, North Carolina State College (as the school was then known) was beginning to grow beyond its original agricultural and mechanical focus, adding schools of engineering, textiles, education and business, as well as a graduate school. The Depression posed economic challenges for higher education throughout the nation, and State College was no exception. As the crisis slowly eased, the college renewed its growth, adding students and developing new programs until the onset of World War II. State College contributed to the war effort by hosting a number of military detachments and training exercises and by refitting the work of several departments and programs to military and defense purposes.

The campus experienced unparalleled growth during the postwar years as the G.I. Bill brought thousands of former servicemen to campus. In the following decades, the college continued to expand its curricula, creating schools of design, forestry, physical and mathematical sciences,
and humanities and social sciences. During these years of growth, the name was changed again, this time to North Carolina State University at Raleigh—the university’s current official name.

The university celebrated its 100th anniversary in 1987, which also saw the creation of Centennial Campus (http://centennial.ncsu.edu/), bringing together academic, corporate, government and nonprofit leaders to partner in teaching, research and economic development.

NC State has developed into a vital educational and economic resource, with more than 34,000 students and 8,000 faculty and staff. A wealth of university outreach and extension programs continue to provide services and education to all sectors of the state’s economy and its citizens. Consistently ranked a best value (http://www.kiplinger.com/tools/colleges/school.php?id=7794/) among the nation’s public universities, NC State—the state’s largest university—is an active, vital part of North Carolina life. Today, more than 128 years after its founding, NC State continues to follow its original mission: opening the doors of higher education to the citizens of North Carolina and providing teaching, research and extension that strengthen the state and its economy.

**Campus**

NC State University is located west of downtown Raleigh on 2,099 acres. The campus acreage includes Centennial Campus on 1,105 acres and Centennial Biomedical Campus on 215 acres. West Campus includes the College of Veterinary Medicine and the stadium/arena complex. Nearby are research farms, biology and ecology sites, horticulture and floriculture nurseries and research forests that cover an additional 3,000 acres. Elsewhere across the state are research farms and 4-H camps.

**Research Triangle Park**

NC State is one of three nationally renowned research universities in the Triangle area, along with Duke University in Durham and the University of North Carolina at Chapel Hill. Within the 30 mile triangle formed by the three universities is Research Triangle Park, a 7,000-acre research park founded in 1959 by leaders in academia, business and government. Today, Research Triangle Park is home to some of the most innovative technology and research-based companies in the world.

**Faculty**

The university has 9,553 employees, including 2,360 faculty. Among the many honors and recognitions received by members of the faculty are 9 memberships in the National Academy of Sciences, 18 memberships in the National Academy of Engineering, one membership in the Institute of Medicine, and 778 members of NC State’s Academy of Outstanding Teachers.

**Students**

In the 2018 Fall Semester, the university’s head count enrollment totaled 35,479. Included in this number were 25,199 students in undergraduate degree programs, 10,280 in graduate degree programs, 400 First Professional and 1,801 non-degree-seeking students. The total enrollments by college were:

- Agriculture and Life Sciences - 3,575
- Design - 841
- Education - 1,717
- Engineering - 9,617
- Natural Resources - 1,976
- Humanities and Social Sciences - 4,480
- Management - 3,947
- Sciences - 4,070
- Textiles - 1,110
- Veterinary Medicine - 483
- Division of Academic and Student Affairs - 1,345

The student population included 2,055 African American students, 4,190 other non-white students, and 16,562 female students. Students at the university come from 56 states (including DC and territories) and 132 foreign countries. The international enrollment is a distinctive feature of the institution as 4,068 international students give the campus a cosmopolitan atmosphere.

**Outreach and Extension**

As North Carolina’s flagship research intensive, community engaged land-grant university, NC State has a unique mission to serve the citizens of this state through technical assistance, professional development, lifelong education, technology transfer, and other means of applying knowledge to real world issues and problems. Faculty, students, and staff from all ten academic colleges and other units engage in collaborative research, learning, and service partnerships with business, industry, government, and communities, in the Triangle region and across the state. Extension and engagement imperatives include economic development, environmental stewardship, K-12 education, leadership development, and entrepreneur support. NC State’s Office of Extension, Engagement, and Economic Development reaches over one million citizens annually through Cooperative Extension, Industrial Extension, McKimmon Center for Extension and Continuing Education, NC State’s Economic Development Partnership, the General Hugh Shelton Leadership Center, and the North Carolina Small Business and Technology Development Center.

**Administration**

NC State is one of 16 constituent institutions of the multi-campus University of North Carolina system (http://www.northcarolina.edu/). The UNC Board of Governors is the policy-making body legally charged with “the general determination, control, supervision, management, and governance of all affairs, of the constituent institutions.”

NC State is a member of the National Association of State Universities and Land-Grant Colleges. It is also a member of the American Council on Education, the College Entrance Examination Board, the Council of Graduate Schools, the National Commission on Accrediting and the Southern Association of Colleges and Schools.

North Carolina State University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (http://www.sacscoc.org/) to award associate, baccalaureate, master’s and doctoral degrees. Contact the:

Commission on Colleges
1866 Southern Lane
Decatur, Georgia, 30033-4097

Or call 404-679-4500 for questions about the accreditation of North Carolina State University. We are providing this contact information here to enable interested constituents:
1. to learn about the accreditation status of NC State,
2. to file a third-party comment at the time of NC State’s decennial review, or
3. to file a complaint against the institution for alleged non-compliance with a standard or requirement.

Normal inquiries about NC State, such as admission requirements, financial aid, educational programs, etc., should be addressed directly to the university and not the Commission’s office.

Changes may be announced in official university publications subsequent to this publication and maintained on the S (http://www.ncsu.edu/registrar/calendars/) and Student Services Center website (https://go.ncsu.edu/academiccalendar/).

Admission and Enrollment

View the following links for helpful information about the various paths to admission to NC State, enrollment options and procedures, financial aid eligibility, and university tuition and fees.

- Admission (p. 16)
- Enrollment (Registration) (p. 23)
- Financial Aid (p. 25)
- International Programs and Activities (p. 26)
- Supplemental Academic Programs (p. 28)
- Tuition and Fees (Graduate) (p. 29)
- Tuition and Fees (Undergraduate) (p. 29)

Admission

What best describes the type of student you are? Are you looking to attend NC State for one of our outstanding undergraduate baccalaureate degree programs? Are you thinking about pursing your doctoral degree here? Or, do you want to explore some of our course offerings as a Non-Degree Study student? Check out the links below to view admissions requirements and procedures based on your academic history, needs and goals.

- Undergraduate Admission (p. 16)
- Graduate Admission (p. 20)
- Non-Degree Studies (p. 22)
- Readmission (p. 23)

Undergraduate Admission

NC State is a member of the Common Application (http://www.commonapp.org/) and the Coalition for Access, Affordability, and Success (http://www.coalitionforcollegeaccess.org/). Students may choose to apply through either application system. Undergraduate Admissions implements a notification date system for both domestic freshman and transfer applicants. International applicants are notified of their admission decision on a rolling basis once their application is complete. Freshmen are strongly encouraged to apply during the fall of their senior year in high school by the early action deadline.

Application Dates and Deadlines (https://admissions.ncsu.edu/apply/dates-and-deadlines/)

Freshman and transfer applicants for the College of Design and Fashion and Textile Design program must submit a complete application including a portfolio and additional essay by November 1 and list it as their first choice major.

All applications for the spring semester should be submitted prior to October 1. A few programs do not accept applications for spring entry including applied mathematics and mathematics, College of Design studio-based majors, College of Engineering, Exploratory Studies, fashion and textile design, physics and statistics.

Students are notified of their decision on their wolfPAW account (https://wolfpaw.ncsu.edu/Default.asp) and admitted students (https://admissions.ncsu.edu/enroll/) must confirm their enrollment by May 1, or within ten days of if they are accepted after May 1.
The Undergraduate Admissions website (http://admissions.ncsu.edu/) provides more information on the application review process and procedure.

Office of Undergraduate Admissions
NC State University
121 Peele Hall

Raleigh, NC 27607
Phone: 919-515-2434
Email: undergrad-admissions@ncsu.edu

Jon Westover, Associate Vice Provost and Director of Undergraduate Admissions

Admission to the university is highly competitive. Applicants are asked to indicate their first and second choices for a curriculum, including undeclared majors within a college, or, if undecided, to indicate their choice of participating in University College Exploratory Studies. Applicants not admitted in their first curriculum choice will be reviewed for admission in their second curriculum choice. The admissions decision is based on a holistic review of a complete application. Of primary importance is the high school record, including the level and difficulty of the courses taken, the overall grade point average, rank in class, and scores on the SAT or the ACT. Extracurricular involvement, leadership, and many other factors are also considered.

Admissions Requirements

The Board of Governors of the University of North Carolina System has determined that the Minimum Course Requirements (MCR) for all constituent institutions, including NC State, shall include a high school diploma or its equivalent and the following course units taken in high school:

1. Six course units in language, including
   - Four units in English
   - Two units in a language other than English
2. Four course units of mathematics in any of the following combinations:
   - Algebra I and II, Geometry, and one unit beyond Algebra II
   - Algebra I and II, and two units beyond Algebra II or
   - Integrated Math I, II, III and one unit beyond Integrated Math III
3. Three course units in science, including
   - At least one unit in a life or biological science, and
   - At least one unit in physical science, and
   - At least one laboratory course
4. Two course units in social studies, including
   - One unit in U.S. history
   - One other unit in social studies

Competitive applicants will typically exceed these minimum courses. It is recommended that every student take a foreign language course and a mathematics course in their senior year.

NC State does not conduct individual interviews with applicants, however, students are always welcome to walk-in and meet with an admissions officer at NC State's Joyner Visitor Center. Information sessions and student led campus tours are also available Monday through Friday at the Joyner Visitor Center (http://admissions.ncsu.edu/visit/schedule-your-visit/).

How to Apply

1. Review our deadlines: The application opens in August
2. Complete the application through the Common App or the Coalition App; we do not have a preference. Applicants for Studio-Based Majors will also need to submit a portfolio.
3. Pay the $85 application fee, or provide an official fee waiver.
4. Self-report your test scores. Visit our website (https://admissions.ncsu.edu/apply/freshmen/application-process/) for more information and for our school codes.
5. Submit your official academic transcript.
6. Check your status in your wolfPAW (https://apply.ncsu.edu/portal/wolfpaw/) account throughout the application process.

Admissions Dates and Deadlines

Decisions are released on the corresponding notification date as long as the application is complete by the deadline.

Fall Entry Early Action:
   - Deadline: November 1
   - Notification Date: January 30

Fall Entry Regular Decision:
   - Deadline: January 15
   - Notification Date: March 30

Spring Entry Regular Decision:
   - Deadline: October 1
   - Notification Date: December 1

Some programs do not accept applications for spring entry. Visit our website for details.

Studio-Based Majors

The following programs are considered studio-based majors and are fall entry only:

- Architecture
- Art & Design
- Fashion & Textile Design
- Graphic Design
- Industrial Design

Application Deadline: November 1
Portfolio and Optional Essay Due: November 1

Agricultural Institute

NC State’s 2-year Agricultural Institute (AGI) (p. 81) accepts freshman and transfer applicants.

Fall Entry:
   - Deadline: June 1
   - Decision Date: Rolling
Spring Entry:

• Deadline: November 1
• Decision Date: Rolling

Credit Opportunities
Students can jump-start their college careers by acquiring pre-enrollment credits by one or more of the following means:

1. by passing a proficiency examination administered by a teaching department at NC State;
2. by meeting a specific minimum score on certain Advance Placement Program (AP), International Baccalaureate (IB) examinations, and/or A and AS Level Equivalencies; and/or
3. by attaining a minimum score on certain College Level Examination Program (CLEP) subject tests.

Learn about the recognized test curriculum, accepted test scores and credit awarded at admissions.ncsu.edu/apply/credit-opportunities (http://admissions.ncsu.edu/apply/credit-opportunities/).

Out-of-State Students
Undergraduate applicants from outside North Carolina are reviewed using the same criteria as applicants from North Carolina. NC State is limited to enrolling not more than 18 percent of total new undergraduate students from outside the state as set forth by the University of North Carolina System.

The path to NC State is not always direct. About 20 percent of our students start their college career at another college or university. All transfer applicants should have at least 30 transferable college credit hours completed, including specific coursework and a competitive GPA based on the major you are applying for. Meeting these recommendations does not guarantee admission but sets you up to be considered a competitive applicant in the review process. View our recommendations for competitive applicants (https://admissions.ncsu.edu/apply/transfers/application-review/#recommendations-for-competitive-applicants).

What We Look For
Here are some of the items we’re looking at when evaluating your transfer application to NC State:

1. Your college coursework and GPA
2. Your high school coursework and test scores if you have less than 30 transferable college semester credit hours completed
3. Your interest in the program you’re applying for
4. Your accomplishments/involvement outside of the classroom
5. Your background and opportunities
6. Your individual story

Visit our Transfer Admissions website (https://admissions.ncsu.edu/apply/transfers/application-review/) for more information and recommendations for competitive transfer applicants. Students are always welcome to walk in and meet with an admissions officer at NC State’s Joyner Visitor Center. Information sessions and student led campus tours are also available Monday through Friday at the Joyner Visitor Center (http://admissions.ncsu.edu/visit/schedule-your-visit/).

How to Apply
1. Review our deadlines: The application opens in August. Be sure to pay attention to additional requirements and timelines for Studio-Based Majors and the Agricultural Institute.
2. Plan your path, and review our recommendations for competitive applicants.
3. Complete the application through the Common App (http://commonapp.org/) or the Coalition App (http://www.coalitionforcollegeaccess.org/); we do not have a preference. Applicants for Studio-Based Majors will also need to submit a portfolio.
4. Pay the application fee or provide an official fee waiver.
5. Submit your official academic transcript(s) from each institution you have attended.
6. Check your status in your wolfPAW (https://apply.ncsu.edu/portal/wolfpaw/) account throughout the application process.

• Deadline: June 1
• Decision Date: Rolling

Spring Entry:
Transfer Credit

Search our transfer course equivalency database (https://www.acs.ncsu.edu/php/transfer/) to get an initial idea of which course credits from other institutions transfer to NC State. An official course evaluation is provided to students once they are admitted.

Visit Us
Transfer Admissions Center
Joyner Visitor Center
1210 Varsity Drive
Raleigh, NC 27607
Phone: 919-513-1200

At NC State we value diversity and welcome international students. Located in Raleigh, North Carolina, we are proud to be home to the most diverse student body in North Carolina hosting students from 117 different countries.

The Office of International Services (https://internationalservices.ncsu.edu/future-students/) is the main resource for international students regarding immigration regulations, university policies, employment and travel. They provide assistance to you and your family as you prepare to arrive on campus and to smooth the transition to studying in the U.S.

What We Look For

Here are some of the items we're looking at when evaluating your transfer application to NC State:

1. Your Academic Achievement
3. Your level of English language skills
4. Your interest in the program you are applying for
5. Your accomplishments/involvement outside the classroom
6. Your background and opportunities
7. Your individual story

Visit our International Admissions website (https://admissions.ncsu.edu/apply/international/international-application-review/) for more information on application considerations, including interactive interviews (for Chinese applicants) and SAT or ACT composite scores (for Freshman applicants only).

How to Apply

1. Review our deadlines: The application opens in August. Be sure to pay attention to additional requirements and timelines for Studio-Based Majors and the Agricultural Institute.
2. Complete the application through the Common App (http://www.commonapp.org/) or the Coalition App (http://www.coalitionforcollegeaccess.org/); we do not have a preference. Applicants for Studio-Based Majors will also need to submit a portfolio.
3. Pay the application fee ($100 for international applicants).
4. Submit your academic credentials. Visit our website for details.
5. Show proof of English proficiency (https://admissions.ncsu.edu/apply/international/international-application-review/), if you are not from a country where English is the official or commonly spoken language.
6. Check your status in your wolfPAW (https://apply.ncsu.edu/portal/wolfpaw/) account throughout the application process.

**Agricultural Institute**

NC State’s 2-year Agricultural Institute (AGI) (p. 81) accepts freshman and transfer applicants.

**Fall Entry:**
- Deadline: June 1
- Decision Date: Rolling

**Spring Entry:**
- Deadline: November 1
- Decision Date: Rolling

**Use of Agents or Educational Agencies**

NC State does not partner with incentive-based agents or educational agencies to represent the University or to administer any part of the application process.

We recognize that in many countries agents or consultants are retained by students and their families to assist in applying to universities in the United States. It is not necessary to engage an agent in order to have a strong chance of admission to NC State. Admission decisions are not based on the recommendations of agents.

NC State expects an application to be the work of the applicant and that all information on the application is complete, accurate and truthful. We may reject application materials, cancel an admissions offer or dismiss a student from attendance, if it is determined that application materials have been falsified.

It is critical that applicants use their own email address, phone number, and mailing address on their application to ensure that all communication from NC State is delivered in an accurate and timely manner. Missing any important communication from NC State may delay applicants’ application process and admission decisions.

**Financial and Immigration Information**

All international applicants seeking an F-1 or J-1 student visa must submit a Certificate of Financial Responsibility (CFR) as part of the admission process. The purpose of this form is to certify financial solvency for the student throughout his/her program of study - this is a federal requirement that must be met before the Office of Undergraduate Admissions can issue any visa certificates.

In addition, applicants deemed admissible who are already in the U.S. must also fill out a Visa Clearance Form (VCF). This includes international applicants who are in a nonimmigrant visa category other than F-1 or J-1 (ex: H-4, L-2, DACA, E-2, Pending Permanent resident etc.). These applicants are not required to complete a CFR, unless they plan to change to F-1 or J-1 student status (if eligible).

CFR and VCF forms are reviewed by the Office of Undergraduate Admissions upon receipt. If the information provided by the applicant is incomplete or not acceptable (e.g. sponsor and bank official signatures, bank statements, etc.), the applicant will be notified that his/her documents were not approved and why. Notification is done via e-mail. The applicant will then have an opportunity to correct the problem(s) and resubmit the form(s). Applicants can check the status of their applications through their WolfPAW account.

Once the applicant is considered admitted (fully or conditionally) to the University, the Office of Undergraduate Admissions mails out the appropriate Certificate of Eligibility (Form I-20 for an F-1 visa or Form DS-2019 for a J-1 visa) along with the full admission letter and other important pre-arrival information. Newly fully admitted international students will also receive information and guidance from the Office of International Services (OIS) via email prior to their arrival to NC State. Conditionally admitted international students will received information from the Intensive English Program (IEP) prior to their arrival as well.

New F-1 and J-1 international students must check-in with the Office of International Services upon arrival to campus and attend the New International Student Orientation, which is scheduled a few days before the semester begins.

New international students who are accepted to NC State have the opportunity to participate in a Summer Start program during the month of July before fall classes begin. More information can be found here. [https://newstudents.dasa.ncsu.edu/summerstart/](https://newstudents.dasa.ncsu.edu/summerstart/)

**Contact Us**

**Office of Undergraduate Admissions**

Jeong Powell
Director, International Admissions and Recruitment
Phone: 919-515-2434
Email: jcpowell@ncsu.edu

**Graduate Admission**

For a list of graduate degrees, details on the programs, and admissions information, please consult the Graduate Programs website ([https://grad.ncsu.edu/programs/](https://grad.ncsu.edu/programs/)).

The Graduate School is committed to provide a transformative experience for graduate students and postdoctoral researchers at NC State by preparing these talented individuals to become true leaders ready to tackle the major challenges facing our state, nation, and world. NC State is recognized as a national leader in the STEM disciplines, and the University supports advanced study and innovative research in numerous fields, including agriculture, life sciences, design, education, engineering, natural resources, humanities and social sciences, management, textiles, and veterinary medicine, along with many exciting interdisciplinary programs.

NC State currently offers over 160 master’s programs and more than 60 doctoral programs in both traditional and emerging disciplines, including biomedical engineering, biotechnology, genomics, geographical information systems, nanotechnology, and natural resources. The University also offers a broad range of certificate programs that afford graduate students and postdoctoral scholars with opportunities to collect certification for key skills and knowledge. Moreover, several Professional Science Master’s programs are offered that tailor educational outcomes to employer needs.

The Graduate School also proudly offers numerous professional development experiences throughout the year. These opportunities are meant to endow graduate students and postdoctoral scholars with a competitive edge that enhances their ability to land jobs and to experience long-term career success. Graduate School professional development programming incorporates training that pertains to four core competency areas: professional and personal development, leadership and management, academic development, and communication.
Signature programs include the Notes From the Field seminar series, the Transition to Industry Immersion Program, the Dissertation and Thesis Institute, the Teaching and Communication Certificate program, the Preparing Future Faculty program, the STEM Faculty Launch program, the Team Case Studies course, and the Job Search Strategies course.

The criteria used for admissions decisions vary according to programs and schools/colleges, reflect an evaluation of the applicant’s potential for graduate work, and consider the ability of a program to accommodate additional students. Commonly, departmental admissions committees consider requests for admission and forward their recommendations to the Graduate School. However, Graduate School regulations govern the criteria for the classification of graduate student status.

Applications and all supporting documents must be received on or before the priority deadlines OR the Program Deadlines (https://grad.ncsu.edu/programs/), whichever is earlier. Please be aware of specific program deadlines (https://grad.ncsu.edu/programs/), as many are earlier than the Graduate School priority deadlines. All application fees are totally non-refundable. Note that applications must be submitted to the Graduate School by midnight Eastern Standard Time on the deadline.

1020 Main Campus Drive, Box 7102
Raleigh, NC 27695

For a list of graduate degrees, details on the programs, and admissions information, please consult the Graduate Programs website (https://grad.ncsu.edu/programs/).

Applications and all supporting documents must be received on or before the priority deadlines OR the Program Deadlines (https://grad.ncsu.edu/programs/), whichever is earlier. Please be aware that many program deadlines are earlier than the Graduate School priority deadlines.

**Domestic Applicants**

- Unofficial transcripts from all colleges and universities previously attended
  - If you are currently enrolled in an institution taking courses, you will need to provide a list of courses in progress
  - All foreign transcripts must be translated to English through a certified Credential Evaluation Service
  - Official transcripts and statements of degree will be required if you are recommended for admission
- 3 Recommendations from people who know your academic record and potential for graduate study
  - All recommendation letters are submitted online through a link that will be sent to each recommender's email once their information is listed on the recommendation list
- Standardized Test Scores
  - Depending on the prospective program's admission requirements, this may include: GRE, GMAT, and/or MAT scores
- Statement of Purpose & CV/Resume
- Supplemental Documentation
  - Depending on the prospective program's admission requirements, this may include: research papers, additional essay questions, or writing/media samples
- Application Fee
  - Domestic Application: $75.00
  - Graduate Certificate Application: $25.00
- Payments are made online as the last step of the Admissions application through any major credit card issuer
- All application fee submissions are totally non-refundable

**International Applicants**

- Unofficial transcripts from all colleges and universities previously attended
  - If you are currently enrolled in an institution taking courses, you will need to provide a list of courses in progress
  - All foreign transcripts must be translated to English through a certified Credential Evaluation Service
  - Official transcripts and statements of degree will be required if you are recommended for admission
- 3 Recommendations from people who know your academic record and potential for graduate study
  - All recommendation letters are submitted online through a link that will be sent to each recommender's email once their information is listed on the recommendation list
- Standardized Test Scores
  - English Proficiency Scores (IELTS/TOEFL) are mandatory for International Students (please see the following link for more information: https://grad.ncsu.edu/students/rules-and-regulations/handbook/2-3-graduate-school-admissions/#p)
  - Depending on the prospective program's admission requirements, this may include: GRE, GMAT, and/or MAT scores
- Statement of Purpose & CV/Resume
- Supplemental Documentation
  - Depending on the prospective program's admission requirements, this may include: research papers, additional essay questions, or writing/media samples
- Application Fee
  - International Application: $85.00
  - Graduate Certificate Application: $25.00
  - Payments are made online as the last step of the Admissions application through any major credit card issuer
  - All application fee submissions are totally non-refundable

- Statement of Purpose & CV/Resume
- Supplemental Documentation
  - Depending on the prospective program's admission requirements, this may include: research papers, additional essay questions, or writing/media samples
- Application Fee
  - International Application: $85.00
  - Graduate Certificate Application: $25.00
  - Payments are made online as the last step of the Admissions application through any major credit card issuer
  - All application fee submissions are totally non-refundable

**Non-Degree Studies**

NC State’s **Non-Degree Studies (NDS)** program provides opportunities for students who are not full-time degree-seeking students to enroll at NC State for a variety of reasons. NDS caters to:

- Working professionals looking to advance in their careers,
- Students who need to meet NC State admission requirements for an undergraduate or graduate program,
- Students who would like to try out classes at NC State,
- High school students (https://registrar.ncsu.edu/nds/aoe-students/) who wish to earn college credit and have exhausted enrollment options at their home institutions,
- North Carolina Senior learners (https://registrar.ncsu.edu/nds/over65/) wishing to audit courses tuition-free,
- and so many others.

**Eligibility**

- Students must have graduated from high school at least one year before beginning enrollment or have the written support of their high school principal
- Students must be eligible to return to any previous institution(s) attended
- Students must maintain a minimum cumulative GPA of 2.0 at all times to remain eligible to continue

**NDS Classifications**

**Undergraduate Studies**

- Students who have not yet obtained a baccalaureate degree
- Students enrolled in an undergraduate certificate program

**Post-Baccalaureate Studies**

- Students who have obtained a baccalaureate degree

**Academic Enrichment Opportunities**

- Rising high school juniors and seniors with a cumulative weighted GPA of 3.5 or higher
- North Carolina Senior Auditors (“65+”)
  - North Carolina residents aged 65-years and older

**How to Apply to the NDS Program**

Students interested in the NDS program will apply online through our ApplyNDS portal. Depending on what type of student you are, whether you have previously been a student at NC State, and your residency (in-state, out-of-state, or international), there may be different components to the application. Details are available on the NDS website (https://registrar.ncsu.edu/nds/). It is important that applicants follow each step of the application carefully, as your application may not be considered if we are missing any important information or documentation.
Application Dates and Deadlines

The deadline to apply to the NDS program for the Fall 2020 semester is August 14, 2020. Applicants are notified of their decision on a rolling basis. The deadline for the Spring 2021 application will be posted to the NDS website during the summer.

Readmission

Sometimes students may take some time away from NC State, and that's okay. Any Undergraduate or Agricultural Institute student who has not enrolled in a Fall or Spring semester may apply for readmission to continue their degree program if they wish to continue.

Eligibility

Students are eligible to apply for readmission if you fall into one of the following categories:

1. Former Undergraduate and Agricultural Institute students eligible to return to NC State University
2. Suspended Undergraduate Students (additional action required)
3. Former Undergraduate who obtained a degree and wishes to seek an additional undergraduate degree

Students who desire a change of curriculum can apply through the Change of Degree Application (CODA) upon readmission, except for Leadership in the Public Sector. The Leadership in the Public Sector (LPS) major, housed within the College of Humanities and Social Sciences, is an online degree completion program for students who have been away from NC State University for more than three years. It is not available for transfer via CODA. If you are interested in this program, please visit the LPS Program website (https://spia.ncsu.edu/lps/) and contact the program advisor or director before readmitting into your previous major.

Students who have completed their undergraduate degrees and wish to return to pursue an additional degree must complete the application for readmission and complete the Change to Additional Degree form (http://studentservices.ncsu.edu/wp-content/uploads/2018/12/Readmit-Second-Degree-072617-2-1.pdf).

Suspended Students

Students on Academic Suspension may appeal to the Admissions Committee for readmission. Students will be directed to the appeal upon completing the readmission application above. Appeals will not be reviewed unless all documents are included.

Academically Suspended students who have had a break in enrollment for at least 3 years may appeal for Contractual Readmission. Students who are contractually readmitted will be placed on Academic Warning and must maintain a 2.0 GPA on all coursework attempted after readmission. Failure to do so will result in permanent dismissal from the university.

Students are encouraged to begin the Contractual Readmission process early. Colleges may have additional requirements or deadlines; students should consult with their college and/or academic advisor before starting the contractual readmission application. Visit our website (https://studentservices.ncsu.edu/your-degree/readmission/) for more information and to download the Contractual Readmission Application Form.

How to Apply

Application dates and deadlines are updated on our website throughout the year.

All students applying for readmission to NC State must pay a non-refundable, $60 Readmission Application Fee.

The Readmission application is available online at our Apply/Readmit portal (https://go.ncsu.edu/apply_readmission/). Decisions are released on a rolling basis.

Residency Determination

All students applying for undergraduate readmission and requesting in-state tuition are required to complete the North Carolina Residency Determination Service (RDS) (https://ncresidency.cfonc.org/residencyInfo/) prior to completing the Readmission application. You will need your Residency Certification Number (RCN) in order to complete your Readmission application.

Department of Registration and Records
Phone: 919-515-2572
Email: readmission@ncsu.edu

Enrollment (Registration)

Enrollment Process

Enrollment is conducted using MyPack Portal, NC State’s online student services application. The Student Services Center website (https://studentservices.ncsu.edu/) houses tutorials and guides for completing enrollment as easily and efficiently as possible. A schedule of courses for each semester is also available online prior to the beginning of the enrollment period.

Enrollment consists of three steps:

1. Students meet with advisors to determine course requirements and to have their Advising Hold released;
2. Students enroll in courses in MyPack Portal; and
3. Students pay tuition, fees, and all other debts to the university by the established deadlines.

Students can find more information about how to search for classes, how to enroll, how to drop and edit their class schedules, and how to utilize degree planning tools on the Student Services Center website (https://studentservices.ncsu.edu/your-classes/).
Enrollment Calendar and Timeline

Students are assigned a date and time during which they can begin enrolling for the upcoming term. These assignments are determined by a number of factors, including the student’s academic career (i.e. undergraduate, graduate, etc.), classification by credit hours (i.e. junior, senior), and any university groups the student may be a part of.

Enrollment typically begins in October for Spring and Summer semesters, and in March for Fall semesters. The enrollment calendars are published shortly before then.

New freshmen entering in the Fall enroll during summer orientation after meeting with advisors and becoming acquainted with the MyPack Portal.

The enrollment calendar is available online on the Student Services Center website (https://studentservices.ncsu.edu/calendars/enrollment/).

Schedule Revision (drops and adds)

Note: NC State University policies, rules and regulations are updated and reviewed as the need arises. For the most current information regarding this section, please visit the Policies, Rules, and Regulations website (http://policies.ncsu.edu/regulation/reg-02-20-02/).

Courses may be added during the first week of a regular semester without permission of the instructor and during the second week with the permission of the instructor.

Courses may be dropped without regard to course load prior to the Census Date of a regular semester. After the Census Date and prior to the Drop/Revision deadline, full-time undergraduate students who wish to drop courses at any level and whose academic load would thereby fall below the twelve hour minimum course load may do so only for documented medical reasons or other verified, unforeseen grounds of personal or family hardship.

Exceptions to the drop policies require the recommendation of a student’s advisor, the departmental coordinator of advising or the departmental head, and approval by the student’s dean.

The full academic calendar is available on the Student Services Center website (https://go.ncsu.edu/academiccalendar/).

Students who wish to drop all courses must withdraw from the university for the remainder of the semester or summer session in which they are enrolled. All withdrawals for a current or upcoming term are initiated through the self-service Term Withdrawal page in the MyPack Portal. Withdrawals after the drop/revision deadline are approved by the university only under extenuating circumstances. Documentation is required to support these requests. More information about how to initiate a Term Withdrawal is available online (https://studentservices.ncsu.edu/your-classes/withdrawal/).

Veterans Education Benefits

NC State University is approved to administer veterans benefits to eligible students. The Veterans Education Benefits office is located in Witherspoon Student Center, suite 100. Students who are eligible to receive veterans benefits should contact the NC State Certifying Official at veterans-ed@ncsu.edu. For more information see the NC State Veterans Education website (http://registrar.ncsu.edu/veterans/).

Military Priority Registration

NC State strives to ensure the academic success of our military-affiliated students by offering priority registration to student service members, veterans and those using GI Bill benefits. For more information regarding priority registration for military-affiliated students, please contact the university’s Veterans Education Benefits office at veterans-ed@ncsu.edu.

Exchange Programs

Several enrollment programs exist for the purpose of fostering cooperative educational activities. Under these programs students have the opportunity to register for courses at other institutions and to participate in cooperative library arrangements and joint student activities.

Inter-Institutional Program

The Inter-Institutional Registration Program is a voluntary organization comprised of NC State, Duke, North Carolina Central University, University of North Carolina at Chapel Hill, University of North Carolina at Charlotte, and University of North Carolina at Greensboro for the purpose of developing and conducting cooperative educational activities. The program provides the opportunity for students to enroll at another institution for a course accepted for their program of study and not offered on their home campus. Distance education courses are not eligible to be used for Inter-Institutional registration. Other activities include a cooperative library arrangement, joint student activities, and faculty cooperation and interchange. Interested students should contact the Inter-Institutional Coordinator at (919) 515-1427 or visit the Inter-Institutional website (https://studentservices.ncsu.edu/your-classes/exchange-programs/inter-institutional-program/).

UNC Online

The University of North Carolina Online Academic Services supports members of the UNC multi-campus community. This portal provides access to information on University-wide cross-campus online course offerings to enrolled students. It also administers an exam proctoring system to accommodate students, faculty and qualified proctors for scheduled proctored exams. The program provides the opportunity for students to enroll at another institution for a course accepted for their program of study and not offered on their home campus through Distance Education courses only. Students should contact the Inter-Institutional Coordinator at (919) 515-1427 or visit the UNC Online website (http://online.northcarolina.edu/).

Cooperating Raleigh Colleges

The Cooperating Raleigh Colleges Program (CRC) is a voluntary organization comprised of NC State, Meredith College, St. Augustine’s College, Shaw University, Wake Technical Community College, and William Peace University for the purpose of developing and conducting cooperative educational activities within the Raleigh area. The course taken at the visited school must be a course that is accepted for their program of study and not offered through NC State. Interested students should contact the Inter-Institutional Coordinator at (919) 515-1427 or visit the Cooperating Raleigh Colleges website (https://studentservices.ncsu.edu/your-classes/exchange-programs/cooperating-raleigh-colleges/).

Contact Us

For more information, contact:
Student Services Center
Financial Aid

Website: studentservices.ncsu.edu (https://studentservices.ncsu.edu)

Our mission is to make an NC State education affordable and accessible. We provide scholarships, grants, loans, and work funding to support students and their families. Our staff is here to help as you navigate the process of applying for financial aid.

To be considered for financial assistance, a student must complete the Free Application for Federal Student Aid (FAFSA). This form, submitted online at www.fafsa.gov (http://www.fafsa.gov), evaluates the family’s ability to pay for educational expenses. Students who submit a FAFSA to the federal processor by March 1 are given first priority for need-based scholarship and grant consideration.

By completing the FAFSA, students are considered for all forms of federal financial aid, as well as most types of state and institutional aid. Some academic scholarships may require separate applications. Determination of the applicant’s need is based on estimated educational costs as established by the Office of Scholarships and Financial Aid and a consideration of the family’s financial strength, as determined by the analysis of the FAFSA.

Aid is available on a non-discriminatory basis to all qualifying students based on the applicant’s financial need. Financial aid awards are usually made in the form of “packages,” which combine aid from all sources including the federal, state and institutional funds, and private entities.

Award packages can include gift aid (scholarships and grants), student loans, and/or employment through the Federal Work-Study program. Students must reapply for aid each year. Renewal is based on continued financial need as well as satisfactory academic progress as defined by the Policy (https://studentservices.ncsu.edu/your-degree/academic-progress/) on Satisfactory Academic Progress for Financial Aid Eligibility.

Please visit the Student Services Center website (http://studentservices.ncsu.edu/your-money/) for more detailed information regarding types of aid and how to apply.

Scholarships

NC State offers a variety of scholarships (https://studentservices.ncsu.edu/your-money/financial-aid/types/scholarships/) for both incoming first-year students and those who are continuing at NC State. Consideration for these awards is given to students who are academically competitive and exhibit special talents or characteristics. Some scholarships require that students also demonstrate financial need. Once admitted to NC State, students can apply for scholarship consideration by using PACK ASSIST (https://ncsu.academicworks.com/), NC State University’s scholarship application portal. To maximize scholarship consideration, students should apply for admission by October 15 and complete the FAFSA by March 1.

In addition to these university-wide scholarships, many colleges and departments offer specific awards to students enrolled in their academic programs. These scholarships, funded by alumni, friends of the university, foundations, and industry, are available to both incoming freshmen and to continuing students. Consult the college or department websites for important deadlines and apply online with PACK ASSIST (https://ncsu.academicworks.com/). (https://go.ncsu.edu/packassist/)

NC State encourages students to search for private scholarships. Many organizations offer awards based on place of residence, background, professional affiliations and/or field of study. Students should use the many free online scholarship search websites to search and apply for outside scholarships.

University Academic Scholarships

Park Scholarships

The Park Scholarships program, established in 1996, brings exceptional students to NC State University based on outstanding accomplishments and potential in scholarship, leadership, service, and character. The program develops and supports Park Scholars in these areas, preparing them for lifelong contributions to the university, state, nation, and world.

Approximately 40 scholarships will be awarded this year to outstanding entering freshmen for undergraduate study in any discipline at NC State. As one of the most prestigious and comprehensive undergraduate scholarships in the nation, the Park Scholarship covers the cost of attendance for four years and includes educational trips, retreats, and seminars; enrichment grants to fund study abroad, research projects, service activities, and conferences; individualized faculty mentoring; and more.

The Park Scholarships are named for the late Roy H. Park ’31, an NC State alumnus who created the charitable Park Foundation, dedicated to education, media, and the environment. The Park Foundation initially funded the Park Scholars through annual grants; then, in September 2013, the Park Foundation committed $50 million to begin an endowment for Park Scholarships. With others’ support, this endowment will sustain the Park Scholars program in perpetuity.

To date, 20 classes of Park Scholars have graduated and built a vibrant alumni network. For more information, visit the Park Scholarships website (http://park.ncsu.edu/).

Goodnight Scholars Program

The Goodnight Scholars Program, funded by a gift from Dr. Jim and Ann Goodnight, began in 2008 with 25 scholars. Since that time, it has grown into a comprehensive student development program designed to develop scholars into leaders within the STEM and/or education fields. The Program celebrated its eighth graduating class in May 2019, adding to its network of alumni stretching from coast to coast in the United States and throughout the world: all of whom are using their STEM talent to address critical societal, economical, and educational issues. Currently, the Program has more than 200 active students, and expanded to include transfer students beginning in Fall 2017.

The scholarship is targeted at low and middle-income families from North Carolina and is limited to students studying in the STEM disciplines or affiliated education majors. The current value of the scholarship is $20,500 and is renewable for up to four years for first-year students, and two years for transfer students. In addition to the scholarship, Goodnight Scholars have access to an assortment of developmental programming focused on their professional and personal growth, as well as enrichment grant funding to support their unique endeavors.

Dr. Jim Goodnight is founder and CEO of the SAS Institute, the world’s leading business intelligence software vendor. Ann Goodnight, director of
community relations at SAS, serves on the University of North Carolina Board of Governors and is a former member of the NC State Board of Trustees. Both are NC State graduates. Their frequent interactions with Goodnight Scholars provide unique and invaluable exposure to visionary leaders. Please visit the Goodnight Scholars website (https://goodnight.ncsu.edu/) for more information about the program and its exceptional scholars.

The Caldwell Fellows

The Caldwell Fellows is an intensive and comprehensive leadership development program that over 50 years at NC State has produced 1300+ outstanding alumni shaped by the Robert Greenleaf model of Servant Leadership. Supported through endowments held by the NC State Alumni Association, over 100 alumni “invest” in individual Fellows, providing funds for their development through experiential learning. Students selected as Fellows are expected to engage deeply in the program’s rich offerings, which include community-based service-learning, wilderness adventure, international engagement, and capstone training at the Center for Creative Leadership. Students receive three years of stipend (divided 70-30 between tuition and funds available for experiential learning), all contingent upon a students’ maintenance of the program ideals and a 3.25 cumulative GPA.

The application period for selection begins in January of each year, after a student’s initial semester(s) at NC State is complete. The program actively seeks applicants from all colleges at NC State. The rigorous selection process is based on an application portfolio which includes essays, short video, letters of recommendation, and the first semester transcript at NC State (minimum 3.25 GPA); high school transcripts and standardized test scores are not reviewed. The application is available on the Caldwell Fellows website (http://ncsu.edu/caldwellfellows/). Application reviews by campus faculty and program alumni determine the finalists who are invited to interviews in February. Only first year students are eligible to apply.

The Caldwell Fellows program was created to honor the legacy of John T. Caldwell and to carry out his spirit and ideals. As Chancellor of NC State for 16 years, he presided over the university as a servant leader: inspiring excellence, modeling moral behavior and marshaling the strengths of the entire campus to further the common good. Guided by a deep respect for the potential inside every individual, he held a vision of NC State as a place where young people could find and refine their unique capabilities and potential. The Caldwell endowment is the only university-wide merit-based scholarship funded by alumni and supporters of NC State.

The program also derives from the NC Fellows program, originally known as the Richardson Fellows program, established in 1968 by Smith Richardson of the Richardson Vicks Corporation. Concerned for the state’s future leadership, Mr. Richardson established Fellows Programs on North Carolina campuses and charged them with developing leadership in their promising students. Caldwell Fellows maintain close ties with the internationally acclaimed Center for Creative Leadership, also created by the Smith Richardson Foundation.

Open minds and open hearts are core to the Caldwell Fellows community. Curiosity, creativity, respect for diversity, and commitment to service to the greater good are common qualities which are sought and developed in all Fellows.

International Programs and Activities

Study Abroad

Study abroad allows students to develop skills required to face the grand challenges of society - deepen intercultural sensitivity, think more critically and creatively, and broaden both personal and academic perspectives. Distinguish yourself from your peers by developing skills in independence, flexibility, and the ability to deal with ambiguity. Make the world your classroom at NC State.

Study Abroad Programs

NC State offers programs worldwide that meet academic, career, and personal interests. Study Abroad is for every major: fulfill major, minor, or general education program courses abroad. Plus, participation in NC State study abroad programs fulfill the Global Knowledge co-requisite degree requirement for NC State students. Students should work with their academic advisor to identify a time frame and outline a course plan for study abroad. For all majors, with academic planning, study abroad does not delay graduation at NC State. View program options by major. (http://go.ncsu.edu/studyabroadbymajor/)

Funding Study Abroad

Study Abroad is affordable at NC State. Semester exchange programs provide the most economical option for most students since standard tuition and fees keep the cost of a semester abroad comparable to a semester on campus at NC State. Students are eligible to receive financial aid (including loans, grants, and scholarships) for the cost of any study abroad program. Study abroad scholarships provide additional funding to about 1/3 of applicants receiving an award, plus many other financial resources are available in support of study abroad. View information about NC State Study Abroad Scholarships (https://studyabroad.ncsu.edu/funding/nc-state-scholarships/).

Applying for Study Abroad

With hundreds of opportunities to choose from—each differing in courses, duration, language, cost, location—early planning is key to a successful study abroad experience. Well prepared students typically start planning a year in advance.

Learn more at http://studyabroad.ncsu.edu.

Kim Priebe, Director

Global Perspectives Certificate

The goal of the Global Perspectives Certificate is to:

• recognize students for their international studies and activities and
• encourage students to continue their global interests both overseas and within the United States.

All undergraduate degree-seeking students and all majors are welcome, including undergraduate international students. Upon completion,
students will receive an official certificate and a notation on their transcript documenting their global experiences during their studies. Learn more about the GPC and get started today at gpc.dasa.ncsu.edu (http://gpc.dasa.ncsu.edu/).

**North Carolina Japan Center**

Jonathan Brewster, Director

The NC Japan Center was established in July 1980 to strengthen the state’s academic, economic, scientific, and cultural ties with Japan. In its many aspects, the Center serves as a focal point for interaction between Japanese and North Carolinians. It is a statewide resource intended to assist all citizens, universities, companies, and public and private institutions in relations with the Japanese. The NC Japan Center works to inform people of the state about modern Japan and its people. It also provides information and resources for Japanese citizens living in North Carolina.

Consistent with NC State’s “Think and Do” land-grant mission, the NC Japan Center works in partnership with the Economic Development Partnership of North Carolina to attract Japanese businesses to the state, as well as strengthens relationships between NC State and academic partners in Japan. An external Board of Advisors includes prominent citizens of North Carolina who have a strong interest in Japan and US-Japan relations. Its Academic Advisory Committee consists of faculty from colleges across the university who provide guidance and direction for academic exchange and development. The NC Japan Center cooperates closely with the NC State Japanese language program and provides a full range of non-credit Japanese language courses to the public. For more information, please contact Jonathan Brewster at (919) 515-3450 or visit the North Carolina Japan Center’s website (http://www.ncsu.edu/japan/).

**International Students**

The Office of International Services (OIS) is charged with meeting the immigration advising and cross-cultural programming needs for the university’s more than 4000 international students and 700 J-1 Exchange Visitor scholars who come from more than 120 different countries. Services provided by OIS include advising students and scholars on immigration regulations and university policies; authorizing certain types of on or off-campus employment authorization for F-1 and J-1 visa holders; and providing cultural programs designed to enrich the cultural and academic experience of the campus community. OIS programs include: New International Student Orientation, Culture Corps, ISSERV service learning program, English Conversation Club, and many others. New international students are required to participate in New International Student Orientation. OIS also provides opportunities for U.S. students to get involved in the international community at NC State by inviting participation in various cross-cultural programs such as volunteering at the International Student Orientation and English Conversation Club.

International applicants must apply to the Admissions Office by the stated deadlines and must meet all the necessary requirements for admission. In addition, international applicants must meet certain language and financial criteria (see the TOEFL and Financial Information sections under Freshman Admission).

The North Carolina Global Training Initiative (GTI) sponsors several short-term certificate, internship, and research programs that international students may be interested in. These full-time non-degree study programs allow international students to study at NC State for one semester in order to learn about U.S. culture and education, improve their conversational English, take undergraduate courses in their field of study back home or in preparation for admission to a degree program here in the U.S., and experience life in the U.S. These programs have a later application deadline and are great for students to take before enrolling in an undergraduate or graduate degree program in the US or for siblings and friends of current degree-seeking students who want to study in the US together.

International students may be interested in joining the GTI’s Cultural Exchange Network (CENet). CENet connects NC State’s domestic and international students through joint participation in social, academic, and service learning events and workshops. Visit the CENet website (go.ncsu.edu/CENet) for more details about the program and how you can apply.

Anyone interested in the GTI’s programs can visit us on the web at www.ncsu.edu/gti (http://www.ncsu.edu/gti/) for more information.

Outline of minimum immigration requirements for F-1 and J-1 students:

- Keep passport and I-20 or DS-2019 current
- Maintain full-time enrollment every semester (12 hours/semester for undergraduates)
- Make good academic progress toward your degree
- Do not work or intern off campus without prior written approval from OIS
- Do not work on campus more than 20 hours in any one week during the semester
- Update any address change in MyPack Portal within ten days of moving
- Update OIS immediately of any changes in name, funding, or visa status
- Consult with an OIS advisor before changing curriculum/majors, withdrawing, dropping below full-time, transferring to another school/program, etc.
- Purchase and maintain the NC State University approved Health and Accident Insurance or other insurance plan that meets the published minimum coverage requirements.
- Keep your valid passport and recently signed visa certificate (I-20 or DS-2019) with you when you travel abroad. Consult with an OIS advisor about visa and travel questions

Further information about immigration requirements, employment and travel questions, cultural opportunities, and other critical information designed to assist international students are detailed on the OIS website. For individual advising, please call (919) 515-2961 to make an appointment with an advisor or stop by during our walk-in hours of 10:00am-11:45am and 1:00pm-2:45pm on Monday, Tuesday, Thursday and Friday (no walk-ins on Wednesdays).

The Intensive English Program (Conditional Admission and IEP-only)

The Intensive English Program (IEP) at North Carolina State University is a full-time, non-credit academic program offered to international, non-native English speakers. Its mission is to provide high-quality language instruction to those seeking academic preparation, professional development and/or personal enrichment. Programs of study are offered in the fall, spring, and summer semesters.

In the IEP, students take up to 25 hours per week of intensive language study in all core language skills. Students who enroll in the IEP will be tested for the appropriate level of English instruction when they arrive on campus.

Classes are located on NC State’s main campus and nearby on Hillsborough Street. IEP students are also offered the opportunity to participate in numerous cultural enrichment activities designed to help them get to know the surrounding area and interact with other students. Academic coaching (tutoring) is offered to students free of charge.

Students join the IEP as conditionally admitted students or IEP-only students. While the course of instruction is identical for both, IEP-only students are not guaranteed admission to degree programs, but may apply directly to such programs while enrolled in the IEP.

Conditional Admission

For undergraduate applicants who meet the competitive academic requirements for admission, but who do not yet possess the minimum English proficiency requirements for full, direct admission, NC State offers conditional admission. For NC State conditionally admitted students, the IEP provides the opportunity to improve one’s English language skills before moving into a degree program.

Successful completion of the IEP requires achieving at least a B or higher in each course, meeting strict attendance obligations, and passing all exit requirements.

Incoming Exchange Students

NC State has a growing number of international exchange partners from around the world. The Study Abroad Office warmly welcomes incoming exchange students to NC State's internationally renowned programs for a semester or for the full academic year.

Visit the NC State Study Abroad website (https://studyabroad.ncsu.edu/subpage-example/incoming-student/) for information about exchange programs at NC State, the application process, English proficiency requirements, preparation and arrival, and what you can expect during your time in Raleigh!

Study Abroad Office

Email: study_abroad@ncsu.edu
Website: https://studyabroad.ncsu.edu/

Cultural Exchange Network (CENet)

The Cultural Exchange Network (CENet) at NC State is a student organization comprised of undergraduate and graduate students from all fields of study and from around the world. CENet fosters global learning and international friendship through social, academic and service activities.

CENet is facilitated by the Global Training Initiative (GTI) and details can be found on the website (go.ncsu.edu/CENet (http://go.ncsu.edu/CENet)).

Supplemental Academic Programs

Cooperative Education Program

The Cooperative Education Program (co-op) is an opportunity for students to gain hands-on work experience while pursuing a degree. Through alternate semesters of full-time study and full-time work experience, students can:

• Strengthen their job prospects after graduation; companies usually prefer hiring students who have related work experience, especially within their organization
• Be well-paid
• Explore career fields and confirm their choice of major
• Work with state-of-the-art equipment in the industry
• Experience “corporate culture” by working with professionals and observing how they handle job situations in the given field

The co-op plan can be completed in five years, during which time the student receives 12 to 18 months of industrial experience.

To be eligible for a co-op, students must:

• Be full-time students (in any degree program)
• Have completed a minimum of 30 credit hours (or one semester for transfer students)
• Have been admitted into a degree program prior to reporting for a co-op job
• Have a cumulative GPA of at least 2.50 (3.00 for graduate students)

For more information, visit: https://go.ncsu.edu/co-op (https://go.ncsu.edu/co-op)

The Peer Mentor Program

The Peer Mentor Program (PMP), offered through the Department of Multicultural Student Affairs, is a student advisory program aims to foster a network of support for culturally diverse first-year students (“mentees”). The peer mentoring relationship is designed to aid in the academic, emotional, and socio-cultural adjustment to college life of mentees. Peer Mentors serve as peer support personnel for mentees and share program goals and responsibilities aimed at ensuring the retention of student participants.

For more information, visit: https://oied.ncsu.edu/divweb/msa/peer-mentor-program/
Supplemental Instruction

Supplemental Instruction (SI) is a voluntary academic support opportunity for students in selected sections of historically difficult, large lecture courses. SI supports students who want to improve their understanding of course material in a small group setting. Students are actively engaged with small group activities facilitated by the SI leader, a trained peer tutor. Several sessions are offered at various times each week. A schedule of current SI sessions can be found on the SI website (https://tutorial.dasa.ncsu.edu/si/si-schedule/).

Tuition and Fees (Graduate)

The University Cashier’s Office (https://treasurer.ofb.ncsu.edu/cashier/) provides billing, financial aid disbursement and account management services to all students. All students paying tuition and fees are entitled to University services, facilities and programs, including the services, facilities, and programs offered by the Student Center, Health Services, Physical Education Department, and Athletics Department.

Visit the Student Services Center website (https://studentservices.ncsu.edu/your-money/tuition-and-fees/) for the most up-to-date information on campus finances and student tuition and fees.

Students should view the Graduate School website for important information on Residence for Tuition Purposes (https://grad.ncsu.edu/admissions/residency/) and the North Carolina Residency Determination Service (RDS) for graduate programs.

Tuition and Fees (Undergraduate)

- North Carolina Resident: $4,550 per semester (effective 2019-2020 academic year)
- Nonresident: $14,610 per semester (effective 2019-2020 academic year)

A statement of tuition and fees is posted on each student’s account that registered during a normal registration period. Students (and authorized parents) are notified via e-mail (eBILL) when a new statement has posted. Payment in full or approved financial aid information must be received by the due date appearing on the statement. The due date is approximately two weeks before classes begin. Students registering during a late registration period will be required to pay their tuition and fees at the time of registration and may be subject to a late registration fee. Fees are the same for both residents and nonresidents and are required of all students. Nonresident students are required to pay an additional $10,060 per semester for tuition.

1. Note: Tuition and fees are fixed items of cost. The rates listed above are for Undergraduate students in a degree program. Tuition and fee rates for Distance Education courses are billed based on the student’s affiliation, see the Student Services Center website (https://studentservices.ncsu.edu/your-money/tuition-and-fees/distance-education/) for full details.

2. Health Insurance is billed unless you waive out of the program each semester. For more information, visit the Student Health website (https://healthypack.dasa.ncsu.edu/insurance-and-billing/ship/).

3. Room rent is shown as main-campus, double occupancy rate.

4. Meals, books and supplies, other personal expense, and transportation are shown as estimates.

5. For estimated costs of other student classifications please go to the Student Services Center website (https://studentservices.ncsu.edu/your-money/financial-aid/estimated-cost-of-attendance/).

Expenses Other than Tuition and General Fees

Application Fee: A nonrefundable fee $85 U.S. must accompany each application for admission ($100 for international students). Applicants may pay the fee online using their WolfPAW account.

Room Rent: New incoming students receive instructions on how to apply for housing with the letter of acceptance. Continuing students receive room reservation information each January at their residence hall rooms. The 2020-2021 residence hall room rent ranges from $3,210 to $3,925 per semester and plus a mandatory $140.00 ResNet (internet) charge. The Wolf Village Apartments charge $3,375 per semester plus mandatory charges for ResNet ($140) and cable television ($46) per person per semester. Wolf Ridge Apartments range form $3,585 per person to $4,230 per person per semester plus mandatory charges for ResNet ($140) and cable television ($46) per person per semester.

Meals: During their first academic year, new freshmen living on campus are required to participate in one of the university’s available meal plans. Meal plans are available to all registered students and costs for 2020-2021 range from $800 to $2,400. Students may also pay for meals individually at the various dining facilities available both on and near campus.
Books and Supplies: Books and supplies are usually purchased during the first week of classes directly from the NCSU Bookstores. Allow approximately $541 per semester for purchasing books and supplies.

Personal Expenses: Personal expenses vary widely among students but the estimate of $804 is based on what students report that they spend on these items.

Cooperative Education Program Fee: Required of all participating co-op students for each semester in which they are enrolled in an off-campus work assignment. This fee, set at $490 for the 2020 Fall Semester, the 2021 Spring Semester, or the combined 2021 Summer Sessions, is used for partial support of the Cooperative Education Program staff in job development and placement activities. Students paying this fee are entitled to all university services, facilities, and programs during the semester or combined summer sessions for which they are enrolled.

COE Program Enhancement Fee: Students enrolled in the College of Engineering will be charged a COE Program Enhancement Fee. This fee is used for program and infrastructure improvements in the College of Engineering to ensure our engineering students are provided career-ready skills that continue to advantage them in the marketplace. Each semester, undergraduates will be charged $750 (12 or more hours), $562.50 (9-11 hours), $375.00 (6-8 hours), and $187.50 (0-5 hours). Each semester graduate students will be charged $750 (9 or more hours), $499.95 (6-8 hours), and $249.98 (0-5 hours). Engineering students who enroll in a co-op work session will not be billed for the computing fee unless they also enroll in an NC State course.

Professional Golf Management Fee: Students enrolled in the Professional Golf Management program (PGM) will be charged $350/semester. The fee pays for golf play and practice privileges at several area golf courses.

Required Fees
Required fees are levied for services, facilities, and programs available to all students whether or not the student takes advantage of them. Students are assessed fees based on the course load they are taking. An itemization of required fees and other detailed information concerning expenses or related data can be obtained on the Student Services Center website (https://studentservices.ncsu.edu/your-money/tuition-and-fees/fees-explanation/) or by contacting:

University Cashier’s Office
NC State, Box 7213
Raleigh, North Carolina 27695-7213
919-515-2986 (Option 4), or via e-mail at studentaccounts@ncsu.edu (studentaccounts@ncsu.edu)

Refund Policy
Reduction in Hours: The last day to reduce hours and receive a refund or reduction in rates is the same as the last day to register or add hours, typically the 10th day of a fall or spring term and the 4th day of a summer session. Tuition and Fees are not prorated after this date for reduced course loads. Specific dates are posted on the Student Services Center website (https://studentservices.ncsu.edu/your-money/bill/refunds-and-reimbursements/refunds-for-reduction-in-hours/) and in MyPACK Portal.

Withdrawal: Dropping all courses for which you are registered constitutes a Withdrawal from the University. Refunds for official withdrawals from NC State University are prorated based upon the percentage of the enrollment period attended. No refunds are made for official withdrawals after 50 percent of the enrollment period has passed. The prorated withdrawal schedule for each semester is publicized on the Student Services Center website (https://studentservices.ncsu.edu/your-money/bill/refunds-and-reimbursements/refunds-for-withdrawal/).

In some instances circumstances such as severe medical issues can justify an appeal of your refund percentage. You may submit an appeal to the Fee Appeals Committee when you believe special consideration is merited. Applications for such appeals may be obtained from the Student Services Center website (https://studentservices.ncsu.edu/forms/cashier/refundapp.pdf).

Residency Determination Service (RDS)
The Residency Determination Service (RDS) was established in coordination with the University of North Carolina (UNC), the North Carolina Community College System (NCCCS), the North Carolina State Education Assistance Authority (NCSEAA), and the North Carolina Independent Colleges and Universities (NCICU) as the centralized service for determining residency for students. This service enables a student to use one residency determination for admissions applications to multiple North Carolina public colleges and universities and to demonstrate residency for state aid programs consideration at all (public and private) North Carolina colleges and universities. In compliance with state law, the UNC system requires Undergraduate, Agricultural Institute, and Non-Degree Studies students to request a residency classification through the RDS.

Learn more online at https://ncresidency.cnc.org.

Residence Status for Tuition Purposes
According to the North Carolina General Assembly (North Carolina General Statutes Section (G.S.) 116-143.1(b) (http://www.ncga.state.nc.us/EnactedLegislation/Statutes/HTML/BySection/Chapter_116/GS_116-143.1.html)), a student qualifies as a resident for tuition purposes if he or she has:

• an established legal residency (domicile) in North Carolina
• maintained that legal residence for at least 12 continuous months prior to being considered for in-state residency

The North Carolina State Residence Classification Manual (http://www.northcarolina.edu/sites/default/files/documents/state_residence_classification_manual.pdf) offers complete information on residency statutes, as well as explanations as how the two qualifications above are evaluated.

Initial Classification: The student’s initial residence classification occurs during the admission application process when the student is first admitted to a community college or UNC institution.

Reclassification: A student, accepted for admission, who is initially classified as a nonresident and believes he or she meets the requirements of G.S. 116-143.1, -143.3, or any other applicable laws and regulations may request a reclassification by completing the RDS process. The request for reclassification may be submitted either in direct response to the initial classification (if the student believes the initial classification is erroneous), or at a future time if the student has experienced a change in circumstances that he or she believes makes him or her eligible for in-state resident status. Students must submit requests for reclassification in accordance with approved procedures and
application deadlines. The institution will not assume responsibility for initiating such an inquiry independently.

Residency Reclassification Application Deadlines. Except for deadlines set out in the General Statutes, institutions (undergraduate or graduate) may set their own deadlines so long as they are not inconsistent with the deadlines. The deadline to submit the reclassification application along with all supporting documentation cannot be later than the 10th business day of the term for which the student is seeking residency reclassification. All conditions necessary for achieving in-state status must still be satisfied prior to the beginning of the academic term for which the student is seeking reclassification. It is the student’s responsibility to provide the documentation necessary to support his or her claims for in-state residency for tuition purposes by the applicable deadlines.

Residence. To qualify as a resident for tuition purposes, a person must become a legal resident and remain a legal resident for at least twelve consecutive months (365 days) immediately prior to classification. Thus, there is a distinction between legal residence and residence for tuition purposes. Furthermore, twelve months legal residence means more than simple abode in North Carolina. In particular, it means maintaining a domicile (permanent home of indefinite duration) as opposed to “maintaining a mere temporary residence or abode incident to enrollment in an institution of higher education.” The burden of establishing facts which justify classification of a student as a resident entitled to in-state tuition rates is on the applicant for such classification, who must show his or her entitlement by the preponderance (the greater part) of the residency information.

Parents’ Domicile. If an individual, irrespective of age, has living parent(s) or court appointed guardian of the person, the domicile of such parent(s) or guardian is, prima facie, the domicile of the individual; but this prima facie evidence of the individual’s domicile may or may not be sustained by other information. Further, non-domiciliary status of parents is not deemed prima facie evidence of the applicant child’s status if the applicant has lived (though not necessarily legally resided) in North Carolina for the five years preceding enrollment or registration.

Effect of Marriage. Marriage alone does not prevent a person from becoming or continuing to be a resident for tuition purposes, nor does marriage in any circumstance insure that a person will become or continue to be a resident for tuition purposes. Marriage and the legal residence of one’s spouse are, however, relevant information in determining residency intent. Furthermore, if both a husband and his wife are legal residents of North Carolina and if one of them has been a legal resident longer than the other, then the longer duration may be claimed by either spouse in meeting the twelve month requirement for in-state tuition status.

Military Personnel. Any active duty member of the armed services qualifying for admission to an institution of higher education but not qualifying as a resident for tuition purposes shall be charged the in-State tuition rate and applicable mandatory fees for enrollments while the member of the armed services is abiding in this State incident to active military duty in this State. In the event the active duty member of the armed services is reassigned outside of North Carolina or retires, the member shall continue to be eligible for the in-State tuition rate and applicable mandatory fees so long as the member was enrolled at the time the member is reassigned. In the event the active duty member of the armed services receives an Honorable Discharge from military service, the member shall continue to be eligible for the in-

State tuition rate and applicable mandatory fees so long as the member establishes residency in North Carolina within 30 days after the discharge and is continuously enrolled in the degree or other program in which the member was enrolled at the time the member is discharged.

Any dependent relative of a member of the armed services who is abiding in this State incident to active military duty, as defined by the Board of Governors of The University of North Carolina and by the State Board of Community Colleges while sharing the abode of that member shall be eligible to be charged the in-State tuition rate, if the dependent relative qualifies for admission to an institution of higher education. The dependent relatives shall comply with the requirements of the Selective Service System, if applicable, in order to be accorded this benefit. In the event the member of the armed services is reassigned outside of North Carolina or retires, the dependent relative shall continue to be eligible for the in-State tuition rate and applicable mandatory fees so long as the dependent relative is continuously enrolled in the degree or other program in which the dependent relative was enrolled at the time the member is reassigned or retires. In the event the member of the armed services receives an Honorable Discharge from military service, the dependent relative shall continue to be eligible for the in-State tuition rate and applicable mandatory fees so long as the dependent relative establishes residency within North Carolina within 30 days after the discharge and is continuously enrolled in the degree or other program in which the dependent relative was enrolled at the time the member is discharged. A person charged less than out-of-state tuition rate solely by reason of this section shall not, during the period of receiving that benefit, qualify for or be the basis of conferring the benefit of G.S. 116-143.1.

Grace Period. If a person (1) has been a bona fide legal resident, (2) has consequently been classified a resident for tuition purposes, and (3) has subsequently lost North Carolina legal residence while enrolled at a public institution of higher education, that person may continue to enjoy the in-state tuition rate for a grace period of twelve months measured from the date on which North Carolina legal residence was lost. If the twelve months extends during an academic term for which the person is enrolled at a State institution of higher education, the grace period extends, in addition, to the end of that term. The fact of marriage to one who continues domicile outside North Carolina does not by itself cause loss of legal residence marking the beginning of the grace period.

Minors. Minors (persons under 18 years of age) usually have the domicile of their parents, but certain special cases are recognized by the residence classification statute in determining residence for tuition purposes.

a) If a minor’s parents live apart, the minor’s domicile is deemed to be North Carolina for the time period(s) that either parent, as a North Carolina legal resident, may claim and does claim the minor as a tax dependent, even if other law or judicial act assigns the minor’s domicile outside North Carolina. A minor thus deemed to be a resident will not, upon achieving majority before enrolling at an institution of higher education, lose North Carolina legal residence if that person

1. Upon becoming an adult “acts, to the extent that the person’s degree of actual emancipation permits, in a manner consistent with bona fide legal residence in North Carolina” and

2. Begins enrollment at an institution of higher education not later than the fall academic term following completion of education prerequisite to admission at such institution.”

b) If a minor has lived for five or more consecutive years with relatives (other than parents) who are domiciled in North Carolina and if the
relatives have functioned during this time as if they were personal guardians, the minor will be deemed a resident for tuition purposes for an enrolled term commencing immediately after at least five years in which these circumstances have existed. If under this consideration a minor is deemed to be a resident for tuition purposes immediately prior to his or her eighteenth birthday, that person on achieving majority will be deemed a legal resident of North Carolina or at least twelve months duration. This provision acts to confer in-state tuition status even in the face of other provisions of law to the contrary; however, a person deemed a resident of twelve months duration pursuant to this provision continues to be a legal resident of the State so long as he or she does not abandon North Carolina domicile.

Lost but Regained Domicile. If a student ceases enrollment at or graduates from an institution of higher education while classified as a resident for tuition purposes and then both abandons and re-acquires North Carolina domicile within a twelve month period, that person, if he or she continues to maintain the reacquired domicile into re-enrollment at an institution of higher education, may re-enroll at the in-state tuition rate without having to meet the usual 12-month durational requirement. However, any one person may receive the benefit of this provision only once.

Change of Status. A student admitted to initial enrollment in an institution (or permitted to enroll following an absence from the institutional program which involved a formal withdrawal from enrollment) must be classified by the admitting institution either as a resident or as a nonresident for tuition purposes prior to actual enrollment. A residence status classification once assigned (and finalized pursuant to any appeal properly taken) may be changed thereafter (with corresponding change in billing rates) only at intervals corresponding with the established primary divisions of the academic year.

Transfer Students. When a student transfers from one North Carolina public institution of higher education to another, he or she is treated as a new student by the institution to which he or she is transferring and must be assigned an initial residence status classification for tuition purposes.

Non-U.S. Citizens. Persons who are not U.S. citizens but who have certain visa and immigration statuses that grant them the legal ability to establish and maintain a bona fide domicile in this country are subject to the same considerations as U.S. citizens in determining residence status for tuition purposes. If it is later discovered that the person’s visa or immigration status was obtained fraudulently, the institution shall have the right to seek and collect payment of full, out-of-state tuition, along with fees and costs associated with such collection. Non-U.S. citizens present in the United States under certain visa statuses such as tourists, visitors on business, and temporary foreign/international students do not have the legal capacity to establish a bona fide domicile in this country (and thus, not in North Carolina). As examples, holders of non-immigrant visa statuses such as B, C, D, F, J, M, Q, S, and TN visas (and dependent visas for spouses and children such as a TD visa) cannot establish domicile with these documents, in and of themselves, unless there is a change in their visa status. An EAD, in and of itself, does not confer any immigrant or non-immigrant status and does not give the EAD holder the legal capacity to establish residency for tuition purposes in this state.

UNC System Employees. A person who is a full-time employee, in a permanent position, of The University of North Carolina, or is the spouse or dependent child of a full-time employee, in a permanent position, of The University of North Carolina, and who is a legal resident of North Carolina, qualifies as a resident for tuition purposes without having maintained that legal residence for at least 12 months immediately prior to his or her classification as a resident for tuition purposes.

The following categories of persons are eligible for tuition waivers:

Survivors of Deceased Law Enforcement/ Emergency Workers. Tuition waivers are available to the surviving spouse and children of a law enforcement officer (including sheriffs), firefighter, volunteer firefighter or rescue squad worker who was killed as a direct result of a traumatic injury sustained in the line of duty (including both active service and training for active duty). Additional eligibility requirements must be met.

Families of Disabled Law Enforcement/Emergency Workers. Tuition waivers are available to the spouses and children of law enforcement officers (including sheriffs), firefighters, volunteer firefighters, or rescue squad workers who are permanently and totally disabled as a direct result of a traumatic injury sustained in the line of duty (including both active service and training for active service). Additional eligibility requirements must be met.

Note: Decisions on residence for tuition purposes are based on NC G.S. 116-143.1 and 116-143.3 and on the State Residence Classification Manual which was prepared by the General Administration of the University of North Carolina system.

This information is subject to change.
DELTA also manages the university’s learning technology infrastructure, including various asynchronous learning management systems (WolfWare, Moodle, Zoom), a tool for synchronous online teaching and learning, and lecture capture technologies for all technology-assisted courses, whether online or on-campus.

Office of Information Technology

NC State offers you a leading-edge academic computing environment to enrich your student life and learning. Here, you’ll find that many colleges and administrative and academic units are involved in providing various IT resources, services and information.

The Office of Information Technology (OIT) provides centralized campus-wide computing and information and communication technology services in support of the university’s academic and administrative goals. Some of OIT’s major services are:

- Campus-wide data network infrastructure, including the multi-gigabit network backbone and wireless computing infrastructure
- MyPack Portal, the gateway to university online enterprise systems and services, such as Human Resources, Financials and the Student Information System
- ResNet, high-speed wired and wireless Internet access for students living in campus housing
- Cable TV and telephone, which are available to all students, faculty and staff
- Hundreds of software packages for student use from computing labs, and many also available from the NC State Virtual Computing Lab (VCL) environment
- G Suite, which provides the university’s official email and calendaring services and numerous collaborative tools powered by Google
- University’s central Web servers
- File space
- Classroom technology support
- High Performance Computing (HPC) for researchers and students in computational science
- IT security for campus computing resources, including acceptable use, rules and regulations
- NC State Help Desk, which provides support to students and other users of campus resources
- Hardware and software support for student-owned computers through the OIT Walk-in Center

Unity ID and Password

As an NC State student, you will have a Unity ID and password, which are your credentials to access campus-wide computing services and facilities.

Information about your Unity ID and password and help are provided during student orientation sessions, from the NC State Help Desk, and online on the OIT (https://oit.ncsu.edu) website.

Unity Labs

As a student, you may use the Unity computer labs that are equipped with Windows, Linux and Macintosh workstations that provide direct access to information technologies. Colleges and academic departments support additional computing facilities, and overall, there are about 123 student-computing labs on campus, with about 2,800 workstations with high-speed network connections. NC State does not require you to own a computer, although specific colleges or programs may make this requirement. Information about computer recommendations, specifications and purchasing options are published online on the OIT (https://oit.ncsu.edu) website and updated annually.

Help

For additional information, see NC State’s computing resources:

- OIT (https://oit.ncsu.edu) website
- OIT Walk-in Center, West Dunn Building (corner of Dan Allen and Thurman drives)
- NC State Help Desk, 515-HELP (4357); help@ncsu.edu; or help.ncsu.edu (https://help.ncsu.edu)

Marc Hoit, Vice Chancellor for Information Technology and Chief Information Officer

Office of Institutional Equity and Diversity

The Office for Institutional Equity and Diversity (OIED) is committed to fostering an inclusive, accessible and diverse intellectual and cultural campus experience related to the mission of NC State University.

Diversity Engagement, Training and Education

The Diversity, Engagement, Training and Education unit within the Office for Institutional Equity and Diversity provides leadership in the university’s efforts to coordinate, implement and facilitate educational programs, promote cultural competence and foster an understanding of and appreciation for diversity, equity and inclusion throughout the university community. Activities include providing diversity training, programs and consultation for the recruitment, retention and success of students, faculty and staff and reviewing and recommending changes to university policies, procedures and regulations to promote diversity and enhance inclusion.

Equal Opportunity and Equity

The Equal Opportunity and Equity unit of the Office for Institutional Equity and Diversity strives to make NC State University a discrimination-free, harassment-free environment for faculty, students and staff to work, live and learn. This unit is responsible for managing and monitoring the university’s equal opportunity compliance activities, overseeing the university’s equal opportunity policies, responding to complaints, conducting investigations, developing and delivering training and educational outreach to campus and consulting with supervisors, managers and unit equity officers regarding equal opportunity concerns and initiatives.

Bias Impact Response Team

The Bias Impact Response Team (BIRT) at NC State supports the campus community by providing a system through which a person can report incidents of bias on and around campus. BIRT seeks to effectively engage with impacted individuals and groups to achieve awareness, support, education and restoration. See the BIRT website at bias-incident.ncsu.edu (http://bias-incident.ncsu.edu/).
Campus Community Centers
NC State’s Campus Community Centers report to the Office for Institutional Equity and Diversity (OIED). Collectively, the centers foster community; celebrate identity and culture; raise awareness; and support, empower and advocate for positive change for underrepresented and marginalized students, families and communities. They assist OIED in its goal of fostering an inclusive, accessible and diverse intellectual and cultural campus experience by creating spaces and activities that improve campus climate and enhance the overall educational experience for all students.

See Campus Community Centers under Student Services for information on the African American Cultural Center, GLBT Center, Multicultural Student Affairs and the Women’s Center, which report to the Office for Institutional Equity and Diversity.

Office of Professional Development
NC State University’s Office of Professional Development (OPD) is a unit of the office of Continuing and Professional Education (https://mckimmoncenter.ncsu.edu/cpe/). Dedicated to the development and delivery of non-degree professional training courses, OPD provides you with a broad range of quality educational opportunities in a flexible, comfortable, and affordable learning environment.

The Office of Professional Development (OPD) develops, promotes, and coordinates noncredit seminars, certificate programs, and conferences to a broad market on a wide range of topics. Program areas include:

- test preparation;
- accounting and taxation;
- agriculture;
- communications;
- education;
- engineering;
- English as a second language;
- environmental;
- management;
- textiles;
- and general interest.

Events management services are available to help both campus and non-campus groups more efficiently and productively administer educational seminars, workshops, and conferences.

Chip Futrell, Director
Website: ncsu.edu/opd (http://ncsu.edu/opd/)
Phone: (919) 515-2261

Office of Research and Innovation
Mladen A. Vouk, Vice Chancellor for Research and Innovation
Wade Fulghum, Assistant Vice Chancellor, Office of Research Commercialization
Genevieve Garland, Assistant Vice Chancellor for Research Operations and Communications
Jonathan Horowitz, Associate Vice Chancellor for Research Infrastructure and Development
Rick Liston, Assistant Vice Chancellor for Administration
Lorena McLaren, Executive Director, Corporate and Foundation Relations, University Development
Pradip Pramanik, Director, Proposal Development Unit
Shawn Troxler, Associate General Counsel
Alison Wilson, Associate Vice Chancellor for National Security and Special Research Initiatives

Office of the Vice Chancellor
Vice Chancellor
As Chief Research Officer (CRO), the Vice Chancellor oversees all research activities at NC State. Under his authority, units reporting to the Office of Research and Innovation centrally manage research administration, the university’s intellectual properties, and industry and government agency alliances on the university’s award-winning research campus. Researchers at NC State are supported by $405++ million in sponsored programs from federal, local government, industry, and nonprofit organizations. NC State’s research portfolio exceeds 5,000 invention disclosures, 960+ US patents (OR rated #6 in patents issued), 800 active commercialization agreements, and 595+ products to market. Centennial Campus hosts more than 70 corporate, government and nonprofit partners working with the university’s 75+ centers and institutes, laboratories and research departments.

Research Operations
The Research Operations Unit provides strategic leadership and support to the Office of Research and Innovation. The office consists of three units: Strategic Initiatives, Education and Training, and Marketing and Outreach.

Integrated Support Services Center (ISSC)
The ISSC was created to provide streamlined, professional services to faculty and administrators, eliminating costly duplication, creating efficiency and improving timeliness.

Research Development
Research Development Office (RDO)
The RDO facilitates collaboration between faculty and interdisciplinary research experts, providing strategic and responsive support that enhances the university’s most valued research initiatives. By searching a centralized, easy-to-access portal, researchers quickly find internal and external funding opportunities. Once identified, potential funding translates to successful grants with the help of Research Development’s tools and training resources that support researchers as they plan, write, and submit competitive proposals.
Centers + Institutes

NC State's Centers and Institutes reflect the university's commitment to interdisciplinary scholarly pursuit, including research, instruction and public service. These cutting-edge organizations are frontrunners in their field, blazing the trails for other researchers to follow. Research and innovation on topics ranging from climate change to textiles add value to the everyday lives of our state's citizens, maintaining public trust and admiration and standing at the forefront in global excellence for research and discovery. Here, the leadership of these organizations can access the materials, procedures and policies necessary to manage their efforts responsibly, equitably and with the highest integrity.

Proposal Development Unit (PDU)

The PDU supports faculty teams in the development of large-scale, interdisciplinary research proposals. These services include team facilitation, budget development, writing and editing, and administrative assistance, thereby enabling investigators to concentrate on the research-related aspects of their proposals. PDU support is available to NC State faculty planning proposals with estimated total budgets of at least $1M.

Research Administration and Compliance

Sponsored Programs & Regulatory Compliance Services (SPARCS)

SPARCS facilitates the submission of proposals, negotiation of agreements, the administration of internally and externally funded projects, and the administration of subagreements that provide funding to NC State. This includes all aspects of externally sponsored research and scholarship, from pre-award management to non-fiscal post-award management.

Office of Research Commercialization

Office of Research Commercialization (ORC)

NC State University is a research powerhouse and a powerful economic engine for North Carolina. ORC plays a crucial role in this by protecting and promoting University research discoveries and intellectual property, working with and guiding industry partners, and promoting the acceleration of startups. ORC provides innovators with a wide range of programs and services to protect, market, and license intellectual property developed at NC State. Collaboration with NC State innovators and industry partners has led to the creation of more than 125+ startups and 575+ commercialized products that benefit society on a local, national and global scale. Among surveyed universities without medical schools, NC State consistently ranks among the top 10 for key technology transfer metrics.

University Advancement

The mission of University Advancement of NC State University is to facilitate communication, internally and externally, and to enhance the image of the University; to provide meaningful programs and service to alumni and friends; to seek service-support participation and ambassadorship from constituents; to build and sustain a strong volunteer leadership network; to raise money from private sources; to manage the collection of private gifts for North Carolina State University; to manage an effective alumni and development database and gift systems; and to coordinate with the General Administration in areas of government and legislative priorities in Raleigh and Washington.

The office oversees a division that includes development, alumni relations, university communications, and advancement services. Visit the University Advancement website (https://leadership.ncsu.edu/advancement/) for more information.

Advancement Services

Advancement Services supports the operations of Alumni Relations, University Development and University Communications. The department oversees the alumni and donor database, working to process gifts and conduct research about potential contribution opportunities. Other initiatives include management of the University online giving website, support of the alumni association alumni web portal, conducting education and training in the areas of national best practices and rules and regulations pertaining to fundraising activities, ethics, and accountability, and management of an international listserv dedicated of the furtherance of the entire advancement services profession.

The NC State Alumni Association

The NC State Alumni Association engages alumni through programs and services that foster pride and enhance lifelong connections to NC State. The Association encourages alumni to be Red and White for Life — with connections to the university and fellow alumni no matter where they live by linking alumni to the university through membership, a statewide, national, and growing international network of alumni, programming for special-interest groups and students, events and an array of communication tools, including the award-winning NC State magazine. The Alumni Association offers membership options and benefits for alumni who join, and supports a growing Student Alumni Association (SAA), with events and programming that builds connections and enhances their student experience. The Association also sustains the prestigious Caldwell Fellows Scholarship Program, funded by alumni endowments and contributions, and designed to foster academic excellence, leadership, personal growth and service learning.

The Association upholds campus traditions such as the official class ring, Homecoming, Ram Roast, the Tradition Keepers Medals, Wolfpack Freshmen Welcome events, and Founders’ Day, as well as the Legacy Luncheon for incoming freshmen whose parents and/or grandparents attended NC State. In addition, the Association is responsible for the Evening of Stars Gala to celebrate NC State’s distinguished alumni, and the Faculty Awards to recognize the achievements of the university’s outstanding undergraduate and graduate faculty. The Association offers services such as the Wolf Treks alumni travel program and Career Services. Students and alumni can visit the Alumni Association in the Dorothy and Roy Park Alumni Center on Centennial Campus, or contact the Alumni Association at (919) 515-3375 or (800) 627-2586. For a complete overview of programs, services and events, visit the Alumni Association’s website (http://www.alumni.ncsu.edu).

University Development

University Development works with the colleges and programs at North Carolina State University to secure private financial support for priority projects and programs. This support may come from individuals (alumni, parents, students, faculty, staff, and friends), corporations, philanthropic foundations and other organizations. The mission of University Development is to strengthen relationships with alumni and friends and reconnect them with campus colleagues in their colleges and areas of interest, reach out to alumni and friends living out-of-state to carry the messages of NC State’s progress, success, and vision for the
future, and to serve as liaisons to university-wide programs to support
their fundraising and outreach efforts.

University Development provides services to the colleges and programs
in capital campaigns, gift planning, corporate & foundation relations,
and annual giving. University Development also facilitates external and
internal communication among fundraisers, and coordinates approaches
to prospective donors.

**University Communications and Marketing**

University Communications and Marketing builds positive relationships
between NC State University and its many constituents through strategic
internal and external communications that convey the university’s brand
identity. The office is comprised of university relations, marketing and
creative strategies, web communications, and special events, and
focuses on:

- Increasing awareness of the university’s distinctive benefits
- Ensuring consistency in university-wide messaging and visual identity
  by facilitating integration and coordination of public relations and
  communications efforts through out the university
- Monitoring and responding to public issues and perceptions
- Providing marketing, communication and Web strategy, counsel and
  creative services to campus clients
- Providing guidance and resource assistance for university events

**Leadership**

Brian C. Sischo, Vice Chancellor for University Advancement

Brad C. Bohlander, Associate Vice Chancellor for University
Communications & Chief Communications Officer

Jim Broschart, Associate Vice Chancellor for University Development

Derek Bryan, Assistant Vice Chancellor of Finance and
Administration

Jeff Baynham, Interim Associate Vice Chancellor for Advancement

Services

Maggie Musick, Interim Executive Assistant to the Vice Chancellor

Reid Ricciardi, Executive Director of Talent Management

Benny Suggs, Associate Vice Chancellor and Executive Director for
Alumni Relations & Alumni Association

Alan Taylor, Assistant Vice Chancellor for Principal Gifts

Christina Walker, Chief of Staff and Executive Director of University
Advancement

**NC State Policies**

North Carolina State University is committed to academic integrity, and all
students are required to adhere to the NC State Code of Student Conduct
(https://policies.ncsu.edu/policy/pol-11-35-01/). Individual policies on
conduct, including those listed below, are posted on University Policies,
Regulations, and Rules (https://policies.ncsu.edu/) (PPRs).

University Patent Procedures (https://policies.ncsu.edu/policy/pol-10-00-01/)

Grievance Procedures for Graduate Students (https://policies.ncsu.edu/
regulation/reg-11-40-02/)

Code of Student Conduct (https://policies.ncsu.edu/policy/pol-11-35-01/)

Academic Integrity (https://policies.ncsu.edu/policy/pol-11-35-01/)

Policy on Illegal Drugs (https://policies.ncsu.edu/policy/pol-04-20-05/)

Sexual Harassment Policy (https://policies.ncsu.edu/regulation/
reg-04-25-02/)

Racial Harassment Policy (https://policies.ncsu.edu/regulation/
reg-04-25-02/)

University Copyright Procedures (https://policies.ncsu.edu/regulation/
reg-01-25-03/)

**Equal Opportunity and Non-Discrimination**

It is the policy of the State of North Carolina to provide equality of
opportunity in education and employment for all students and employees.
Accordingly, the university does not practice or condone unlawful
discrimination in any form against students, employees or applicants on
the basis of race, color, religion, creed, sex, national origin, age, disability
or veteran status. Nor does the university allow discrimination on the
basis of sexual orientation with respect to internal university matters
that do not contravene federal or state law and that do not interfere with
the University’s relationships with outside organizations, including the
federal government, the military, ROTC, and private employers.  [NOTE:
The NC State University equal opportunity and nondiscrimination policy
includes transsexual individuals within the policy’s prohibitions against
discrimination on the basis of sex. This includes actual or perceived
gender identity and gender expression. See Price Waterhouse v.
Hopkins, 490 U.S. 228 (1989); Smith v. City of Salem, 378 F.3d 566 (6th
Circ. 2004).] Retaliation against any person complaining of discrimination
is in violation of federal and state law and North Carolina State University
policy, and will not be tolerated.

**Unlawful Harassment**

Harassment based upon race, color, religion, creed, sex, national origin,
veteran status, age, or disability is a form of discrimination in violation of
federal and state law and North Carolina State University policy and will
not be tolerated. It is the internal policy of North Carolina State University
to prohibit harassment on the basis of sexual orientation. Retaliation
against any person complaining of harassment is in violation of federal
and state law and North Carolina State University policy, and will not
be tolerated. North Carolina State University will respond promptly to
all complaints of harassment and retaliation. Violation of this policy can
result in serious disciplinary action up to and including expulsion for
students or discharge for employees.

Every individual is encouraged, and should feel free, to seek assistance,
information and guidance from his/her supervisor, the Office for Equal
Opportunity, the Office of Student Conduct or the Employees Relations
section of Human Resources. For additional information, contact:
Office for Equal Opportunity, 1 Holliday Hall, Box 7530, North Carolina
State University, Raleigh, NC 27695-7530, Phone: (919) 513-1234 or
515-3148.

**Disability Resource Office**

Individuals desiring reasonable accommodations for their documented
disabilities should contact the Disability Resource Office (https://
dro.dasa.ncsu.edu/) (DRO), 2751 Cates Avenue, Holmes Hall,
(919) 515-7653 (Voice), (919) 515-8830 (TTY). Services and
accommodations are provided based on an individual’s documented
needs and are determined in consultation with the individual and a
DRO representative. For students, such requests should be made
far in advance of registration deadlines to ensure timely services and
accommodations. DRO will maintain appropriate confidentiality of records and communication regarding disability.

Associations and Accreditation

Associations

The university is a member of the Association of Public and Land-grant Universities, the American Council on Education, the Association of Governing Boards of Universities and Colleges, the Association of American Colleges and Universities, the Education Advisory Board, the Engagement Scholarship Consortium, the National Association of College and University Business Officers, the Oak Ridge Associated Universities, the Southern Association of Colleges and Schools Commission on Colleges, Campus Compact, the University Professional and Continuing Education Association, and the Cooperating Raleigh Colleges.

Accreditation

North Carolina State University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award associate, baccalaureate, master's and doctoral degrees. Contact the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of NC State University.

In addition, many of the university's professional programs and departments are accredited by national professional associations, including:

Equal Opportunity and Non-Discrimination Policy

It is the policy of the State of North Carolina to provide equality of opportunity in education and employment for all students and employees. Educational and employment decisions should be based on factors that are germane to academic abilities or job performance. North Carolina State University ("NC State") strives to build and maintain an environment that supports and rewards individuals on the basis of relevant factors such as ability, merit, and performance. Accordingly, NC State engages in equal opportunity and affirmative action efforts and prohibits discrimination, harassment and retaliation, as defined by NC State's Equal Opportunity and Non-Discrimination Policy (POL 04.25.05) (https://policies.ncsu.edu/policy/pol-04-25-05/).¹

NC State will promptly, thoroughly and impartially respond to all complaints of Discrimination, Harassment and Retaliation.

Any individual with a complaint of Discrimination, Harassment or Retaliation should use the procedures outlined in the Resolution Procedures for Discrimination, Harassment and Retaliation Complaints.

Substantiated instances of Discrimination, Harassment and Retaliation, as defined in the policy, are violations of the policy and will not be tolerated by NC State.

For more information, please contact:

Office for Institutional Equity and Diversity
231 Winslow Hall
Box 7530
NC State University
Raleigh, NC 27695-7530
Phone: 919.515.5148
TTY: (919) 515-9617
Website: http://oied.ncsu.edu/oied/

¹ This policy is established in accordance with 41 CFR Part 60 and is implemented in accordance with applicable laws and their amendments, including but not limited to, Title VI and Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Executive Order 11246, the Age Discrimination in Employment Act of 1975, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, the Vietnam Era Veterans' Readjustment Assistance Act of 1974, the Civil Rights Restoration Act of 1988, North Carolina General Statutes Chapters 116 and 126.

Discrimination, defined as unequal and unlawful treatment based upon race, color, religion, creed, sex,² national origin, age, disability, veteran's status, or genetic information is a violation of this policy and will not be tolerated by NC State. Discrimination based on sexual orientation is also prohibited by this policy². Harassment is unwelcome conduct based upon race, color, religion, creed, sex, national origin, age, disability, veteran status or sexual orientation that either 1) creates a quid pro quo situation, or 2) creates a hostile working or learning environment. Retaliation is an adverse action against a covered individual because that individual engaged in a protected activity.

NC State will respond promptly to all complaints of discrimination, harassment and retaliation. Violation of this policy can result in serious disciplinary action up to and including expulsion for students or discharge for employees.

Any individual with a concern, grievance or complaint of discrimination, harassment or retaliation should use the procedures outlined in the Resolution Procedures for Discrimination, Harassment and Retaliation Complaints.

For more information, please contact:

The Office for Institutional Equity and Diversity
231 Winslow Hall
Box 7530, NC State University
Raleigh, NC 27695-7530
Phone: (919) 515-3148
fax: (919) 513-1428
TTY: (919) 515-9617
Website: http://oied.ncsu.edu/oied/

² The policy's prohibition against discrimination on the basis of sex includes actual or perceived gender identity and gender expression.
³ NC State does not allow discrimination nor harassment on the basis of sexual orientation with respect to internal university matters that do not contravene federal or state law and that do not interfere with NC State's relationship with outside organizations, including the federal government, the military, ROTC, and private employers.

Student Activities

At NC State, we are dedicated to providing students with not only a world-class education, but a well-rounded and enriching collegiate experience. Students have the opportunity to take in thrilling performances put on by Arts NC State, connect with like-minded peers by joining or beginning any of 700+ student organizations through Student
Involvement, or cheer on the Wolfpack with pride as our 23 varsity sports teams take on the competition.

Take a look through the resources below to see just some of the ways that students can get involved and stay active both on and off campus with the Wolfpack community.

- Arts NC State (p. 41)
- Campus Facilities (p. 42)
- Intercollegiate Athletics (p. 44)
- Student Involvement (p. 45)
- Student Media (p. 45)

Arts NC State

The six visual and performing arts programs of Arts NC State - Crafts Center, the Dance Program, the Gregg Museum of Art & Design, the Department of Music, NC State LIVE and University Theatre – provide opportunities for our students and our community to explore, learn, create, and grow. Whether through academic courses, cutting-edge performances and exhibitions or the preservation of traditional crafts, Arts NC State educates our students for the 21st century while providing a living link to our rich cultural heritage. For additional information, please visit the Arts NC State website (https://arts.ncsu.edu/).

The Crafts Center

Explore your creative side and Make it Here! The NC State Crafts Center is an excellent resource for all students. Whether you’re interested in learning a skill or just want to “de-stress,” the Center has a comprehensive range of offerings in clay, digital photography, wood, jewelry/metals, fibers, glass, lapidary, mixed media and more. The Crafts Center is a diverse and creative space where skill and self-expression are fostered through the making and sharing of art and craft. Join us for special student-only classes such as Friday CRAFTernoons, Stressbusters and more. It’s also a great place to visit, study and surround yourself with creativity. Mentorship thrives at the Center. Professional staff and crafts instructors provide quality technical advice and materials support. With the intent of enhancing quality of life, the Crafts Center reaches out through academic collaboration, support for student life, and partnerships with other arts organizations. Participation in associated crafts guilds that routinely meet at the Crafts Center provides NC State students a creative platform within the university and beyond.

For answers to your questions about the Crafts Center, please call 919.515.2457 or visit the Crafts Center website (https://crafts.arts.ncsu.edu/) for our upcoming programming, calendar information, map and directions.

Dance Program

The NC State Dance Program gives students the opportunity to study dance through direct experience in choreography and performance. The program’s two student companies, the State Dance Company (DAN 295 Problems of Dance Performance) and the Panoramic Dance Project (DAN 210 Current Trends in Afrocentric and World Dance), are open by audition. A vast array of classes, offered through the Master Class Series, are open to all NC State students, faculty and staff. The program also offers other academic courses such as Dance Composition (DAN 272 Dance Composition - Solo Forms) and Hip-hop Dance (DAN 260 Hip-hop Dance).

The Dance Program provides a rich training ground for choreographers through the study of composition, independent study, and guided choreographic projects. As undergraduate and graduate students pursuing degrees in various fields, the dancers at NC State bring their diverse insights and experiences into the artistic process and contribute meaningfully to the art. The Dance Program’s three annual concerts are described below:

- The Dance Program Fall Concert: The Fall Concert features the choreography of current students who create work through independent study, as well as guest artists and company directors. Both the State Dance Company and the Panoramic Dance Project are represented on the Fall Concert.

- State Dance Company Concert: The State Dance Company performs a distinguished collection of modern dance for their annual concert. The concert features premiere and repertory work created by the dance program directors and invited guest artists.

- Panoramic Dance Project Concert: For their annual spring concert, the Panoramic Dance Project presents a variety of dance styles in a world context with a focus on African, hip-hop and Latin dance. The concert features work by the director, guest artists and selected student choreographers.

For more information, please contact 919.515.7034 or visit the Dance Program website (https://dance.arts.ncsu.edu/).

Gregg Museum of Art & Design

The Gregg Museum seeks to inspire creativity, innovation and the expression of ideas. With frequently-changing exhibitions and exciting free programs like films, artist talks, workshops, or yoga nearly every week, there’s always something new to see or do at the Gregg. As one of NC State’s designated Student Centers, the museum and its surrounding gardens offer a great place to study, have a picnic, or hang out with friends in a stimulating environment. Wifi is available both outdoors and inside.

The Gregg collection includes more than 35,000 objects from every continent, such as ceramics, glass, textiles, furniture, photography, paintings and sculptures, folk and outsider art, works on paper, Native American art, industrial design, archaeological artifacts, and fashion and costume. If you’re looking for inspiration or researching a topic involving objects, feel free to approach the museum staff for help. Each semester the Gregg also offers internships (for class credit) and paid student positions that provide experience in museum work.

To schedule tours or class visits, or to plan to use the permanent collection for research, please call 919.515.3503 or visit gregg.arts.ncsu.edu (https://gregg.arts.ncsu.edu/).

The Gregg is located at 1903 Hillsborough Street, just across Pullen Road from the university’s Memorial Belltower, at the northern tip of Pullen Park. Opening hours are 10am-5pm Tuesday, Wednesday, Friday and Saturday; 10am-9pm Thursday; and 1pm-5pm on Sunday. The galleries are closed Mondays. Admission is free.

Department of Music

The Department of Music provides educational and performance opportunities for student and community participants through a variety of musical experiences and academic courses. Both a 15-hour minor in Arts Entrepreneurship and a 20-hour music minor is offered for qualified undergraduate students who wish to engage in more extensive study of
music and the arts. Three tracks are offered: Performance, Composition, and General Studies.

For full descriptions of the academic courses, consult the Department of Music (p. 1493) page in the NC State University Course Catalog, contact 919.515.2981 or visit the Department of Music's website. (https://music.arts.ncsu.edu/)

A wide variety of performing ensembles provide opportunities for students to develop both artistically and intellectually through applied music study. Through performance, the ensembles play an important role in campus life, presenting public concerts and performing at official functions (both on and off campus) and athletic events. Curricular performing ensembles receive one academic credit that may be used to satisfy free elective requirements in any academic major. Membership in most ensembles requires an audition with the instructor. See the Department of Music's website (https://music.arts.ncsu.edu/) for audition information.

- **Choral Ensembles.** The Choral program offers students from all academic areas an opportunity to participate in the exploration and performance of the highest quality choral repertoire from all eras. The ensembles include State Chorale, Tenor-Bass Choir (Singing Statesmen), Soprano-Alto Choir (Vox Aculalia), and the African American Choral Ensemble. Performance highlights have included concerts every semester, tours and occasional collaborations with other ensembles.

- **Orchestras.** The Raleigh Civic Symphony and Chamber Orchestra combine student and community musicians with professional leaders to present concerts of innovative programming on campus and in other Triangle area venues. Area professionals serve as concertmaster, principal cellist, and guest coaches, to provide high-level instruction and leadership to community and student players. Both orchestras require an audition.

- **Athletic Bands.** The Marching Band (Power Sound of the South) is active during football season, and the Varsity (Pep) Band is active during basketball season. Students must audition for a band and will be placed according to their ability and interest.

- **Concert Bands.** Two concert bands, the Symphonic Band and the Wind Ensemble, are offered each semester. Students must audition for the Wind Ensemble and will be placed according to their ability and interest.

- **Jazz Ensembles.** The jazz program includes Jazz Ensemble I, Jazz Ensemble II and a variety of Jazz Combos. The jazz groups perform both on and off campus during the fall and spring semesters. Students must audition for a jazz ensemble or combo and will be placed according to their ability and interest.

- **Piano.** Beginning piano classes are offered to students from all academic areas for credit. No previous experience is required. Applied lessons are offered to advanced piano students who have passed an audition and are admitted to the music minor program in piano performance with limited additional openings for non-minors.

- **Voice.** A Vocal Techniques class is offered to beginning voice students for credit with instructor approval. Previous voice study is not required. Applied voice lessons are offered to advanced voice students who have passed an audition and are admitted to the music minor program in vocal performance with limited additional openings for non-minors.

- **Pipes & Drums.** Students may learn to play the bagpipes, an instrument known to many of North Carolina’s earliest settlers. Pipes, drums, and other equipment are furnished. Beginning pipe and drum lessons are available to students without previous experience.

**NC State LIVE**

Experience amazing performers from around the world. A typical NC State LIVE season features outstanding professional artists from a wide range of disciplines, including jazz, world music, modern and contemporary dance, drama and comedy. Discounted tickets are available to NC State students, faculty, and staff, as well as parents of current NC State students and members of the NC State Alumni Association. The NC State community also has the opportunity to engage with world-class artists through free workshops, master classes, artist lectures, and more. Contact: 919.515.3030 or visit the NC State LIVE website (https://live.arts.ncsu.edu/).

**University Theatre**

University Theatre is NC State’s volunteer student theatre, open to all students regardless of major. Through our large-scale Main Stage series, cutting-edge performance based Open Door Series, and professional summer TheatreFEST series, students can enjoy theatrical works that tell stories from different perspectives and in varied genres.

Participating both on stage and backstage, students can be a part of the campus theatre community. Audition for a show; develop skills in our various shops, including scenery, costumes, lighting, sound or projections; join a production crew; or become a member of our stage management team. Academic classes are offered in conjunction with our theatre minor and numerous workshops throughout the year. Employment opportunities for live events are also offered. University Theatre is also home to a chapter of Alpha Psi Omega national theatre honor society.

Contact: 919.515.3927 or visit the University Theatre website (https://theatre.arts.ncsu.edu/).

**Ticket Central**

Ticket Central serves as the centralized box office for the visual and performing arts programs at NC State. Ticket Central tickets events in a variety of performance venues including Titmus Theatre, Kennedy-McIlwee Theatre, and the Talley Student Union. In addition to serving the six Arts NC State programs, Ticket Central provides ticketing services on a fee basis for many campus and community organizations.

The box office is located in the main lobby of Thompson Hall. Normal hours of operation are Monday-Friday 1- 6 p.m. If there are performances during the week, the box office will remain open until curtain. On weekends with performances, the box office will open one hour prior to curtain. Hours vary during University holidays and during the summer. Tickets may be purchased in person, over the phone by calling 919.515.1100, or online by visiting the Ticket Central website (https://tickets.arts.ncsu.edu/).

**Campus Facilities**

NC State’s campus facilities are home to many of our student activities and events. From screening films in the historic Witherspoon Student Center, joining Student Government meetings in Talley Student Union, participating in intramural sports at the Carmichael Complex, or watching one of University Theatre’s student-directed plays in Frank Thompson Hall, students and visitors can have a variety of experiences all right here on campus. Here are just a few of the spots that serve our student activities and services.
The Campus Cinema

The Campus Cinema, located in Witherspoon Student Center, presents films ranging from independent works to the latest Hollywood blockbusters in digital format with Dolby® Digital Surround Sound. The cinema is a fully functional movie theatre with 460 seats and a concession stand offering freshly popped popcorn, one free popcorn per person. Movie screenings are free to NC State and the general public unless otherwise specified. Check out the cinema website at: https://uab.ncsu.edu/films-schedule/ (http://uab.ncsu.edu/films-schedule/). If you desire any assistive devices, services, or other accommodations to participate in these activities, please contact the UAB Films Advisor at 919-515-5168.

Carmichael Complex

Carmichael Complex consists of Carmichael Gym, Carmichael Recreation Center, Willis R. Casey Aquatic Center, Miller Fields, 12 tennis courts, and 8 basketball courts, which offer a wide variety of indoor and outdoor fitness choices for students. Students may use the pools, indoor track, courts, cardio equipment, the outdoor fields, and tennis courts unless otherwise reserved for classes, events or maintenance. The Carmichael Complex is home to University Recreation and the Department of Health & Exercise Studies. For more information, please visit the Carmichael Complex website (http://recreation.ncsu.edu/facilities/carmichael/) or call (919) 515-PLAY (7529).

Gregg Museum of Art & Design

Gregg Museum of Art & Design is NC State’s collecting museum, with more than 35,000 examples of contemporary and historic ceramics, textiles, glass, furniture, photography, paintings, sculptures, folk and outsider art, archaeological artifacts, works on paper, and fashion garments preserved in its permanent collection. Frequently-changing exhibitions and interesting programs make every visit special.

Located in the original 1928 Chancellor’s Residence at 1903 Hillsborough Street (just across from NC State’s famous Memorial Belltower), the Gregg includes period rooms, formal gardens, and a contemporary 15,000 sq ft. galleries wing. All are used as exhibition and programming spaces, and are free and open to students and public alike.

Departments, groups, and individuals may also book spaces for private meetings, conferences, workshops, parties, weddings, and other events. Call 919-515-8956 for rates and availability.

To schedule tours or class visits, or to make arrangements to use the permanent collection, call 919-515-3503 or visit Gregg.arts.ncsu.edu (https://gregg.arts.ncsu.edu/). The Gregg and its surroundings offer a great place to meet, hang out, study, play, or have a picnic in a stimulating environment. WiFi is available both inside and outdoors. Hours are 10am-5pm Tuesday, Wednesday, Friday and Saturday; 10am-9pm Thursday; and 1pm-5pm on Sunday. The galleries are closed Mondays. Admission is free.

Price Music Center (PMC)

Price Music Center (PMC) is the location for the Department of Music and its programs. Until 1965, the first Pullen Hall had been the original music building, which, along with many band instruments, pianos, and a music library, was destroyed by a student arsonist. Built in 1971, Price Music Center is named to honor Percy Walter (Daddy) Price, the father of today’s musical organizations on campus and the University’s first music director in 1923.

Practice studios are available to NC State students on a first-come, first-served basis. Each practice room has an upright piano and music stand. For questions about practice space in Price, call 919.515.2981. For more information, see Department of Music (https://music.arts.ncsu.edu/).

Price Music Center is located at 2620 Cates Avenue, next to the Talley Student Union. The main office is located on the second floor, room 203. Additional facilities and offices are located in the south wing of Broughton Hall.

Talley Student Union (TSU)

Talley Student Union (TSU) is the hub of student life on campus and is the place to study, shop, dine and engage with your peers. Talley Student Union is anchored with nine food venues, Wolfpack Outfitters, the Woodward Student Involvement Center and Stewart Theatre. If students are looking to connect with the arts, enhance their leadership skills, or connect with peers, Talley Student Union is the place to start. Students can even be part of the amazing student employment team that operates the facility.

Program offices and service areas that can be found in the Talley Student Union include:

• Arts NC State;
• Center for Student Leadership;
• Dance Program;
• Ethics & Public Service;
• Fraternity and Sorority Life; GLBT Center;
• Multicultural Student Affairs; Student Involvement;
• NC State LIVE;
• NC State Student Centers Administration;
• Student Centers Board of Directors;
• Union Activities Board;
• University Theatre Administration;
• Women’s Center;
• RAVE! Events;
• Ticket Central;
• and University Graduate Student Association.

RAVE! Events

To reserve room in the Talley Student Union or to plan your event, please visit R (http://campusenterprises.ncsu.edu/talley-student-union)/RAVE!‘s website (https://campusenterprises.ncsu.edu/rave-events/) or contact RAVE! Events at 51-EVENT (513-8368).

Frank Thompson Hall

Frank Thompson Hall is the location for University Theatre and the Crafts Center. Built in 1925 as a gymnasium, Thompson Hall reopened in Fall 2009 after an extensive renovation that was an extraordinary partnership between NC State students, private citizens, businesses and the extended NC State community.

Thompson Hall houses University Theatre’s full production activities, performances, and classes. Facilities include the Titmus Theatre, the Kennedy-McIlwee Studio Theatre, the costume shop, the scenic construction and paint shop, lighting and sound facilities, as well as
rehearsal and classroom spaces. The renovation brought state-of-the-art technologies and improved accessibility to the building that now returns to its purpose as a hub of student activity. For more information, see University Theatre (https://theatre.arts.ncsu.edu/).

Located on the ground floor of Thompson Hall, the Crafts Center offers technology-rich studios and specializes in classes and workshops in clay, digital photography, wood, jewelry/metals, fibers, glass, lapidary, mixed media and more. For more than fifty years, the Crafts Center has provided a friendly learning environment for students and craftspeople of all levels. NC State’s Crafts Center is one of the finest university crafts programs in the country. Classes and studio use are available to NC State students, alumni, employees, and the general public. For information, see Crafts Center (https://crafts.arts.ncsu.edu/).

Thompson Hall is located on Dunn Street and Jensen Drive.

Witherspoon Student Center (WSC)

Witherspoon Student Center (WSC) currently houses the African-American Cultural Center, Student Government and Student Media which includes the offices of five student-run media organizations:

- Agromeck (yearbook);
- The Nubian Message and Technician (newspapers);
- Windhover (literary magazine);
- and WKNC FM 88.1 (radio station).

Witherspoon includes two accessible balconies; one meeting room available by reservation through REM; the African-American Cultural Center’s Sankofa Room, Gallery and Library; and Campus Cinema, used for films, lectures, classes and special events.

**Intercollegiate Athletics**

**Go Pack!**

NC State has a long and storied history in athletics, as well as a loud and passionate fanbase that supports the Wolfpack faithfully. The university’s athletics programs (http://www.gopack.com/) enjoy a tradition of excellence as they compete in the prestigious Atlantic Coast Conference.

The athletics program is self-supporting and is operated primarily through gate receipts, radio and television revenues, NCAA distributions, student fees, and private donations. Funds for athletics grants-in-aid are provided through the North Carolina State Student Aid Association, also known as the Wolfpack Club.

**Sports**

The Department of Athletics conducts the university’s intercollegiate athletics program, which includes 23 varsity sports. The athletics program is administered by the Director of Athletics, Boo Corrigan. The Council on Athletics is appointed by the Chancellor and serves in an advisory capacity to the Director of Athletics and the Chancellor.

Men’s varsity sports include soccer, cross country, and football in the fall; basketball, swimming and diving, indoor track, and wrestling in the winter; and outdoor track, golf, softball and tennis in the spring. Varsity sports for women include soccer, cross country, and volleyball in the fall; basketball, indoor track, swimming and diving, and gymnastics in the winter; and outdoor track, golf, softball and tennis in the spring. The co-ed rifle team competes during the winter.

**Athletics Facilities**

The Wolfpack’s football facility, Carter-Finley Stadium, boasts 57,600 permanent seats. The 106,000 square-foot Murphy Football Center, which is the operations hub for the football program, stands in the south end zone, while the Finley Fieldhouse houses visitor locker rooms and other operations spaces on the north end of the field. Soaring high above it all is Vaughan Towers, a 117,000 square-foot structure along the west grandstand that houses 955 club-level seats, 51 private luxury suites, a University suite for the Chancellor and a state-of-the-art press box.

The men’s basketball squad competes in the PNC Arena, which boasts one of the top capacities in the Atlantic Coast Conference with seating for 19,500 fans. Since PNC Arena opened in 1999-2000, NC State has finished every year in the top-25 nationally in attendance. The women’s basketball squad plays in the James T. Valvano Arena at William Neal Reynolds Coliseum – one of nine areas on campus designated as a “hallowed space.” The arena has seating for 5,500 in the facility which recently underwent a $35 million renovation and now houses the Wolfpack Walk of Fame and History. It’s also the home of gymnastics, wrestling and rifle, as well as NC State’s ROTC programs.

Located in the heart of campus, the Dail Soccer Field is located inside Paul Derr Track under stadium lights. Adjacent to that complex is the Dail Softball Stadium. Situated across from historic Reynolds Coliseum, the picturesque campus setting serves as the background for one of the best softball facilities in the ACC.

With seating for 3,480, Doak Field at Dail Park has been the home of Wolfpack baseball for over 50 years. Across the street from “The Doak” is the J.W. Isenhour Tennis Center. The outdoor stadium, has six lighted courts, chairback seating for up to 1,000 spectators, and an electronic scoreboard. The indoor courts, named in honor of former Wolfpack standout Andy Andrews, provides seating for up to 200 spectators.

The golf team trains at the beautiful Lonnie Poole Golf Course, an 18-hole, 7,350-yard, par 71 public course located on Centennial Campus. The $11.6 million dollar Arnold Palmer Signature multipurpose golf course also houses a research center and The Carol Johnson Poole Clubhouse. This facility also supports critical academic programs, including the Professional Golf Management (PGM) and turfgrass programs.

The Willis R. Casey Aquatic Center serves as the hub for the Pack’s nationally-ranked swimming and diving teams. The site of many ACC Championship meets over the years, it features two pools and spectacular seating for approximately 1,000 fans.

The Wolfpack’s athletics administrative offices and coaches’ offices for soccer, track and cross country, and wrestling are located in the Weisiger Brown General Athletics Facility. The Case Athletics Center houses the Academic Support Program for Student-Athletes.

The fundraising offices of the Wolfpack Club and the athletic department’s ticket offices are located in the Palisades Building near Carter-Finley Stadium: 5400 Trinity Rd. (Suite 500), Raleigh, NC 27607.

For ticket information call (919) 865-1510 or 1-800-310-Pack. The main athletic department receptionist: (919) 515-2101. Visit the official athletic department website (http://www.gopack.com/) for complete information.
Student Involvement

Student Involvement
The Wolfpack’s starting place for students to get involved at NC State, Student Involvement helps students find fun and meaningful ways to make NC State home through involvement on campus. The department supports the Wolfpack’s diverse community of student organization members, leaders, and advisors through advising, education, and programming. Student Involvement also provides resources to students that make it easy to find any of over 700 student organizations to join or start an organization that doesn’t exist.

Getting involved is an important way students can develop the sense of belonging necessary for academic success, personal and professional development. Being involved on campus is a great way to build a sense of belonging at NC State, increase cultural competencies and develop multiple perspectives, as well develop academically, personally, and professionally.

Email: studentinvolvement@ncsu.edu

Student Government
Founded in 1921, Student Government is a student-run organization that serves as the official voice of the student body. The organization attempts to better the student experience at NC State by working alongside university administrators to address student concerns.

Student Government is organized into five primary areas: executive, legislative, judicial, the treasury, and the Board of Elections. Student organizations may seek funding from Student Government appropriations committee through a bi-annual process.

McKenzy Heavlin, Student Body Vice President
Coleman Simpson, Student Senate President
Garrison Seitz, Student Body Treasurer

The University Activities Board
The University Activities Board (UAB) was formed in 1951 to produce quality programming “for the students, by the students.” The mission of UAB is to create innovative activities that stimulate, motivate, educate, and involve the student body. Annual programs include Wolfstock, Pan-African Week, and TUFFTalks.

Bri Murphy, Vice President of Internal Affairs

Fraternity and Sorority Life
There are over 50 fraternities and sororities at NC State University, each founded to prepare students for society through a values-based fraternal experience. Affiliation with an organization is designed to empower students to pursue their potential, providing opportunities to belong, give, achieve, live and lead. How organizations enact those values through membership, programs, and activities are what makes each organization unique. Fraternities and sororities provide opportunities to get involved, helping students on a large campus build a support network of peers that share similar goals and interests. Organizations challenge members to take on new responsibilities, develop their leadership potential, be active within the campus and surrounding communities, and adopt a commitment to volunteerism and civic engagement. Fraternities and sororities also provide their members with a unique lifetime membership, connecting them with local graduate and alumni chapters and national alumni groups well after graduation.

Approximately half of our chapters provide housing for their members with 15 chapters currently living in Greek Village on campus and 4 new homes under construction. The University, in partnership with our fraternities and sororities, has committed to redevelop Greek Village over the next 10 years. At completion, Greek Village will be home to over 35 different fraternities and sororities in a combination of homes, townhouses and apartments.

For more information on membership, educational programming, or service opportunities, visit the Department of Fraternity and Sorority Life’s website, the office in 5261 Talley Student Union, or call (919) 513-2910.
Website: fsl.dasa.ncsu.edu
Shelly Brown Dobek, Director of Fraternity and Sorority Life

Student Media
Department website: https://ncsu.edu/sma
NC State students have the opportunity to produce and manage a variety of student-oriented media. By working with these media, students gain valuable co-curricular experience in sales, marketing, journalism, broadcasting, production, design, multimedia communication, leadership and management. NC State boasts five media outlets staffed by students and supported in large part by self-generated non-fee revenue, as well as a student-staffed Business and Marketing office which coordinates advertising sales, sponsorships and full-service marketing opportunities for all five media. Many staff positions are paid.

Agromeck
Agromeck, the university’s yearbook, provides a record in words and pictures of student and campus activities each year. Student staff members include photojournalists, writers, designers and editors, all with a common mission: documenting the history of the university from the student perspective. The Agromeck has received the nation’s highest awards for general excellence and photography as well as national Pacemaker and Crown awards.

Nubian Message
Nubian Message provides news and features about the African-American community at NC State, as well as coverage of regional, state and
national issues of interest to our students. To find out more about this bi-weekly publication, visit the Nubian Message online.

**Technician**

The Technician, the university’s oldest student newspaper, is published each Thursday when school is in session during the fall and spring semesters, and online with breaking news and online-only content year-round at technicianonline.com (https://technicianonline.com). With a print circulation of 4,000 copies at nearly 100 newsstands on and near campus, the Technician has earned numerous state and national awards for news, features, sports, opinion writing and photography, as well as general excellence. Online, you’ll find continuous updates of news, features, sports, campus events, and other content of interest to students, including video, audio and photo slideshows.

**The Windhover**

The Windhover, the campus literary and visual arts magazine, is published each spring. As a showcase for NC State’s creative writers, poets, artists, photographers and musicians, it has received numerous national awards, including the Pacemaker from the Associated Collegiate Press and Gold Crown from the Columbia Scholastic Press Association. Visit the Windhover online (http://www.ncsu.edu/windhover/).

**WKNC (88.1 FM)**

WKNC (88.1 FM), NC State’s student radio station, operates at 25,000 watts, for a potential effective potential audience of more than 1.4 million through its FM signal alone, as well as an online stream and a mobile app that lets listeners enjoy WKNC from anywhere in the world. It employs a full complement of student managers, DJs, engineers, journalists and bloggers to provide programming 24 hours a day. It also sponsors a variety of live music events both on campus and at various music venues in Raleigh. Visit (and listen to!) WKNC online (http://www.wknc.org). If you have an HD radio, you can also enjoy WKNC HD-2.

**Student Media’s Business Office**

Student Media’s Business Office gives students interested in sales and marketing an opportunity to hone their skills while earning commission on every advertisement and sponsorship they sell. From print, to broadcast, to online sales, few (if any) organizations at NC State offer our students a better way to build their "real-world" business and marketing acumen as they work toward earning their degree from NC State. To find out more, visit the Business and Marketing Office online. (https://www.ncsu.edu/sma/)

**The Student Media Board of Directors**

The Student Media Board of Directors is a way for students to get involved in the management of a large business operation. The Board of Directors is the governing arm for all student media which use student fee monies to support their operations. Elections to the Board are held in the spring.

**Student Services**

NC State University knows that there's more to academic success than books and research papers. That's why we offer a full range of services to support students in all aspects of their academic careers. Our full-service Student Health Center helps keep students healthy, while our Career Development Center helps them plan for life after graduation.

Take a look through all of our student services below to see how we are here to support your time at NC State.

Dr. Carrie McLean, Assistant Dean and Director  

Academic Advising Programs and Services (AAS) provides quality and timely advising services to students and faculty to facilitate academic success, major selection, career development, and personal enrichment. Current or former NC State undergraduate degree students in transition are the priority population for AAPS. AAPS is a collaborative of cross-curricular professional advisors who partner to provide walk-in, face-to-face, and virtual advising to undergraduate students exploring majors; current information on General Education, declaring majors & minors, and academic policies; and advising support and development to faculty and staff across the campus.

**Pre-Professional Programs**

**Pre-Law Advising**

Law schools neither prescribe nor recommend a particular undergraduate curriculum for prospective candidates. A student may prepare for law school within any of the majors offered by the nine undergraduate colleges. Pre-Law Services at NC State are offered through the Career Development Center (http://careers.ncsu.edu/). Through Pre-Law Services, students receive guidance on preparing for law school, taking the LSAT, and applying to law school. Students have the opportunity to learn and network through experiential learning programs, internships, seminars and workshops, and the annual Law School Fair.

The Pre-Law Advisors also work with the Pre-Law Students’ Association (PLSA), which is open to all interested students. During the year the PLSA provides programs that have included: NC State Law School Fair, local attorneys, panel of Law School students, Law School Directors of Admission, information on the admissions process. For more information, visit the Pre-Law Services website (https://careers.dasa.ncsu.edu/gain-experience/pre-professional/pre-law/).

**Health Professions Advising**

Many NC State undergraduate students are planning a career in the health professions and will apply to attend medical, dental, optometry or other health care graduate schools after graduation. Health Professions Advising at NC State University offers guidance, information, and support to students interested in attending health professional school. The Health Professions Advisor can assist you with:

- Prerequisite course selection
- Becoming a competitive candidate
- Selecting potential health professions schools
- Application materials & timelines
- Personal statement assistance
- Interview tips & preparation

Health professional schools do not require students to obtain a designated “Pre-Health” degree. Instead, they seek students who have demonstrated academic success and who also have excelled in other areas including clinical and service experience as well as social development. Like most schools, NC State does not offer a dedicated “Pre-Health” curriculum. Instead, we recommend that students interested in health professions select the academic major that is of greatest interest to them while ensuring that they select courses that provide a strong foundation in the natural sciences required by most professional programs for admission. These include biology, chemistry, physics, and calculus along with recommended courses like genetics and biochemistry. It is also recommended that students select courses that improve communication and writing skills as well as provide a strong foundation in the humanities, psychology and ethics.

For more information on Health Professions Advising, visit the Health Professions Advising website (https://prehealth.dasa.ncsu.edu/).

**Veterinary Professions Advising Center (VetPAC)**

The Veterinary Professions Advising Center (VetPAC) aims to provide NC State students and alumni the guidance, resources and experience necessary to become uniquely competitive veterinary school applicants. While there is no formal "pre-veterinary" program or degree at NC State, many students interested in pursuing veterinary school often declare majors in the following disciplines: Animal Science, Zoology, Biological Sciences, Biochemistry, Microbiology, and Poultry Science.

VetPAC is housed within the College of Agriculture and Life Sciences. For more information on pre-veterinary advising, visit the VetPAC website (https://cals.ncsu.edu/vetpac/).

**Academic Support Program for Student Athletes**

The Academic Support Program for Student Athletes (ASPSA) is a comprehensive support program that strives to meet the academic, personal and professional development needs of all student-athletes, promoting excellence and effectiveness in undergraduate and graduate education as well as leadership and civic engagement.

ASPSA is committed to extending the educational experience of its constituency with particular emphasis on empowering student-athletes to become strong self advocates, providing specialized initiatives to facilitate a smooth transition from high school to college and from college to professional life while successfully integrating student-athletes into the campus community; enhancing academic skills for student-athletes at all skill levels and providing academic support personalized to the needs of each student-athlete.

ASPSA will maintain a strong sense of integrity and will continue to strive to be one of the benchmark programs for academic support for all collegiate academic support programs in the nation. The mission of the Office of Academic Support Program for Student Athletes at NC State University is:

1. to support the recruitment, retention and graduation of NC State student-athletes;  
2. to provide a comprehensive support system that affords NC State student-athletes equitable opportunity to pursue academic, personal, and professional development and  
3. to strongly adhere to the principles of integrity, excellence, and lifelong learning.

Campus Box 7104
Campus Community Centers

NC State’s Campus Community Centers are proudly comprised of the African American Cultural Center, the GLBT Center, Multicultural Student Affairs, and the Women’s Center.

African American Cultural Center

The mission of the African American Cultural Center is to promote awareness of and appreciation for African American and other African descent experiences through activities and events that enhance academic excellence and strengthen cultural competence for the campus and surrounding communities. Students, staff and visitors are welcome to attend our programs and events and to visit the Art Gallery and Library in Witherspoon Student Center, the first building on NC State’s campus named for an African American, Dr. Augustus M. Witherspoon.

To learn more about the African American Cultural Center, visit our website (https://diversity.ncsu.edu/aacc/). Our main office is located on the 3rd floor of Witherspoon Student Center.

African American Cultural Center
355 Witherspoon Student Center
Email: aaculturalcenter@ncsu.edu

GLBT Center

The mission of the NC State GLBT Center is to engage, develop and empower members of the gay, lesbian, bisexual and transgender communities and their allies. To fulfill that mission, we help students connect to form social support networks; offer identity-based and health-related information and resources; consult with students individually and collectively on issues related to personal identity and academic success; refer students to a wide variety of resources on campus and in the local community; provide professional and leadership development opportunities; and host educational events and programs.

Our vision is of a campus where students, staff, faculty and alumni feel a shared responsibility to increase their individual understanding of and comfort with diversity, to enhance their ability to connect with members of their own communities, to build coalitions across identity groups and to work collaboratively to raise awareness, promote respect and create a culture where they can advocate for equity, inclusion and social justice on behalf of themselves and others.

For more information about our educational workshops, events, student organizations, resources or support services, visit our website (http://www.ncsu.edu/gltb/). We are located on the 5th floor of Talley Student Union.

GLBT Center
5230 Talley Student Union
Email: gltbcenter@ncsu.edu

Multicultural Student Affairs

Multicultural Student Affairs researches, designs and implements programs that promote the academic success, retention and
graduation of students, with an emphasis on students from historically underrepresented and marginalized ethnic populations. Our programs and services aim to expand students’ horizons while honoring their respective cultural experiences.

Multicultural Student Affairs collaborates with many university organizations to conduct programs to enhance personal, professional and cultural development and student success. Programs and services have included orientation symposia, peer mentoring, heritage month programming, cultural celebrations, academic recognition programs, student leadership development, recruitment and advising.

We welcome any NC State student to our programs and services. Visit our website (https://diversity.ncsu.edu/msa/) for more information. We are located on the 4th floor of Talley Student Union.

Women’s Center

The mission of the Women’s Center is to build and create a community of authentic and engaged allies and leaders to pursue gender equity and social justice; enhancing the campus climate through education, advocacy, support and leadership development.

The Women’s Center provides leadership opportunities through programming initiatives such as Feminist Friday’s, alternative service break trips and volunteer and internship opportunities. Staff in the Women’s Center also serve as direct advocates for survivors of interpersonal violence. Students can speak with an advocate by stopping by the center or calling the 24-Hour Sexual Assault Helpline at 919.515.4444.

To learn more about the Women’s Center visit our website (https://diversity.ncsu.edu/womens-center/). We are located on the 5th floor of Talley Student Union.

Women’s Center
5210 Talley Student Union
Email: womens-center@ncsu.edu

Career Development Center

The Career Development Center’s mission is to prepare and empower students to identify and pursue their career goals. From first year students to graduate students, services are designed to meet the needs of students across all stages of career development. Career coaches are available to meet with students one-on-one or in group settings. Students are provided access to career related assistance ranging from resume development and interview strategies to job search techniques and experiential learning opportunities.

The Career Development Center’s online career tool, ePACK, allows students to search and apply for co-op’s, internships, and full-time jobs, schedule an appointment with a career counselor, schedule on-campus interviews with employers, find career fairs, and search for career-related events and activities. A wealth of career information is available on the Career Development Center’s website (http://careers.dasa.ncsu.edu/).
College Advising Corps (CAC)

In February 2014, the College Advising Corps launched a partnership with the John M. Belk Endowment to expand the Corps to institutions of higher education, such as NC State University. In its inaugural year, 9 recent NC State graduates were placed into 9 rural high schools across North Carolina to assist students navigate the path to college. Going into its second year, the NC State College Advising Corps has placed 21 recent NC State graduates into 21 high schools.

The College Advising Corps aims to increase the number of first-generation college going, low-income, and/or underrepresented students who apply, enter, and complete college. We believe that every student deserves the opportunity to enter and complete higher education.

Nicole Ditillo, Program Director

Counseling Center

NC State and the Counseling Center work hard to create a campus culture that supports and connects us all. College is a time for tremendous intellectual, social and professional growth. But as we create leaders and innovators, we also want to cultivate emotional and psychological growth that will allow our students to be successful and flourishing.

The Counseling Center provides individual and group counseling for NC State students wishing for assistance with personal, academic or career concerns. Services are primarily short-term in nature and referrals are made as appropriate. Counseling staff includes psychologists, professional counselors, social workers, graduate interns and psychiatrists who are available to work with students with concerns such as anxiety, depression, relationship issues, substance abuse, test anxiety, time management, dissertation support, and choosing a career. All counseling is strictly confidential with exceptions noted on the Counseling Center website. In addition to counseling, workshops and support groups are offered throughout the year in a variety of areas such as time management, stress reduction, suicide prevention, and relationship skills.

The Counseling Center is located on the 2nd floor of the Student Health Center, 2815 Cates Avenue. Appointments may be scheduled by coming by the Counseling Center during walk in hours daily as posted on our website. Emergency after-hours assistance is available by calling the Counseling Center at 919-515-2423 and selecting the Counselor on Call.

Additional information about services can be found on the Counseling Center's website (https://counseling.dasa.ncsu.edu/).

The Counseling Center is accredited by the International Association of Counseling Services (http://iacsinc.org/).

Disability Resource Office

The Disability Resource Office (DRO) facilitates accommodations and services for individuals with documented disabilities and serious medical conditions. Accommodations and services are rendered based on the individual’s documented needs and are determined through an interactive process. DRO will maintain appropriate confidentiality of records and communication regarding disability. To receive accommodations and services, please contact the DRO as far in advance as possible.

Visit The Disability Resource Office online (http://dso.dasa.ncsu.edu/) for more information about services, student and faculty rights, and other resources.

In accordance with Section 504 of the Rehabilitation Act of 1973 ("Rehab Act"), the Americans with Disabilities Act of 1990 ("ADA"), The ADA Amendments Act of 2008 ("ADAAA"), and state law, NC State is committed to ensure that no qualified individual with a disability in the United States shall be excluded from, denied the benefits of, or be subjected to discrimination under any program or activity. The DRO works diligently to ensure that individuals with disabilities are provided an inclusive experience and equal opportunity by determining eligibility for accommodations for students with disabilities and serving as a resource to faculty in helping them understand their obligation in providing equal access.

Military and Veteran Services

NC State University Military and Veteran Services (MVS) is the university’s centralized resource to coordinate integrated support to military-affiliated students. Our primary objective is to ensure that our veterans and military-affiliated students feel a strong sense of belonging to NC State.

Mission

NC State University is committed to educating, supporting, and honoring student veterans and their families by helping them acquire
the knowledge and skills necessary to achieve their personal and professional goals.

The MVS proudly serves all military-affiliated students, staff, faculty and retirees:

- Discharged and retired veterans
- Active duty military
- Members of the National Guard and Reserve Components
- Spouses and dependents of military and veterans
- Gold Star family members

The goal of the MVS is to ensure you are successful as you:

- Transition from the military to the campus;
- Persist to graduation; and
- Transition from NC State into your chosen career

For more information about our services and resources, visit our website (https://veterans.dasa.ncsu.edu/).

Nick Drake, Director

NC State Dining

NC State Dining’s award-winning program offers food options that are convenient, fresh, wholesome and delicious. We have over 40 dining locations across campus, all of which accept some form of the meal plan. From traditional all-you-care-to-eat dining halls to a mix of restaurants, cafes and convenience stores, our program is designed to meet the unique needs and tastes of the campus community.

NC State Dining hosts a number of theme meals and monotony breakers during the year, including our famous All Carolinas Meal, which features items grown or produced in North Carolina. We also host a number of cultural meals, too. Check out the special events calendar (http://www.ncsudining.com/university-dining-events/) for more details.

Nutrition

We understand the diverse nutritional needs of our campus population, such as food allergies, intolerances, and special dietary preferences. Our website (https://dining.ncsu.edu/locations/) provides nutritional information for all of our restaurants and dining halls, and many locations have a nutrition kiosk where guests can check the daily menu for allergens and other key ingredients.

Our Well-Fed Wolfpack nutrition team and registered dietitian are nationally recognized for their efforts to make NC State one of the best campuses known for its nutrition and wellness programs (http://www.ncsudining.com/campus-dining/healthwellness/). Our dietitian is available for a free consultation to discuss your nutrition goals and special dietary needs. We place a special emphasis on fresh foods and wellness while providing nutrition resources, education, and awareness across campus.

These efforts have helped us earn national recognition, including the Top 26 Healthiest Colleges and Top 10 Gluten Free Accommodating Colleges in the nation.

Meal Plans

All first-year students living on campus are required to have a meal plan.

Our meal plans (https://dining.ncsu.edu/meal-plan-options/) are designed to cover the cost of meals and snacks in three different ways: Dining Hall Swipes, Meal Credits, and Dining Dollars.

- **Dining Hall Swipes**: Just one swipe at our dining hall locations and you can enjoy a full meal or a light snack, all with a single swipe.
- **Meal Credits**: Use Meal Credits to purchase a meal at one of our many restaurants or cafes. Meal Credits are also used to purchase a dining hall take-out meal. Meals Credits vary by location and only one Meal Credit can be used per meal period.
- **Dining Dollars**: Use Dining Dollars at convenience stores and vending machines, or to make small purchases at a restaurant or cafe in lieu of a Meal Credit.

Our Core Plans (the Dining Hall Plan, Flex Plan, and Flex Plus Plans) are primarily designed for students who desire to have the majority of their meals covered by a convenient, affordable campus dining plan. All three plans include all-day access to our dining halls, so students can come and go when they’re hungry to our three all-you-care-to-eat dining halls and enjoy a full meal or light snack as often as they like throughout the semester. (The all-access pass requires 30 minutes pass between each Dining Hall Swipe.)

We also have the **Block 170 Plan** (170 meals-per-semester) that can be used at any time in the dining halls or once per meal period in a restaurant or cafe, and includes 100 Dining Dollars. Our **Commuter/ Apartment Plan** is for students who commute or live in on-campus apartments. It includes $800 Dining Dollars that can be used at any dining location and comes with a five percent discount at the register on all purchases.

Picking a Plan

Detailed information and a full guide on selecting a plan is available on our website at dining.ncsu.edu. We recommend you review the plans, then consider your expected daily travel and eating patterns once you’ve received your residence hall assignment and course schedule. Once you’ve picked a plan, register online (https://dining.ncsu.edu/meal-plan-options/meal-plan-signup/) or complete the paper form you’ll receive in your packet before you arrive on campus this fall. You can then try out your plan and make any changes via our website prior to September 15. Be sure to re-evaluate for the spring semester to ensure your plan is the right one for you and make any changes by January 31.

We're Here for You

We take pride in offering quality food and services designed specifically to meet the needs of students. For more information, visit NC State Dining online (http://dining.ncsu.edu) or call 919.515.3090.

Follow us on Facebook (https://www.facebook.com/ncstatediningpack/), Twitter (https://twitter.com/ncstatedining/) and Instagram (https://www.instagram.com/ncstatedining/) for information on special events, featured menu items, cooking demos, and more.
NC State Stores

NC State Stores has been the authority on textbooks, school supplies, computers and apparel since our founding in 1954. NC State Stores ensures students have access to the best prices and service to secure course materials through price comparison tools and easy on-campus shopping. The Stores also offer the most extensive collection of officially licensed merchandise available anywhere, featuring apparel from leading brands like Adidas, Southern Tide, Peter Millar, Vineyard Vines, Clinique and more.

Shop online or find out more at bookstore.ncsu.edu (http://bookstore.ncsu.edu/).

Locations

Wolfpack Outfitters is the flagship location, located in Talley Student Union. The store carries fan gear, apparel, gifts, books, novelty items, school supplies, technology and more.

Wolfpack Outfitters also services students on Centennial Campus with a smaller satellite location that carries books, school supplies, apparel and snacks. It is located in Wolf Ridge Apartments next to On the Oval Culinary Creations.

Textbooks

Once a student has completed course registration, they can view their book list from their Class Schedule page in MyPack Portal. From there, students can view all required and recommended course materials, compare prices with the online shopping tool, and place an order.

NC State Stores prides itself on the value it provides, and it is backed up with pricing transparency. NC State stores also offers a textbook buy-back program at the end of each semester, and students can visit the Stores’ website to check their value before bringing them in.

Financial Aid and Scholarship Funds

Wolfpack Outfitters will defer payment of online and in-store textbook orders for students who receive financial aid or academic scholarship funds. These charges will be sent to the University Cashier’s office for processing upon disbursement of funds. Only items fulfilled by NC State Bookstores are eligible for this payment method at checkout. Students who receive athletic scholarships or sponsorship (VA, VR, WIA, Services for the Blind) should make all purchases in the store.

Laptops

The Technology Department offers business class computers that meet the specifications for all areas of study at NC State. All computers sold at the NC State Stores meet or exceed the university-set recommendations, and are guaranteed to last through all four years of college.

By purchasing from the NC State Stores, students are guaranteed to receive the convenience of full warranty support on campus.

New Student Programs (NSP)

New Student Programs (NSP) addresses the holistic needs of each new NC State student to create a foundation of success.

Based on the core value that people matter, we achieve this through:

• Cultivating strategic partnerships across the University
• Promoting an environment of personal responsibility
• Fostering inclusivity through a shared campus identity
• Partnering with parents and families
• Preparing and empowering student leaders to serve the campus
• Striving to be innovative in meeting the needs of our community

New first-year, transfer, and international students can visit our website (https://newstudents.dasa.ncsu.edu) to view new student checklists, learn about orientation, explore pre-semester programs, and view other resources for how to connect with the Wolfpack before arriving on campus.

Michael Coombes, Director

Office of International Services

The Office of International Services (OIS) is charged with meeting the immigration advising and cross-cultural programming needs for the university's more than 4000 international students and 700 J-1 Exchange Visitor scholars who come from more than 120 different countries. Services provided by OIS include advising students and scholars on immigration regulations and university policies; authorizing certain types of on or off-campus employment authorization for F-1 and J-1 visa holders; and providing cultural programs designed to enrich the cultural and academic experience of the campus community. OIS programs include: New International Student Orientation, Culture Corps, ISSERV service learning program, English Conversation Club, and many others.

New international students are required to participate in New International Student Orientation. OIS also provides opportunities for U.S. students to get involved in the international community at NC State by inviting participation in various cross-cultural programs such as volunteering at the International Student Orientation and English Conversation Club.

International applicants must apply to the Admissions Office by the stated deadlines and must meet all the necessary requirements for admission.
In addition, international applicants must meet certain language and financial criteria (see the TOEFL and Financial Information sections under Freshman Admission).

The North Carolina Global Training Initiative (GTI) sponsors several short-term certificate, internship, and research programs that international students may be interested in. These full-time non-degree study programs allow international students to study at NC State for one semester in order to learn about U.S. culture and education, improve their conversational English, take undergraduate courses in their field of study back home or in preparation for admission to a degree program here in the U.S., and experience life in the U.S. These programs have a later application deadline and are great for students to take before enrolling in an undergraduate or graduate degree program in the US or for siblings and friends of current degree-seeking students who want to study in the US together.

International students may be interested in joining the GTI’s Cultural Exchange Network (CENet). CENet connects NC State’s domestic and international students through joint participation in social, academic, and service learning events and workshops. Visit the CENet website (go.ncsu.edu/CENet (http://go.ncsu.edu/CENet/)) for more details about the program and how you can apply.

Anyone interested in the GTI’s programs can visit us on the web at www.ncsu.edu/gti (http://www.ncsu.edu/gti/) for more information.

Outline of minimum immigration requirements for F-1 and J-1 students:

- Keep passport and I-20 or DS-2019 current
- Maintain full-time enrollment every semester (12 hours/semester for undergraduates)
- Make good academic progress toward your degree
- Do not work or intern off campus without prior written approval from OIS
- Do not work on campus more than 20 hours in any one week during the semester
- Update any address change in MyPack Portal within ten days of moving
- Update OIS immediately of any changes in name, funding, or visa status
- Consult with an OIS advisor before changing curriculum/majors, withdrawing, dropping below full-time, transferring to another school/program, etc.
- Purchase and maintain the NC State University approved Health and Accident Insurance or other insurance plan that meets the published minimum coverage requirements.
- Keep your valid passport and recently signed visa certificate (I-20 or DS-2019) with you when you travel abroad. Consult with an OIS advisor about visa and travel questions

Further information about immigration requirements, employment and travel questions, cultural opportunities, and other critical information designed to assist international students are detailed on the OIS website. For individual advising, please call (919) 515-2961 to make an appointment with an advisor or stop by during our walk-in hours of 10:00am-11:45am and 1:00pm-2:45pm on Monday, Tuesday, Thursday and Friday (no walk-ins on Wednesdays).

Prevention Services

NC State Prevention Services believes that information should be shared from an objective and factual perspective, without bias or an agenda to steer an individual in any one direction unless imminent harm would result. Prevention Services is a no-cost service to all students and offers consultation to parents of students, staff, and faculty. We are flexible in format and willing to work with you, your group(s), and/or your department in some of, but not limited to, the following ways:

- one-on-one conversations focused on resources
- formal/informal presentations and trainings
- formal/informal conversation facilitators
- staff/student group meeting guests
- Q & A resource
- student group leadership trainings/discussions
- event planning for risk management and problem prevention

CARES: Student Behavioral Case Management

The CARES case managers at NC State work collaboratively with campus resources to provide support for students who are in distress or crisis or who are identified as exhibiting concerning or worrisome behaviors. Effective case management ensures that the community at large remains supported and safe while the student involved gains the necessary resources to remain successful academically and personally at NC State. Services include:

- Providing comprehensive outreach and consultation services to the NC State community in order to proactively identify students with concerns
- Providing early intervention and behaviorally based assessments to determine appropriate resources and referrals to campus and community resource
- Working constructively with students to foster resilience and self-advocacy
- Monitoring student progress, seeking input from collateral resources as needed

Learn more about CARES: Student Behavioral Case Management on our website at: https://prevention.dasa.ncsu.edu/nc-state-cares/about/

Alcohol and Other Drug Prevention Education

Alcohol and Other Drug Prevention Education (AOD) is rooted in objectivity, compassion, and non-judgment. Although AOD supports community members that choose to live an abstinent lifestyle, the program does not use an abstinence based methodology or believe in telling others how to live their lives. AOD cannot condone underage drinking or illicit drug use as this would mean advocating for individuals to break the laws of North Carolina. However, our program does understand
that some community member’s personal choices do not abide by the law on this topic. Alcohol and Other Drug prevention Education is here to reduce the harm and unwanted consequences associated with alcohol and other drug use. Services include:

- Providing alcohol education programming to all first-year students prior to arriving at NC State
- Consulting with campus partners, students, alumni and faculty regarding AOD topics including risk management and prevention
- Providing training for the campus community on harm reduction strategies
- Facilitating the Howl for Help: Health intervention for AOD related emergencies without violation by the Code of Student Conduct
- Administering BASICS (Brief Alcohol Screening and Intervention for College Students)

Learn more about Alcohol and Other Drug Prevention Education on our website at: https://prevention.dasa.ncsu.edu/alcohol-prevention/about-aod/

**Suicide Prevention Services**

Suicide Prevention Services' goal is to reduce barriers to help-seeking at NC State by promoting a campus culture of caring and taking responsibility for the mental health needs of our students. This program supports individuals and groups on campus as they strive to understand the warning signs, offer guidance in talking to students, friends, and colleagues and to connect them to available resources. Suicide Prevention Services also offers support to those impacted by the loss of a loved one to suicide.

Services include:

- Providing QPR (Question, Persuade, and Refer) Suicide Prevention Training
- Creating and collaborating large scale campus events focused on suicide prevention and mental health awareness
- Developing and providing programming for faculty and staff focused on early intervention
- Supporting the Division of Academic and Student Affairs' postvention efforts following tragic events involving students, faculty or staff

Learn more about Suicide Prevention Services on our website at: https://prevention.dasa.ncsu.edu/suicide-prevention/about-suicide-prevention/

**NC State Prevention Services**

**Student Health**

At NC State we believe in enhancing both students individual health and the overall health of our campus community. With an understanding that Wellness is the interdependent and interactive combination of love for what is done each day, the quality of relationships, the security of finances, the vibrancy of physical health, and the pride taken in what is contributed to our communities. Student Health Services is at the cornerstone health and wellness on campus and offers non-urgent medical care and health prevention to students as an outpatient center.

We are staffed by board certified physicians, nurse practitioners, physician assistants, registered nurses and other medical support professionals. Some of our services include primary care, gynecology services, physical therapy, nutrition counseling, pharmacy, and specialty services with local dentists, orthopaedists, and gastroenterologists.

Student Health is accredited by the Accreditation Association for Ambulatory Health Care, Inc (http://www.aaahc.org/) (AAAHC) and Commission on Office Laboratory Accreditation (http://www.cola.org/) (COLA).

To learn more about the many services and benefits we offer students, visit our website at https://healthypack.dasa.ncsu.edu (https://healthypack.dasa.ncsu.edu/).

**Hours of Operation**

**Student Health Services on Main Campus** operates on the following hours:

- Monday: 8 a.m. - 5 p.m.
- Tuesday: 9 a.m. - 5 p.m.
- Wednesday: 8 a.m. - 5 p.m.
- Thursday: 8 a.m. - 5 p.m.
- Friday: 8 a.m. - 5 p.m.
- Saturday: 9 a.m. - 12 p.m. (During fall and spring semesters, excluding breaks, for illness and injury)
- Sunday: Closed

**Student Health Services on Centennial Campus** is our newly opened location in Plaza Hall on Centennial Campus. For hours of operation, please check our website.

**Physical Therapy on Main Campus** allows appointments during the following hours during the fall and spring semesters:

- Monday: 8 a.m. - 5 p.m.
- Tuesday: 9 a.m. - 5 p.m.
- Wednesday: 8 a.m. - 5 p.m.
- Thursday: 8 a.m. - 5 p.m.
- Friday: 8 a.m. - 2 p.m.
- Saturday: Closed
- Sunday: Closed

A nurse advice line is available at all other times to assure students receive qualified nurse and medical advice. During adverse weather, students should check the Student Health Services website, https://healthypack.dasa.ncsu.edu (https://healthypack.dasa.ncsu.edu/) for any variance in operating hours.

**Summer session** hours are Monday through Friday, 8 a.m. to 5 p.m. **with no weekend hours.** We accept patients for care up to 4:20 p.m to provide sufficient time for you to see your healthcare provider.

Patient appointments are typically 20 minutes.

**How to Schedule an Appointment**

Appointments can be scheduled online, via the HealthyPack Portal (https://sso.medicatconnect.com) (https://sso.medicatconnect.com) or by calling Student Health Services at 919.515.2563.
Charges

All registered students pay a health fee which provides access to care and covers most, but not all, office visits for provider services. There are charges associated with x-rays, lab tests, allergy injections, travel vaccines, physical therapy, annual physicals, some office visits and specialty clinics. Students are responsible for the cost of prescriptions and over the counter medications /supplies available at the Student Health Pharmacy, as well as expenses incurred when referred to an off-campus laboratory, physician, hospital or pharmacy. Student Health Services will file most insurances on behalf of the student for services and prescriptions received at Student Health. Charges not covered by insurance may be transferred to the student's account with University Cashiers Office. Check with us prior to your visit to determine if your insurance plan is considered in-network.

Student Health partners with several specialty groups to offer on campus care. Specialists include Dermatology, Orthopedics and Gastroenterology. Insurance is filed by the specialty group and not Student Health. Check with the specialty group prior to your visit to determine if your insurance plan is considered in-network.

Student Health, in partnership with Campus Smiles Dental Services, provides comprehensive dental care to students. Campus Smiles accepts most dental plans and will file your insurance for you. Cash discount pricing is also available. To make an appointment, contact Student Health and ask for the dental clinic. Two locations are available for your convenience - Main Campus and Centennial Campus.

Staying Healthy and Well

As a part of our mission, Student Health not only provides high quality health care but also a comprehensive disease prevention and health education program to the NC State community. Our outreach health educator and Pack Peer Educators offer a variety of information, programs and services to students on issues facing today’s young adults. Health topics include nutritional counseling, alcohol and drug education, healthy sexuality, women’s health, men’s health and much more.

Pack Peers is our student volunteer program that includes two tracks: Track I - Peer Education and Track II - Clinical Experience. Students interested in becoming engaged in our Pack Peer program should visit our website at https://healthypack.dasa.ncsu.edu/ for more information.

Required Medical Insurance

As mandated by the UNC System, NC State University requires all undergraduate students taking 6 or more credit hours to have and show evidence of a creditable health insurance policy. Students failing to provide proof of coverage by the published deadline each semester will automatically be enrolled in and billed for the university-sponsored health insurance plan through Student Blue. Note: This is a University requirement.

The University-sponsored health insurance plan (Student Blue) has a robust set of benefits at an affordable premium. Each year, complete information is available to students at the start of the fall and spring semesters. For more information regarding the health insurance requirement and/or the University-sponsored health insurance plan, please see the information at: https://healthypack.dasa.ncsu.edu/.

Confidentiality

All health and medical information is kept secure and confidential and is not divulged to anyone without the express written consent of the patient as required by Federal law.

Please Note: Parents must have the written consent of their student for the release of any protected health information (PHI). Guarantor of payment is not considered written consent for access to PHI.

Medical Insurance

NC State University requires all undergraduate degree-seeking students who are taking 6 or more credit hours to either purchase the University-sponsored health insurance plan (Student Blue) or provide evidence of an existing creditable health insurance policy. Students who are already covered by an insurance policy (i.e. through parent plans, family plans, employer-sponsored plans, or student health insurance) and wish to waive out of the university-sponsored plan must submit a waiver for each term. Students enrolled in Distance Education courses only are not eligible for health insurance and therefore are not required to submit a waiver.

Students who do not waive out by the waiver deadline will automatically be enrolled in and billed each semester for the university-sponsored health insurance plan. This university-sponsored health insurance plan has a robust set of benefits at an affordable premium. More information regarding the health insurance requirement and/or the university-sponsored health insurance plan is available on the Student Health Services website at https://healthypack.dasa.ncsu.edu/.

Julie Casani, M.D., MPH - Director and Medical Director

Student Legal Services

University Student Legal Services (USLS) is a nonprofit corporation initiated by the Student Government at NC State which is funded by student fees. The service is free for currently enrolled NC State students who have paid their student fee. The purpose of the service is to provide education, advice and representation within the scope of the prepaid student legal services plan. The USLS plan is registered with the North Carolina State Bar. The service focuses on helping students resolve their legal problems with as little disruption as possible to their educational endeavors. The office promotes preventative law, enabling the students to make educated choices. The service provides advice, limited court representation, document creation and review as well as educational seminars and materials on legal issues affecting students. The usual areas of law that most impact students are landlord tenant, consumer matters, employment questions, immigration, traffic and DMV issues, criminal issues and expungements as well as domestic matters.

Confidentiality

The staff are not employees of the NC State or the State of North Carolina and as licensed attorneys are required to preserve the confidentiality of clients. All staff working with the office are bound by
by providing courteous and professional service. We treat each individual with dignity and respect. Financial services for the University are provided in an ethical and professional manner with a focus on fiscal integrity and accountability. The success of our students will always be our primary concern.

Maria Brown, Director

Learn more about the Student Services Center on our website at studentservices.ncsu.edu.

The Student Services Center is bound by the Family Educational Rights and Privacy Act (FERPA), which gives students certain rights to privacy of their education records and rights of access to their education records. Employees and agents of the University are expected to comply fully with this law. Please review the NC State REG 11.00.01 - Family Educational Rights and Privacy Act (FERPA) (https://policies.ncsu.edu/regulation/reg-11-00-01/) for detailed information about this federal law and what it means for our students, their families, and sharing of student information.

The NC State Libraries

The NC State Libraries’ website (http://www.lib.ncsu.edu) is a rich source of information and serves as a gateway to resources and services. The D.H. Hill Jr. Library is open 24 hours/day in the fall and spring semesters. Branch libraries include: Harrye B. Lyons Design Library, Natural Resources Library, and William Rand Kenan, Jr. Library of Veterinary Medicine.

The Libraries’ collections reflect the strengths of the university across disciplines. We provide demand-driven, network-based collections to the campus community in support of research and teaching. We are recognized as a national leader in building extensive research holdings in the areas of engineering, science, technology, and agriculture. The collection contains over 5.3 million volumes of books, bound journals, and government documents; over 128,000 print and electronic serial subscriptions; over 1.2 million e-books; 635 full-text databases in all disciplines and extensive digital collections; numerous video, audio, and multimedia titles; unique and rare materials in the Special Collections Research Center. The Libraries’ participation in the Triangle Research Libraries Network (TRLN) provides convenient access to the collections of Duke University, UNC-Chapel Hill, and NC Central University.

Key spaces at the libraries include:

• Learning Commons, Faculty Research Commons, Graduate Student Commons
• Large-scale, immersive visualization spaces
• Digital media creation facilities
• Dataspace with advanced computing, software, training, and consultation (Hunt)
• A Game Lab for the scholarly study and enjoyment of games and for interactive workshops and demonstrations
• iPearl Immersion Theater for panoramic display of faculty and student work (Hunt)

the Rules of Professional Conduct relating to nondisclosure of any information that has been discussed. The policy is firmly followed by the office to encourage clients to speak candidly about all information necessary for effective legal representation.

Student Services Center

The Student Services Center (SSC) is NC State’s one-stop center for student registration, financial aid, and billing needs. The Center was formed in 2016 to merge the resources and services of the University Cashier’s Office, Department of Registration and Records, and Office of Scholarships and Financial Aid in order to better serve the students of NC State. Students can visit the SSC in Harris Hall on Main Campus to order an official transcript, receive an enrollment verification, meet with a financial aid counselor, or discuss payment options with the university cashiers.

The Student Services Center website provides helpful information for students on how to search and register for classes, as well as everything they need to know about staying on track to graduate. Our experts are ready to help incoming, current and former members of the Wolfpack--and their families--accomplish any financial or academic task necessary.

Department of Registration and Records

The Department of Registration and Records is responsible for maintaining student records and enrollment systems, establishing the academic calendar, establishing and upholding policies on academic standards, and providing several other essential services to students and faculty on campus.

Charles Clift, University Registrar

Office of Scholarships and Financial Aid

The Office of Scholarships and Financial Aid is responsible for evaluating students’ financial need and eligibility, awarding financial aid packages, disbursing federal and state financial aid awards, and upholding policies on academic standards for financial aid recipients.

Financial aid counselors and staff at NC State are trained and highly equipped to meet the needs of all students, even those with the most exceptional of circumstances. We are dedicated to working with students as closely as possible to ensure a seamless transition to NC State without financial worry.

Krista Ringler, Associate Vice Provost and Director

University Cashier’s Office

The University Cashier’s Office projects a positive image of the University by providing courteous and professional service. We treat each individual...
• Makerspaces offering 3D printing and scanning and other specialized tools
• Special Collections Reading Room and Exhibit Gallery (Hill)

The James B. Hunt Jr. Library (http://www.ncsu.edu/huntlibrary/) on Centennial Campus is more than the 21st-century face of NC State. It's a place where ideas become reality and bold ambition forges beautiful solutions to global challenges.

The Libraries website (http://www.lib.ncsu.edu) provides information about and access to many services, including reference assistance, interlibrary loan, and electronic reserves. Library Course Tools (http://www.lib.ncsu.edu/course/) web pages are available for every course offered at NC State. These customized pages include e-reserves, article databases, librarian recommendations, citation tools, IM a Librarian for help, and more. The Libraries’ Course Books on Reserves program makes over 4,500 required texts available on Course Reserves each year.

Greg Raschke, Senior Vice Provost and Director of Libraries

Transportation

Parking Permits

All students (including Freshmen) living on or off campus may purchase a parking permit until all available student parking space is sold. Demand for permits does exceed supply. Permits are sold online on a semester basis via the Transportation website (http://www.transportation.ncsu.edu), and are available on a first-come, first served basis. Students must be enrolled in classes in order to be able to purchase a parking permit. All parking permits at NC State are virtual.

Parking Enforcement

Permitted parking areas and hourly visitor spaces are enforced: Monday - Friday: 7:00 a.m. to 5:00 p.m. except on Official University Holidays.

Exceptions include:

• Resident parking areas (“RC,” “RE,” “RW”) are enforced: Monday - Thursday: 7:00 a.m. to Midnight; Friday: 7:00 a.m. to 5:00 p.m.
• Any space or area designated as reserved 24/7, handicap parking spaces and no parking areas.

Wolfline (Buses)

Wolfline is NC State’s bus service which is tailored to student class schedules, but also serves the general public fare-free. Wolfline buses operate every day classes are in session, serving all three campuses, three park & ride lots, official NC State housing and privately-owned apartment complexes located on city streets traveled by Wolfline buses on the way to or from these areas. No university ID, pass, or fare is required to ride. Buses are red, white and black with the Wolfline logo lettering.

Wolfline buses travel along designated routes and only stop at designated Wolfline stops, some of which are shared stops with city (GoRaleigh) and regional (GoTriangle) transit providers. A few routes are designated as “limited stop.”

Please visit the Wolfline website (https://transportation.ncsu.edu/riding-the-wolfline-bus/) for the most up-to-date information about park-and-ride lots and locations, bus routes and schedules.

Alternative Transportation Options

NC State University Transportation offers the following alternative transportation options:

• Bicycling: Bicycling is an inexpensive, healthy and environmentally-friendly way to travel to, from and around campus. Bike racks are conveniently located throughout our three campuses, as well as on all Wolfline buses. Students are strongly encouraged to register their bicycles through the Transportation office; Campus Police also offers free engraving on bicycles.

• Lime Bike/Scooter Share: NC State now offers a pilot program with LimeBike, a dockless public bike share, and Lime-S, a dockless electric scooter program. LimeBike technology is integrated into smart bikes and scooters and a smart phone app. There’s no kiosk docking station so bikes and scooters can be ridden anywhere and parked at any bike rack or designated bike parking area throughout campus. Thirty-minute bike rides are $0.50 for NC State students and employees by registering with an @ncsu.edu email address. The cost for a Lime-S scooter is $1 to unlock and $0.06 per minute for NC State students and employees.

• Walking: As an urban campus, NC State University is very walkable with short distances to off-campus locations such as shopping and restaurants, as well as between campus destinations. Many students and staff choose to walk to school or work, and/or combine walking with another alternative mode to get around campus. Visit the Transportation website (https://transportation.ncsu.edu/walking/) to download a Walk Times map.

• Carpool: NC State students who participate in the student carpool program can enjoy carpooling benefits and gain access to premium parking areas. The Transportation office requires at least two commuter students to form a carpool. All registered carpool participants must show proof of vehicle registration and a local address.

• Local/Regional Transit: GoRaleigh, the City of Raleigh’s public transit services, offers city-wide bus service. Four GoRaleigh routes serve the NC State campus. GoTriangle provides regional bus service to NC State from Raleigh, Cary, Apex, Durham, Chapel Hill, Wake Forest, Zebulon, Wendell, and many points in between. GoPass (https://transportation.ncsu.edu/local-transit/) is a bus pass sponsored by NC State Transportation, at a cost of $5 per year for NC State students. GoPasses allow NC State students and staff to ride city (GoRaleigh) and regional (GoTriangle, GoCary, and GoDurham) buses to commute to campus, get to the airport, or visit friends at other nearby universities.

• Zipcar: Zipcar is a car-share program that offers the convenience of car ownership without the hassles of having a car on campus. There are six vehicles available for use at NC State which are parked in designated spots around campus: Dan Allen Drive (Bragaw Hall Carriageway), Avent Ferry Complex, and Centennial Campus. Students can join Zipcar for a $35 annual membership fee, and can reserve Zipcars at a rate of $8 per hour and $69 per day. Costs include gas, insurance and roadside assistance.

• Wolfpack Pick Up: Wolfpack Pick Up is a service designed for students with injuries or living with disabilities. Wolfpack Pick Up services students on both Main Campus and
Centennial campus. Rides are scheduled online (https://wolfpackpickup.dasa.ncsu.edu/). Questions about scheduling may be directed to wolfpackpickup@ncsu.edu.

TRIO Programs

The TRIO Programs are Federal outreach and student services programs designed to serve under resourced individuals, first-generation college students, and individuals with disabilities to progress through the academic pipeline from middle school to post baccalaureate programs.

The Talent Search and Upward Bound Programs serve pre-college level students. Talent Search serves grades 6-12 and Upward Bound serves 9-12 while the Student Support Services and the Student Support Services STEM Programs support enrolled undergraduate NC State University students. These programs utilize a holistic approach in providing academic tutoring, personal counseling, mentoring, financial guidance, and other support services necessary for educational access, persistence and degree completion.

Marsha Boyd Pharr, Executive Director

Undergraduate Research (OUR)

The office of Undergraduate Research supports and promotes undergraduate opportunities in discovery-, inquiry- and creativity-based scholarship through mentored research experiences with NC State faculty and other national and international scholars and professionals. Undergraduate Research is scholarly study in any discipline in which this scholarship culminates in advancements in science, technology, engineering, business, the arts, or humanities. Students from any discipline can engage in the excitement of scholarly research and present their work at multiple annual symposia. Research and travel awards supporting both student projects and the communication of results are available.

Dr. Chris Ashwell, Director

University Fellowships Office (UFO)

The University Fellowships Office (UFO)—formerly called the Fellowship Advising Office—helps NC State’s undergraduate students, graduate students, and alumni learn of and apply for nationally competitive and prestigious awards. These awards fund a wide range of opportunities, and many are connected to undergraduate and graduate degree programs or internships, overseas opportunities, and independent projects.

Some of our services include:

- Meeting with candidates to discuss their goals and interests and to help identify matching opportunities
- Reviewing and critiquing drafts of application essays and statements
- Providing institutional endorsements for applicants who receive the campus nomination (for the awards that require nominations/endorsements)
- Submitting application materials at the national level on behalf of applicants
- Staging practice interviews for applicants selected at the national level for finalist interviews

Courtney Hughes, Director

University Housing

Living on Campus

Living on campus is an essential part of the Wolfpack experience: that’s why students are required to live in University Housing their first year.

When you live on campus, you’ll be at the heart of the Wolfpack nation, making it easy to be a part of all that NC State has to offer. Whether you’re looking for the close-knit community of a village (https://villages.dasa.ncsu.edu/) or the diverse social opportunity of a traditional residence hall, we have the housing option (https://housing.dasa.ncsu.edu/find-a-community/) that’s right for you. With a selection of 20 residence halls (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/) and four on-campus apartment communities (https://housing.dasa.ncsu.edu/find-a-community/apartment-options/), you’ll enjoy the once-in-a-lifetime opportunity to live in the heart of NC State.

Get Started with University Housing

Incoming First-Year Students

1. Apply for housing: You should complete your University Housing and Living and Learning Village application as soon as possible. Students who have received acceptance for the Fall semester may access the housing application through the Campus Living section on MyPack Portal (https://mypack.ncsu.edu). If you decide not to attend NC State, you can cancel your housing application without penalties. Space is assigned in the order in which applications are received. If you have a preferred building or roommate already in mind, an early application will help you get them.

2. Choose a place to live: You have a lot of options to choose from, ranging from residence halls to our Wolf Village Apartments. Find
the ones that you like best (https://housing.dasa.ncsu.edu/find-a-community/).

Incoming Transfer Students
Due to the first-year live-on requirement that began in 2017, space is very limited for upper-class students. There are options available, however. NC State has two Living and Learning Villages that reserve space for transfer students.

1. Located in Wolf Village Apartments (https://housing.dasa.ncsu.edu/find-a-community/apartment-options/wolf-village-apartments/) on the main campus, the Second-year Transitions And Transfer Experience (S.T.A.T.E.) Village (https://villages.dasa.ncsu.edu/village-options/state-village/) connects students to a variety of campus resources and programming meant to navigate their years following their freshman experience.

Undergraduate students must be enrolled in at least 12 credit hours to be eligible to live on campus during the fall and spring terms. Students who must drop below these minimum requirements should contact University Housing to request an exception. Summer session housing (https://housing.dasa.ncsu.edu/current-residents/summer-housing/) is also available.

More Information
For more information about living on campus, visit:

University Housing
Monday - Friday | 8:00 a.m. to 5:00 p.m.
1112 Pullen Hall

Web: housing.ncsu.edu (https://housing.ncsu.edu/)

Living and Learning Villages
NC State’s Living and Learning Villages are interested-based living communities that engage students both inside and outside the classroom. Villages provide an unparalleled living experience where you’ll make lifelong friends and immerse yourself in the NC State community. There is currently no additional cost to join a village.

The Albright Entrepreneurs Village provides sophomores, juniors, seniors and graduate students across all academic disciplines the opportunity to live, socialize and work with entrepreneurial-minded students. Residents can explore and develop their entrepreneurial interests in an environment that fosters creativity.

Creative, vibrant and colorful only begin to describe the experiences you’ll have as you explore theater, visual arts, crafts, music, dance and more.

BMI strives to establish a brotherhood and develop leaders among black male students. By promoting academic success, personal growth, professional development, and self-responsibility, the group breaks through negative stereotypes and combats challenges facing African-American males in today’s society.

EcoVillage is a first-year student program that welcomes students from all majors, creating both a multi-disciplinary and an interdisciplinary educational experience that prepares students for lifelong sustainable leadership, engagement, advocacy, and discovery.

The Engineering Village is an extension to the College of Engineering’s First-Year Engineering (https://www.engr.ncsu.edu/academics/undergrad/first-year/) program introducing students to the field of engineering; encouraging thoughtful consideration to complex challenges facing our communities.

The Exploratory Studies Village is for students entering the university who are knowingly undecided about a major. A year of guided inquiry and exploration coupled with one-on-one sessions with their academic advisor helps move students through the career planning and decision-making process.

Global Village is a living and learning community for those interested in living and interacting with people from differing backgrounds, experiences, countries, and viewpoints.

Honors and Scholars Village (https://villages.dasa.ncsu.edu/village-options/honors-and-scholars-village/) - **Live in** Berry, Becton or Bagwell Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/berry-hall/)

Honors Village and Scholars Village merged in 2017 to become Honors and Scholars Village (https://dasa.ncsu.edu/honors-scholars/). The most noticeable change being that Scholars Village residents will be relocating from Sullivan Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/sullivan-hall/) to east campus beginning Fall 2018. Students from both the University Honors Program (https://honors.dasa.ncsu.edu/) (UHP) and the University Scholars Program (https://scholars.dasa.ncsu.edu/) (USP) will now live together in the Honors Commons. The move will provide village residents with the opportunity to live and learn in a vibrant, socially and intellectually stimulating environment that fosters mindful interaction.

ILV provides experiential learning for students who have a passion for leadership and service. Students are given the opportunity to engage in practical application of leadership to real-world issues and explore leadership development through one on one sessions with professionals.

ILV enhances students’ college experience and prepares leaders to make their personal IMPACT on the state, nation, and the world.

Students living in the Native Space community will demonstrate growth and learning along three focal points of the living experience: culture, academics and community engagement. Residents will find a deeper awareness of Native American history and drive cultural awareness through participation in Native American Heritage Month and the annual NC State Pow Wow.

Students Advocating for Youth (https://villages.dasa.ncsu.edu/village-options/students-advocating-for-youth-village/) - **Live in** Syme Hall (https://housing.dasa.ncsu.edu/find-a-community/residence-hall-options/syme-hall/)

SAY Village is a community for first-year students in any academic discipline who have a passion for working with youth. Students develop one-on-one mentoring relationships with local elementary school students and learn what it means to be a youth advocate.

Provides second-year and transfer students with opportunities to make the most of their NC State experience by focusing on the six core pillars essential to student success: academic success, career development, community and global engagement, diversity, leadership, and life skills.

Encourages and promotes the development and maintenance of a healthy body, mind, and spirit through a wide array of wellness programs and events. Students have the opportunity to experience personal growth while learning about the seven dimensions of wellness.

WISE Village was created for female freshman and sophomore students majoring in science, technology, engineering, and mathematics. Membership in WISE provides a powerful networking opportunity with other goal-oriented women as you pursue your STEM major.

WOW Village enhances women’s leadership outside the classroom through empowerment, leadership development, self-awareness and diversity/social justice. WOW creates a holistic community that fosters individual women’s growth and development while challenging residents to act as citizens of a global community.

University Tutorial Center (UTC)

The University Tutorial Center provides free academic assistance to NC State undergraduate students enrolled for credit in many challenging 100- and 200- level math, physics, and chemistry classes. Several types of assistance are available that are designed to best meet the students’ needs, including tutoring by appointment, group tutoring, and Supplemental Instruction (SI). In addition, Writing and Speaking consultations are available to both undergraduate and graduate students. They provide assistance to all students who need help at any stage of the writing process in the English language.

Students are eligible to become a tutor for the UTC if they have an established GPA of 3.25 or better and least a B+ in the course(s) they wish to tutor. All new tutors are required to take USC 210, Introduction to College Tutoring, during the first semester of employment. All tutors are trained in techniques that are designed to help students become independent learners.

Barbara B. Windom, Director

Wellness and Recreation

About Wellness and Recreation

The Department of Wellness and Recreation is proud to be a leader of wellness at NC State. We value the impact of movement and inspire behaviors that improve health and well-being. Our programs, services and facilities enhance academic success by assisting students in developing skills and resilience needed for college and beyond.

Programs and Services

Take one of the more than 100 Group Fitness (https://wellrec.dasa.ncsu.edu/fitness/group-fitness-2/) classes offered each week, designed for every fitness level. Challenge yourself by taking cycling, TRX®, yoga, BODYPUMP™, Zumba® or a variety of other class formats and experience firsthand how we make fitness fun. Students can take their structured workout to the next level with Small Group Training (https://wellrec.dasa.ncsu.edu/fitness/training-services/small-group-training/), where our coaches lead workshops on Olympic lifting, boxing and more.

Receive one-on-one attention from our nationally-certified personal trainers (https://wellrec.dasa.ncsu.edu/fitness/training-services/personal-training/). Learn how to exercise, improve performance and establish fitness goals. No matter what your fitness level, we have a trainer who wants to work with you.

Our ThriveWell (https://wellrec.dasa.ncsu.edu/wellness-2/) program offers wellness coaching and health education programs for individuals and groups. Wellness coaching takes a holistic approach and discovers how personal wellness impacts student success, strengths, values and goals. Establish a wellness plan and stay accountable with a certified health coach. Learn stress management techniques, strategies and lifestyle modification tips from our team of experts.

Intramural Sports (https://wellrec.dasa.ncsu.edu/sports/intramural-sports/) offers more than 40 different leagues and events throughout the year. Sports range from flag football, basketball, soccer and volleyball to exciting and unique events such as pool battleship, bubble soccer and cricket. Create a team and compete for a championship, join a recreational league with friends or sign up for an individual/dual sport or special event to find a new favorite activity.

For students seeking a more competitive sports experience, check out one of the Club Sports (https://wellrec.dasa.ncsu.edu/sports/club-sports/) teams that include a wide variety of men’s, women’s and co-ed sports. These student-led organizations practice regularly and compete against other colleges and universities at local, state and national levels.

Outdoor Adventures (https://wellrec.dasa.ncsu.edu/outdoor-adventures/) offers students unique outdoor trips and educational clinics. Rent outdoor equipment from the Outdoor Adventures Equipment Rental Center or climb to new heights on the indoor climbing wall. Students can challenge themselves individually or build community with customized programs at our Challenge Course located in Schenck Memorial Forest.

Our Student Employment (https://wellrec.dasa.ncsu.edu/about-us-2/student-employment/) program supports more than 700 students employed annually through Wellness and Recreation. Students enhance their development by learning transferable skills that will prepare them for future careers.

Carmichael Complex

Carmichael (https://wellrec.dasa.ncsu.edu/facilities/) is a 300,000-square-foot facility designed to help students achieve their personal wellness, recreation and fitness goals.

Features include:

- Six Strength and Conditioning Centers (30,000-square-foot)
- Six Fitness/Activity Rooms
- 11 Indoor Basketball/ Multipurpose Courts
- 25-yard pool and dive well
- 50-meter pool
- Indoor climbing wall
- Indoor track
- 14 racquetball courts
- One squash court
- Personal training suite
- Men’s and women’s locker rooms
- Single occupant locker rooms
- Steam room
Wellness and Recreation manages numerous outdoor facilities that promote healthy, active living.

- Miller Outdoor Recreation Field
- Method Road Recreation Complex
- 12 outdoor tennis courts
- Four outdoor basketball courts
- FitGround outdoor functional training area
- Centennial Campus Recreation Fields
- Centennial Campus Disc Golf Course

**Wolfpack One Card**

The Wolfpack One Card is the official ID card for NC State students, faculty, staff and affiliates. The One Card allows NC State students to:

- Access meal plans
- Enter their residence hall or other buildings with restricted access
- Work out at the gym
- Check out books at the library
- Create and access their AllCampus account to make purchases at participating on-campus locations. All Campus funds are also used for Wolfprint (campus air printers). Wolfprint provides quick and easy printing at a variety of buildings across campus.

Incoming students receive their card during summer orientation. New graduate students will not receive ID cards during the New Graduate Student Orientation, and should visit the One Card office in Talley Student Union to obtain an ID card.

Students are encouraged to store their card in a safe and convenient location as they will use it often during the course of a day. Don’t hole punch it or tumble it in a dryer to extend the life of the card. Replacement cards are $20.

To report a lost or stolen card, students should call or visit the Wolfpack One Card office or go online (http://onecard.ncsu.edu/). The office is located on the main level of Talley Student Union. Students can also stop by to ask questions about the many features of the ID card during regular business hours: Monday - Friday from 8 a.m. - 6 p.m.

For more information, call us at 919.515.3090 or visit the Wolfpack One Card website (https://onecard.ncsu.edu/).
Undergraduate

The NC State Wolfpack is an ever-growing community of inventors, creators, and scholars. As a community, we not only think about how to make the world better, we also take action and make it happen. We’re quick, curious, and creative - and we want you to join us!

If you’re considering joining the NC State Wolfpack, the Undergraduate Catalog is a valuable resource to help introduce you to our university. Start exploring with the links in the sidebar. You can find information on admission requirements (p. 16), degrees offered, and academic policies (p. 67) relevant to your career as a student. You’ll also find a wealth of information on the numerous services NC State offers to students. See how NC State can help you put your ideas into action!

Academic Policies and Procedures
It’s important to be familiar with the policies and procedures that will be relevant to you as a student. NC State wants you to be able to access and understand these procedures as easily as possible, so the list below includes plain-language summaries of some of our most important and useful policies.

If you would like more information, please visit the Policies, Regulations, and Rules website (http://policies.ncsu.edu/).

Policies about:
• Courses and Grading (p. 68)
• Getting Your Degree (p. 68)
• Student Conduct (p. 75)
• Student Records (p. 76)
• Student Status and Honors (p. 76)
• Transfer and Exam Credit (p. 78)
Courses and Grading

A good understanding of the policies regarding course credit and grading procedures is vital for successful students. The resources below can help you make sense of what you'll see on your NC State transcript:

- Classification of Students (https://policies.ncsu.edu/regulation/reg-02-65-01/)
- Course Load (https://policies.ncsu.edu/regulation/reg-02-20-05/)
- Credit Only and Audit (https://policies.ncsu.edu/regulation/reg-02-20-15/)
- Grading (https://policies.ncsu.edu/regulation/reg-02-20-03/)
- Repeating Courses (https://policies.ncsu.edu/regulation/reg-02-20-16/)

Getting Your Degree

NC State is committed to providing students with the information they need to complete their degree programs in a timely manner. Please review the resources provided here regarding policies and procedures relevant to obtaining your degree from NC State:

- Academic Advising (p. 68)
- Adding or Changing a Program (p. 68)
- General Education Program (p. 69)
- Graduation Requirements (p. 73)
- Satisfactory Academic Progress (p. 74)

For more information about planning your degree, visit the Student Services Center website. (https://studentservices.ncsu.edu/your-degree/)

Academic Advising

Most regularly enrolled students are assigned for academic advising to a faculty member who is normally a member of the department which is, or is most likely to become, the student’s major department. Students who are admitted into programs such as Exploratory Studies will be advised by professional advisors in those programs who will aid the students in the process of selecting an appropriate major.

Responsibilities of the Student

Students have the primary responsibility for planning their individual programs and meeting graduation requirements. This involves keeping up-to-date with university, college, and department curricular requirements through materials available from the advisors or departmental coordinators of advising; keeping informed of academic deadlines and changes in academic policies; and consulting with the advisor or departmental coordinator of advising during each registration period, following notification of academic warning status, and at other times as needed and required by academic policy; and attending class and meeting class objectives and assignments.

Responsibilities of the Advisor

Although students have the primary responsibility for planning their programs, advisors are expected to:

- be available for conferences at appropriate times and places about which their advisees have been informed;
- provide accurate information about academic regulations and procedures, course prerequisites, and graduation requirements;
- assist students in planning academic programs suited to their interests, abilities and their career objectives;
- discuss with their advisees appropriate course choices in fulfilling curriculum requirements as well as possible consequences of various alternative course choices;
- inform their advisees when the advisee’s proposed course selections conflict with university academic or curricular regulations;
- assist advisees with following proper procedures for such things as Progress Toward Degree and the possible consequences of changing a letter graded course to a pass/fail status without speaking with an advisor, exceptions to the course drop deadlines, auditing a course before or after taking it for credit, taking a course under the credit by examination policy, registering for 19 or more credit hours, registering for inter-institutional courses, the availability and rules for the First Year Course Repeat Policy, and referring their advisees for special testing or counseling as needed;
- assist their advisees in considering the appropriateness of academic adjustments where these become necessary in cases of serious injury or illness, or unforeseen personal hardships.

Responsibilities of the Coordinator of Advising

Each college or department has a coordinator of advising who is responsible for: assigning, training, and supervising faculty and professional advisors; providing up-to-date, printed course and curriculum information for advisors and students; reassigning to another advisor any student who requests reassignment; and assisting any student who wants to major in the coordinator’s area of study, but is ineligible at the time to transfer into it. Students in this category keep their advisor in the department in which they are enrolled, but consult additionally with the coordinator of advising and teaching for the department offering the curriculum in which they wish to enroll. Whenever appropriate, the coordinator will advise students that they should consider alternative curricula and refer the students to Academic Advising Services (http://advising.dasa.ncsu.edu/). (https://advising.dasa.ncsu.edu/)

Adding or Changing a Program

Adding a Major (Double Degree)

Students may pursue more than one bachelor's degree while at NC State. Students are admitted to one program upon admission to the University. After satisfactorily completing 12 graded credit hours, they can apply to add an additional degree program. All academic requirements for both degrees must be satisfied, and by working with academic advisors in both programs students can maximize their course choices to take advantage of where requirements overlap. To apply to add an additional degree, students must submit a Change of Degree Application (CODA) (https://go.ncsu.edu/coda/). Once the required coursework is complete, the degrees may be awarded during the same term or different terms.

Change of Degree Application (CODA)

To apply to change to a major, a student must have attempted twelve or more graded hours at NC State, and have satisfied the transfer requirements for a specific major as listed on the CODA website (https://go.ncsu.edu/coda/).
CODA Process

Undergraduate students wishing to change from one major to another should:

1. Visit the CODA website (http://go.ncsu.edu/coda/) to check requirements for their intended major.
2. Check CODA application deadlines.
3. Submit a CODA online for the intended major.

CODA applications are accepted throughout the year (except for Engineering programs) and will be reviewed following each deadline. Candidates who meet the Preferred Qualifications for their major have a higher probability of being approved for transfer. All admission is competitive and based on academic record and space availability in the intended program and college. Meeting the preferred or minimum qualifications does not guarantee admission.

For academic advising purposes, students accepted into a new program are considered to be in the new plan once the official major change is posted.

REG 02.65.03 - Intracampus Transfers (http://policies.ncsu.edu/regulation/reg-02-65-03/) is available to view in full on the university’s Policies, Regulations and Rules website.

General Education Program

General Education at NC State provides the opportunity for a broad and informed understanding of the world, offering our students the foundation for rich and productive lives. General Education is valuable for students because logical and creative thinking are fundamental to improving the human condition; because a respect for the value of diversity and an understanding of human history and cultures are essential to true citizenship; because the development of global knowledge has become increasingly important in response to international interdependence; because knowledge of science and the ability to apply scientific reasoning provide the basis for an appreciation of the workings of the universe and the richness, variety, and ecological interconnectedness of the world around us; because well-considered moral, philosophical, aesthetic, and intellectual convictions are necessary for contributing to human thought and achievement; because effective communication is central to productive engagement in academic, professional, and civic communities; because an ability to understand and evaluate the interaction among science, technology, and society is important in a world that is changing through technological innovation and scientific discovery; and because the development of attitudes and skills for a healthy life is essential to social, mental, and physical well-being. For the most current information available, please see the GEP website (https://oucc.dasa.ncsu.edu/general-education-program-gep/).

Special Note: If a student changes a General Education course except for HES courses from a letter grade to credit-only (S/U), then the course will not satisfy the GEP requirements. Consult your academic advisor if you have questions.

Mathematical Sciences

Rationale:
A logical approach to problem solving is important for successful functioning in society. It is also important that students be able to formulate models, be critical consumers of quantitative information, communicate mathematically and solve problems.

Objectives for courses in the category of Mathematical Sciences: Each course in the Mathematical Sciences category will provide instruction and guidance that help students to:

1. improve and refine mathematical problem-solving abilities; and
2. develop logical reasoning skills.

Mathematical Sciences Requirement

(6 credit hours)
A total of six credit hours from the university approved GEP Mathematical Sciences course list. At least one course must have an MA or ST prefix.

Natural Sciences

Rationale:
The natural sciences pursue basic questions about the workings of the universe, and the richness, variety and interconnectedness of the world around us. Students today are exposed to an increasing volume of information, from a large variety of sources, in diverse and changing formats. Training in the natural sciences is essential to help students develop skills to distinguish between testable and un-testable ideas, recognize scientifically valid tests of theories, and understand how information relates to those tests. By studying the natural sciences, students learn to reason both inductively and deductively, develop and test scientific hypotheses, and understand the value and limitations of scientific studies. The development and application of new technologies require scientifically literate citizens who can understand technological issues and evaluate the role of science in society's debate of those issues.

Objectives for courses in the category of Natural Sciences: Each course in the Natural Sciences category will provide instruction and guidance that help students to:

1. Use the methods and processes of science in testing hypotheses, solving problems and making decisions; and
2. Make inferences from and articulate scientific concepts, principles, laws, and theories, and apply this knowledge to problem solving.

Natural Sciences Requirement

(7 credit hours)
A total of seven credit hours from the university approved GEP Natural Sciences course list including at least one laboratory course or course with a laboratory.

Humanities

Rationale:
The humanities comprise the subjects and disciplines that use various models of rational inquiry to understand human human nature and experience, organization and change in human societies, the nature of the world, and rational inquiry itself. An education in the humanities and social sciences requires reading significant works, gaining an exposure to a variety of methodologies, and learning to apply these in written exposition. An education in the basic humanistic disciplines is necessary to become a citizen with a broad knowledge of human cultures and with well-considered moral, philosophical, aesthetic, and intellectual convictions.

Objectives for courses in the category of Humanities:
Each course in the Humanities category will provide instruction and guidance that help students to:

1. Engage in the human experience through the interpretation of human culture; and
2. Become aware of the act of interpretation itself as a critical form of knowing in the humanities; and
3. Make academic arguments about the human experience using reasons and evidence for supporting those reasons that are appropriate to the humanities.

**Humanities Requirement**
(6 credit hours)

A total of six credit hours from the university approved GEP Humanities course list. The selected courses must be from two different disciplines.

**Social Sciences**

**Rationale:**
The study of social sciences enables students to understand individual and collective human behavior by exploring meaning within a variety of social, cultural, political, and economic contexts, analyzing the structures within which human goals are established and human choices are made, and applying theoretical and empirical models to specific cases.

**Objectives for courses in the category of Social Sciences:**
Each course in Social Sciences category will provide instruction and guidance that help students to:

1. Examine at least one of the following: human behavior, culture, mental processes, organizational processes, or institutional processes; and
2. Demonstrate how social scientific methods may be applied to the study of human behavior, culture, mental processes, organizational processes, or institutional processes; and
3. Use theories or concepts of the social sciences to analyze and explain theoretical and/or real-world problems, including the underlying origins of such problems.

**Social Sciences Requirement**
(6 credit hours)

A total of six credit hours from the university approved GEP Social Sciences course list. The selected courses must be from two different disciplines.

**Introduction to Writing**

**Rationale:**
Writing is a powerful way of understanding ourselves and the world in which we live. It is through writing that the various disciplines and professions define the knowledge and methodologies that characterize them. Mastery of writing and information skills is central to engaging in the productive life of academic and professional communities.

**Objectives for courses in the category of Introduction to Writing:**
Each course in this category will provide instruction and guidance that help students to:

1. Write effectively in specific situations, which may include various academic, professional, or civic situations, and
2. Understand and respond appropriately to the critical elements that shape written communication situations, such as audience, purpose, and genre, and
3. Demonstrate critical and evaluative thinking skills in locating, analyzing, synthesizing, and using information in written communication.

**Introduction to Writing Requirements**
(ENG 101 Academic Writing and Research - 4 credit hours)

A total of four credit hours of English (ENG 101 Academic Writing and Research) are required to fulfill this category. Successful completion of ENG 101 Academic Writing and Research requires a grade of C- or better and is required for graduation.

**Health and Exercise Studies**

**Rationale:**
The development of attitudes and skills for a healthy life is essential to a university student's education. In addition to developing and gaining an appreciation of health-related fitness and wellness concepts and fundamental motor skills, student participation in physical activities and sport significantly decreases major health risks, reduces stress from the pressures of academic life, and improves general social and mental well-being.

**Objectives for courses in the category of Health and Exercise Studies:**
Each course in the Health and Exercise Studies category will provide instruction and guidance that help students to:

1. Acquire the fundamentals of health-related fitness, encompassing cardio-respiratory and cardiovascular endurance, muscular strength and endurance, muscular flexibility and body composition; and
2. Apply knowledge of the fundamentals of health-related fitness toward developing, maintaining, and sustaining an active and healthy lifestyle; and
3. Acquire or enhance the basic motor skills and skill-related competencies, concepts, and strategies used in physical activities and sport; and
4. Gain a thorough working knowledge, appreciation, and understanding of the spirit and rules, history, safety, and etiquette of physical activities and sport.

**Health and Exercise Studies Requirement**
(2 credit hours)

A total of two credit hours/two courses including one Fitness and Wellness course from the university approved GEP Health and Exercise Studies course list. (Fitness and Wellness courses are those found in the HESF 100-level series). Students have the option of taking HES courses on a credit-only (S/U) basis.

**Interdisciplinary Perspectives**

**Rationale:**
Interdisciplinary study provides students with the opportunity to synthesize knowledge and skills, to make connections between fields of study, to consider more than one disciplinary approach or methodology, and to bring to bear the insights from two or more disciplines in examining and/or responding to complex problems.

**Objectives for courses in the category of Interdisciplinary Perspectives:**
Each course in Interdisciplinary Perspectives will provide instruction and guidance that help students to:

1. Distinguish between the distinct approaches of two or more disciplines; and
2. Identify and apply authentic connections between two or more disciplines; and
3. Explore and synthesize the approaches or views of the two or more disciplines.

**Interdisciplinary Perspectives Requirement**

(5 credit hours)

A total of five credit hours from the university approved GEP Interdisciplinary Perspectives course list.

**Additional Breadth**

Rationale:

One purpose of the General Education Program is to introduce students to a variety of disciplines. To this end, students are required to successfully complete a course from a general education category list that represents an approach to scholarship that is clearly distinct from the primary approach of their major. Determining an appropriate group of lists from which their students choose is an exercise in judgment best left to faculty in the major; accordingly, each program will select the group of lists from which their majors will choose a course to fulfill this requirement (either the group “Humanities/Social Sciences/Visual and Performing Arts” or the group “Mathematics/Natural Sciences/Engineering”). The program faculty’s selection will be reviewed through appropriate college-level mechanisms and then be subject to review by CUE.

**Additional Breadth Requirement (3 credit hours)**

A total of three credit hours in the Additional Breadth category must be selected from the university approved GEP course lists that represent an approach to scholarship that is clearly distinct from the primary approach of the Major. These two approaches are distinguished for GEP purposes as “Humanities/Social Sciences/Visual and Performing Arts” or the “Mathematics/Natural Sciences/Engineering.” Note: At this time, there is no Engineering course list.

**Visual and Performing Arts**

The Visual and Performing Arts category is part of the Additional Breadth Requirement.

Rationale:

The Visual and Performing Arts constitute a separate, unique, and independent mode of inquiry distinct from both the Humanities and Social Sciences and the Science, Technology, Engineering, and Mathematics disciplines. Being conversant in the symbolic languages of the Arts is as important as familiarity with other modes of inquiry. Many of the most profound expressions of meaning and value are embodied in the arts, and developing sensitivity and responsiveness to these through visual and performing arts courses encourages students’ aesthetic sensitivities, critical judgment, and creativity. Courses in the arts also provide students with an understanding of the cultural and historical dimensions of artistic expression.

Objectives for courses in the category of Visual and Performing Arts:

1. Deepen their understanding of aesthetic, cultural, and historical dimensions of artistic traditions; and
2. Strengthen their ability to interpret and make critical judgments about the arts through the analysis of structure, form, and style of specific works; and
3. Strengthen their ability to create, recreate, or evaluate art based upon techniques and standards appropriate to the genre.

**U.S. Diversity Co-requisite**

Rationale:

The study of diversity in the United States provides students the opportunity to consider questions of difference and culture, identity and community, privilege and oppression, and power and responsibility in our nation, and to gain an understanding of how these issues affect both individuals and communities.

Objectives for courses in the category of U.S. Diversity:

Each course in U.S. Diversity will provide instruction and guidance that help students to achieve goal 2 of the following:

1. Analyze how religious, gender, ethnic, racial, class, sexual orientation, disability, and/or age identities are shaped by cultural and societal influences;
2. Categorize and compare historical, social, political, and/or economic processes producing diversity, equality, and structured inequalities in the U.S.;
3. Interpret and evaluate social actions by religious, gender, ethnic, racial, class, sexual orientation, disability, and/or age groups affecting equality and social justice in the U.S.;
4. Examine interactions between people from different religious, gender, ethnic, racial, class, sexual orientation, disability, and/or age groups in the U.S.

**Global Knowledge Co-requisite**

Rationale:

Global knowledge is necessary for students to understand the world and their place in it. The global knowledge requirement provides students the opportunity to explore the complex interrelationships among nations, to gain a deeper appreciation of other cultures and peoples, and to evaluate the impact of U.S. culture and policy on the rest of the world.

Objectives for courses in the category of Global Knowledge:

Each course in Global Knowledge will provide instruction and guidance that help students to achieve goal #1 plus at least one of #2, #3, or #4.

1. Identify and examine distinguishing characteristics, including ideas, values, images, cultural artifacts, economic structures, technological or scientific developments, and/or attitudes of people in a society or culture outside the United States.
And at least one of the following:

1. Compare these distinguishing characteristics between the non-U.S. society and at least one other society.
2. Explain how these distinguishing characteristics relate to their cultural and/or historical contexts in the non-U.S. society.
3. Explain how these distinguishing characteristics change in response to internal and external pressures on the non-U.S. society.

**Global Knowledge Requirement**

(1 course designated as a GEP GK course or an academic course taken via study abroad, 0 additional credit hours)

Choose one course from the university approved GEP Global Knowledge course list. Courses on additional GEP course lists that satisfy the Global Knowledge co-requisite will have a “GK” co-requisite indicator next to the course. Any academic course taken in a study abroad context may satisfy the GEP global knowledge requirement.

**Foreign Language Proficiency**

**Rationale:**
In a sense, languages are keys to the world. The continuous expansion of international relations makes the knowledge of foreign languages increasingly significant. In learning a foreign language and studying its literature and cultures, students acquire a body of knowledge about how humans think, view the world, express themselves, and communicate with one another. Language learning also expands one’s ability to create and discover new meaning in one’s own language and culture. Knowledge of the linguistic structures of a second language helps students to understand their own language better. Likewise, an awareness of contrasting cultural concepts sensitizes students to the differences between their own culture and others. Such awareness has become increasingly important as the communities of the world have become more interconnected and interdependent. The needs of our global society require that more citizens have access to other languages and cultures in order to cooperate in the process of improving the quality of human life.

**Foreign Language Proficiency Requirement**

To fulfill the GEP Foreign language requirement, the student must have proficiency at the FL* 102 level. This can be demonstrated by completing two years of high school study of the same language with a grade better than a C- in each of the two years, or a passing grade at the FL* 102 level, or by placement into the FL* 201 by examination. Additional Foreign Language requirements above the FL proficiency requirement (FL*102) have been established by some Colleges and programs.

American Sign Language (ASL) is accepted in satisfying the foreign language proficiency requirement with two years of ASL in high school with a grade “C” or better in each year.

The Cherokee language is an accepted language for satisfying the foreign language proficiency requirement.

**Technology Fluency**

**Rationale:**
Today’s graduate must achieve technology fluency appropriate to the needs of his/her discipline, including technologies for problem solving, empirical inquiry and research. Students will demonstrate critical thinking skills, analytical skills, proficiency and ethical use of the technology within the discipline, which includes responding to and readily adapting to change in those technologies.

**Communication In The Major**

**Rationale and Requirement:**
Writing and speaking are fundamental to all disciplinary and scholarly work, also serving as powerful ways of learning and evaluating learning in the disciplines. Each undergraduate curriculum must be designed and taught so that the Major enhances students’ learning through writing and speaking activities and helps students to communicate competently for academic and professional contexts. Because effective communication in these contexts often demands proficiency in the use of information technologies and resources, students must gain a basic understanding of how information is identified, organized, and accessed, in both the print and digital environments.

Associate deans are responsible for providing evidence that their college’s curricula are designed to comply with this requirement’s rationale and objectives and ensuring that academic programs assess and report student achievement of the objectives.

**Objectives:**
Each undergraduate curriculum must be designed to provide instruction and ample opportunities for guided practice that enable students to:

1. Learn more deeply and effectively through the use of writing and speaking activities, and
2. Master the kinds of writing and speaking that are appropriate to their academic or professional majors, and
3. Use information technologies and search strategies appropriate to their academic or professional majors to identify and access information and then to evaluate, synthesize, and incorporate that information effectively in their writing and speaking.

**GEP Thematic Track Option**

**Rationale:**
The purpose of thematic tracks is to encourage students to connect knowledge from different disciplinary areas while focusing on a unifying theme or topic. It is well suited to students who have an interest in a particular topic and who would benefit by exploring that topic from multiple disciplinary perspectives. Students will be credited with no more than one thematic track.

All students have three options for thematic tracks within the General Education Program (GEP). A student may:

1. Choose a thematic track that has been approved by the Council on Undergraduate Education (CUE). Completion of one approved thematic track will be noted in the student’s official transcript upon graduation provided that the student selects the thematic track prior to completion of degree requirements.
2. Create a thematic track of their own choice. In this case, the thematic track will not be noted in the student’s transcript.
3. Choose to complete the GEP without a thematic track.

**Objective for a thematic track:** Thematic tracks will provide educational experiences that help students to use critical thinking skills to connect multiple disciplinary perspectives around a common topic or theme.
Requirement for Completion of a Thematic Track
(12 credit hours)

Choose a total of twelve credit hours in the thematic track category as a combination of four courses or more (12 credit hours) - which are linked by a common theme or topic. At least one course must come from the university approved GEP Mathematical Sciences/Natural Sciences/Engineering lists; at least one course must come from the GEP Humanities/Social Sciences/Visual and Performing Arts lists. The remaining courses are also to be chosen from the approved GEP lists.

General Education Competencies

The assessment of General Education at NC State is coordinated through the Office of Assessment in the Division of Academic and Student Affairs (http://dasa.ncsu.edu/) (DASA). In spring 2012, five general education competencies were identified and defined by NC State faculty and were vetted through faculty senate, the Council on Undergraduate Education, and the Associate Deans.

The Office of Assessment, in partnership with faculty from across campus, uses rubrics with student work to assess oral communication and written communication. Critical and creative thinking has been assessed through testing, surveys, and rubrics applied to student projects through NC State’s Quality Enhancement Plan (https://think.dasa.ncsu.edu/the-plan-and-annual-reports/). In addition, we assess writing, reading, mathematics and critical thinking for first-year and senior students using the ETS Proficiency Profile, (http://www.ets.org/proficiencyprofile/about/) the Critical Thinking Assessment Test (CAT) (https://www.ets.org/cat/), and ETS HElighten Quantitative Literacy Assessment (https://www.ets.org/heighten/about/quantitative_literacy/).

For more information on General Education Competencies, please visit the Office of Assessment website (https://assessment.dasa.ncsu.edu/academic-assessment/general-education-assessment/).

The General Education Competencies are defined as follows:

Written Communication Competency

Definition: Written communication is the purposeful development, expression, and revision of ideas in writing for specific audiences. Effective written communication follows appropriate genre conventions and may include a combination of text and other media.

Oral Communication Competency

Definition: For the purposes of the GEP, the oral communication competency involves the ability to ethically and responsibly use verbal and nonverbal communication for clear expression of ideas and collaborative processes; engage in active listening; build, express, and justify a claim; and adapt messages to varying situations and contexts.

Critical and Creative Thinking

Definition: Critical thinking is the active, persistent and careful consideration of a belief or form of knowledge. It includes analysis and judgments about the ideas and conditions that support beliefs and the conclusions that follow. Critical thinking involves analyzing and evaluating one’s own thinking and that of others. It is subject to intellectual standards, including clarity, accuracy, precision, relevance, significance, depth, breadth, logic, and fairness.

Definition: Creative thinking is the generation of new ideas within or across disciplines. It draws upon or breaks rules and procedures in those disciplines and actively engages students in bringing together existing ideas into new configuration; developing new properties or possibilities for something that already exists; and discovering or imagining something entirely new. Standards for judging creative thinking include originality, appropriateness, flexibility, and contribution to the domain.

Quantitative Literacy

Definition (AAC&U): “also known as Numeracy or Quantitative Reasoning (QR) is a ‘habit of mind,’ competency, and comfort in working with numerical data. Individuals with strong QL skills possess the ability to reason and solve quantitative problems from a wide array of authentic contexts and everyday life situations. They understand and can create sophisticated arguments supported by quantitative evidence and they can clearly communicate those arguments in a variety of formats (using words, tables, graphs, mathematical equations, etc. as appropriate)” (Rhodes, 2010).

References

Graduation Requirements

Students are eligible for graduation when they have satisfactorily completed all of the academic requirements of their degree program as specified by their major department, their college and the university.

NC State requires that, in addition to other university, college, and departmental requirements, all students must have a cumulative grade point average (GPA) of at least 2.000, based on all courses attempted at NC State, in order to be eligible to receive a baccalaureate degree.

Minimum Hours Required for Graduation

Most baccalaureate programs require a minimum of 120 credit hours for graduation; exceptions include designated five-year programs, and programs in certain colleges. Students may complete more hours than the required minimum.

Length of Time to Graduation

The normal and expected length of time to graduation for a baccalaureate degree is four years (average of eight semesters) provided the student completes an average of slightly more than 16 credit hours each semester (for most curricula) and/or attends one or more summer sessions.

Degree-seeking undergraduate students who exceed credit hour limits toward their degree may be subject to a 50 percent Tuition Surcharge. The University of North Carolina Board of Governors defines exceeding credit hour limits as:
• more than 140 degree credit hours to complete a baccalaureate degree in a four-year program, or
• more than 110 percent of the credit hours necessary to complete a baccalaureate degree in any program officially designated by the Board of Governors as a five-year program.

In order to make continuous progress toward graduation, students are encouraged to take full advantage of the university’s advising and support services. Effective career decision-making and early, deliberate, long-range semester-by-semester planning of courses and careful selection of extra-curricular commitments can provide direction and motivation necessary for effective use of time towards graduation.

Additional factors that may assure a student’s continuous progress toward graduation include good academic performance in first-year and basic prerequisite courses, advanced placement for introductory courses and enrollment in summer sessions. Students are discouraged from taking unrealistic course loads as a means to accelerate their progress toward graduation as this may result in poor academic performance.

Students may require more than eight semesters to complete an undergraduate program at NC State. In some cases this is the result of effective decision-making on the part of the student for such things as participation in cooperative education or study abroad programs; a decision to be a part-time student with a reduced course load for reasons of health, necessary outside employment, or parental responsibilities; or attempting dual degrees, double majors or academic minors. Students are encouraged to discuss their specific situations and options with their academic advisors.

In other cases, the length of time to graduation may be prolonged beyond the eighth semester as a result of incomplete or inadequate secondary school background requiring some additional compensatory, developmental or prerequisite courses. Poor academic performance in the freshman year or early semesters, or late changes in curriculum, could also impact time to graduation.

Semester-by-Semester Plans

The Semester-by-Semester Plans listed under each College reflect an 8-semester display of the requirements for the specific degree program. Many degree audits in the Student Information System (SIS) has a corresponding semester-by-semester display.

The effective date for each plan represents the date the specific degree requirements are effective. When students are accepted into a degree program, they follow the specific requirements for the degree in effect at that time. When new requirements or significant changes are made to a degree program, a new effective date is created for those students entering the degree program under the new requirements.

Semester-by-semester plans are available throughout this catalog and on the Office of Undergraduate Courses, Curricula and Academic Standards website (https://oucc.dasa.ncsu.edu/undergraduate-academic-programs/semester-by-semester-plans/).

Limited D Grades

Some colleges and departments have established limitations on the use of D grades in certain courses or categories of courses for satisfying graduation requirements. Students should consult with their academic advisors if they have any questions.

Grade Point Average in Major

Some departments have established graduation requirements of a grade point average of 2.000 on all courses attempted in the major at NC State or a minimum letter grade requirement in some or all major courses. Such a requirement is in addition to the university grade point average total requirement of 2.000 for all courses attempted at NC State. Students are encouraged to enquire about specific requirements in majors of interest.

Residence Requirements

To be eligible for a bachelor’s degree, a student must be enrolled in a degree program at NC State, must have completed at least 25 percent of credit hours required for graduation through courses offered by NC State, and must have earned at least 30 of the last 45 hours of credit through NC State courses. In no case shall the proportion of credit hours taken at NC State and applied towards a bachelor’s degree be less than 25 percent. Individual departments and/or colleges may have additional residence requirements. Be sure to ask your advisor about any special requirements.

Note: The College of Engineering has a policy that transfer students normally must earn at least 48 of their last 60 hours of credit at NC State while enrolled as degree candidates. Students are encouraged to consult with their academic advisors regarding whether additional residency requirements apply to their major.

Satisfactory Academic Progress

Satisfactory Academic Progress (SAP) refers to the policies that require students to meet certain standards to be eligible to continue enrollment and receive financial aid. The information provided in this section details more information on the SAP policies and procedures to be able to maintain eligibility.

SAP is calculated for undergraduate students and for financial aid purposes at the end of the Spring semester (May). All students who fail to meet SAP requirements have the opportunity to submit an appeal to continue enrollment and/or for financial aid eligibility for a subsequent term.

More information about Satisfactory Academic Progress, including the appeal process and criteria, is available on the Student Services Center website (https://studentservices.ncsu.edu/your-degree/academic-progress/).

Student Services Center
2831 Thurman Dr
Raleigh, NC 27695
Phone: 919-515-6278
Email: studentservices@ncsu.edu

All undergraduate students, regardless of when they first enrolled in NC State University, will be subject to the Progress Toward Undergraduate Degree (https://policies.ncsu.edu/regulation/reg-02-05-03/) regulation.

Undergraduate and Agricultural Institute (AGI) students must be enrolled in a minimum of 12 credit hours per term to be considered full-time. Undergraduate students are encouraged to enroll in at least 15 hours per term in a degree-granting major to remain on track to graduate.
Satisfactory Academic Progress (SAP) for undergraduate students is evaluated annually at the end of the Spring semester (May).

Undergraduate and AGI students must meet the following standards for continued enrollment:

- Successfully complete at least 2/3 of all attempted hours*
- Maintain an academic standing that allows for continued enrollment.

Students must maintain a cumulative GPA of at least 2.0 or be on Academic Warning or Probation in order to be eligible to continue enrollment. View more on Academic Standing here (https://studentservices.ncsu.edu/your-degree/academic-progress/academic-standing/).

Undergraduate and AGI students applying for financial aid must also meet the standards outlined by the Satisfactory Academic Progress for Financial Aid Eligibility Policy (https://studentservices.ncsu.edu/your-money/financial-aid/eligibility/).

* Attempted hours = All hours attempted toward the degree  
* Completion rate = Hours Completed/Hours Attempted

All students are subject to the academic standards as set forth by the Department of Registration and Records, the Graduate School and the College of Veterinary Medicine.

All financial aid applicants are subject to the Eligibility for Continued Receipt of Financial Aid regulation (REG 02.70.02) (https://policies.ncsu.edu/regulation/reg-02-70-02/) in order to be eligible for receipt of financial aid.

Satisfactory Academic Progress (SAP) will be evaluated annually at the end of each Spring semester (May).

**Undergraduate and Agricultural Institute (AGI) Students**

All Undergraduate and AGI students are subject to the Progress Toward Undergraduate Degree (REG 02.05.03) (https://policies.ncsu.edu/regulation/reg-02-05-03/) and the Continuation of Undergraduate Enrollment (REG 02.05.01) (https://policies.ncsu.edu/regulation/reg-02-05-01/) regulations. More information is available here (https://studentservices.ncsu.edu/your-degree/academic-progress/ugrd/).

Undergraduate and AGI students applying for financial aid must also meet the following standards in addition to the standards to undergraduate continuation standards:

- Successfully complete at least 2/3 of all attempted hours
- Maintain a minimum cumulative 2.0 Grade Point Average (GPA)
- Graduate or be able to graduate before attempting more than 150% of the hours required for the degree program (e.g. maximum time frame of 180 hours for a 120-hour degree program.)

**Graduate Students**

All graduate students are subject to the Academic Difficulty (https://policies.ncsu.edu/regulation/reg-02-45-01-academic-difficulty/) and Time Limit for Completion of Graduate Degree (https://policies.ncsu.edu/regulation/reg-02-25-10/) regulations.

Graduate students applying for financial aid must also meet the following standards:

- Successfully complete at least 2/3 of all attempted hours
- Maintain a minimum cumulative 2.0 Grade Point Average (GPA) and not be placed on an Academic Probation or a Terminated-Reinstated status
- Graduate before exceeding the maximum time frame

**Professional Students**

All Doctor of Veterinary Medicine (DVM) professional students are subject to the academic standards established by the College of Veterinary Medicine.

DVM students applying for financial aid must also meet the following standards:

- Successfully complete at least 2/3 of all attempted hours
- Maintain a minimum cumulative 2.0 GPA
- Graduate before exceeding the maximum time frame of 6 years

**Non-Degree Studies (NDS) Students**

All NDS students are subject to the Non-Degree Studies Enrollment (https://policies.ncsu.edu/rule/rul-02-66-03/) rule.

NDS students applying for financial aid must also meet the following standards:

- Successfully complete at least 2/3 of all attempted hours
- Maintain a minimum cumulative 2.0 GPA
- Complete coursework or program before exceeding the maximum time frame as set in the Non-Degree Studies Enrollment (https://policies.ncsu.edu/rule/rul-02-66-03/) rule.

For more information on Satisfactory Academic Progress for Financial Aid Eligibility, including reinstatement of eligibility and how to appeal for eligibility, visit the Student Services Center website (https://studentservices.ncsu.edu/your-money/financial-aid/eligibility/progress/).

**Office of Scholarships and Financial Aid**

Phone: 919-515-6278

Email: studentservices@ncsu.edu

**Student Conduct**

**Code of Student Conduct**

All students who enroll at NC State are required to adhere to the Code of Student Conduct (https://policies.ncsu.edu/policy/pol-11-35-01/). The Code serves as the basis for student conduct at NC State. It contains information related to the University’s jurisdiction over student behavior, academic and non-academic violations, potential sanctions available when a violation occurs, and information regarding interim suspension.

All students are strongly encouraged to read and understand the Code of Student Conduct.

The Student Disciplinary Procedures establish the procedures that will be used when a student has been accused of a violation. It also establishes the rights and responsibilities for individuals accused of a violation (the respondent) and those bringing an allegation on behalf of the University (the complainant). In addition, the Student Discipline...
Procedures establish and govern the rules regarding student appeals in the event that the student is found responsible for an alleged violation.

For more information, please contact the Office of Student Conduct at 919.515.2963 or access the Code through the Office of Student Conduct website (https://studentconduct.dasa.ncsu.edu/).

Student Records

Student Rights to Privacy and Records

The Family Educational Rights and Privacy Act (FERPA) (https://policies.ncsu.edu/regulation/reg-11-00-01/), a Federal law, and its corresponding regulations give students certain rights to privacy of their education records and rights of access to their education records.

Generally, students may obtain copies of their education records if circumstances make on-site inspection impractical and the student is in good standing. For example, a request for copies may be denied if the student lives within commuting distance of NC State, or there is a "hold" on the student's records, or there is an unresolved disciplinary action against the student, or the requested records include exam or test questions. When copies are provided, the student may be charged a reasonable fee for the actual copying expense.

NC State shall not disclose the education records of a student to other persons unless that student has given consent in writing or an exception exists under FERPA.

Transcripts of Academic Records

An official transcript is issued only at the authorization or written request of the student concerned. A transcript is a complete copy of a student's academic record at the time that it is issued. It contains all course work, including undergraduate, graduate and/or non-degree, taken while enrolled at NC State University. NC State will NOT issue a partial transcript. The university will automatically send all course work when a transcript is requested.

For more information on how to obtain an official transcript, please visit the Student Services Center website (https://studentservices.ncsu.edu/your-grades/transcripts/).

Directory Information

The University may disclose “directory information” without student consent. Directory information consists of a student's name, preferred email address, enrollment status (e.g., full-time or part-time), grade level (freshman, sophomore, etc.), major field of study, dates of attendance, and honors, degrees and awards received, weight and height of student-athletes, participation in officially recognized activities and sports, and most recent educational institution attended. For students residing in University-owned or leased housing facilities, the University may also designate as “directory information” a student's local and permanent addresses and age for the limited purpose of responding to requests from the United States Census Bureau as part of census data collection.

Change of Name, Address, or Telephone

It is the student's responsibility to notify the University of any changes in name, address, or telephone. Failure to do so may prevent prompt delivery of important university correspondence and correct notification of hometown newspapers of honors received. International students are required by law to notify the university of any change or correction in name or address within 10 days. Updating address changes in MyPack Portal system fulfills international students' federal requirements for maintaining status in SEVIS.

Name changes can only be completed by submitting a Name Change/ Marital Status Change Request Form, available from the Student Services Center (https://studentservices.ncsu.edu/), along with the required proof of identification.

Changes of address or telephone can be completed in MyPack Portal (http://mypack.ncsu.edu/). More information about how to update personal information can be found on the Student Services Center website (https://studentservices.ncsu.edu/your-resources/privacy/frequently-asked-questions).

Note: NC State University policies, rules and regulations are continuously being updated and reviewed as the need arises. For the most current information regarding this section, please visit the Policies, Regulations, and Rules website (http://policies.ncsu.edu/).

Student Status and Honors

Below are plain-language explanations of academic honors and academic status, as well as information about withdrawal from the university.

- Academic Honors (p. 76)
- Academic Standing (p. 77)
- Withdrawal (p. 77)

Academic Honors

Academic Honors

Students with exceptional academic performance may be recognized in the following ways at the university.

- Phi Beta Kappa, Outstanding students majoring in the College of Humanities and Social Sciences, the College of Sciences, basic science departments in the College of Agriculture and Life Sciences, and the Department of Economics in the Poole College of Management are eligible for election based on their academic achievements.
- Phi Kappa Phi, Outstanding students from all majors are eligible for election to membership in Phi Kappa Phi, the University's most prestigious campus-wide scholastic honor society. Students are invited to join based on their academic achievements.

A list of College Honor Societies can be viewed online (https://honors.dasa.ncsu.edu/honors-societies/).

Scholastic Honor Societies

The following scholastic honor societies recognize outstanding academic performance for undergraduates at the Junior level and above and graduate students:

- Phi Beta Kappa, Outstanding students majoring in the College of Humanities and Social Sciences, the College of Sciences, basic science departments in the College of Agriculture and Life Sciences, and the Department of Economics in the Poole College of Management are eligible for election based on their academic achievements.

A list of College Honor Societies can be viewed online (https://honors.dasa.ncsu.edu/honors-societies/).

Semester Dean's List

A full-time undergraduate student, who earns a semester average of (a) 3.5 or better on 12 to 14 credit hours of course work for which grade points are earned; or (b) 3.25 or better on 15 or more credit hours of course work for which grade points are earned shall be placed on the Dean's List for that semester. Students are not eligible for the Dean's List in any semester in which they receive an F, U, or IN grade. When IN
grades are resolved, however, students who are otherwise eligible shall be added retroactively to the Dean’s List for that semester. Dean’s List recognition shall be noted on the student’s semester grade report and permanent academic record.

Graduation with Honors
Undergraduate degree honor designations are:

- **Cum Laude**- for GPA 3.25 through 3.499
- **Magna Cum Laude**- for GPA 3.5 through 3.749
- **Summa Cum Laude**- for GPA 3.75 and above

To be eligible for degree honor designations students must have completed at least two semesters and at least 30 credit hours at NC State.

REG 02.30.01 - Academic Honors (https://policies.ncsu.edu/regulation/reg-02-30-01/) is available to view in full on the University’s Policies, Regulations and Rules website.

Academic Standing
Academic status will be calculated at the end of every fall, spring and summer term for all enrolled undergraduate students.

Academic Status and Continuation Criteria

Good Standing
Students must maintain a cumulative Grade Point Average (GPA) of at least 2.0 or be on Academic Warning or Academic Probation status in order to continue enrollment. Students are considered to be in Good Standing if they are eligible to continue enrollment.

Academic Warning
Students who meet either of the following criteria will be placed on Academic Warning and will be allowed to continue enrollment:

- Have a cumulative GPA less than 2.0 and a grade point deficit of 15 or less
- Have a cumulative GPA above 2.0 and a term GPA below 1.0

Students on Academic Warning must maintain a term GPA of at least 2.0 for every subsequent fall, spring and summer term of enrollment, until they achieve a cumulative GPA of at least 2.0.

Academic Probation
Students will be placed on Academic Probation for one term after an appeal to return from Academic Suspension has been approved.

Students on Academic Probation who:

- earn a term GPA of at least 2.0 during their Probation term will move to Academic Warning and will be subject to the continuation criteria described above.
- fail to earn a term GPA of at least 2.0 during their Probationary term will be suspended.

Timely Advising
Students on Academic Warning or Academic Probation are required to meet with their academic advisor during the first four (4) weeks of the fall or spring term to discuss their plan for academic success.

Academic Suspension
Students who meet either of the following criteria will be placed on Academic Suspension:

- Have a cumulative GPA less than 2.0 and a grade point deficit\(^1\) greater than 15 at the end of any term
- Students on Academic Warning or Probation who fail to maintain a term GPA of at least 2.0 for every subsequent fall, spring or summer term

Options for suspended students:

All suspended students have the right to submit an appeal to continue enrollment for a subsequent term. Information on submitting appeals is available online (https://go.ncsu.edu/academicprogress/).

Note: Students who remain on Academic Suspension will have all future term enrollments canceled and may not re-enroll.

\(^1\) Grade point deficit (GPD) is defined as the number of grade points below the required 2.0 minimum GPA. The deficit reflects the number of hours of B (3.0) grades necessary in the future to raise the GPA to the 2.0 minimum.

REG 02.05.01 - Continuation of Undergraduate Enrollment (http://policies.ncsu.edu/regulation/reg-02-05-01/) is available to view in full on the University’s Policies, Regulations, and Rules website.

Withdrawal
Withdrawal from the University
Information on the term withdrawal process and retroactive withdrawals is available on the Student Services Center website (https://studentservices.ncsu.edu/your-classes/withdrawal/process/). Information on term withdrawal for graduate students is available in the Graduate School Handbook (https://grad.ncsu.edu/students/rules-and-regulations/handbook/3-16-withdrawal-from-the-university/).

Students who wish to drop all the courses for which they are registered must withdraw from the university for the remainder of the semester or summer session in which they are enrolled. Students who have registered and prepaid are considered to be registered and must be officially withdrawn, unless they have notified the university prior to the beginning of the first day of classes that they wish to have their registration cancelled.

Undergraduate students who wish to initiate a term withdrawal should consult with their academic advisors to discuss the academic implications of the intended withdrawal. A withdrawal may impact a student’s academic eligibility, financial aid, and progress toward a degree. All withdrawals for a current or upcoming term are initiated through the self-service Term Withdraw page in the MyPack Portal. The withdrawal process will include information on refunds and financial aid and will provide contacts to University Housing and Dining. Undergraduate students who do not enroll for a fall or spring term are required to complete the readmission process before returning to classes.
Non-Degree Studies students withdraw through the self-service Term Withdraw link in MyPack Portal. NDS students may contact the Student Services Center at (919) 515-6278 if they have any questions about this process.

International students who for some reason want or need to interrupt their program of study and either withdraw completely from their program or take a semester away from their studies must consult both their academic advisor (or DGP) and an Office of International Services (OIS) advisor. There are university and departmental procedures as well as immigration consequences that must be considered before any action is taken by the student. International students who are contemplating a withdrawal should call the OIS at (919) 515-2961 for an appointment.

NC State students carrying course work at another campus under the Inter-Institutional Program arrangement must contact the Student Services Center at (919) 515-6278 or studentservices@ncsu.edu to initiate the paperwork necessary for removal from the class roll at the other institution.

Students visiting from other institutions who are registered for NC State course work under the Inter-Institutional arrangement must initiate withdrawal on their home campus.

Financial aid recipients who withdraw during the semester or summer sessions may be required to repay all or a portion of the aid received, depending on the date upon which the withdrawal is effective. Students can contact the Student Services Center during the withdrawal process to determine their individual repayment options.

**Withdrawal After the Last Day of the Official Course Drop Period**

A current semester withdrawal after the drop/revision deadline (https://studentservices.ncsu.edu/calendars/academic/) removes you from all courses in a current semester.

Withdrawals after the drop/revision deadline are approved by the university only under extenuating circumstances (https://studentservices.ncsu.edu/your-classes/withdrawal/extenuating-circumstances/). Documentation is required to support these requests. The documentation must provide evidence that the extenuating circumstances were unforeseeable and unavoidable and caused a serious disruption in academic functioning. Submission of a withdrawal request after the drop/revision deadline is not guaranteed approval. Students should have contingency plans in place in case a withdrawal request is delayed or denied.

Students who intend to withdraw after the drop/revision deadline should:

1. Consult with your advisor before initiating a withdrawal to discuss the academic implications of the intended withdrawal.
2. Organize the details of your case. It’s often helpful to write a statement detailing the grounds for your request to withdraw (for example, what occurred, when it occurred, how it affected you, and what you have done or plan to do about it).
3. Organize your documentation to verify the facts of your request. You can obtain documentation from your healthcare or mental health provider by giving them this form (https://counseling.dasa.ncsu.edu/wp-content/uploads/sites/14/2015/05/ProviderLetter.pdf).
4. Initiate your term withdrawal request through the MyPack Portal. Term withdrawal requests can be initiated through the MyPack Portal up to 30 days after the last day of the term (https://go.ncsu.edu/academiccalendar/).

5. Withdrawal requests after the Drop/Revision deadline require the approval of the Associate Dean of your college. There is no guarantee of approval so it is recommended that you have a contingency plan in mind in the event of a denial.
6. Notification of the approval or denial of withdrawal requests will be communicated to students via their NC State email address.
7. Students who are denied their request for a Term Withdrawal have the right to appeal the decision. Information regarding the process for the appeal is available via a link in the denial notification email. Appeals must be filed within ten (10) calendar days from the date of the notification of denial.

Courses for which students are officially enrolled are recorded on the transcript without grades or grade points but with a notation of “W” to indicated approval to withdraw after the withdrawal deadline.

**Transfer and Exam Credit**

**Credit by Examination**

Undergraduate students currently registered at NC State may request an examination for course credit in a course whether enrolled in that course or not, under the conditions described below. Students must initiate a request with their advisor (except when a teaching department awards credit based upon group testing for placement purposes). Should the advisor approve, the student must arrange for the examination with the department offering the course. The department may administer the examination in any manner pertinent to the materials of the course. Departments are encouraged to offer credit by examination in all courses but have the prerogative of excluding certain courses, which are demonstrably unsuited for credit by examination.

The academic standards for credit by examination will be commensurate with the academic standards for the course. If a student’s performance on the examination is judged to be of C- or higher quality, the department head will notify the Department of Registration and Records on a Grade Report Form that the student has received “credit by examination” for the course. The Department of Registration and Records will enter the appropriate number of credit hours on the student’s permanent academic record. Credits earned through examination are not used in the calculation of a student’s grade point average.

A student who receives credit by examination in a course in which that student is currently enrolled must officially drop that course no later than the last day to drop for the term enrolled. If the course credit by examination would enable a student to complete the final requirements for a degree, that student need not be registered in order to receive the credit.

Once a student has failed a course, has failed a previous credit by examination attempt, or has been enrolled in a course past the last day to drop, the student may not attempt credit by examination for that course. Under unusual circumstances, exceptions may be made upon the written recommendation of the student’s adviser and the approval of the department offering the course.

The full regulation (https://policies.ncsu.edu/regulation/reg-02-50-01/) on Credit by Examination is available on the Policies, Rules and Regulations website.
Transfer Credit

Transcripts of college course credit for new transfer students and for NC State students who have taken course work at another institution are evaluated by the Office of Undergraduate Admissions in consultation with the deans of the NC State colleges to determine how the work applies to fulfilling the graduation requirements of each student’s intended major. Only courses where the student receives a grade of C or better will be considered for transfer credit. Students admitted to an NC State undergraduate degree program who wish to take courses at another institution must obtain prior endorsement from their academic department and prior written approval from their college’s associate dean (or dean’s office) in order to insure that the transfer credits will apply toward specific graduation requirements. Transfer credit is not recorded on former students’ permanent records until after they have been readmitted and have re-enrolled at NC State. Students should not assume that transfer credits will be accepted, and should speak with their academic advisor.

Credit accepted for transfer from another institution is shown only as credit hours and is not included in the computation of the grade point average. A list of courses and how they transfer to NC State from other institutions on the Office of Undergraduate Admissions website (https://admissions.ncsu.edu/apply/credit-opportunities/). Please note this website speaks only to the general transferability of the course work. How transfer credit applies to a student’s degree is determined by the student’s academic department and college associate dean’s office.

For the most current information regarding this regulation, please view the full regulation (http://policies.ncsu.edu/regulation/reg-02-10-03/).

Centers and Institutes

NC State’s Centers and Institutes reflect the university’s commitment to interdisciplinary scholarly pursuit, including research, instruction and public service. These cutting-edge organizations are frontrunners in their field, blazing the trails for other researchers to follow. Research and innovation on topics ranging from climate change to textiles add value to the everyday lives of our state’s citizens, maintaining public trust and admiration and standing at the forefront in global excellence for research and discovery. Here, the leadership of these organizations can access the materials, procedures and policies necessary to manage their efforts responsibly, equitably and with the highest integrity.

For a full list of the NC State Centers and Institutes, as well as the centers’ administrative units and contact information, visit the Centers and Institutes website (https://research.ncsu.edu/centers/).

College of Agriculture and Life Sciences

Agriculture is a diverse industry that touches all of us in many ways. The life sciences provide foundations for studying life and the role of plants and animals in the environment. Academic programs in the college represent a unique blending of the agriculture and life sciences. The College of Agriculture and Life Sciences (CALS) offers specialized majors in agriculture and life sciences that prepares graduates for fulfilling careers in industry, academia, government, or nonprofits, or for graduate or professional programs.

The goals of the instructional programs in CALS include proving relevant, scientific, and practical knowledge of the food, agricultural, and life sciences to its students. With the support of highly qualified and accomplished faculty, students are able to achieve their greatest personal and professional potential. Central to the college’s goals is the cultivation of interdisciplinary problem-solving skills that will serve its graduates well as they pursue a lifetime of learning and professional experiences.

What sets our college apart:

- Student activities such as the representing your college and serving on the Agri-Life Council or becoming a CALS Ambassador and gaining professional and hands-on experience in the agriculture and life sciences world
- Nationally-recognized honors societies that allow academically-strong students to further their education
- Honors Program inspires students to take ownership of their education, explore their passions and pursue their academic goals beyond the classroom
- Approximately 620 scholarships awarded to CALS students each year based on merit, financial need, academic major and/or outside interests

For more information about our college, including contact information, visit our website (https://cals.ncsu.edu/).

• Agricultural Business Management (Certificate) (For Post-Baccalaureate Students, Distance Education) (p. 178)
• Agricultural Business Management (Certificate) (Non Post-Baccalaureate Students, Distance Education) (p. 179)
• Agricultural Leadership (Certificate) (p. 131)
• Animal Nutrition (Certificate) (p. 184)
• Crop Science Certificate (Distance Education) (p. 300)
• Feed Milling (Certificate) (p. 369)
• Field Botany (Certificate) (p. 301)
• Food Safety & Quality Management (Certificate) (p. 317)
• Fundamentals of Entomology (Certificate) (p. 311)
• Horticulture (Undergraduate Certificate) (p. 344)
• Plant Pests, Pathogens, and People (Certificate) (p. 312)
• Soil Science (Certificate) (p. 304)
• Swine Science (Certificate) (p. 221)

Agricultural Institute

Instructional programs of the Agricultural Institute (AGI) are organized and conducted as a part of the overall program in the College of Agriculture and Life Sciences. The Agricultural Institute is an addition to and not a substitute for the bachelor of science degree-granting program of the College of Agriculture and Life Sciences. The Institute uses the same facilities (classrooms, laboratories, farms) as the four-year program. Facilities are available for both teaching and observing how technology is applied in agriculture and other areas.

People with the kind of training offered by the Agricultural Institute are in demand in North Carolina and the nation. By adding new courses of study to keep up with rapidly changing technology, the Agricultural Institute strives constantly to meet the needs of its students. In doing so, it prepares them to be highly trained candidates for careers in agribusiness, agriculture, pest management, ornamentals, landscape, turfgrass, and other related areas.

Here are some key highlights about the Agricultural Institute:

• We offer six academic programs leading to an Associate of Applied Science (AAS) degree
• The Institute uses the same facilities (classrooms, laboratories, farms) as the four-year bachelor of science degree-granting program
• All AGI students have access to the AGI tutorial center as well as the AGI Writing website
• Student organizations like AGI Ambassadors and Delta Tau Alpha Honor Society bring AGI students together to share their passions

Admissions

The Agricultural Institute has separate admissions requirements for incoming freshman students and transfer students. Visit our website (https://cals.ncsu.edu/agricultural-institute/students/admissions/) for more information about our admissions requirements for our programs.

For more information about this department, including contact information, visit our website (https://cals.ncsu.edu/agricultural-institute/).

Agribusiness Management (AAS)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orip.ncsu.edu/pgas/!

Agriculture is a multifaceted and cutting-edge industry that incorporates the fundamentals of business activity, including economics, marketing, sales, law, policy, and international trade.

The agricultural business management major combines core knowledge in agricultural business and economics with skill-building in areas such as animal production and management, crop production, pest management and equipment maintenance.

You will be prepared to succeed in managerial positions in agriculture and agriculture-related businesses, including:

- Farm Management
- Entrepreneurship
- Animal Health Sales
- Agricultural Lobbying
- Agricultural Import/Export
- Advertising

For more information about this major, including contact information, please visit our website (https://cals.ncsu.edu/agricultural-institute/students/majors/agribusiness-management).

### Total Hours

Total Hours: 64

---

1 WRT 111 Expository Writing and WRT 114 Professional Writing, Research and Reporting must be completed with a C- minus or higher grade for transfer to an NC State baccalaureate program.

2 MAA 102 Mathematics in Agriculture and Related Sciences must be completed with a C- minus or higher grade.

3 ARE 112 Agricultural & Agribusiness Marketing or ARE 133 Agricultural & Environmental Policy is required. If ARE 112 Agricultural & Agribusiness Marketing is taken, student must take the ARE elective during the second year spring. If ARE 133 Agricultural & Environmental Policy is taken, student must take the ARE elective during second year fall.

---

### Agribusiness Management (Certificate) (Distance Education)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas)!
The University Associate Certificate in Agribusiness Management is available to any student enrolled as a non-degree studies (NDS) student at North Carolina State University. This certificate is not available to students enrolled in a 2-year or 4-year degree program at N.C. State University. This certificate provides individuals an opportunity to learn applied business and economic principles that are useful in career in agricultural and related industries. These could include careers in horticulture, landscaping, and chemical and farm equipment sales, as well as the production and distribution of crops and other commodities.

Program Coordinator
Dr. John S. Russ
Undergraduate Coordinator
Director of ARE Distance Education
Department of Agricultural & Resource Economics (ARE)
NC State University
Box 8109
Nelson Hall, Room 3346
Raleigh, North Carolina 27695
(919) 515-4677
russ@ncsu.edu

Admissions Requirements
- Have received a High School Diploma or a GED at least 12 months prior to applying to this program;
- Not enrolled in a degree program (2-year or 4-year) at N.C. State;
- Acceptance as a Non-Degree Studies (NDS) student through DELTA, if not already enrolled;
- Completed certificate program application that may be submitted to ARE at any time throughout the year; and
- Must be accepted into the AAS Certificate in Agribusiness Management program.

Completion Requirements
Completion of 15 credit hours from the list of required courses with a grade of C- or higher received for each course; and an overall GPA of 2.0 or higher must be achieved upon completion of all required courses.

- Three (3) years will be allowed for completion of all courses. The time limit starts with enrollment in the first course. Students will be allowed to defer no more than two semesters after acceptance into the program. Courses may be completed in any order.
- All courses must be taken through distance education unless special approval is granted for completion of an on-campus section to allow the student to successfully complete the course sequence for receipt of the certificate.
- None of the required 15 credit hours may be taken for S/U or “credit-only.”
- No pre-requisite course requirements are needed.
- No transfer credits from other institutions to fulfill certificate course requirements are allowed. Students currently enrolled in a 2-year Agribusiness Management degree program, or who would qualify for a 2-year degree AGB concentration, do not qualify for this certificate program.

Registration/Financial Aid information
Acceptance as a Non-Degree Studies (NDS) student at N.C. State University does not imply acceptance into this certificate program.

NDS students must also apply to the Department of Agricultural and Resource Economics to be accepted into this certificate program. Potential students should check to see if their financial aid will provide tuition for all courses required for this program. Financial aid may not be available for this certificate, or other non-degree programs or certificates at N.C. State University. Contact the Program Coordinator for more information.

Academic Structure
Term Effective: 1/2012
Plan Code: 32AGPCTA
CIP Code: 01.0101
Description: Associate Certificate in Agribusiness Management
Offered via Distance Education only

Additional information available on the departmental website for this certificate at http://go.ncsu.edu/agribusiness_online.

Plan Requirements
Plan Code: 32AGPCTA

Required Courses to be taken via distance education (section number 601) (15 credits):

Field Crops Technology (AAS)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orig.ncsu.edu/pgas/)

A growing world population and decreased arable land make it extremely important to explore new ways to grow more crops on less land.

The program focuses on sound crop and soil management practices and the wise use of farm resources. Students learn efficient and effective production strategies for the major agronomic crops based on best practices and integrated pest management principles, agricultural business principles and environmentally sound soil management.

For more information about this major, including contact information, please visit our website (https://cals.ncsu.edu/agricultural-institute/students/majors/field-crops-technology).

1. Courses graded “S” for Satisfactory are allowed. Students should consult their academic advisors to determine which courses fill this requirement.

Semester Sequence
This is a sample.
General Agriculture (AAS)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The general agriculture (GNA) degree offers students the opportunity to get a degree in agriculture without having to focus on one specific area such as horticulture or animal science. The GNA degree also offers the opportunity to concentrate on specific topics. Our GNA students can choose from agribusiness management, field crop production, general livestock management, poultry management, and swine management. These areas of concentration allow students to get the broad spectrum of courses that the GNA degree offers, and also to focus on one area a little more closely. The GNA program also allows for students who come to the Agricultural Institute unsure of their specialty areas a chance to learn about our diverse fields taught here.

Jobs in this area include:

- Farm Management
- Machinery and Equipment Sales
- Agricultural Chemical Distribution

To learn more information about this major, including contact information, visit our website (https://cals.ncsu.edu/agricultural-institute/students/majors/#general-agriculture).

Horticultural Science Management (AAS): Ornamentals and Landscape Technology Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)! The horticultural science management major is for students interested in growing, installing, and/or maintaining ornamentals, landscape plants and edibles. This program provides a foundation of science-based horticultural knowledge while emphasizing artistic and nutritional principles of plant use. Internships are required to reinforce classroom principles and vary based on the individual. The horticultural science management major offers concentrations in ornamentals and landscape technology and small-scale farming.

With this major, graduates can pursue careers in:

- Production Manager
- Horticulture Entrepreneur
- Landscape Foreman
- Pest Management Technician
- Small Farm Manager

To learn more about this major, including contact information, please visit our website (https://cals.ncsu.edu/agricultural-institute/students/majors/#horticultural-science-management).

### Livestock and Poultry Management (AAS)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Associate of Applied Science (AAS) degree in Livestock and Poultry Management is designed for students with an interest in working with various livestock (dairy, beef, and swine) and poultry (broiler, turkey, and commercial egg) species after graduation. This program prepare graduates for entry-level management positions in live production, technical consultation or with allied industries. The curriculum includes technical courses such as beef, swine, and poultry management courses; agricultural business courses; and General Education Program (GEP) courses which include English, math, humanities, and social sciences.

Career possibilities include:

- Poultry Management
- Livestock Management
- Feed and Equipment Sales
To learn more about this major, including contact information, please visit our website (https://cals.ncsu.edu/agricultural-institute/students/majors/#livestock-and-poultry-management).

1 WRT 111 Expository Writing and WRT 114 Professional Writing, Research and Reporting must be completed with a C-minus or higher grade for transfer to an NC State baccalaureate program.
Turfgrass Management (AAS)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orp.ncsu.edu/pgas/)

Turfgrass managers establish and maintain grasses for functional (erosion control), recreational, and ornamental purposes. They manage people and budgets and use their knowledge of plants and soils to produce high-quality, visually-appealing turfgrass areas. There are ample employment opportunities for well-trained managers in this industry.

Career possibilities include:

- Lawn Care
- Athletic Field Manager
- Golf Course Superintendent
- Parks and Recreation Management
- Sod Production and Installation

To learn more about this major, including contact information, please visit our website (https://cals.ncsu.edu/agricultural-institute/students/majors/#turfgrass-management).

Mrs. Emily Erickson
Program Coordinator and Advisor

Agricultural and Extension Education is a broad field of study and practice representing the blending of agricultural and social and behavioral sciences into educational programs for youth and adults. Central to the department’s goals is the formal and non-formal teaching of problem-solving and learning skills for a lifetime of growing, evolving, and changing. The program awards a Bachelor of Science degree in Agricultural Science, which provides graduates with the necessary knowledge, skills, and experiences for teacher licensure in agriculture for grades 7-12. Additionally, the agriculture industry loves our graduates because of their combination of agriculture and people knowledge and skills. The Agricultural Science degree also provides graduates with knowledge and skills in both agriculture and leadership skills that are essential to success in the food, agriculture, and natural resources industries.

Key highlights about our department:

- Students in the department complete a specialty area or a concentration in at least one area of agriculture
- Graduates may plan for teaching, administrative leadership and public relations positions in secondary schools, community colleges, universities, Cooperative Extension Service, and agribusinesses
- Graduates are highly qualified to enter agricultural careers in all areas of food, agriculture, and natural resources
- Career placement assistance is provided to all graduates

Curricula

The Agricultural Education curriculum encompasses areas of study that will enable students to participate effectively in planning, promoting, and initiating educational programs in agriculture. The program leads to a Bachelor of Science degree and prepares teachers of agriculture for secondary schools and community and technical colleges. The demand for agricultural education teachers exceeds present supply in the Carolinas, Virginia, and throughout the nation.

The Agricultural Science curriculum prepares graduates for careers in a wide variety of agricultural industry positions. The program leads to a Bachelor of Science degree in Agricultural Science. Students complete a minimum of two agricultural specialty areas, increasing their options for careers in agriculture. Students also complete a series of leadership courses to prepare them for leadership positions within the agricultural industries. Internships are not required in this curriculum, but are strongly encouraged.

For more information about this department, including contact information, visit our website (https://cals.ncsu.edu/agricultural-and-human-sciences/).

Agricultural Education (BS): Agricultural Business Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Agricultural Education major within the Department of Agricultural and Human Sciences prepares graduates to teach agriculture and be FFA advisors in public and private schools.

The Agricultural Business concentration is one of seven concentrations offered for the Bachelor of Science in Agricultural Education.

- Students interested in Agricultural Education may be eligible to apply for the North Carolina Teaching Fellows Program at NC State
- Many alumni pursue careers in middle and high schools, universities and community colleges, county extension offices, and in the agricultural industry

Teacher Licensure

Completion of the B.S. program in Agricultural Education leads to teacher licensure in North Carolina for grades 6-12. Because of North Carolina’s reciprocity agreements, graduates also can pursue certification in about 35 states. Download the Teacher Licensure Checklist (https://cals.ncsu.edu/agricultural-and-human-sciences/wp-content/uploads/sites/13/2017/06/Teacher-Licensure-Checklist.pdf) to review the requirements for admissions to teacher education candidacy and help you stay on course.

For more information more about this program, including contact information, visit our website (https://cals.ncsu.edu/agricultural-and-human-sciences/undergraduate/#agricultural-education-major).

Plan Requirements

Agricultural Education: Agricultural Business Concentration: 120 Total Units
### Orientation
Select one of the following:

- AEE 103 Fundamentals of Agricultural and Extension Education
- ALS 103 Freshman Transitions and Diversity in Agriculture & Life Sciences
- ALS 303 Transfer Transitions and Diversity in Agriculture & Life Sciences

### Communication
- COM 110 Public Speaking 3

### Sciences
- BIO 181 Introductory Biology: Ecology, Evolution, and Biodiversity 4
- BIO 183 Introductory Biology: Cellular and Molecular Biology 4
- CH 101 Chemistry - A Molecular Science 3
- CH 102 General Chemistry Laboratory 1

### Agricultural Education
- AEE 101 Introduction to Career and Technical Education 1
- AEE 206 Introduction to Teaching Agriculture 3
- AEE 226 Computer Applications and Information Technology in Agricultural & Extension Ed 3
- AEE 303 Administration and Supervision of Student Organizations 3
- AEE 322 Experiential Learning in Agriculture 3
- AEE 326 Teaching Diverse Learners in AED 3
- AEE 327 Conducting Summer Programs in Agricultural Education 1
- AEE 424 Planning Agricultural Educational Programs 3
- AEE 426 Methods of Teaching Agriculture 3
- AEE 427 Student Teaching in Agriculture 8
- AEE 491 Seminar in Agricultural Education 1

### Teaching Content Courses
- BAET 201 Shop Processes and Management or TDE 110 Materials & Processes Technology 3
- Plant Science Elective (p. 94) 3
- ANS 150 Introduction to Animal Science 3
- ANS 151 Introduction to Animal Science Lab 1
- SSC 200 Soil Science 4
- & SSC 201 and Soil Science Laboratory

### Professional Education
- EDP 304 Educational Psychology 3
- ELP 344 School and Society 3
- ED 311 Classroom Assessment Principles and Practices 2
- ED 312 Classroom Assessment Principles and Practices Professional Learning Lab 1

### Concentration Electives
- ARE 215 Small Business Accounting or BUS 225 Personal Finance 3
- ARE 303 Farm Management or ARE 304 Agribusiness Management 3
- ARE 306 Agricultural Law or ARE 309 Environmental Law & Economic Policy 3

### ARE 311 Agricultural Markets 3
or ARE 312 Agribusiness Marketing

### ARE 321 Agricultural Financial Management 3
or ARE 332 Human Resource Management for Agribusiness

### ARE, BUS or EC Elective (p. 96) 3

Select one of the following Economics electives:

- ARE 201 Introduction to Agricultural & Resource Economics
- ARE 201A Introduction to Agricultural & Resource Economics
- EC 201 Principles of Microeconomics
- EC 205 Fundamentals of Economics

### GEP Courses
- ENG 101 Academic Writing and Research 4
- GEP Humanities (p. 1423) 6
- GEP Mathematical Sciences (p. 1428) 6
- GEP Health and Exercise Studies (p. 1422) 2
- GEP Additional Breadth (p. 1417) (Mathematical Sciences/Natural Sciences/Engineering) 3
- GEP Interdisciplinary Perspectives (p. 1426) 5
- GEP U.S. Diversity (p. 1431) (verify requirement)
- GEP Global Knowledge (p. 1419) (verify requirement)

Foreign Language Proficiency (p. 1417) (verify requirement)

### Free Electives
Free Electives (12 Hr S/U Lmt) 2

Total Hours 120

1. A grade of C- or higher is required.
2. Courses graded “S” for Satisfactory are allowed.
3. Students should consult their academic advisors to determine which courses fill this requirement.

### Plant Science Electives

¹ A minimum grade of C- is required for graduation. A minimum grade of C is required for teacher licensure.
² Incoming freshmen complete AEE 103 Fundamentals of Agricultural and Extension Education. Transfer students may complete ALS 103 Freshman Transitions and Diversity in Agriculture & Life Sciences or ALS 303 Transfer Transitions and Diversity in Agriculture & Life Sciences.
Agricultural Education (BS): Agricultural Engineering Technology Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orp.ncsu.edu/pgas/)

The Agricultural Education major within the Department of Agricultural and Human Sciences prepares graduates to teach agriculture and be FFA advisors in public and private schools.

The Agricultural Engineering Technology concentration is one of seven concentrations offered for the Bachelor of Science in Agricultural Education.

- Students interested in Agricultural Education may be eligible to apply for the North Carolina Teaching Fellows Program at NC State.
- Many alumni pursue careers in middle and high schools, universities and community colleges, county extension offices, and in the agricultural industry.

Teacher Licensure

For more information more about this program, including contact information, visit our website (https://cals.ncsu.edu/agricultural-and-human-sciences/undergraduate/#agricultural-education-major).

**Semester Sequence**

This is a sample.
Agricultural Education (BS): Agronomy Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orip.ncsu.edu/pgas/)!  

The Agricultural Education major within the Department of Agricultural and Human Sciences prepares graduates to teach agriculture and be FFA advisors in public and private schools.

The Agronomy concentration is one of seven concentrations offered for the Bachelor of Science in Agricultural Education.

- Students interested in Agricultural Education may be eligible to apply for the North Carolina Teaching Fellows Program at NC State.
- Many alumni pursue careers in middle and high schools, universities and community colleges, county extension offices, and in the agricultural industry.

1 A minimum grade of C- is required for graduation. A minimum grade of C is required for teacher licensure.
2 Incoming freshmen complete AEE 103 Fundamentals of Agricultural and Extension Education. Transfer students may complete ALS 103 Freshman Transitions and Diversity in Agriculture & Life Sciences or ALS 303 Transfer Transitions and Diversity in Agriculture & Life Sciences.

Teacher Licensure

Completion of the B.S. program in Agricultural Education leads to teacher licensure in North Carolina for grades 6-12. Because of North Carolina’s reciprocity agreements, graduates also can pursue certification in about 35 states. Download the Teacher Licensure Checklist (https://cals.ncsu.edu/agricultural-and-human-sciences/wp-content/uploads/sites/13/2017/06/Teacher-Licensure-Checklist.pdf) to review the requirements for admissions to teacher education candidacy and help you stay on course.

For more information more about this program, including contact information, visit our website (https://cals.ncsu.edu/agricultural-and-human-sciences/undergraduate/#agricultural-education-major).

Dr. Carolyn Dunn  
Department Head  
Phone: 919-515-9142

| CH 101  | Chemistry - A Molecular Science                           | 4     |
| CH 102  | General Chemistry Laboratory                             | 4     |

Agricultural Education

| AEE 101 | Introduction to Career and Technical Education ¹       | 1     |
| AEE 206 | Introduction to Teaching Agriculture ¹                 | 3     |
| AEE 226 | Computer Applications and Information Technology in Agricultural & Extension Ed ¹ | 3     |
| AEE 303 | Administration and Supervision of Student Organizations ¹ | 3     |
| AEE 322 | Experiential Learning in Agriculture ¹                 | 3     |
| AEE 326 | Teaching Diverse Learners in AED ¹                     | 3     |
| AEE 327 | Conducting Summer Programs in Agricultural Education   | 1     |
| AEE 424 | Planning Agricultural Educational Programs ¹            | 3     |
| AEE 426 | Methods of Teaching Agriculture ¹                       | 3     |
| AEE 427 | Student Teaching in Agriculture ¹                       | 8     |
| AEE 491 | Seminar in Agricultural Education                      | 1     |

1 A minimum grade of C- is required for graduation. A minimum grade of C is required for teacher licensure.
EDP 304 Educational Psychology 1 3
ELP 344 School and Society 1 3
ED 311 Classroom Assessment Principles and Practices and Classroom Assessment Principles and Practices Professional Learning Lab 1 3 & ED 312 Teaching Content Courses
BAET 201 Shop Processes and Management 3 or TDE 110 Materials & Processes Technology 3
ANS 150 Introduction to Animal Science 4 & ANS 151 and Introduction to Animal Science Lab 3 Agriculture Elective (p. 108) 3
Select one of the following Economics Electives: 3
ARE 201 Introduction to Agricultural & Resource Economics 3
EC 201 Principles of Microeconomics 3
EC 205 Fundamentals of Economics 3
Agronomy Concentration
CS 213 Crop Science 3
CS 230 Introduction to Agroecology 3
CS 411 Crop Ecology 3
SSC 200 Soil Science 4 & SSC 201 and Soil Science Laboratory 3
SSC 341 Soil Fertility and Nutrient Management 3
SSC 342 Soil and Plant Nutrient Analysis 1 CS *** or SSC *** Elective (p. 112) 3
GEP Courses In The Major
ENG 101 Academic Writing and Research 1 4
GEP Humanities (p. 1423) 6
GEP Social Sciences (p. 1430) 3
GEP Mathematical Sciences (p. 1428) 6
GEP Health and Exercise Studies (p. 1422) 2
GEP Additional Breadth (p. 1417) (Mathematical Sciences/Natural Sciences/Engineering) 3
GEP Interdisciplinary Perspectives (p. 1426) 2
GEP U.S. Diversity (p. 1431) (verify requirement) 3
GEP Global Knowledge (p. 1419) (verify requirement) 3
Foreign Language Proficiency (p. 1417) (verify requirement) 3
Free Electives 4
Total Hours 120

1 A grade of C- or higher is required.
2 Courses graded “S” for Satisfactory are allowed.

Agricultural Education (BS): Animal Science Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Agricultural Education major within the Department of Agricultural and Human Sciences prepares graduates to teach agriculture and be FFA advisors in public and private schools.

The Animal Science concentration is one of seven concentrations offered for the Bachelor of Science in Agricultural Education.

- Students interested in Agricultural Education may be eligible to apply for the North Carolina Teaching Fellows Program at NC State
- Many alumni pursue careers in middle and high schools, universities and community colleges, county extension offices, and in the agricultural industry

Teacher Licensure

Completion of the B.S. program in Agricultural Education leads to teacher licensure in North Carolina for grades 6-12. Because of North Carolina’s reciprocity agreements, graduates also can pursue certification in about 35 states. Download the Teacher Licensure Checklist (https://cals.ncsu.edu/agricultural-and-human-sciences/wp-content/uploads/sites/13/2017/06/Teacher-Licensure-Checklist.pdf) to review the requirements for admissions to teacher education candidacy and help you stay on course.

For more information more about this program, including contact information, visit our website (https://cals.ncsu.edu/agricultural-and-human-sciences/undergraduate/#agricultural-education-major).

Total Hours: 12

Total Hours: 120

1 A minimum grade of C- is required for graduation. A minimum grade of C is required for teacher licensure.

2 Incoming freshmen complete AEE 103 Fundamentals of Agricultural and Extension Education. Transfer students may complete ALS 103 Freshman Transitions and Diversity in Agriculture & Life Sciences or ALS 303 Transfer Transitions and Diversity in Agriculture & Life Sciences.

3 Total hours of free electives vary in order to allow the minimum hours required for the degree to equal 120 credit hrs.
BIO 183 Introductory Biology: Cellular and Molecular Biology 4
CH 101 Chemistry - A Molecular Science 3
CH 102 General Chemistry Laboratory 1

Agricultural Education
AEE 101 Introduction to Career and Technical Education 1 1
AEE 206 Introduction to Teaching Agriculture 1 3
AEE 226 Computer Applications and Information Technology in Agricultural & Extension Ed 1 3
AEE 303 Administration and Supervision of Student Organizations 1 3
AEE 322 Experiential Learning in Agriculture 1 3
AEE 326 Teaching Diverse Learners in AED 1 3
AEE 327 Conducting Summer Programs in Agricultural Education 1
AEE 424 Planning Agricultural Educational Programs 1 3
AEE 426 Methods of Teaching Agriculture 1 3
AEE 427 Student Teaching in Agriculture 1 8
AEE 491 Seminar in Agricultural Education 1

Other Professional Education
EDP 304 Educational Psychology 1 3
ELP 344 School and Society 1 3
ED 311 Classroom Assessment Principles and Practices 1 2
ED 312 Classroom Assessment Principles and Practices Professional Learning Lab 1

Teaching Content Courses
BAET 201 Shop Processes and Management 3
or TDE 110 Materials & Processes Technology
Plant Science Elective (p. 115) 3
SSC 200 Soil Science 4
& SSC 201 and Soil Science Laboratory

Select one of the following Economics Electives: 3
ARE 201 Introduction to Agricultural & Resource Economics
ARE 201A Introduction to Agricultural & Resource Economics
EC 201 Principles of Microeconomics
EC 205 Fundamentals of Economics

Animal Science Concentration
ANS 150 Introduction to Animal Science 3
ANS 151 Introduction to Animal Science Lab 1
Select one of the following Evaluation of Farm Animals courses: 2
ANS 205 Physiology of Domestic Animals
ANS 303 Principles of Equine Evaluation
ANS 304 Dairy Cattle Evaluation
ANS 309 Livestock Evaluation
ANS 225 Principles of Animal Nutrition 3
or ANS 230 Animal Nutrition
ANS 215 Agricultural Genetics 3
or GN 301 Genetics in Human Affairs
Animal Science Elective (p. 117) 2
ANS Restricted Elective (p. 118) 6

GEP Courses In The Major
ENG 101 Academic Writing and Research 1 4
GEP Humanities (p. 1423) 6

GEP Mathematical Sciences (p. 1428) 6
GEP Health and Exercise Studies (p. 1422) 2
GEP Additional Breadth (p. 1417) (Mathematical Sciences/Natural Sciences/Engineering) 3
GEP Interdisciplinary Perspectives (p. 1426) 5
GEP U.S. Diversity (p. 1431) (verify requirement)
GEP Global Knowledge (p. 1419) (verify requirement)
Foreign Language Proficiency (p. 1417) (verify requirement)
Free Electives 4

Total Hours 120

1 A grade of C- or higher is required.
2 Courses graded "S" for Satisfactory are allowed.

**Semester Sequence**

This is a sample.

- **Course**
- **Title**
- **Hours**

### First Year

#### Fall Semester

- AEE 101 | Introduction to Career and Technical Education ¹ | 1
- AEE 103 | Fundamentals of Agricultural and Extension Education ² | 1
- BIO 181 | Introductory Biology: Ecology, Evolution, and Biodiversity | 4
- COM 110 | Public Speaking | 3
- ENG 101 | Academic Writing and Research | 4
- GEP Mathematical Sciences (p. 1428) | 3
- GEP Health and Exercise Studies (p. 1422) | 1

**Hours Total: 17**

#### Spring Semester

- AEE 226 | Computer Applications and Information Technology in Agricultural & Extension Ed | 3
- ANS 150 | Introduction to Animal Science | 3
- ANS 151 | Introduction to Animal Science Lab | 1
- BIO 183 | Introductory Biology: Cellular and Molecular Biology | 4
- GEP Mathematical Sciences (p. 1428) | 3
Agricultural Education (BS): Horticultural Science Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Agricultural Education major within the Department of Agricultural and Human Sciences prepares graduates to teach agriculture and be FFA advisors in public and private schools.

The Horticultural Science concentration is one of seven concentrations offered for the Bachelor of Science in Agricultural Education.

- Students interested in Agricultural Education may be eligible to apply for the North Carolina Teaching Fellows Program at NC State
- Many alumni pursue careers in middle and high schools, universities and community colleges, county extension offices, and in the agricultural industry

Teacher Licensure

Completion of the B.S. program in Agricultural Education leads to teacher licensure in North Carolina for grades 6-12. Because of North Carolina’s reciprocity agreements, graduates also can pursue certification in about 35 states. Download the Teacher Licensure Checklist (https://cals.ncsu.edu/agricultural-and-human-sciences/wp-content/uploads/sites/13/2017/06/Teacher-Licensure-Checklist.pdf) to review the requirements for admissions to teacher education candidacy and help you stay on course.

For more information more about this program, including contact information, visit our website (https://cals.ncsu.edu/agricultural-and-human-sciences/undergraduate/#agricultural-education-major).

</table>

1 A minimum grade of C is required for teacher licensure.
2 Incoming freshmen complete AEE 103 Fundamentals of Agricultural and Extension Education. Transfer students may complete ALS 103 Freshman Transitions and Diversity in Agriculture & Life Sciences or ALS 303 Transfer Transitions and Diversity in Agriculture & Life Sciences.
3 Total hours of free electives vary in order to allow the minimum hours required for the degree to equal 120 credit hrs.

**Writing and Speaking**

---

1. A minimum grade of C- is required for graduation. A minimum grade of C is required for teacher licensure.

2. Incoming freshmen complete AEE 103 Fundamentals of Agricultural and Extension Education. Transfer students may complete ALS 103 Freshman Transitions and Diversity in Agriculture & Life Sciences or ALS 303 Transfer Transitions and Diversity in Agriculture & Life Sciences.

3. Total hours of free electives vary in order to allow the minimum hours required for the degree to equal 120 credit hrs.

1. A minimum grade of C- is required for graduation. A minimum grade of C is required for teacher licensure.

2. Incoming freshmen complete AEE 103 Fundamentals of Agricultural and Extension Education. Transfer students may complete ALS 103 Freshman Transitions and Diversity in Agriculture & Life Sciences or ALS 303 Transfer Transitions and Diversity in Agriculture & Life Sciences.

---

**Agricultural Leadership (Certificate)**

To see more about what you will learn in this program, visit the Learning Outcomes website [https://apps.oirp.ncsu.edu/pgas/]

The Agricultural Leadership Certificate is a program designed for individuals interested in advancing both their personal and organizational leadership skills. The Certificate in Agricultural Leadership will provide participants with the opportunity to develop leadership skills in a series of in-depth, semester-length courses that are programmatic in nature. Coursework includes topics covering personal leadership, team leadership, organizational leadership as well as professional presentations. The certificate program seeks to motivate present and future leaders to develop those leadership skills needed by colleges, universities and the agricultural industry.

**Program Coordinator**

Dr. Jackie Bruce – Associate Professor
Department of Agricultural and Extension Education
Box 7607, 213 Ricks Hall
North Carolina State University
Raleigh, NC 27695-7607
919-515-8801
jackie_bruce@ncsu.edu

**Admissions Requirements**

Students enrolled at North Carolina State University who are in good academic standing are eligible for admission to this certificate program. In addition, non-degree students in good academic standing may enroll in the program. Students who complete the minor in Leadership in Agriculture and Life Sciences are not eligible for the Certificate in Agricultural Leadership.

**Plan of Study**

Contact the Program Coordinator.

**Registration Information**

Contact the Program Coordinator.

**Academic Structure**

Term Effective: 1/2009
Plan Requirements

The University Certificate in Leadership in Agriculture requires a minimum of 12 credit hours and is offered both on-campus and online via DELTA Distance Education. The minimum grade required for courses counting toward the certificate program is a 'C-'.

**Elective Courses**

Select three of the following:

- AEE 311 Communication Methods and Media
- AEE 350 Personal Leadership Development in Agriculture and Life Sciences
- AEE 360 Developing Team Leadership in Agriculture and Life Sciences
- AEE 435 Professional Presentations in Agricultural Organizations
- AEE 460 Organizational Leadership Development in Agriculture and Life Sciences

Total Hours: 12

**Agricultural Science (BS)**

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orip.ncsu.edu/pgas/)

In the agricultural industry, a growing need exists for professionals with extensive knowledge and experience in the agricultural sciences. Students pursuing a Bachelor of Science (B.S.) in Agricultural Science study the dynamic aspects of the food and fiber industry and specialize in two agricultural areas.

Students who major in Agricultural Science will:

- have opportunities to develop skills necessary to work independently and as part of a team, communicate effectively, solve problems, and understand basic business concepts
- select two of the following specialty areas to study: Animal Science, Agricultural Business Management, Agricultural Environmental Technology, Crop Science, Horticultural Science, Poultry Science, Soil Science, and Feed Mill Management.
- graduate and succeed as teachers, extension agents or leaders in the agricultural industry

For more information more about this program, including contact information, visit our website (https://cals.ncsu.edu/agricultural-and-human-sciences/undergraduate/#agricultural-science-major).

**Professional Content Courses**

Select one of the following Economics Electives:

- ARE 201 Introduction to Agricultural & Resource Economics
- ARE 201A Introduction to Agricultural & Resource Economics
- EC 201 Principles of Microeconomics
- EC 205 Fundamentals of Economics

Select one of the following Writing Electives:

- AEE 311 Communication Methods and Media
- ENG 332 Communication for Science and Research
- ENG 333 Communication for Business and Management

Select one of the following sequences:

- ANS 150 Introduction to Animal Science & ANS 151 and Introduction to Animal Science Lab
- PO 201 Poultry Science and Production & PO 202 and Poultry Science and Production Laboratory
- CS 213 Crop Science or HS 201 The World of Horticulture: Principles and Practices

Select one of the following Introductory Agricultural Electives:

- BAET 201 Shop Processes and Management
- ES 100 Introduction to Environmental Sciences
- FS 201 Introduction to Food Science
- SSC 200 Soil Science & SSC 201 and Soil Science Laboratory

Extension Education (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The minor in Extension Education is open to all interested baccalaureate students. The minor is especially appropriate for students enrolled in agricultural, natural resource, and nutrition majors and/or those students who are interested in careers with the Cooperative Extension Service or other nonformal educational/community outreach organizations. Students completing a minor in Extension Education will become familiar with the organization, structure, and mission of Cooperative Extension; the planning and delivery of nonformal educational programs; the management and leadership of volunteers; communication media and technology; and leadership theory, principles, and skills. The minor requires a minimum of 15 credit hours, with 9 credit hours from a required core and 6 credit hours from a list of advised electives. A grade of "C" or better is required in all courses used toward the minor. Courses used to satisfy the minor may not be taken for credit only. Course substitutions may be made with minor advisor and minor administrator approval.

Certification

As the student nears completion of the minor, the student and their minor advisor will complete and submit to the minor administrator the Application for Minor Certification. The minor program administrator will certify the completion of the student’s minor program. Certification must be submitted no later than the enrollment period for the student’s final semester at NC State (prior to the first day of their last semester). The minor must be completed no later than the semester in which the student expects to graduate from his or her degree program.

SIS code: 11EXTEDM

For more information about this program, including admissions and contact information, please visit our website (https://cals.ncsu.edu/agricultural-and-human-sciences/undergraduate/#minors).

Plan Requirements

The minor requires a minimum of 15 credit hours with 9 credit hours from a required core and 6 credit hours from a list of advised electives. The minimum grade required for all courses counting toward the minor is “C”.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tbody>
</table>

Elective Courses

Select one course from at least two different groups: 6

Group 1 - Communication and Technology:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AEE 226</td>
<td>Computer Applications and Information Technology in Agricultural &amp; Extension Education</td>
</tr>
<tr>
<td>AEE 311</td>
<td>Communication Methods and Media</td>
</tr>
<tr>
<td>AEE 435</td>
<td>Professional Presentations in Agricultural Organizations</td>
</tr>
</tbody>
</table>

Group 2 - Leadership Education:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AEE 323</td>
<td>Leadership Development in Agriculture and Life Sciences</td>
</tr>
</tbody>
</table>

1 AEE 103 Fundamentals of Agricultural and Extension Education is the preferred orientation course. ALS 103 Freshman Transitions and Diversity in Agriculture & Life Sciences is accepted for transfer students.

2 Total hours of free electives vary in order to allow the minimum hours required for the degree to equal 120 credit hrs.
Leadership in Agriculture and Life Sciences (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Leadership in Agriculture and Life Sciences minor is open to all interested baccalaureate students in the College of Agriculture and Life Sciences. The minor is especially appropriate for students enrolled in Agricultural and Life Sciences majors seeking a competitive edge when applying for supervisory or management positions in careers related to the Agriculture and Life Sciences industries. Students completing this minor will be able to apply the theory, principles, and skills required by leaders in their discipline.

Certification

Program coordinators will verify that all requirements have been met and recommend approval by the department head to certify the completion of the student’s minor program. The signed minor application/plan of work for the minor will be submitted to the Academic Programs Office in the College of Agriculture and Life Sciences by the department head. Certification must be submitted no later than the registration period for the student’s final semester at NC State. The minor must be completed no later than the semester in which the student expects to graduate from his or her degree program.

SIS Code: 16AGLDM

For more information about this program, including admissions and contact information, please visit our website (https://cals.ncsu.edu/agricultural-and-human-sciences/undergraduate/#minors).

Plan Requirements

The minor requires a minimum of 15 credit hours. The minimum grade required for all courses counting toward the minor is “C-“.

Group 3 - Advanced Extension Education:

- AEE 435 Communication Methods and Media
- AEE 460 Organizational Leadership Development in Agriculture and Life Sciences

AEE 478 Advanced Issues in Extension Education

Total Hours 15

1 ENG 332 Communication for Business and Management or ENG 333 Communication for Science and Research may be substituted for AEE 311 Communication Methods and Media. Only one of these courses can be used to meet the minor requirements.

Department of Agricultural and Resource Economics

The Department of Agricultural and Resource Economics serves agricultural, resource, and related industries through its extension, research, and teaching programs. Applying principles of economics, business, entrepreneurship, and related disciplines, these programs develop an understanding of contemporary economic and business problems and equip students with knowledge of business organization fundamentals and decision-making skills useful in the operation, ownership, value-creation, and management of business firms.

The department offers undergraduate programs leading to a Bachelor of Science (B.S.) degree in Agricultural Business Management. Students who wish to specialize their business management skills can choose to concentrate in biological sciences business management (BBM). The BBM concentration is designed for students with a strong background and interest in science who desire careers in biotech. Students can also choose to specialize in agribusiness entrepreneurship. The agribusiness entrepreneurship program covers the skills needed to identify, evaluate, and commercialize new business ideas.

What opportunities do our students have?

- We work closely with our majors and business partners to make internship work experiences available for our students, and often majors can receive college credit for their work
- Our job shadowing program offers students the opportunity to spend a day at a business shadowing professionals, where they will gain exposure to a variety of opportunities and career pathways
- Our department organizes road trips every semester, at no cost, to expand our students’ professional networks and make connections for internships
- Study abroad with fellow students on faculty-led program designed specifically for CALS majors!

For more information about this department, including contact information, visit our website (https://cals.ncsu.edu/agricultural-and-resource-economics/).

Agricultural Business Management (BS)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Bachelor of Science degree in Agricultural Business Management prepares graduates for increasing opportunities to enter managerial positions in ag-related businesses. The academic program combines core courses in agricultural business and economics with courses in science and technology. Students learn to apply the concepts, principles and terminology of business and economics to real-world issues and opportunities.

The Agricultural Business Management Program prepares graduates for careers in management, marketing, sales, finance, supply chain, entrepreneurship, and related fields. The program has sufficient flexibility to provide more extensive course work in science and math for those students desiring to prepare for advanced graduate study. The concentration in biological sciences prepares graduates for management, marketing, and sales careers in fields such as biotechnology, pharmaceuticals, health care, environmental protection, and food processing. Graduates specializing in agribusiness entrepreneurship are trained in value creation and prepared to address the strong demand in agtech, biotech, and foodtech.

For more information about this program, including contact information, visit our website (https://cals.ncsu.edu/agricultural-and-resource-economics/students/undergraduate/#undergraduate-offerings).

1 A grade of C- or higher is required.
2 For free electives, select courses with enough credits to meet the minimum graduation requirement of 120 total credit hours.

Agricultural Business Management (BS): Biological Sciences Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Bachelor of Science degree in Agricultural Business Management prepares graduates for increasing opportunities to enter managerial positions in ag-related businesses. The academic program combines core courses in agricultural business and economics with courses in science and technology. Students learn to apply the concepts, principles and terminology of business and economics to real-world issues and opportunities.

The concentration in biological sciences combines training in science with business and economics and leads to a Bachelor of Science degree in Agricultural Business Management with a concentration in the Biological Sciences/Business Management (BBM). The concentration prepares graduates for management, marketing, and sales careers in fields such as biotechnology, pharmaceuticals, health care, environmental protection, and food processing. Graduates specializing in agribusiness entrepreneurship are trained in value creation and prepared to address the strong demand in agtech, biotech, and foodtech.

For more information about this program, including contact information, visit our website (https://cals.ncsu.edu/agricultural-and-resource-economics/students/undergraduate/#undergraduate-offerings).

**Communications & Tech Fluency**

Select one of the following: 3

- COM 110 Public Speaking
- COM 112 Interpersonal Communication
- COM 201 Introduction to Persuasion Theory
- COM 211 Argumentation and Advocacy

Select one of the following: 3

- ENG 331 Communication for Engineering and Technology
- ENG 332 Communication for Business and Management
- ENG 333 Communication for Science and Research
- AEE 226 Computer Applications and Information Technology in Agricultural & Extension Ed
  or CSC 200 Introduction to Computers and Their Uses

**Mathematical Sciences**

Select one of the following: 3-4

- MA 121 Elements of Calculus
- MA 131 Calculus for Life and Management Sciences A
- MA 141 Calculus I

Select one of the following: 3-4

- MA 114 Introduction to Finite Mathematics with Applications
- MA 231 Calculus for Life and Management Sciences B
- MA 241 Calculus II

Select one of the following: 3

- BUS 350 Economics and Business Statistics
- ST 311 Introduction to Statistics
- ST 350 Economics and Business Statistics

**Natural Sciences**

BIO 181 Introductory Biology: Ecology, Evolution, and Biodiversity 4

Select one of the following: 4

- BIO 183 Introductory Biology: Cellular and Molecular Biology
- PB 200 Plant Life
- PB 250 Plant Biology
- GN 301 Genetics in Human Affairs
  or GN 311 Principles of Genetics

Select one of the following: 4

- PY 131 Conceptual Physics
- PY 205 Physics for Engineers and Scientists I
- PY 206 Physics for Engineers and Scientists I Laboratory
- PY 211 College Physics I
- CH 101 Chemistry - A Molecular Science
- CH 102 General Chemistry Laboratory

Select four units of the following: 4

- CH 201 Chemistry - A Quantitative Science
- CH 202 Quantitative Chemistry Laboratory
- CH 220 Introductory Organic Chemistry
- CH 221 Organic Chemistry I
- CH 222 Organic Chemistry I Lab

Select four units of the following: 4

- AEC 360 Ecology
- MB 351 General Microbiology
- MB 352 General Microbiology Laboratory
- PB 360 Ecology
- PB 400 Plant Diversity and Evolution
- ZO 250 Animal Anatomy and Physiology

**Department Course Requirements**

ARE 201 Introduction to Agricultural & Resource Economics 3
  or EC 201 Principles of Microeconomics

ACC 220 Introduction to Managerial Accounting 3
  or ACC 210 Concepts of Financial Reporting

ARE 304 Agribusiness Management 3

ARE 306 Agricultural Law 3
  or ARE 309 Environmental Law & Economic Policy

Select one of the following: 3

- ARE 311 Agricultural Markets
- ARE 312 Agribusiness Marketing
- BUS 360 Marketing Methods

ARE 321 Agricultural Financial Management 3
  or BUS 320 Financial Management

ARE 301 Intermediate Microeconomics 3
  or EC 301 Intermediate Microeconomics

Select one of the following: 3

- ARE 332 Human Resource Management for Agribusiness
- ARE 345 Global Agribusiness Management
- EC 302 Intermediate Macroeconomics
- EC 348 Introduction to International Economics
- EC 431 Labor Economics
- ARE 490 Career Seminar in Agriculture & Resource Economics 1

ARE Electives (p. 164) 3

**Restricted Electives**

Restricted Electives (p. 164) 12

**GEP Courses**

ENG 101 Academic Writing and Research 4

GEH Humanities (p. 1423) 6

GEP Social Sciences (p. 1430) 3

GEP Health and Exercise Studies (p. 1422) 2

GEP Additional Breadth (p. 1417) (Humanities/Social Sciences/Visual and Performing Arts) 3

GEP Interdisciplinary Perspectives (p. 1426) 5

GEP U.S. Diversity (p. 1431) (verify requirement)

GEP Global Knowledge (p. 1419) (verify requirement)

**Free Electives**

Free Electives (12 Hr S/U Lmt) 11

Total Hours 120-122
A grade of C- or higher is required.

AEC 761 Conservation and Climate Science 3
AEE 101 Introduction to Career and Technical Education 1
AEE 103 Fundamentals of Agricultural and Extension Education 1
AEE 208 Agricultural Biotechnology: Issues and Implications 3
AEE 226 Computer Applications and Information Technology in Agricultural & Extension Ed 3
AEE 230 Introduction to Cooperative Extension 3
AEE 303 Administration and Supervision of Student Organizations 3
AEE 311 Communication Methods and Media 3
AEE 322 Experiential Learning in Agriculture 3
AEE 323 Leadership Development in Agriculture and Life Sciences 3
AEE 325 Planning and Delivering Non-Formal Education 3
AEE 326 Teaching Diverse Learners in AED 3
AEE 327 Conducting Summer Programs in Agricultural Education 1
AEE 350 Personal Leadership Development in Agriculture and Life Sciences 3
AEE 360 Developing Team Leadership in Agriculture and Life Sciences 3
AEE 423 Practicum in Agricultural Extension/Industry 8
AEE 424 Planning Agricultural Educational Programs 3
AEE 426 Methods of Teaching Agriculture 3
AEE 427 Student Teaching in Agriculture 8
AEE 433 Leadership and Management of Volunteers in Agricultural and Extension Education 3
AEE 435 Professional Presentations in Agricultural Organizations 3
AEE 460 Organizational Leadership Development in Agriculture and Life Sciences 3
AEE 478 Advanced Issues in Extension Education 3
AEE 490 Seminar in Agricultural and Extension Education 1
AEE 491 Seminar in Agricultural Education 1
AEE 492 External Learning Experience in Agricultural and Extension Education 1-6
AEE 493 Special Problems in Agriculture and Extension Education 1-6
AEE 495 Special Topics in Agricultural and Extension Education 1-3
AEE 500 Agricultural Education, Schools and Society 3

## Second Year
### Fall Semester
- **CH 101**: Chemistry - A Molecular Science 3
- **CH 102**: General Chemistry Laboratory 1
- **CSC 200** or **AEE 226**: Introduction to Computers and Their Uses or Computer Applications and Information Technology in Agricultural & Extension Ed 3
- **PY 131** or **PY 211**: Conceptual Physics or College Physics I 4
- **Communications Requirement**: 3
- **GEP Health and Exercise Studies (p. 1422)**: 1

### Spring Semester
- **ACC 220** or **ACC 210**: Introduction to Managerial Accounting or Concepts of Financial Reporting 3
- **Chemistry Requirement**: 4
- **Statistics Requirement**: 3
- **GEP Interdisciplinary Perspectives (p. 1426)**: 2-3
- **GEP Additional Breadth (p. 1417)**: 3

## Spring Semester
- **Advanced Writing Requirement**: 3
- **Restricted Elective**: 3
- **Free Electives**: 8-9

## Third Year
### Fall Semester
- **ARE 301**: Intermediate Microeconomics 3
- **ARE 306** or **ARE 309**: Agricultural Law or Environmental Law & Economic Policy 3
- **ARE 490**: Career Seminar in Agriculture & Resource Economics 1
- **Biology Elective Requirement**: 4
- **ARE or ECG Elective**: 3
- **GEP Interdisciplinary Perspectives (p. 1426)**: 2-3

### Spring Semester
- **Marketing Requirement**: 3
- **GN 311**: Principles of Genetics 4
- **ARE 304**: Agribusiness Management 3
- **Restricted Elective**: 3
- **GEP Humanities (p. 1423)**: 3

## Fourth Year
### Fall Semester
- **ARE 321** or **BUS 320**: Agricultural Financial Management or Financial Management 3
- **ARE/EC Elective**: 3
- **Free Elective**: 3
- **Restricted Elective**: 3
- **Restricted Elective**: 3

## Career Opportunities
The Agricultural Business Management Program prepares graduates for careers in management, marketing, sales, finance, supply chain, entrepreneurship, and related fields. The program has sufficient flexibility to provide more extensive course work in science and math for those students desiring to prepare for advanced graduate study. The concentration in biological sciences prepares graduates for management, marketing, and sales careers in fields such as biotechnology, pharmaceuticals, health care, environmental protection, and food processing. Graduates specializing in agribusiness entrepreneurship are trained in value creation and prepared to address the strong demand in agtech, biotech, and foodtech.

## Program Coordinator
Dr. John S. Russ
Undergraduate Coordinator
Director of ARE Distance Education
Department of Agricultural & Resource Economics (ARE)
NC State University
Box 8109
Nelson Hall, Room 3346
Raleigh, North Carolina 27695
(919) 515-4677
russ@ncsu.edu

More information is available at the Department of Agricultural and Resource Economics website ($http://go.ncsu.edu/ag_business_certificates/.$)
Admissions Requirements

• Student must have received a Bachelor of Science or Bachelor of Arts Degree from an accredited institution. Proof of receipt of a previously awarded B.S. or B.A degree is required, via an official copy of applicant’s transcript from the degree conferring institution, before the application may be reviewed.

• Not enrolled in a 4-year undergraduate degree program at N.C. State University; and

• Acceptance as a Non-Degree Studies Student through DELTA, if not already enrolled.

Completion Requirements

The following are the requirements that must be met to receive a University Certificate in Agricultural Business Management:

• Completion of 15 credit hours from the list of required and elective courses with a grade of C- or higher received for each course and an overall GPA of 2.0 or higher must be achieved upon completion of all required courses.

• Four (4) years will be allowed for completion of all courses. The time limit starts with enrollment in the first course. Students will be allowed to defer no more than two semesters after acceptance into the program.

• All courses must be 601 sections taken through distance education unless special approval is granted for completion of an on-campus section to allow the student to successfully complete the course sequence for receipt of a Post Baccalaureate ABM Certificate.

• None of the required 15 credit hours may be taken for S/U or “credit only.

• No transfer credits from other institutions to fulfill certificate course requirements are allowed.

• Students currently enrolled in the Agricultural Business Management major or who would qualify for the ABM minor do not qualify for this program.

1 ARE 201 Introduction to Agricultural & Resource Economics-601 must be successfully completed before enrollment in any Elective courses. A grade of C- or higher is required.

2 Course(s) to be taken via distance education (section 601).

3 Any ARE 495 Special Topics in Agricultural and Resource Economics-601 section must be pre-approved for the certificate by the Distance Education Coordinator. ARE 495 Special Topics in Agricultural and Resource Economics-601 may only be taken after the successful completion of 12 credit hours.

Agricultural Business Management (Certificate) (Non Post-Baccalaureate Students, Distance Education)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The University Undergraduate Certificate in Agricultural Business Management is available to any student enrolled as a non-degree studies (NDS) student at NC State University and is currently enrolled in a 2-year or 4-year degree program at an accredited college or university or has already received an Associate’s degree. This Certificate is not available to currently enrolled N.C. State degree seeking students. This certificate provides individuals an opportunity to learn basic business and economic principles that are useful in careers in agricultural and related industries.

Admissions

- Must be currently enrolled in a 2-year or 4-year degree program at an accredited college or university and provide proof of a 2.5 GPA or higher; or must have received an Associate Degree from an accredited institution;
- Proof of current enrollment in an Associate Degree or B.S. or B.A. Degree program, or receipt of an Associate Degree, is required via an official copy of applicant’s transcript from the degree conferring institution, before the application can be reviewed.
- Not enrolled in a 4-year undergraduate degree program at N.C. State University; and
- Accepted as a Non-Degree Studies Student through DELTA, if not already enrolled.

Completion Requirements

The following are the requirements that must be met to receive a University Undergraduate Certificate in Agricultural Business Management:

- Associate Degree or Bachelor of Science or Bachelor of Arts Degree must be received prior to receiving the University Undergraduate Certificate in Agricultural Business Management. Proof of receipt of Associate Degree or B.S. or B.A. Degree is required, by providing updated official copy(ies) of applicant’s transcript(s) from the degree conferring institution(s), before the certificate may be awarded. This requirement must be fulfilled in addition to other certificate program requirements.
- Completion of 15 credit hours from the list of required and elective courses with a grade of C- or higher received for each course and an overall GPA of 2.0 or higher must be achieved upon completion of all required courses.
- Four (4) years will be allowed for completion of all courses. The time limit starts with enrollment in the first course. Students will be allowed to defer no more than two semesters after acceptance into the program.
- All courses must be 601 sections taken through distance education unless special approval is granted for completion of an on-campus section to allow the student to successfully complete the course sequence for receipt of the Undergraduate ABM Certificate.
- None of the required 15 credit hours may be taken for S/U (credit only).
- No transfer credits from other institutions to fulfill certificate course requirements are allowed.
- Students currently enrolled in the Agricultural Business Management major or who would qualify for the ABM minor do not qualify for this program.

Agricultural Business Management (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The minor in Agricultural Business Management is offered to undergraduate majors in all departments except the Department of Agricultural and Resource Economics. The minor provides students an opportunity to learn basic business and economic principles that are useful in careers in agricultural and related industries.

Admissions

Admission to the minor requires a cumulative grade point average of 2.0 or better and the completion of ARE 201 Introduction to Agricultural & Resource Economics or EC 201 Principles of Microeconomics with a grade of ‘C’ or better. Students should contact Dr. John S. Russ, to
inquire about adding the minor no later than the registration period for the student’s final semester at NC State.

Certification

Certification requires a cumulative grade point average of 2.0 or better in all courses taken that could be used to satisfy the requirements for the minor. Courses used to satisfy the minor requirements may not be taken for credit only. All 300 or 400 level courses for the minor must be completed at NC State. If transfer credits have been granted for such courses, additional courses will be required and must be approved by the Undergraduate Coordinator. The minor must be completed no later than the semester in which the student expects to graduate from his or her degree program.

Contact Person

Agricultural Entrepreneurship (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Minor in Agricultural Entrepreneurship is available to undergraduates in all majors. Courses in the minor cover the basic mindset, principles,
and practices of entrepreneurship, including how to start a new business and how to add value to an existing business. Entrepreneurship skills are valuable to not only entrepreneurs but also to managers and others in careers in agricultural and related industries. Student teams work on projects with real businesses in all of our entrepreneurship courses. We also form teams around entrepreneurship projects that students bring to our classes. Students participate in poster and pitch contests judged by entrepreneurs and investors. We help students obtain seed money for prototypes and start-ups, and we fund class-related expenses such as travel that are associated with team projects. We immerse students in our extensive agribusiness network and in the NC State entrepreneurship ecosystem.

**Admissions and Certification of Minor**

Admission to the minor requires a cumulative grade point average of 2.0 or better and the completion of ARE 201 or EC 201 with a grade of ‘C-’ or better. Students should contact Dr. John S. Russ, to inquire about adding the minor no later than the registration period for the student’s final semester at NC State.

**Contact Person**

**Elective Courses**

6 hours of Advised Electives designated by the minor advisor and based on project interest.

**Department of Animal Science**

Animal Science is a broad field centered on the biology, production, management and care of domestic animals, and NC State’s Department of Animal Science offers top-tier teaching, research and extension programs that help our faculty and students address critical issues facing the animal industry in North Carolina and beyond.

Undergraduate students study subjects related to various phases of animal science. Courses are offered in anatomy, physiology, nutrition, genetics, reproduction, and management, and there are opportunities for the application of basic scientific training in animal care and well-being areas.

Department Highlights:

- Students interested in Animal Science can join any of several student organizations including the Animal Science Club (https://getinvolved.ncsu.edu/organization/animal_science_club/) or the Pre-Veterinary Club (http://clubs.ncsu.edu/prevet/)
- Animal Science students have the opportunity to student abroad, learning all about the equine industry in Ireland, or about veterinary physiotherapy at Harper Adams University in the United Kingdom
- Students in our programs gain valuable hands-on experience in our hands-on teaching labs as well as at the five nearby teaching farms (horse, small ruminant, swine, beef, dairy).
- All in-class laboratory activities involving live animals or animal specimens are approved by the Institutional Animal Care and Use Committee (IACUC)

For more information about our department, including contact information, visit our website (https://cals.ncsu.edu/animal-science/).

Plans
- Animal Nutrition (Certificate) (p. 184)
- Animal Science (BS): Industry Concentration (p. 184)
- Animal Science (BS): Science Concentration (p. 200)
- Animal Science (BS): Veterinary Bioscience Concentration (p. 216)
- Animal Science (Minor) (p. 220)
- Swine Science (Certificate) (p. 221)

Animal Nutrition (Certificate)
To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Undergraduate Certificate in Animal Nutrition is designed to allow people to gain recognition for learning the basics of animal nutrition. People who successfully complete the required courses will learn about livestock, horse, and companion animal nutrition. Four required courses (12 credit hours) must be completed with a grade of C (2.0) or higher (a grade of C- will not count) in order to earn the certificate. Current undergraduate students at N.C. State University who are not majoring or minoring in Animal Science are welcome to complete the certificate. People from around the world who are not current students at N.C. State University are also welcome to complete the certificate. The four courses can be completed on-campus in Raleigh, via Distance Education, or in combination. Upon successful completion of the certificate requirements, Registration & Records will update the student’s transcript and mail the certificate. The Undergraduate Certificate in Animal Nutrition is administered by the Undergraduate Teaching Coordinator for the Department of Animal Science.

Program Coordinator
Dr. Shannon Pratt Phillips, PhD
Associate Professor
Dept. of Animal Science
Polk Hall 259, Campus Box 7621
NCSU Campus
Raleigh, NC 27695
919-513-1117
sepratt2@ncsu.edu

Additional information available on the Distance Education website for Animal Nutrition (http://distance.ncsu.edu/programs/undergraduate-certificate-in-animal-nutrition/).

Admissions Requirements
A person may be admitted to the certificate program after enrolling in the first course that will be used to fulfill the certificate requirements. To enroll, contact the Undergraduate Teaching Coordinator for the Department of Animal Science: Dr. Shannon Pratt Phillips, sepratt2@ncsu.edu.

Plan of Study
Contact the Program Coordinator.

Registration Information
Contact the Program Coordinator.

Academic Structure
Term Effective: 1/2010
Plan Code: 11ANCCTU, 32ANCCTU
CIP Code: 01.0901
Description: Undergraduate Certificate in Animal Nutrition
Offered: On-campus and Distance Education (http://distance.ncsu.edu/programs/undergraduate-certificate-in-animal-nutrition/) format

Plan Requirements
A minimum grade of “C” (2.0) is required for each course; a C-minus will not be accepted. Undergraduate students majoring or minoring in Animal Science are not eligible to receive the certificate.

1 Course is offered online via Distance Education.

Animal Science (BS): Industry Concentration
To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The degree of Bachelor of Science in Animal Science may be obtained by selecting one of three concentrations offered by the Department of Animal Science in the College of Agriculture and Life Sciences: Veterinary Bioscience, Science, and Industry.

The Industry concentration is designed for students who are more interested in the business or production aspects of animal science. It offers flexibility in completing Animal Science courses with business, marketing, economics, and applied science coursework. There are many opportunities to gain undergraduate research experience with an Animal Science faculty member, to participate in one of the animal-related clubs, and to engage globally by participating in one of our Animal Science Study Abroad experiences.

Accelerated Graduate Opportunities
Advanced undergraduates have the opportunity to complete the Accelerated Bachelor’s/Master’s degrees, which allows students to earn both the BS and the Master’s of Animal Science degrees within five
years. See listing of graduate degrees offered in the Graduate Catalog (http://www.ncsu.edu/grad/catalog). The **Accelerated BS/DVM for Animal Science Majors (3+1 Advising Guide)** is a pathway for students admitted early to a College of Veterinary Medicine to complete the BS in Animal Science degree by transferring back 12 credits after one year in vet school.

For more information about our program, visit our website (https://cals.ncsu.edu/animal-science/students/undergraduate/#bachelor-of-science).

TOX 501 Principles of Toxicology 4

Semester Sequence

This is a sample.

Course Title Hours

First Year

Fall Semester

ALS 103 Freshman Transitions and Diversity in Agriculture & Life Sciences 1
ANS 150 Introduction to Animal Science 3
ANS 151 Introduction to Animal Science Lab 1
BIO 181 Introductory Biology: Ecology, Evolution, and Biodiversity 4
ENG 101 Academic Biology and Research 4
MA 107 Precalculus I 3

Hours 16

Spring Semester

CH 101 Chemistry - A Molecular Science 3
CH 102 General Chemistry Laboratory 1
Animal Science Course 3

Select one of the following:

MA 114 Introduction to Finite Mathematics with Applications 3
MA 121 Elements of Calculus 3
MA 131 Calculus for Life and Management Sciences A 3
BIO 183 Introductory Biology: Cellular and Molecular Biology 4
Animal Science (BS): Science Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website ([https://apps.oirp.ncsu.edu/pgas/](https://apps.oirp.ncsu.edu/pgas/)).

The degree of Bachelor of Science in Animal Science may be obtained by selecting one of three concentrations offered by the Department of Animal Science in the College of Agriculture and Life Sciences: Veterinary Bioscience, Science, and Industry.

The Science concentration is designed for students with an interest in advanced study, such as MS and PhD programs, in disciplines such as physiology, nutrition, or genetics. This concentration gives students more flexibility to select courses that fit their disciplinary interests. There are many opportunities to gain undergraduate research experience with an Animal Science faculty member, to participate in one of the animal-related clubs, and to engage globally by participating in one of our Animal Science Study Abroad experiences.

### Accelerated Graduate Opportunities

Advanced undergraduates have the opportunity to complete the **Accelerated Bachelor's/Master's degrees**, which allows students to earn both the BS and the Master's of Animal Science degrees within five years. See listing of graduate degrees offered in the Graduate Catalog ([http://www.ncsu.edu/grad/catalog/](http://www.ncsu.edu/grad/catalog/)). The **Accelerated BS/DVM** for Animal Science Majors (3+1 Advising Guide) is a pathway for students admitted early to a College of Veterinary Medicine to complete the BS in Animal Science degree by transferring back 12 credits after one year in vet school.

For more information about our program, visit our website ([https://cals.ncsu.edu/animal-science/students/undergraduate/#bachelor-of-science](https://cals.ncsu.edu/animal-science/students/undergraduate/#bachelor-of-science)).

Animal Science (BS): Veterinary Bioscience Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The degree of Bachelor of Science in Animal Science may be obtained by selecting one of three concentrations offered by the Department of Animal Science in the College of Agriculture and Life Sciences: Veterinary Bioscience, Science, and Industry.

The Veterinary Bioscience concentration is for students who are interested in advanced study in DVM programs and has all veterinary school prerequisite courses built into the concentration. Students in this concentration must maintain an overall GPA of 3.0 or higher. There are many opportunities to gain undergraduate research experience with an Animal Science faculty member, to participate in one of the animal-related clubs, and to engage globally by participating in one of our Animal Science Study Abroad experiences.

Accelerated Graduate Opportunities

Advanced undergraduates have the opportunity to complete the Accelerated Bachelor's/Master's degrees, which allows students to earn both the BS and the Master's of Animal Science degrees within five years. See listing of graduate degrees offered in the Graduate Catalog (http://www.ncsu.edu/grad/catalog/). The Accelerated BS/DVM for Animal Science Majors (3+1 Advising Guide) is a pathway for students admitted early to a College of Veterinary Medicine to complete the BS in Animal Science degree by transferring back 12 credits after one year in vet school.

For more information about our program, visit our website (https://cals.ncsu.edu/animal-science/students/undergraduate/#bachelor-of-science).

Communication

Select one of the following: 3

1 Use of animals and animal specimens is critical to our educational program. To obtain full credit for Animal Science courses, students are required to participate in laboratory procedures involving animals and animal specimens. All activities with live animals are IACUC (Institutional Animal Care and Use Committee) approved. Many lectures also incorporate animals or animal specimens into the course.

2 ANS 150 Introduction to Animal Science, MA 107 Precalculus I, ENG 101 Academic Writing and Research, and CH 101 Chemistry - A Molecular Science must be completed with a grade of C-minus or higher, and the student should repeat the course in the semester following the initial attempt if less than a C-minus is earned.

3 Pre-vet students: this course also meets a vet school requirement.

4 Students are encouraged to take an Ethics course as part of their Humanities, Additional Breadth, Interdisciplinary Perspectives, or Free Electives.

Animal Science (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orip.ncsu.edu/pgas/)

The Department of Animal Science offers an undergraduate minor in Animal Science to all interested baccalaureate students. This minor is appropriate for (but not limited to) students majoring in Agricultural Business Management, Agricultural Education, Agricultural Science, Agronomy, Food Science, Nutrition Science, Poultry Science, and Zoology. Students completing a minor in Animal Science will become familiar with animal production and with its related industries.

Admissions

Students who plan to minor in Animal Science should contact Dr. Melissa Merrill for consultation and approval. Dr. Merrill can be reached at: 919.515.3028, Melissa_Merrill@ncsu.edu or in 342 Riddick Hall.

Certification

Dr. Melissa Merrill will certify the completion of the student's minor program. Certification must be submitted no later than the registration period for the student's final semester at NC State. The minor must be completed no later than the semester in which the student expects to graduate from his or her degree program.

Contact Person

Dr. Melissa Merrill
342 Riddick Hall
919.515.3028
Melissa_Merrill@ncsu.edu

SIS Code: 11ANM

Plan Requirements

• Minimum of 15 credit hours is required.
• A grade of ‘C-’ or higher in each course.
• The program is flexible in order for students to be able to emphasize the discipline or species of their interest.

Total Hours 15
Credit is allowed for either ANS 105 Introduction to Companion Animal Science or ANS 110 Introduction to Equine Science, but not both.

2 AgIdea course, offered online with additional tuition.

Swine Science (Certificate)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orip.ncsu.edu/pgas/).

The Undergraduate Certificate in Swine Science program is the study of pork production and is available to post-secondary students interested in the pork industry. NCSU Animal Science majors can only complete the certificate by counting the courses to their Free Elective requirements as these courses will not count toward any Animal Science major requirements. The certificate is available via distance education. Students completing the certificate will have knowledge of all aspects of pork production, the pork industry, and factors that impact swine production and management. In addition, the U.S. Polk Center of Excellence located in Des Moines, Iowa will issue a certification of completion which is recognized in the pork industry as proficiency of swine practices.

Student Learning Outcomes

- Have a comprehensive knowledge or pork production and describe where pork production list within the animal agriculture industries in the United States and North Carolina.
- Describe production practices for all phases of production of swine, including the impacts of nutrition, physiology, and genetics on these practices.
- Understand diseases that affect swine and develop programs to eliminate or mitigate their impact.
- Identify key factors impacting the profitability of the pork industry, understand key records that need to be maintained in a production setting, and describe the markets available for swine and pork products.
- Understand the issues of pork production and effectively communicate with various constituencies regarding pork, pork production, and animal agriculture.

Registration Information

Contact the Program Coordinator.

Department of Applied Ecology

The Department of Applied Ecology exists to advance and share fundamental and novel discoveries in ecology and apply them to our greatest environmental challenges. Working at the intersection of basic and applied life sciences, our researchers confront local problems and solve grand global challenges. Faculty strengths are in the areas of ecology, fisheries, aquaculture, conservation biology, environmental toxicology, and global change biology.

The Department of Applied Ecology has a strong and diverse research portfolio that exists at the interface of basic and applied life sciences. Topics of interest vary widely as do the levels of analysis, ranging from cells to ecosystems. We share a passion for understanding the living world and applying ecological principles to solving societal challenges. Research in these fields fuels a strong, well-funded graduate program, effective extension and outreach, an undergraduate minor and a developing undergraduate curriculum.

For more information about this department, including contact information, visit our website (https://cals.ncsu.edu/applied-ecology/).

Plans

- Applied Ecology (Minor) (p. 222)

Applied Ecology (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The minor in Applied Ecology is intended for students interested in applying ecological concepts and principles to solving real-world problems. Students with expertise in applied ecology will be well equipped to address local and global challenges associated with a wide variety of important issues such as water quantity and quality, natural resource management, environmental conservation and restoration, climate change, and maintenance of biodiversity. To receive a minor in Applied Ecology students will be required to complete challenging courses and an in-depth research experience.

For admission, students should first complete BIO 181 and BIO 360 with letter grades of C- or better before contacting the Minor Coordinator.

Administration of the Minor

Erin McKenney
Minor Coordinator
Department of Applied Ecology
126 David Clark Laboratory
eamckenn@ncsu.edu

SIS Code: 11AECM

Plan Requirements

For admission, students should first complete BIO 181 Introductory Biology: Ecology, Evolution, and Biodiversity and AEC 360 Ecology with letter grades of C- or better before contacting the Minor Coordinator.

For completion:

- All letter-graded courses must be completed with a C or better.

Department of Biological and Agricultural Engineering

In the Department of Biological and Agricultural Engineering we embrace natural solutions. By applying engineering principles and the fundamentals of biology-based systems and tools, we’re managing natural resources to address the grand challenges related to providing food, water, fiber and energy to our growing world. The scope of BAE ranges in scale from the molecular to the ecosystem level, for the safe, efficient, and environmentally sound production, processing and management of agricultural, biological and natural resources. From bioenergy to food processing and water management, we’re engineering solutions for a sustainable future.

The BAE department provides excellent educational opportunities at the undergraduate level with programs that are well recognized as among the finest in the United States. Most recently, NC State BAE was No. 4 among biological and agricultural engineering programs nationally.

Department highlights:

- All of the resources of a large department but with the added value of a personalized, community environment.
- There is a broad range of departmental clubs and initiatives to become involved with including the Pack Pullers Quarter Scale Tractor Competition Team, the American Society of Agricultural and Biological Engineers Student Chapter and the Fountain Wars Design Competition Team and the Sustainability Committee.
- BAE students have the opportunity to learn abroad including a trip led by BAE faculty to Spain to study ancient Roman engineering.
- Students in BAE gain valuable hands on experience in the machine shop and the natural environment.

For more information about our department, including contact information, visit our website (http://bae.ncsu.edu).

Biological and Agricultural Engineering Technology (BS): 120 Total Units

Plan Requirements

Biological and Agricultural Engineering Technology (BS): 120 Total Units

Biological and Agricultural Engineering Technology (SSS) Bachelor of Science (B.S.) degree is to:

- Design and implement technological systems by interacting directly with both production personnel as well as the environment.
- Provide a critical link in the agricultural and environmental spectrum.
- To attain depth in science, business, or environmental areas. Graduates are prepared for careers in hands-on application of technology to efficiently manage agricultural and environmental systems. Flexibility within the program allows students to attain depth in science, business, or environmental areas. Graduates provide a critical link in the agricultural and environmental spectrum by interacting directly with both production personnel as well as the designers and implementers of technological systems.

The program objectives of the Biological and Agricultural Engineering Technology (BAET) Bachelor of Science (B.S.) degree are to:

- Develop technical knowledge of physical and biological sciences used in agricultural and environmental systems;
- Apply critical thinking, existing technology and practical approaches to solve problems in agricultural and environmental systems;
- Produce technologists able to work in teams and effectively communicate to audiences; and
- Develop in students an appreciation for life-long education that supports their careers.

Biological and Agricultural Engineering Technology (BS)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The BAET curriculum is administered by the College of Agriculture and Life Sciences and is intended to uniquely prepare students for hands-on application of technology to efficiently manage agricultural and environmental systems. Flexibility within the program allows students to attain depth in science, business, or environmental areas. Graduates provide a critical link in the agricultural and environmental spectrum by interacting directly with both production personnel as well as the designers and implementers of technological systems.

The program objectives of the Biological and Agricultural Engineering Technology (BAET) Bachelor of Science (B.S.) degree are to:

- Develop technical knowledge of physical and biological sciences used in agricultural and environmental systems;
- Apply critical thinking, existing technology and practical approaches to solve problems in agricultural and environmental systems;
- Produce technologists able to work in teams and effectively communicate to audiences; and
- Develop in students an appreciation for life-long education that supports their careers.

Plans

- Biological and Agricultural Engineering Technology (BS) (p. 225)
- Biological and Agricultural Engineering Technology (BS): Agricultural Systems Management Concentration (p. 239)
- Biological and Agricultural Engineering Technology (BS): Environmental Systems Management Concentration (p. 253)
- Biological and Agricultural Engineering Technology (Minor) (p. 268)
- Biological Engineering (BS) (p. 268)
- Biological Engineering (BS): Agricultural Engineering Concentration (p. 272)
- Biological Engineering (BS): Bioprocessing Engineering Concentration (p. 274)
- Biological Engineering (BS): Ecological Engineering Concentration (p. 277)
- Biological Engineering (BS): Environmental Engineering Concentration (p. 280)

Biological and Agricultural Engineering Technology (Minor)

Biological and Agricultural Engineering Technology (BS): Agricultural and Environmental Safety and Health

Biological and Agricultural Engineering Technology (BS): Agricultural Electrification

Biological and Agricultural Engineering Technology (BS): Management of Animal Environments

Biological and Agricultural Engineering Technology (BS): Shop Processes and Management

Biological and Agricultural Engineering Technology (BS): Foundations of Graphics

Biological and Agricultural Engineering Technology (BS): Introduction to Computers and Their Uses

Biological and Agricultural Engineering Technology (BS): Computer Applications and Information Technology in Agricultural & Extension Ed

Biological and Agricultural Engineering Technology (BS): Introduction to Biological Engineering

Biological and Agricultural Engineering Technology (BS): Shop Processes and Management

Biological and Agricultural Engineering Technology (BS): Water Management

Biological and Agricultural Engineering Technology (BS): Management of Animal Environments

Biological and Agricultural Engineering Technology (BS): Agricultural Electrification

Biological and Agricultural Engineering Technology (BS): Agricultural and Environmental Safety and Health

Biological and Agricultural Engineering Technology (BS): Shop Processes and Management

Biological and Agricultural Engineering Technology (BS): Foundations of Graphics

Biological and Agricultural Engineering Technology (BS): Introduction to Agricultural & Resource Economics

Biological and Agricultural Engineering Technology (BS): Leadership Development in Agriculture and Life Sciences

Biological and Agricultural Engineering Technology (BS): Academic Writing and Research

Biological and Agricultural Engineering Technology (BS): GEP Health and Exercise Studies

Biological and Agricultural Engineering Technology (BS): GEP Humanities

GEP Courses

Engineering

GEP Health and Exercise Studies

GEP Humanities

GEP Social Sciences

GEP Humanities

GEP Social Sciences

GEP Health and Exercise Studies

Associate professors emeriti

G. Baughman

R.L. Huffman

J.H. Young

D.H. Willits

NC State University
GEP Additional Breadth (p. 1417) (Humanities/Social Sciences/Visual and Performing Arts) 3  
GEP Interdisciplinary Perspectives (p. 1426) 5  
GEP U.S. Diversity (p. 1431) (verify requirement)  
GEP Global Knowledge (p. 1419) (verify requirement)  
Foreign Language Proficiency (p. 1417) (verify requirement)  
Free Elective 2 1  
Total Hours 120  

1 A grade of C- or higher is required.  
2 Students should consult their academic advisors to determine which courses fill this requirement.

Career Opportunities

BE students learn to solve a wide variety of engineering problems and will have opportunities for specialization through selection of a specific concentration. Scientific and engineering principles are applied: to conserve and manage air, energy, soil and water resources; to manage, protect and restore natural ecosystems; to understand and utilize biological, chemical and physical processes for the production and conversion of biomass to bio energy; to analyze, understand and utilize mechanical properties of biological materials; to design and develop machinery systems for all phases of agricultural and food production; to design and evaluate structures and environmental control systems for housing animals, plant growth, and biological product storage; to develop improved systems for processing and marketing food and agricultural products; and to design sensor-based instrumentation and control systems for biological and agricultural applications.

Graduates of the BE curriculum receive a Bachelor’s of Engineering in Biological Engineering, qualifying them for positions in design, development, and research in industry, government and public institutions. The curriculum also prepares students for post-graduate work leading to advanced degrees. Typical positions filled by recent BE graduates include: stream and wetlands restoration project manager; product design; development and testing engineer; plant engineering and management; engineering analysis and inspection for federal and state agencies; engineering consultant and research engineer. Entry-level salary ranges for BE graduates are similar to those of Civil, Industrial, and Mechanical Engineering graduates.

The BAET curriculum provides graduates opportunities in technical analysis, application and evaluation of agricultural production systems and environmental systems. The curriculum’s flexibility enables students to specialize technologically in agriculture, the environment, or business management. Careers include technical jobs in production agriculture, environmental systems, agribusiness sales and service, and agricultural extension.

Biological and Agricultural Engineering Technology (BS): Agricultural Systems Management Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The BAET curriculum is administered by the College of Agriculture and Life Sciences and is intended to uniquely prepare students for hands-on application of technology to efficiently manage agricultural and environmental systems. Flexibility within the program allows students to attain depth in science, business, or environmental areas. Graduates provide a critical link in the agricultural and environmental spectrum by interacting directly with both production personnel as well as the designers and implementers of technological systems.

The program objectives of the Biological and Agricultural Engineering Technology (BAET) Bachelor of Science (B.S.) degree are to:

- Develop technical knowledge of physical and biological sciences used in agricultural and environmental systems;
- Apply critical thinking, existing technology and practical approaches to solve problems in agricultural and environmental systems;
- Produce technologists able to work in teams and effectively communicate to audiences; and
- Develop in students an appreciation for life-long education that supports their careers.

Career Opportunities

BE students learn to solve a wide variety of engineering problems and will have opportunities for specialization though selection of a specific concentration. Scientific and engineering principles are applied: to conserve and manage air, energy, soil and water resources; to manage, protect and restore natural ecosystems; to understand and utilize biological, chemical and physical processes for the production and conversion of biomass to bio energy; to analyze, understand and utilize mechanical properties of biological materials; to design and develop machinery systems for all phases of agricultural and food production; to design and evaluate structures and environmental control systems for housing animals, plant growth, and biological product storage; to develop improved systems for processing and marketing food and agricultural products; and to design sensor-based instrumentation and control systems for biological and agricultural applications.

Graduates of the BE curriculum receive a Bachelor’s of Engineering in Biological Engineering, qualifying them for positions in design, development, and research in industry, government and public institutions. The curriculum also prepares students for post-graduate work leading to advanced degrees. Typical positions filled by recent BE graduates include: stream and wetlands restoration project manager; product design; development and testing engineer; plant engineering and management; engineering analysis and inspection for federal and state agencies; engineering consultant and research engineer. Entry-level salary ranges for BE graduates are similar to those of Civil, Industrial, and Mechanical Engineering graduates.

The BAET curriculum provides graduates opportunities in technical analysis, application and evaluation of agricultural production systems and environmental systems. The curriculum’s flexibility enables students to specialize technologically in agriculture, the environment, or business management. Careers include technical jobs in production agriculture, environmental systems, agribusiness sales and service, and agricultural extension.

Biological and Agricultural Engineering Technology (BS): Environmental Systems Management Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The BAET curriculum is administered by the College of Agriculture and Life Sciences and is intended to uniquely prepare students for hands-on application of technology to efficiently manage agricultural and environmental systems. Flexibility within the program allows students to attain depth in science, business, or environmental areas. Graduates provide a critical link in the agricultural and environmental spectrum by interacting directly with both production personnel as well as the designers and implementers of technological systems.

The program objectives of the Biological and Agricultural Engineering Technology (BAET) Bachelor of Science (B.S.) degree are to:
- Develop technical knowledge of physical and biological sciences used in agricultural and environmental systems;
- Apply critical thinking, existing technology and practical approaches to solve problems in agricultural and environmental systems;
- Produce technologists able to work in teams and effectively communicate to audiences; and
- Develop in students an appreciation for life-long education that supports their careers.

Plan Requirements

Biological and Agricultural Engineering Technology (BS): Environmental Systems Management Concentration: 120 Total Units

Communication

Select one of the following: 3
- COM 110 Public Speaking
- ENG 331 Communication for Engineering and Technology
- ENG 332 Communication for Business and Management
- ENG 333 Communication for Science and Research

Mathematical Sciences

- MA 131 Calculus for Life and Management Sciences A 3
- MA 114 Introduction to Finite Mathematics with Applications 3
- ST 350 Economics and Business Statistics 3

Natural & Physical Sciences

- CH 101 Chemistry - A Molecular Science 3
- CH 102 General Chemistry Laboratory 1
- PY 211 College Physics I 4
- BIO 181 Introductory Biology: Ecology, Evolution, and Biodiversity 4
- SSC 200 Soil Science 4
& SSC 201 and Soil Science Laboratory 4

Select one of the following: 4
- CH 201 Chemistry - A Quantitative Science
& CH 202 and Quantitative Chemistry Laboratory
- PY 212 College Physics II

AES Major Requirements

- BAE 100 Introduction to Biological Engineering 1
- BAET 201 Shop Processes and Management 3
- BAET 323 Water Management 3
- BAET 332 Management of Animal Environments 4
- BAET 343 Agricultural Electrification 4
- BAET 432 Agricultural and Environmental Safety and Health 3
- CSC 200 Introduction to Computers and Their Uses 3
or AEE 226 Computer Applications and Information Technology in Agricultural & Extension Ed
- GC 120 Foundations of Graphics 3
- ARE 201 Introduction to Agricultural & Resource Economics 3
- AEE 323 Leadership Development in Agriculture and Life Sciences 3

Environmental Systems Management

Select one of the following 3
- BAET 333 Processing Agricultural Products
- BAET 411 Agricultural Machinery and Power Units
- BAE 435 Precision Agriculture Technology
- BAE 535 Precision Agriculture Technology
- BAE 325 Introductory Geomatics 3
- BAET 443 Environmental Restoration Implementation 3
- GIS 510 Fundamentals of Geospatial Information Science and Technology 3

**Career Opportunities**

BE students learn to solve a wide variety of engineering problems and will have opportunities for specialization though selection of a specific concentration. Scientific and engineering principles are applied: to conserve and manage air, energy, soil and water resources; to manage, protect and restore natural ecosystems; to understand and utilize biological, chemical and physical processes for the production and conversion of biomass to bio energy; to analyze, understand and utilize mechanical properties of biological materials; to design and develop machinery systems for all phases of agricultural and food production; to design and evaluate structures and environmental control systems for housing animals, plant growth, and biological product storage; to develop improved systems for processing and marketing food and agricultural products; and to design sensor-based instrumentation and control systems for biological and agricultural applications.

Graduates of the BE curriculum receive a Bachelor’s of Engineering in Biological Engineering, qualifying them for positions in design, development, and research in industry, government and public institutions. The curriculum also prepares students for post-graduate work leading to advanced degrees. Typical positions filled by recent BE graduates include: stream and wetlands restoration project manager; product design; development and testing engineer; plant engineering and management; engineering analysis and inspection for federal and state agencies; engineering consultant and research engineer. Entry-level
salary ranges for BE graduates are similar to those of Civil, Industrial, and Mechanical Engineering graduates.

The BAET curriculum provides graduates opportunities in technical analysis, application and evaluation of agricultural production systems and environmental systems. The curriculum's flexibility enables students to specialize technologically in agriculture, the environment, or business management. Careers include technical jobs in production agriculture, environmental systems, agribusiness sales and service, and agricultural extension.

**Biological and Agricultural Engineering Technology (Minor)**

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The BAET minor is offered to students interested in the application of engineering technology analysis in agricultural and environmental systems that utilize machinery, agricultural structures, food and feed processing, soil, water and waste management, electrical power and controls, and agricultural safety and health technology. It allows majors in other programs to understand engineering technology for equipment, materials, resources, processes, and facilities utilized in their major area of study, and be knowledgeable in the application of technology for managing environmental issues, impacts, and monitoring.

**Admissions**

Students who plan to minor in Agricultural and Engineering Technology should contact Dr. Crowell Bowers for consultation and approval. Admission to the minor requires a cumulative grade point average of 2.0 or higher. Students should contact the Biological and Agricultural Engineering Undergraduate Coordinator to inquire about adding the minor no later than the registration period for the student’s final semester at NC State. A minor advisor will be assigned to all of the students enrolled.

**Certification**

The minor should be declared as soon as the student decides to pursue it. Minor coursework must be completed no later than the semester in which the student expects to graduate from his or her program. Paperwork for certification should be completed no later than during the registration period for the student’s final semester at NC State.

**Contact Person**

S. Andrew Hale  
108 Weaver Labs  
919.515.6760  
andy_hale@ncsu.edu

**SIS Code: 11BAET**

**Plan Requirements**

- Completion of a minimum of 15 credit hours.
- Open to all students at NC State except students majoring in Biological and Agricultural Engineering Technology (BAET).
- The program is flexible in order for students to be able to emphasize the area of their interest.

### Biological Engineering (BS)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The BE curriculum is jointly administered by the College of Agriculture and Life Sciences and the College of Engineering and combines the fields of engineering, biology and agriculture. The BE curriculum is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. BE graduates are qualified to become registered professional engineers by passing the appropriate examinations and upon completing the engineering experience requirements. Specific curriculum requirements are available online.

BAE faculty, in concert with program constituencies, has developed the following undergraduate program objectives. Within the first five years following graduation, NC State’s Biological Engineering graduates will:

- Excel in their careers or in graduate school by applying their knowledge of engineering principles, processes, and procedures;
- Practice engineering professionally and ethically;
- Communicate effectively in a professional environment; and
- Be engaged in life-long learning and professional development.

### Plan Requirements

### Total Hours

128

1. A grade of C- or higher is required.

### Career Opportunities

BE students learn to solve a wide variety of engineering problems and will have opportunities for specialization through selection of a specific concentration. Scientific and engineering principles are applied: to conserve and manage air, energy, soil and water resources; to manage, protect and restore natural ecosystems; to understand and utilize biological, chemical and physical processes for the production and conversion of biomass to bio energy; to analyze, understand and utilize mechanical properties of biological materials; to design and develop machinery systems for all phases of agricultural and food production; to design and evaluate structures and environmental control systems for housing animals, plant growth, and biological product storage; to develop...
Biological Engineering (BS): Agricultural Engineering Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The BE curriculum is jointly administered by the College of Agriculture and Life Sciences and the College of Engineering and combines the fields of engineering, biology and agriculture. The BE curriculum is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. BE graduates are qualified to become registered professional engineers by passing the appropriate examinations and upon completing the engineering experience requirements. Specific curriculum requirements are available online.

BAE faculty, in concert with program constituencies, has developed the following undergraduate program objectives. Within the first five years following graduation, NC State’s Biological Engineering graduates will:

- Excel in their careers or in graduate school by applying their knowledge of engineering principles, processes, and procedures;
- Practice engineering professionally and ethically;
- Communicate effectively in a professional environment; and
- Be engaged in life-long learning and professional development.

Plan Requirements

Career Opportunities

BE students learn to solve a wide variety of engineering problems and will have opportunities for specialization though selection of a specific concentration. Scientific and engineering principles are applied: to conserve and manage air, energy, soil and water resources; to manage, protect and restore natural ecosystems; to understand and utilize biological, chemical and physical processes for the production and conversion of biomass to bio energy; to analyze, understand and utilize mechanical properties of biological materials; to design and develop machinery systems for all phases of agricultural and food production; to design and evaluate structures and environmental control systems for housing animals, plant growth, and biological product storage; to develop improved systems for processing and marketing food and agricultural products; and to design sensor-based instrumentation and control systems for biological and agricultural applications.

Graduates of the BE curriculum receive a Bachelor’s of Engineering in Biological Engineering, qualifying them for positions in design, development, and research in industry, government and public institutions. The curriculum also prepares students for post-graduate work leading to advanced degrees. Typical positions filled by recent BE graduates include: stream and wetlands restoration project manager; product design; development and testing engineer; plant engineering and management; engineering analysis and inspection for federal and state agencies; engineering consultant and research engineer. Entry-level salary ranges for BE graduates are similar to those of Civil, Industrial, and Mechanical Engineering graduates.

The BAET curriculum provides graduates opportunities in technical analysis, application and evaluation of agricultural production systems and environmental systems. The curriculum’s flexibility enables students to specialize technologically in agriculture, the environment, or business management. Careers include technical jobs in production agriculture, environmental systems, agribusiness sales and service, and agricultural extension.

Biological Engineering (BS):
Bioprocessing Engineering Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The BE curriculum is jointly administered by the College of Agriculture and Life Sciences and the College of Engineering and combines the fields of engineering, biology and agriculture. The BE curriculum is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. BE graduates are qualified to become registered professional engineers by passing the appropriate examinations and upon completing the engineering experience requirements. Specific curriculum requirements are available online.

BAE faculty, in concert with program constituencies, has developed the following undergraduate program objectives. Within the first five years following graduation, NC State’s Biological Engineering graduates will:

- Excel in their careers or in graduate school by applying their knowledge of engineering principles, processes, and procedures;
- Practice engineering professionally and ethically;
- Communicate effectively in a professional environment; and
- Be engaged in life-long learning and professional development.

### Hours

- Total Hours: 46
accredited by the Engineering Accreditation Commission of ABET, fields of engineering, biology and agriculture. The BE curriculum is jointly administered by the College of Agriculture Outcomes website To see more about what you will learn in this program, visit the Concentration Ecological Engineering Biological Engineering (BS): Career Opportunities BE students learn to solve a wide variety of engineering problems and will have opportunities for specialization though selection of a specific concentration. Scientific and engineering principles are applied: to conserve and manage air, energy, soil and water resources; to manage, protect and restore natural ecosystems; to understand and utilize biological, chemical and physical processes for the production and conversion of biomass to bio energy; to analyze, understand and utilize mechanical properties of biological materials; to design and develop machinery systems for all phases of agricultural and food production; to design and evaluate structures and environmental control systems for housing animals, plant growth, and biological product storage; to develop improved systems for processing and marketing food and agricultural products; and to design sensor-based instrumentation and control systems for biological and agricultural applications.

Graduates of the BE curriculum receive a Bachelor’s of Engineering in Biological Engineering, qualifying them for positions in design, development, and research in industry, government and public institutions. The curriculum also prepares students for post-graduate work leading to advanced degrees. Typical positions filled by recent BE graduates include: stream and wetlands restoration project manager; product design; development and testing engineer; plant engineering and management; engineering analysis and inspection for federal and state agencies; engineering consultant and research engineer. Entry-level salary ranges for BE graduates are similar to those of Civil, Industrial, and Mechanical Engineering graduates.

The BAET curriculum provides graduates opportunities in technical analysis, application and evaluation of agricultural production systems and environmental systems. The curriculum’s flexibility enables students to specialize technologically in agriculture, the environment, or business management. Careers include technical jobs in production agriculture, environmental systems, agribusiness sales and service, and agricultural extension.

Biological Engineering (BS): Ecological Engineering Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas)! The BE curriculum is jointly administered by the College of Agriculture and Life Sciences and the College of Engineering and combines the fields of engineering, biology and agriculture. The BE curriculum is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. BE graduates are qualified to become registered professional engineers by passing the appropriate examinations and upon completing the engineering experience requirements. Specific curriculum requirements are available online.

BAE faculty, in concert with program constituencies, has developed the following undergraduate program objectives. Within the first five years following graduation, NC State’s Biological Engineering graduates will:

- Excel in their careers or in graduate school by applying their knowledge of engineering principles, processes, and procedures;
- Practice engineering professionally and ethically;
- Communicate effectively in a professional environment; and
- Be engaged in life-long learning and professional development.

2 A grade of C- or higher is required.

Career Opportunities

BE students learn to solve a wide variety of engineering problems and will have opportunities for specialization though selection of a specific concentration. Scientific and engineering principles are applied: to conserve and manage air, energy, soil and water resources; to manage, protect and restore natural ecosystems; to understand and utilize biological, chemical and physical processes for the production and conversion of biomass to bio energy; to analyze, understand and utilize mechanical properties of biological materials; to design and develop machinery systems for all phases of agricultural and food production; to design and evaluate structures and environmental control systems for housing animals, plant growth, and biological product storage; to develop improved systems for processing and marketing food and agricultural products; and to design sensor-based instrumentation and control systems for biological and agricultural applications.

Graduates of the BE curriculum receive a Bachelor’s of Engineering in Biological Engineering, qualifying them for positions in design, development, and research in industry, government and public institutions. The curriculum also prepares students for post-graduate work leading to advanced degrees. Typical positions filled by recent BE graduates include: stream and wetlands restoration project manager; product design; development and testing engineer; plant engineering and management; engineering analysis and inspection for federal and state agencies; engineering consultant and research engineer. Entry-level salary ranges for BE graduates are similar to those of Civil, Industrial, and Mechanical Engineering graduates.

The BAET curriculum provides graduates opportunities in technical analysis, application and evaluation of agricultural production systems and environmental systems. The curriculum’s flexibility enables students to specialize technologically in agriculture, the environment, or business management. Careers include technical jobs in production agriculture, environmental systems, agribusiness sales and service, and agricultural extension.
Biological Engineering (BS): Environmental Engineering Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The BE curriculum is jointly administered by the College of Agriculture and Life Sciences and the College of Engineering and combines the fields of engineering, biology and agriculture. The BE curriculum is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. BE graduates are qualified to become registered professional engineers by passing the appropriate examinations and upon completing the engineering experience requirements. Specific curriculum requirements are available online.

BAE faculty, in concert with program constituencies, has developed the following undergraduate program objectives. Within the first five years following graduation, NC State's Biological Engineering graduates will:

• Excel in their careers or in graduate school by applying their knowledge of engineering principles, processes, and procedures;
• Practice engineering professionally and ethically;
• Communicate effectively in a professional environment; and
• Be engaged in lifelong learning and professional development.

**Career Opportunities**

BE students learn to solve a wide variety of engineering problems and will have opportunities for specialization through selection of a specific concentration. Scientific and engineering principles are applied: to conserve and manage air, energy, soil and water resources; to manage, protect and restore natural ecosystems; to understand and utilize biological, chemical and physical processes for the production and conversion of biomass to bio energy; to analyze, understand and utilize mechanical properties of biological materials; to design and develop machinery systems for all phases of agricultural and food production; to design and evaluate structures and environmental control systems for housing animals, plant growth, and biological product storage; to develop improved systems for processing and marketing food and agricultural products; and to design sensor-based instrumentation and control systems for biological and agricultural applications.

Graduates of the BE curriculum receive a Bachelor’s of Engineering in Biological Engineering, qualifying them for positions in design, development, and research in industry, government and public institutions. The curriculum also prepares students for post-graduate work leading to advanced degrees. Typical positions filled by recent BE graduates include: stream and wetlands restoration project manager; product design; development and testing engineer; plant engineering and management; engineering analysis and inspection for federal and state agencies; engineering consultant and research engineer. Entry-level salary ranges for BE graduates are similar to those of Civil, Industrial, and Mechanical Engineering graduates.

The B.A.E. curriculum provides graduates opportunities in technical analysis, application and evaluation of agricultural production systems and environmental systems. The curriculum’s flexibility enables students to specialize technologically in agriculture, the environment, or business management. Careers include technical jobs in production agriculture, environmental systems, agribusiness sales and service, and agricultural extension.

**Department of Crop and Soil Sciences**

We roll up our sleeves and get our hands dirty to accomplish great things in the Department of Crop and Soil Sciences. Our world-class undergraduate programs prepare students to answer environmental and agricultural challenges, building on our rich history of growing agricultural and environmental sciences in North Carolina and around the globe. But our focus is on the future, because the solutions for feeding a growing population, conserving natural resources and dealing with climate change are rooted in crop and soil sciences.

We conduct research that drives innovation and new technology, expands understanding and provides science-based information to solve problems, but we don’t stop there. We make sure our graduates, stakeholders and partners put their gained knowledge and innovation to work for a better tomorrow.

A quick overview of our programs:

- The Bachelor of Science (B.S.) program has three specialty areas to choose from: Agronomy, Crop Biotechnology, and Soil Science
- Two undergraduate certificate programs (the Crop Science Certificate and Soil Science Certificate) that allow participants to focus their attention on the core courses of our undergraduate degree programs; both can be completed through distance education (online).
- Two associate degrees through the Agricultural Institute
- Four undergraduate minors

Here are some highlights about our department:

- Our students have the opportunity to join a number of clubs and organizations, from Agronomy Club to Agribusiness/NAMA Club
- Join fellow CALS students on study abroad adventures to

For more information about this department, including contact information, visit our website.

**For Additional Information**

If you need additional information, or have questions about the undergraduate programs in the Department of Crop and Soil Sciences, you can contact the Undergraduate Programs Office at 919.515.5820 or by email at cropsoil-undergraduate-office@ncsu.edu

Agroecology & Sustainable Food Systems (BS): Agroecology Research & Production Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

Bachelor of Science in Plant and Soil Sciences degree is a flexible program that allows students to choose from a wide range of programs, based on their personal interests and career goals. Students can select a concentration from six areas of study including Agroecology, Agronomic Business, Agronomic Science, Crop Biotechnology, Crop Production, and Soil Science. Each concentration provides a strong science-based foundation as well as technical and supporting courses related to each individual discipline.

**Career Opportunities**

The breadth and depth of education and experiences you will gain from our department will set you on a path toward a rewarding career in one of the following specialties:

- Agronomist
- Agronomy Sales and Management
- Athletic Turf Manager
- Crop Advisor
- Conservationist
- Crops Systems Specialist
- Ecologist
- Environmental Scientist and Specialist
- Extension Agent
- Golf Course Superintendent
- Hydrologist
- Nutrient Management/ Waste Management Specialist
- Plant Breeder
- Precision Agriculture Specialist
- Real Estate Manager
- Research Station Manager
- Restoration Specialist
• Seed Production Agronomist
• Soil Scientist

Learn more about future job prospects, representative salaries, and major employers for each of the above listed careers at go.ncsu.edu/careers

### Agroecology & Sustainable Food Systems (BS): Community Food Systems Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

Bachelor of Science in Plant and Soil Sciences degree is a flexible program that allows students to choose from a wide range of programs, based on their personal interests and career goals. Students can select a concentration from six areas of study including Agroecology, Agronomic Business, Agronomic Science, Crop Biotechnology, Crop Production, and Soil Science. Each concentration provides a strong science-based foundation as well as technical and supporting courses related to each individual discipline.

Career Opportunities
The breadth and depth of education and experiences you will gain from our department will set you on a path toward a rewarding career in one of the following specialties:

• Agronomist
• Agronomy Sales and Management
• Athletic Turf Manager
• Crop Advisor
• Conservationist
• Crops Systems Specialist
• Ecologist
• Environmental Scientist and Specialist
• Extension Agent
• Golf Course Superintendent
• Hydrologist
• Nutrient Management/ Waste Management Specialist
• Plant Breeder
• Precision Agriculture Specialist
• Real Estate Manager
• Research Station Manager
• Restoration Specialist
• Seed Production Agronomist
• Soil Scientist

Learn more about future job prospects, representative salaries, and major employers for each of the above listed careers at go.ncsu.edu/careers/!

Agroecology (Minor)
To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orp.ncsu.edu/pgas/)!

The minor in Agroecology is open to all undergraduate students at NC State University. It is designed for students majoring in the biological sciences, agronomy, horticulture and animal sciences, but will be of interest to a wide array of students as agriculture has broad implications in the life sciences, economics, and sociology. Agroecology instruction provides students a fundamental understanding of agriculture and its interaction with natural and social systems. Students selecting the Agroecology minor will gain an understanding of modern production agriculture from an ecological and sociological perspective, obtain new skills in analyzing agricultural systems, and the knowledge to design a plan for change. This knowledge will improve a student’s ability to work with agricultural professionals to implement a system that meets ecological and social needs while remaining profitable for farmers.

Admissions
Admission to the minor requires a cumulative grade point average of 2.0 or better. Students should contact the Crop and Soil Sciences Undergraduate Programs Office to inquire about adding the minor no later than the registration period for the student’s final semester at NC State. A minor advisor will be assigned to all students interested in completing the Agroecology minor. Students enrolled in the minor must consult with their minor advisors during each registration period.

Certification
The minor should be declared as soon as the student makes the decision to pursue a minor. Minor coursework must be completed no later than the semester in which the student expects to graduate from his or her degree program. Paperwork to declare the minor should be completed no later than the registration period for the student’s final semester at NC State. Students should contact the Crop and Soil Sciences Undergraduate Programs Office for certification of the minor.

SIS Code: 11AGECM

Plan Requirements
A minimum of 17 hours is required for the minor in Agroecology. Students are required to complete 11 credits of required courses and a minimum of 6 credits of restricted elective courses. A minimum grade of 'C-' or better is required in each course selected. No courses for the minor may be taken using the S/U option.

| Elective Courses |
| Select one course from at least two of the following groups: |
| 6 |

Group 1: Ecology and Agricultural Production

ANS 150 Introduction to Animal Science
BAET 323 Water Management
PB 200 Plant Life
PB 213/CS 214 Plants and Civilization
PB 250 Plant Biology
CS 213 Crop Science
CS 411 Crop Ecology
CS 415 Integrated Pest Management
ENT 212 Basic Entomology
ENT 401 Honey Bee Biology and Management
ENT 425 General Entomology
FW 221 Conservation of Natural Resources
FOR 260 Forest Ecology
HS 432 Introduction to Permaculture
NR 300 Natural Resource Measurements
NR 406 Conservation of Biological Diversity
SSC 200 Soil Science
SSC 201 Soil Science Laboratory

Group 2: Social Science
HI 340 History of Agriculture
IDS 201 Environmental Ethics
SOC 241 Sociology of Agriculture and Rural Society
SOC 450 Environmental Sociology

Group 3: Economics
ARE 201 Introduction to Agricultural & Resource Economics
CSSC 290 Professional Development in Crop & Soil Sciences
CS 211 Plant Genetics
CS 213 Crop Science
CS 214 Crop Science Laboratory
CS 414 Weed Science
CS 415 Integrated Pest Management
SSC 200 Soil Science
SSC 201 Soil Science Laboratory
SSC 341 Soil Fertility and Nutrient Management
SSC 342 Soil and Plant Nutrient Analysis
SSC 462 Soil-Crop Management Systems

Concentration Electives
Select one of the following:
CS 224 Seeds, Biotechnology and Societies
CS 230 Introduction to Agroecology
SSC 185 Land and Life
Select two of the following:
CS 216 Southern Row Crop Production - Cotton, Peanuts, and Tobacco
CS 218 Southern Row Crop Production - Corn, Small Grains and Soybeans
CS 312 Grassland Management for Natural Resources Conservation
CSSC 492 Professional Internship Experience in Crop and Soil Sciences
or CSSC 493 Research Experience in Crop and Soil Sciences

Restricted Electives (p. 292) 17

General Education Program (GEP) Courses
ENG 101 Academic Writing and Research
GEP Humanities (p. 1423)
GEP Social Sciences (p. 1430)

Crop and Soil Sciences (BS): Agronomy
To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)
Bachelor of Science in Plant and Soil Sciences degree is a flexible program that allows students to choose from a wide range of programs, based on their personal interests and career goals. Students can select a concentration from six areas of study including Agroecology, Agronomic Business, Agronomic Science, Crop Biotechnology, Crop Production, and Soil Science. Each concentration provides a strong science-based foundation as well as technical and supporting courses related to each individual discipline.

Plan Requirements
Crop and Soil Sciences (BS): Agronomy: 120 Total Units

Mathematics & Natural Sciences

MA 121 Elements of Calculus 3
ST 311 Introduction to Statistics 3
BIO 181 Introductory Biology: Ecology, Evolution, and Biodiversity 4
CH 101 Chemistry - A Molecular Science 3
CH 102 General Chemistry Laboratory 1
CH 220 Introductory Organic Chemistry 3
CH 222 Organic Chemistry I Lab 1
PB 321 Introduction to Whole Plant Physiology 3
PY 131 Conceptual Physics 4
BIO 183 Introductory Biology: Cellular and Molecular Biology 4

Communication/Advanced Writing
COM 110 Public Speaking 3
or COM 112 Interpersonal Communication
Select one of the following:
ENG 331 Communication for Engineering and Technology 3
ENG 332 Communication for Business and Management
ENG 333 Communication for Science and Research

Required Courses within Major
ARE 201 Introduction to Agricultural & Resource Economics 3
CSSC 290 Professional Development in Crop & Soil Sciences 1
CS 211 Plant Genetics 3
CS 213 Crop Science 3
CS 214 Crop Science Laboratory 1
CS 414 Weed Science 4
CS 415 Integrated Pest Management 3
SSC 200 Soil Science 1
SSC 201 Soil Science Laboratory 1
SSC 341 Soil Fertility and Nutrient Management 3
SSC 342 Soil and Plant Nutrient Analysis 1
SSC 462 Soil-Crop Management Systems 3

Concentration Electives
Select one of the following:
CS 224 Seeds, Biotechnology and Societies
CS 230 Introduction to Agroecology
SSC 185 Land and Life
Select two of the following:
CS 216 Southern Row Crop Production - Cotton, Peanuts, and Tobacco
CS 218 Southern Row Crop Production - Corn, Small Grains and Soybeans
CS 312 Grassland Management for Natural Resources Conservation
CSSC 492 Professional Internship Experience in Crop and Soil Sciences
or CSSC 493 Research Experience in Crop and Soil Sciences

Restricted Electives (p. 292) 17

General Education Program (GEP) Courses
ENG 101 Academic Writing and Research 4
GEP Humanities (p. 1423) 6
GEP Social Sciences (p. 1430) 3
GEP Health and Exercise Studies (p. 1422) 2
GEP Additional Breadth (p. 1417) (Humanities/Social Sciences/Visual and Performing Arts) 3
GEP Interdisciplinary Perspectives (p. 1426) 2
GEP U.S. Diversity (p. 1431) (verify requirement)
GEP Global Knowledge (p. 1419) (verify requirement)
Foreign Language Proficiency (p. 1417) (verify requirement)

Free Electives
Free Electives (12 Hr S/U Lmt) 2 6

Total Hours 120

1 A grade of C- or higher is required.
2 Students should consult their academic advisors to determine which courses fill this requirement.

Total Hours 120

**Career Opportunities**

The breadth and depth of education and experiences you will gain from our department will set you on a path toward a rewarding career in one of the following specialties:

- Agronomist
- Agronomy Sales and Management
- Athletic Turf Manager
- Crop Advisor
- Conservationist
- Crops Systems Specialist
- Ecologist
- Environmental Scientist and Specialist
- Extension Agent
- Golf Course Superintendent
- Hydrologist
- Nutrient Management/Waste Management Specialist
- Plant Breeder
- Precision Agriculture Specialist
- Real Estate Manager
- Research Station Manager
- Restoration Specialist
- Seed Production Agronomist
- Soil Scientist

Learn more about future job prospects, representative salaries, and major employers for each of the above listed careers at go.ncsu.edu/careers (http://go.ncsu.edu/careers/)

## Crop and Soil Sciences (BS): Soil Science

### Foundation Elective
- MA 131: Calculus for Life and Management Sciences A 3
- CSSC 290: Professional Development in Crop & Soil Sciences 1

### Spring Semester
- BIO 183 or PB 200: Introductory Biology: Cellular and Molecular Biology or Plant Life 4
- CH 101: Chemistry - A Molecular Science 3
- CH 102: General Chemistry Laboratory 1
- MA 231: Calculus for Life and Management Sciences B 3
- GEP Health and Exercise Studies (p. 1422) 1
- GEP Humanities (p. 1423) 3

### Hours
- 16

### Second Year

#### Fall Semester
- CH 221: Organic Chemistry I 3
- CH 222: Organic Chemistry I Lab 1
- CS 213: Crop Science 3
- CS 214: Crop Science Laboratory 1
- SSC 200: Soil Science 3
- SSC 201: Soil Science Laboratory 1
- GEP Health and Exercise Studies (p. 1422) 1
- Restrictive Electives 3

### Hours
- 15

#### Spring Semester
- CH 223: Organic Chemistry II 3
- CH 224: Organic Chemistry II Lab 1
- COM 110: Public Speaking 3
- CS 211: Plant Genetics 3
- Restricted Electives 3
- GEP Interdisciplinary Perspectives (p. 1426) 2

### Hours
- 16

### Third Year

#### Fall Semester
- GEP Social Sciences (p. 1430) 3
- PY 131: Conceptual Physics 4
- PB 421: Plant Physiology 3
- ST 311: Introduction to Statistics 3
- ARE 201: Introduction to Agricultural & Resource Economics 3

### Hours
- 16

#### Spring Semester
- BCH 351: General Biochemistry 3
- GEP Humanities (p. 1423) 3
- Restrictive Elective 3
- BIT 410: Manipulation of Recombinant DNA 4

### Hours
- 13

### Fourth Year

#### Fall Semester
- Biotechnology Elective 4
- PB 480: Introduction to Plant Biotechnology 3
- GEP Additional Breadth (p. 1417) 3
- Experiential Learning Elective 3

### Hours
- 13

#### Spring Semester
- CS 413: Plant Breeding 2
- Select one of the following: 3
  - ENG 331: Communication for Engineering and Technology
  - ENG 332: Communication for Business and Management
  - ENG 333: Communication for Science and Research
- Restrictive Elective 4
- Free Elective 7

### Hours
- 16

### Total Hours
- 120

### Career Opportunities

The breadth and depth of education and experiences you will gain from our department will set you on a path toward a rewarding career in one of the following specialties:

- Agronomist
- Agronomy Sales and Management
- Athletic Turf Manager
- Crop Advisor
- Conservationist
- Crops Systems Specialist
- Ecologist
- Environmental Scientist and Specialist
- Extension Agent
- Golf Course Superintendent
- Hydrologist
- Nutrient Management/ Waste Management Specialist
- Plant Breeder
- Precision Agriculture Specialist
- Real Estate Manager
- Research Station Manager
- Restoration Specialist
- Seed Production Agronomist
- Soil Scientist

Learn more about future job prospects, representative salaries, and major employers for each of the above listed careers at go.ncsu.edu/careers (http://go.ncsu.edu/careers/)

### Crop and Soil Sciences (BS): Soil Science

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)!
Bachelor of Science in Plant and Soil Sciences degree is a flexible program that allows students to choose from a wide range of programs, based on their personal interests and career goals. Students can select a concentration from six areas of study including Agroecology, Agronomic Business, Agronomic Science, Crop Biotechnology, Crop Production, and Soil Science. Each concentration provides a strong science-based foundation as well as technical and supporting courses related to each individual discipline.

Crop Science (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The minor in Crop Science is offered to all undergraduate students at NC State University, with the exception of those enrolled in the Plant & Soil Science major. This minor provides a basic understanding of the requirements for successful field crop production and the role crop species and management practices play in a broad spectrum of sustainable agricultural enterprises.

A course selection option permits a student to focus on the particular aspect of Crop Science that complements the student’s major and career plans. The minor in Crop Science is designed to:

1. Provide a strong background in Crop Science to the variety of disciplines which interact in some way with field crop production;
2. Clarify the role crop species and rotational sequences play in agricultural enterprises both in the United States and globally to increase our quality of life; and
3. Identify strategies either in use or being researched to increase the compatibility of crop species with their environment to achieve yield stability, suitable quality of product, and sustainability of the production enterprise.

Admissions

Admission to the minor requires a cumulative grade point average of 2.0 or better. Students should contact the Crop and Soil Sciences Undergraduate Programs Office to inquire about adding the minor no later than the registration period for the student’s final semester at NC State.

Certification

The minor should be declared as soon as the student makes the decision to pursue a minor. Minor coursework must be completed no later than the semester in which the student expects to graduate from his or her degree program. Paperwork to declare the minor should be completed no later than the registration period for the student’s final semester at NC State. Students should contact the Crop and Soil Sciences Undergraduate Programs Office for certification of the minor.

Contact Person

Undergraduate Programs Office
Crop & Soil Sciences Department
2234 Williams Hall
Campus Box 7620
919-515-5820
cropssoil-undergraduate-office@ncsu.edu

SIS code: 11CSM

Plan Requirements

A minimum of 17 hours is required for the minor in Crop Science. Students are required to complete 4 credits of required courses and a minimum of 13 credits of restricted elective courses. A minimum grade of ‘C-’ or better is required in each course selected. No courses for the minor may be taken using the S/U option.
Crop Science Certificate (Distance Education)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Undergraduate Certificate in Crop Science is a program that allows participants to explore the breadth of crop related courses offered in the Department of Crop and Soil Sciences. Participants in the program can customize their program to gain an understanding of the importance of agronomic crops for our state and national economy; how agronomic growth, development, and yield interact with environmental factors during the production season; sustainable production systems for agronomic crops; and marketing and distribution issues of these crops that can be related to world hunger. Individual courses will vary in instruction style, exam methods and assignments, and will include an assortment of on-line instruction methodology, video and PowerPoint presentations, outside readings, and on-line discussion sessions.

Program Coordinator
Dr. David Crouse
Undergraduate Teaching Coordinator and Director of Distance Education Programs

Admissions Requirements
High school diploma is required. The successful completion of one college biology course or equivalent experience is required.

Plan of Study and Registration Information
Undergraduate Programs Office
Crop & Soil Sciences Department
2234 Williams Hall
Campus Box 7620
919-515-5820
cropsoul-undergraduate-office@ncsu.edu

Academic Structure
Term Effective: 1/2017
Plan Code: 11ACPCTU, 32ACPCTU
CIP Code: 01.1101
Description: Undergraduate Certificate in Crop Science
Offered via Distance Education (http://distance.ncsu.edu/programs/university-certificate-in-agronomic-crop-production/) format only

Plan Requirements
- Total credit hours required: 15
- Students completing the Undergraduate Certificate in Agronomic Crop Production must complete a minimum of 15 credit hours with minimum of C- or better in each class.
- The Certificate will be awarded upon successful completion of required and elective courses.
- Students who have graduated with or are currently enrolled in the Plant and Soil Sciences undergraduate baccalaureate degree program at N.C. State University are not eligible for this certificate.

1 If you have successfully completed ANS 215 Agricultural Genetics/HS 215 Agricultural Genetics or GN 311 Principles of Genetics prior to enrolling in the Crop Science Minor, you may not receive credit for CS 211 Plant Genetics towards the Crop Science Minor. You must select other courses from the elective list.
Field Botany (Certificate)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Certificate in Field Botany will provide the opportunity to develop skills in vascular plant identification, through both sight recognition and use of taxonomic keys, and knowledge of domain specific terminology. The certificate requires 14 hours of traditional course work in four courses. The certificate is a non-degree program offered jointly by the department of Plant and Microbial Biology (PMB) and Department of Forestry and Environmental Resources through on-campus classroom instruction, but is administered by PMB. It is available to students pursuing an undergraduate degree in any major at N. C. State University or to Non-Degree Studies (NDS) students. Students who have earned an undergraduate degree may also return as NDS students to complete the certificate. Students completing the certificate will find it very helpful in securing employment with the U.S. Army Corps of Engineers (protecting wetlands), private consulting firms (preparing impact statements and planning reports), the U.S. Fish and Wildlife Service (conserving threatened and endangered plants and improving wildlife habitat), Natural Heritage Programs (conserving rare plants), and private conservation organizations.

Admissions Requirements

Students must be enrolled in an undergraduate degree at N. C. State University or as a Non-Degree Studies student (NDS).

Natural Resources (BS): Soil, Water and Land Use Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

Bachelor of Science in Natural Resources degree encompasses the study of soil, water, air, minerals, flora, fauna and people. This curriculum offers a broad base in resource management with an opportunity to select one of several specializations. Two of these specifically address soil science: Soil Resources and Soil and Water Systems. The soil resource concentration prepares students to understand basic soil properties and to relate soil capabilities to a broad spectrum of land uses. The soil and water systems concentration integrates the role of soil with the importance of surface and groundwater hydrology.

Soil Science (Certificate)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Undergraduate Certificate in Soil Science enables students to obtain the course credit hours in soil science necessary for advancement in soil related careers. To become a Soil Scientist in the U.S. Federal Government, the Office of Personnel Management requires 15 credit hours in subjects such as soil genesis, pedology, soil chemistry, soil physics, and soil fertility. In states like North Carolina and others with a soil scientist licensing program, 15 credit hours of soil science related coursework is required to qualify for the licensing exam. Nationally, to become a Professional Soil Scientist certified by the Soil Science Society of America, individuals must have completed 15 course credit hours in soil science or a related area. Those who complete this program will meet the coursework requirements for all three career advancement opportunities.

You can learn more about North Carolina’s licensed soil scientist program at https://ncblss.wordpress.ncsu.edu/. To learn about the national certification program, visit http://soils.org/certifications/become-certified (http://soils.org/certifications/become-certified/)

This program may be completed totally online. For more information about Distance Education [Click here] (http://distance.ncsu.edu/programs/university-certificate-in-soil-science/)

Program Coordinator
Dr. David Crouse
Undergraduate Teaching Coordinator and Director of Distance Education Programs

Admissions Requirements
This program will be open to undergraduate students and those pursuing continuing education credits. It will also be open to students outside of North Carolina State University. A Bachelor of Science is required for admission into this program.

Registration Information
Undergraduate Programs Office
Crop & Soil Sciences Department

Academic Structure

Term Effective: 1/2017
Plan Code: 11SSCTU, 32SSCTU
CIP Code: 01.1201
Description: Undergraduate Certificate in Soil Science
Offered via on-campus and Distance Education (http://distance.ncsu.edu/programs/university-certificate-in-soil-science/) format

Plan Requirements

Prerequisites:
To pursue the certificate, students must have the following training in basic sciences:

• 2 semesters of chemistry
• 1 semester of physics
• 1 semester of biology
• mathematics through algebra and trigonometry

Total Hours 15

1 The required courses are available on-campus and via distance education. Prerequisites may be required in some courses. Students should contact instructors before enrolling to discuss eligibility as needed.

2 Available through Distance Education and on-campus. The 500-level courses are graduate level courses.

A grade of C (2.0) or higher in each course is required.
Soil Science (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orip.ncsu.edu/pgas/).

The minor in Soil Science is offered to all undergraduate students at NC State University who desire a strong knowledge of the principles of Soil Science to complement their major. It is intended to strengthen the understanding of basic physical, chemical, and microbiological soil properties that would be relevant to a student’s particular land management interest. These interests may include (but are not limited to) Forestry, Geology, Natural Resources, Environmental Science, Plant and Soil Sciences, Landscape Architecture, Horticulture, Biological and Agricultural Engineering, Agricultural Business Management, or Agricultural Education.

Admissions

Admission to the minor requires a cumulative grade point average of 2.0 or better. Students should contact the Crop and Soil Sciences Undergraduate Programs Office to inquire about adding the minor no later than the registration period for the student’s final semester at NC State.

Certification

The minor should be declared as soon as the student makes the decision to pursue a minor. Minor coursework must be completed no later than the semester in which the student expects to graduate from his or her degree program. Paperwork to declare the minor should be completed no later than the registration period for the student’s final semester at NC State. Students should contact the Crop and Soil Sciences Undergraduate Programs Office for certification of the minor.

Turfgrass (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orip.ncsu.edu/pgas/).

The minor in Turf Grass Science is open to all undergraduate students at NC State University, with the exception of those enrolled in the Turfgrass Science major. It is designed for students majoring in Plant and Soil Sciences, Biological Sciences, Horticultural Science, Parks & Recreation and related disciplines but will be of interest to a wide variety of students desiring expertise in establishing and maintaining turfgrass areas. Students will gain an understanding of the techniques required to successfully establish and manage turfgrasses commonly grown throughout the United States. This knowledge will improve the student’s ability to provide high quality turfgrass cover for a variety of situations including home lawns, commercial grounds, parks and other areas.

Admission

Admission to the minor requires a cumulative grade point average of 2.0 or better. Students should contact the Crop and Soil Sciences Undergraduate Programs Office to inquire about adding the minor no later than the registration period for the student’s final semester at NC State. A minor advisor will be assigned to all students interested in completing the Turfgrass minor. Students enrolled in the minor must consult with their minor advisor during each registration period.

Certification

The minor should be declared as soon as the student makes the decision to pursue a minor. Minor coursework must be completed no later than the semester in which the student expects to graduate from his or her degree program. Paperwork to declare the minor should be completed no later than the registration period for the student’s final semester at NC State. Students should contact the Crop and Soil Sciences Undergraduate Programs Office for certification of the minor.

Turfgrass Science (BS)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

Bachelor of Science in Turfgrass Science degree has been voted #1 in the US by TurfNet Magazine. Why? Because we have the best turfgrass scientists and extension specialists teaching our classes, because we have a state of the art teaching field lab for hands-on learning, and because our program has classes that cover the basics of environmentally sound turfgrass management. Our graduates find great careers in golf course and athletic field management, home and industrial lawn businesses, sod production, recreational park turf management, agri-business management and agri-business sales.

1 A grade of C- or better is required for CS 200 Introduction to Turfgrass Management, CS 400 Turf Cultural Systems, and CS 465 Turf Management Systems and Environmental Quality.
Career Opportunities

The breadth and depth of education and experiences you will gain from our department will set you on a path toward a rewarding career in one of the following specialties:

• Agronomist
• Agronomy Sales and Management
• Athletic Turf Manager
• Crop Advisor
• Conservationist
• Crops Systems Specialist
• Ecologist
• Environmental Scientist and Specialist
• Extension Agent
• Golf Course Superintendent
• Hydrologist
• Nutrient Management/Waste Management Specialist
• Plant Breeder
• Precision Agriculture Specialist
• Real Estate Manager
• Research Station Manager
• Restoration Specialist
• Seed Production Agronomist
• Soil Scientist

Learn more about future job prospects, representative salaries, and major employers for each of the above listed careers at [go.ncsu.edu/careers](http://go.ncsu.edu/careers/)

Department of Entomology and Plant Pathology

Entomology

Undergraduate instruction in entomology provides introductory and advanced courses in the basic science of entomology and the management of beneficial and pest insects. Courses at the 200- and 400-level fulfill General Education Requirements in Natural Sciences or Science and Technology and serve students majoring in biological sciences, agronomy, horticultural science, agricultural education, crop science, forestry and plant biology. They also provide fundamental training for graduate study in entomology (see the Graduate Catalog [http://www.ncsu.edu/grad/catalog/]).

Opportunities

For graduates with advanced degrees in entomology, opportunities include research, teaching, and extension positions in colleges and universities; research, development, production, control, and sales positions in private industries; consultative positions in pest management; research and regulatory positions with state and federal agencies; and curatorial positions in museums.

Curricula

There is no undergraduate major in entomology. Those students with a primary interest in entomology are advised to choose a general biological science curricula and minor in entomology.

Plant Pathology

Plant Pathology is a diverse discipline that provides fundamentally important information to many of the undergraduate degree programs offered in CALS at NC State. Undergraduate instruction in plant pathology provides introductory and advanced courses on the biology of plant pathogens and the nature and control of plant diseases to students majoring in crop science, horticultural science, the life sciences, and forestry. It also provides the fundamental training necessary for graduate study in plant pathology and related fields.

Kelman Scholars

Thanks to the generosity of Dr. Arthur and Mrs. Helen Kelman, family and friends, the department offers the S.E. Kelman Memorial Scholarship to one or more outstanding undergraduates enrolled at NC State or other universities. This competitive program allows selected applicants to gain research experiences as interns working under the supervision of a faculty member in the Department of Plant Pathology. For details about this scholarship program, please see scholarship’s information page ([https://plantpath.cals.ncsu.edu/undergraduate-studies/summer-research](https://plantpath.cals.ncsu.edu/undergraduate-studies/summer-research)).

Opportunities

As a graduate department, our graduates, with advanced degrees in plant pathology, are competitive for employment in many areas. Employment opportunities at the M.S. and Ph.D. levels include research, extension, teaching and regulatory sciences with universities and colleges, the U.S. Department of Agriculture, including APHIS and CPHIST, a wide array of agriculturally related industry, and private consulting. The rapid development of biotechnology, regulatory sciences, agricultural chemicals and biocontrol offers numerous opportunities for exciting and rewarding careers that service societal needs and advance our sciences.

Curricula

There is no undergraduate major or minor in plant pathology. We co-direct with the Department of Entomology a certificate in Plant Pests, Pathogens, and People ([https://oucc.dasa.ncsu.edu/plant-pests-pathogens-and-people](https://oucc.dasa.ncsu.edu/plant-pests-pathogens-and-people)), which offers a course of study in the biology, ecology, economic significance, and management of plant diseases and insects. This program may be completed on-campus or totally online.

For more information about this department, including contact information, visit the department ([http://www.cals.ncsu.edu/entomology/]).

Entomology (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Department of Entomology offers an undergraduate minor in Entomology intended for students who are interested in insects, their management, and their role in the functioning of nature and agricultural ecosystems. Insects represent the single largest group of animal species — they impact every facet of human life and they are a very important part of our environment. This minor provides an opportunity for students to become familiar with the great diversity of insect life, to explore their form and function, to study their impact on and relationships with plants, humans, and other animals, and to learn about various methods of control.

Admissions

The Undergraduate minor program in Entomology is coordinated by David Orr, the Entomology Undergraduate Teaching Coordinator, who acts as the minor advisor or assigns a minor advisor appropriate to the interests of the student.

Certification

David Orr will certify the minor prior to graduation. The minor must be completed no later than the semester in which the student expects to graduate from his or her degree program. Paperwork for certification should be completed no later than during the registration period for the student’s final semester at NC State.

Plan Requirements

• Program requires 15 semester hours
• A grade of ‘C-’ or better is required for all courses to fulfill the minor requirements.
• Students must take ENT 425 General Entomology or ENT 402 Forest Entomology plus 12 hours from the elective course list below.
However, of these 12 hours of elective courses, at least 6 hours must be ENT courses.

**Total Hours** 15

At least 2 of the 4 courses you choose must be ENT courses.

**Fundamentals of Entomology (Certificate)**

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Certificate Program in Fundamentals of Entomology is a non-degree program offered through the Department of Entomology by distance education, by on-campus regular classroom course enrollment, or by a combination of the two. The program is designed to increase personal knowledge about insects, the most diverse group of animals on earth, and their importance to mankind and our environment. It will allow the student to appreciate the role of insect biology and diversity in relation to all forms of animal life. The Certificate Program is open to all NC State undergraduate majors and to students who are enrolled as Non-Degree Studies (NDS) students. Students who complete this Program should be better prepared to teach in the field of science education, work in many fields of animal and plant science including the agricultural sciences, and have a better appreciation of the world in which they live. The Program consists of 12 credit hours of entomology courses of which 3 are required  and 9 are electives. Enrollment in 500 or higher numbered elective courses is limited to upper division undergraduates with consent of the instructor or to students who have already earned an undergraduate degree.

**Program Coordinator**

Dr. Clyde Sorenson

**Admissions Requirements**

Enrollment in NC State University in a baccalaureate degree program or as a Non-Degree Studies (NDS) student.

**Plan of Study**

Contact the Program Coordinator.

**Registration Information**

Contact the Program Coordinator.

**Academic Structure**

Term Effective: 8/2011  
Plan Code: 11ENTCTU, 32ENTCTU  
CIP Code: 26.0702  
Description: Undergraduate Certificate in Fundamentals of Entomology Offered via on-campus and Distance Education (https://online-distance.ncsu.edu/program/university-undergraduate-certificate-in-fundamentals-of-entomology/) format

**Plan Requirements**

The Program will require completion of 12 credit hours. ENT 425 General Entomology will be required of all students. The remaining nine hours can be taken from the list of additional entomology course electives. Students who have not yet earned at least 60 semester hours of college credit or equivalent must select elective courses from 200, 300 and 400 level courses. Upper division undergraduate students and students who have earned baccalaureate degrees may select from the complete list of electives with consent of individual instructors. A few elective courses have pre-requisites other than entomology courses and may not be suitable for all students. Students will select from these courses in consultation with the Department of Entomology’s certificate coordinator.

For additional information regarding Distance Education (click here) (http://distance.ncsu.edu/programs/university-certificate-in-plant-pests-pathogens-and-people/)

Admissions Requirements

This program will be open to undergraduate students and those pursuing continuing education credits. It will also be open to students outside of North Carolina State University.

Plan of Study

The Undergraduate Certificate in Plant Pests, Pathogens and People requires completion of 12 credit hours (four courses). Each course must be completed with a grade of C or better (grades of C- are not accepted). Students pursuing university certificate programs are considered non-degree studies (NDS) students for the purpose of university registration; NDS students may register for a maximum of 6 credit hours per semester. Thus, this certificate may be completed in as little as two semesters. The program must be completed within six (6) semesters, beginning with the initial course enrollment date.

Registration Information

Contact the Program Coordinator.

Total Hours 12
Department of Food, Bioprocessing and Nutrition Sciences

The Department of Food, Bioprocessing and Nutrition Sciences offers three undergraduate degree programs:

1. Food Science
2. Bioprocessing Science
3. Nutrition Science

These programs focus on the application and integration of chemistry, biology, biochemistry, biotechnology, and engineering disciplines in the development, production, and delivery of safe and nutritious foods and other products (including drugs) from food and bioprocessing operations, in addition to understanding the role of diet and how it generally affects human health. In support of each program, the department maintains modern, fully-equipped laboratories and a host of Nutrition outreach opportunities for teaching and research. All three undergraduate programs are compatible with pre-professional school curricula, such as pre-med or pre-vet, and many students elect to take on a minor in an area that enhances their major coursework. There are also opportunities to double major both within departmental majors as well as external majors such as Biochemistry.

For more information about this department, including contact information, visit the department (http://fbns.ncsu.edu/).

Associate Members of the Faculty
K.E. Anderson, Poultry Science
B. Chapman, 4-H Youth Development and Family & Consumer Sciences
S.A. Hale, Biological and Agricultural Engineering
H.M. Hassan, Molecular and Structural Biochemistry, Microbiology, Toxicology
S.A. Khan, Chemical and Biomolecular Engineering
D.P. Smith, Poultry Science
S. Thakur, College of Veterinary Medicine

Adjunct Faculty
P.A. Curtis
K. Maloney
S. Sang
R.C. Theuer

Plans

- Bioprocessing Science (BS) (p. 314)
- Food Safety & Quality Management (Certificate) (p. 317)
- Food Science (BS): Science Concentration (p. 318)
- Food Science (BS): Technology Concentration (p. 320)
- Food Science (Minor) (p. 323)
- Nutrition (Minor) (p. 324)
- Nutrition Sciences (BS) (p. 324)
- Nutrition Sciences (BS): Applied Nutrition Concentration (p. 327)

Bioprocessing Science (BS)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Bioprocessing Science Bachelor of Science degree prepares students for technical careers in biomanufacturing through formal training in fundamental sciences, as well as preparing students for careers in industries whose products are based on biological systems, including biopharmaceutical and biotechnology companies.

Total Hours 15

1 Students are strongly encouraged to complete a minor in a closely related field, and should consult with an advisor in the minor department for the most current requirements. A list of can be viewed online at http://oucc.ncsu.edu/minors (http://oucc.ncsu.edu/minors/). Free elective courses taken as credit only may not apply toward a minor.

Career Opportunities

Consumer demand for safe, high quality, nutritious foods and biopharmaceutical products, as well as for educational programs designed to promote healthy eating, creates a variety of career opportunities in the food, pharmaceutical and the allied health industries. Industrial opportunities include management, research and development, process supervision, quality control and assurance, procurement, distribution, and sales. Public health opportunities include educational program development, delivery, and assessment. In addition, graduates hold positions with government agencies and many with advanced degrees have teaching and/or research positions in colleges and universities.

Bioprocessing Science

The Bioprocessing Science degree is a unique program designed to provide graduates with a special skill set specific to bioprocessing and biomanufacturing. Graduates from this degree program will have exciting opportunities to biomanufacture medicines, vaccines, enzymes and other products that improve the quality of life.

Scholarships

The department provides both merit and financial need scholarships to encourage and assist students preparing for careers in Food, Bioprocessing, or Nutrition Science.

Food Safety & Quality Management (Certificate)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The University Certificate in Food Safety & Quality Management provides individuals an opportunity to learn basic food safety, quality control, and operations management concepts that are useful throughout the food manufacturing supply chain. It is available to non-degree seeking students and both undergraduate and graduate students at N.C. State University.

Program Coordinators

Clint Stevenson, Ph.D.

**Admissions Requirements**

- Non-degree seeking and continuing education students: Must demonstrate current or previous enrollment in a 2-year or 4-year degree program at an accredited college or university and provide proof of a 2.5 GPA or higher; OR have received an Associate Degree, Bachelor of Science or Bachelor of Arts Degree.
- NC State students: Must have a GPA of 2.5 or higher.

**Registration Information**

Contact the Program Coordinator.

**Academic Structure**

Term Effective: 8/2017
Plan Code: 11FSQMCTU/32FSQMCTU
CIP Code: 01.1001
Description: Undergraduate Certificate in Food Safety & Quality Management
Offered: Depending on the combination of courses that are selected, the format of this program can either be entirely Distance Education format or a combination of Distance Education (https://online-distance.ncsu.edu/program/university-certificate-in-plant-pests-pathogens-and-people/) and face-to-face.

**Plan Requirements**

| ISE 352 | Fundamentals of Human-Machine Systems Design |       |
| PSY 307 | Industrial and Organizational Psychology   |       |

Total Hours 12

1 There is a pre-requisite of ST 311 Introduction to Statistics for FS 416 Quality Control in Food and Bioprocessing. This pre-requisite may be satisfied by an equivalent course from other institutions by requesting approval from the certificate program director.
Per previous conversations with the Poole College of Management, this course will only be offered to Food Safety & Quality Management Certificate students in the summer session.

**Food Science (BS): Science Concentration**

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Food Science Bachelor of Science degree is offered through two curricula emphasizing science or technology. The science curriculum is designed for students desiring a more analytically intense program leading to technical careers in the food industry or graduate school. Students with an interest in business opportunities will find the technology program permits greater flexibility to pursue coursework in business, agricultural economics, or related fields.

**Plan Requirements**

Total Hours 15

Career Opportunities

Consumer demand for safe, high quality, nutritious foods and biopharmaceutical products, as well as for educational programs designed to promote healthy eating, creates a variety of career opportunities in the food, pharmaceutical and the allied health industries. Industrial opportunities include management, research and development, process supervision, quality control and assurance, procurement, distribution, and sales. Public health opportunities include educational program development, delivery, and assessment. In addition, graduates hold positions with government agencies and many with advanced degrees have teaching and/or research positions in colleges and universities.

Food Science

Many career opportunities exist in the food and beverage industry, the world's largest manufacturing sector, for graduates with a Food Science degree. Food science professionals are involved in the discovery of new food sources, new methods of food preservation, advances in food chemistry and sensory science and even product development. Positions are found worldwide, providing technical support to the food, beverage, and pharmaceutical industries and also government agencies. Food scientists work to ensure the safety and quality of foods through the application of basic scientific principles. The demand for food scientists continues to increase as the food industry expands.

The undergraduate Food Science major has two emphasis tracks. One is Science and the other is Technology. The B.S. in Food Science with a Science emphasis is designed for students who want more rigorous science courses to prepare them for graduate school or careers in the food, pharmaceutical, and bioprocessing industries. The B.S. in Food Science with a Technology emphasis is designed for students more interested in business opportunities for technically trained individuals. It offers greater flexibility in complementing Food Science coursework with business, agricultural commodity, and computer science courses.

Scholarships

The department provides both merit and financial need scholarships to encourage and assist students preparing for careers in Food, Bioprocessing, or Nutrition Science.

Food Science (BS): Technology Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Food Science Bachelor of Science degree is offered through two curricula emphasizing science or technology. The science curriculum is designed for students desiring a more analytically intense program leading to technical careers in the food industry or graduate school. Students with an interest in business opportunities will find the technology program permits greater flexibility to pursue coursework in business, agricultural economics, or related fields.

Plan Requirements

Food Science (BS): Technology Concentration: 120 Total Units

Positions are found worldwide, providing technical support to the food, beverage, and pharmaceutical industries and also government agencies. Food scientists work to ensure the safety and quality of foods through the application of basic scientific principles. The demand for food scientists continues to increase as the food industry expands.

The undergraduate Food Science major has two emphasis tracks. One is Science and the other is Technology. The B.S. in Food Science with a Science emphasis is designed for students who want more rigorous science courses to prepare them for graduate school or careers in the food, pharmaceutical, and or bioprocessing industries. The B.S. in Food Science with a Technology emphasis is designed for students more interested in business opportunities for technically trained individuals. It offers greater flexibility in complementing Food Science coursework with business, agricultural commodity, and computer science courses.

Scholarships

The department provides both merit and financial need scholarships to encourage and assist students preparing for careers in Food, Bioprocessing, or Nutrition Science.

Food Science (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orp.ncsu.edu/pgas/)

The Food Science minor is designed to provide students with important food science principles and concepts. It should give a competitive edge to individuals seeking employment in the food, pharmaceutical and related industries as a chemist, microbiologist, engineer, nutritionist, business specialist, or technical writer. This minor will provide technical information to improve the student's knowledge and understanding of food and its manufacture. While a comprehensive coverage of Food Science cannot be accomplished in 15 credit hours, flexibility in developing the minor permits tailoring each program to complement a student's major. An introductory course (FS 201 Introduction to Food Science) is required, but other courses at the 200, 300 and 400 level may be selected build on the basic discipline courses in the student's major.

Admissions

Students may declare their desire to complete the Food Science minor by contacting Dr. Harris as listed below. Students will be assigned an advisor to help them in selecting coursework for the minor.

Certification

Dr. Harris will certify the minor prior to graduation. The minor must be completed no later than the semester in which the student expects to graduate from his or her degree program. Paperwork for certification should be completed no later than during the registration period for the student's final semester at NC State.

Contact Person

Dr. Keith Harris
Associate Professor, Food Science
116B Schaub Hall

keith_harris@ncsu.edu

SIS Code: 11FDM

Plan Requirements

- Completion of a minimum of 15 credits
- A grade of 'C' or better.
- The minor must include one introductory course (FS 201 Introduction to Food Science), and 12 additional hours at the 200, 300 or 400 level.

Nutrition (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Minor in Nutrition will provide knowledge of the principles of nutrition that are needed to formulate balanced diets and to evaluate information and policies concerning foods and dietary practices. Students may select courses to emphasize human or animal nutrition or a combination of these.

The objectives for students pursuing the Nutrition Minor are to:

1. acquire an understanding of the functions of the nutrients in the health of humans and/or animals,
2. to learn to formulate nutritionally balanced diets for humans and/or animals, and
3. to learn to apply nutritional principles in the evaluation of information and policies concerning foods and dietary practices.

Admissions

Students who plan to minor in Nutrition should contact Dr. Natalie Cooke, 218A Schaub Hall.

Certification

Dr. Cooke will certify the completion of the student's minor program. Certification must be submitted no later than the registration period for the student's final semester at NC State. The minor must be completed no later than the semester in which the student expects to graduate from his or her degree program.

Nutrition Sciences (BS)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Nutrition Science Bachelor of Science degree has two sub-plans to choose from: the Science track or the Applied track. The Science curriculum is designed for those students with an interest in graduate school or post-graduate training in a human health profession for which physics and 4 semesters of chemistry are required. The Applied curriculum is designed for those interested in health-related jobs immediately after graduation, obtaining further training to become a Registered Dietitian after graduation, or going on for post-graduate training in a human health profession for which no physics courses and only 3 semesters of chemistry are required.

Industrial opportunities include management, research and development, opportunities in the food, pharmaceutical and the allied health industries. Designed to promote healthy eating, creates a variety of career biopharmaceutical products, as well as for educational programs.

Consumer demand for safe, high quality, nutritious foods and other health-related activities to improve quality of life and lower health care costs. It is also designed for students planning to pursue post-graduate programs to become a nurse, physician assistant or registered dietitian.

Graduates in nutrition are competitive job and professional school applicants because of their deep understanding of the physical, social and life sciences as they relate to human health. They stand out due to the many opportunities to apply their knowledge to the major health challenges facing our country and the world today.

- Note: Only entering freshmen studying Biochemistry, Nutrition Sciences, or Plant Biology participate in the Life Sciences First Year Program (http://catalog.ncsu.edu/undergraduate/collegeofals/).

Scholarships
The department provides both merit and financial need scholarships to encourage and assist students preparing for careers in Food, Bioprocessing, or Nutrition Science.

Nutrition Sciences (BS): Applied Nutrition Concentration
To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Nutrition Science Bachelor of Science degree has two sub-plans to choose from: the Science track or the Applied track. The Science curriculum is designed for those students with an interest in graduate school or post-graduate training in a human health profession for which physics and 4 semesters of chemistry are required. The Applied

### Career Opportunities
Consumer demand for safe, high quality, nutritious foods and biopharmaceutical products, as well as for educational programs designed to promote healthy eating, creates a variety of career opportunities in the food, pharmaceutical and the allied health industries. Industrial opportunities include management, research and development, process supervision, quality control and assurance, procurement, distribution, and sales. Public health opportunities include educational program development, delivery, and assessment. In addition, graduates hold positions with government agencies and many with advanced degrees have teaching and/or research positions in colleges and universities.

### Nutrition Sciences
Nutrition professionals provide evidence-based guidance on what we should eat, study relationships between diet and health, assess eating behavior, design and evaluate community nutrition programs, teach nutrition and healthy eating skills, and advocate for policies that support good nutrition.

Nutrition students gain a strong foundation by studying chemistry, statistics, genetics, physiology and psychology. They develop skills for applying that knowledge through research, internships and service-learning programs.

Graduates are prepared to tackle health challenges head-on, with a sound understanding of nutrient functions, nutrition in disease processes, life cycle and exercise nutrition, research methods, principles of nutrition education and public health.

Our students have the flexibility to choose between two options when pursuing their B.S. in Nutrition Science. The Nutrition Science option is designed to fulfill the prerequisites for medical school and other health professional programs, such as dentistry, physical therapy and pharmacy.

The Applied Nutrition option helps students become qualified to consult or develop programming for public health initiatives on healthy eating and other health-related activities to improve quality of life and lower health care costs. It is also designed for students planning to pursue post-graduate programs to become a nurse, physician assistant or registered dietitian.

Graduates in nutrition are competitive job and professional school applicants because of their deep understanding of the physical, social and life sciences as they relate to human health. They stand out due to the many opportunities to apply their knowledge to the major health challenges facing our country and the world today.

- Note: Only entering freshmen studying Biochemistry, Nutrition Sciences, or Plant Biology participate in the Life Sciences First Year Program (http://catalog.ncsu.edu/undergraduate/collegeofals/).
The curriculum is designed for those interested in health-related jobs immediately after graduation, obtaining further training to become a Registered Dietitian after graduation, or going on for post-graduate training in a human health profession for which no physics courses and only 3 semesters of chemistry are required.

</tbody>
</table>

**Hours** 13

**Total Hours** 120

1 A grade of C- or higher is required.
2 These electives cannot be remedial nor can they be taken at an elementary level after you have taken comparable coursework at a more advanced level. They can be taken S/U unless they are being used to fulfill the requirements for a minor.

**Career Opportunities**

Consumer demand for safe, high quality, nutritious foods and biopharmaceutical products, as well as for educational programs designed to promote healthy eating, creates a variety of career opportunities in the food, pharmaceutical and the allied health industries. Industrial opportunities include management, research and development, process supervision, quality control and assurance, procurement, distribution, and sales. Public health opportunities include educational program development, delivery, and assessment. In addition, graduates hold positions with government agencies and many with advanced degrees have teaching and/or research positions in colleges and universities.

**Nutrition Sciences**

Nutrition professionals provide evidence-based guidance on what we should eat, study relationships between diet and health, assess eating behavior, design and evaluate community nutrition programs, teach nutrition and healthy eating skills, and advocate for policies that support good nutrition.

Nutrition students gain a strong foundation by studying chemistry, statistics, genetics, physiology and psychology. They develop skills for applying that knowledge through research, internships and service-learning programs.

Graduates are prepared to tackle health challenges head-on, with a sound understanding of nutrient functions, nutrition in disease processes, life cycle and exercise nutrition, research methods, principles of nutrition education and public health.

Our students have the flexibility to choose between two options when pursuing their B.S. in Nutrition Science. The Nutrition Science option is designed to fulfill the prerequisites for medical school and other health professional programs, such as dentistry, physical therapy and pharmacy.

The Applied Nutrition option helps students become qualified to consult or develop programming for public health initiatives on healthy eating and other health-related activities to improve quality of life and lower health care costs. It is also designed for students planning to pursue postgraduate programs to become a nurse, physician assistant or registered dietitian.

Graduates in nutrition are competitive job and professional school applicants because of their deep understanding of the physical, social and life sciences as they relate to human health. They stand out due to the many opportunities to apply their knowledge to the major health challenges facing our country and the world today.

- Note: Only entering freshmen studying Biochemistry, Nutrition Sciences, or Plant Biology participate in the Life Sciences First Year Program (http://catalog.ncsu.edu/undergraduate/collegeofals/).
Scholarships
The department provides both merit and financial need scholarships to encourage and assist students preparing for careers in Food, Bioprocessing, or Nutrition Science.

Department of Horticultural Science
Horticulture is a dynamic segment of agriculture. The development, growth, distribution, and utilization of fruits, vegetables, flowers, and ornamental plants, plus the art and science of landscape designing enrich our lives with nutritious foods and more attractive surroundings. North Carolina’s varied climatic conditions favor the production of a wide variety of horticultural crops on a commercial scale, as well as numerous beautiful parks, gardens, and arboreta. The growing interest in local foods and home gardening has created a demand for more information about fruits and vegetable production and new crop varieties adapted to North Carolina’s environments. Urban population growth fuels a need for ornamental plants and a thriving nursery industry. Designers skilled in residential and commercial landscaping, interior plantscaping, and plant maintenance are in high demand. The growth in demand for horticultural information by the consumer, schools, and state and county government continues to increase.

Undergraduate programs in horticultural science offer a broad based education in physical and biological sciences and a sound production background. Students can concentrate in areas of fruit and vegetable science, floriculture, woody ornamental plant science, landscape design, or pursue a general approach encompassing all the specialties. They are prepared for graduate study or for diverse professional service.

For more information about this department, including contact information, visit the department [website](https://cals.ncsu.edu/horticultural-science/).

Plans

- Agroecology & Sustainable Food Systems (BS): Urban Horticulture Concentration (p. 332)
- Horticultural Science (BS): Landscape Design, Gardens & Urban Environments Concentration (p. 335)
- Horticultural Science (BS): Plant Breeding and Biotechnology in Horticulture Concentration (p. 337)
- Horticultural Science (BS): Production Systems and Entrepreneurship in Horticulture Concentration (p. 340)
- Horticultural Science (Minor) (p. 343)
- Horticulture (Undergraduate Certificate) (p. 344)

Agroecology & Sustainable Food Systems (BS): Urban Horticulture Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Bachelor of Science in Agroecology and Sustainable Food Systems: Urban Horticulture Concentration is one of the four concentrations offered in by the Department of Horticultural Science. Students are offered a unique look at various aspects of Horticulture.

Students learn the methods, processes, art, and science of horticulture. Courses in each concentration vary and are taught in classroom and laboratory settings or, for some classes, online. Internships are required, which provide hands-on experience and learning.

Students can follow paths toward industry, entrepreneurship, research, and an advanced degree.

### Semester Sequence

#### First Year

**Fall Semester**

- **ALS 103** Freshman Transitions and Diversity in Agriculture & Life Sciences | 1
- **BIO 181** Introductory Biology: Ecology, Evolution, and Biodiversity | 4
- **ENG 101** Academic Writing and Research | 4
- **MA 107** Precalculus I | 3
- **HS 201** The World of Horticulture: Principles and Practices | 3
- **GEP Health and Exercise Studies (p. 1422)** | 1

**Spring Semester**

- **BIO 183** or **PB 200** Introductory Biology: Cellular and Molecular Biology or Plant Life | 4
- **MA 121** Elements of Calculus | 3-4

#### Second Year

**Fall Semester**

- **CH 101** Chemistry - A Molecular Science | 3
- **CH 102** General Chemistry Laboratory | 1
- **CS 230** Introduction to Agroecology | 3
- **MA 121** or **MA 131** Elements of Calculus | 3-4
- **GEP Humanities (p. 1423)** | 3

**Spring Semester**

- **ARE 201** Introduction to Agricultural & Resource Economics | 3
- **AEC/PB 360** Ecology | 4
- **SSC 200** Soil Science | 3
- **SSC 201** Soil Science Laboratory | 1
- **Foundation Elective** | 4

#### Third Year

**Fall Semester**

- **SOC 241** Sociology of Agriculture and Rural Society | 3
- **SSC 427** Biological Approaches to Sustainable Soil Systems | 3
- **CS/HS 410** Community Food Systems | 3
- **Foundation Elective** | 4
- **Select one of the following:** | 3
  - **ENG 331** Communication for Engineering and Technology
  - **ENG 332** Communication for Business and Management
  - **ENG 333** Communication for Science and Research
  - **AEE 311** Communication Methods and Media

**Spring Semester**

- **CS 430** Advanced Agroecology | 4
- **SSC/H 428** Service-Learning in Urban Agriculture Systems | 1
- **STS 323** World Population and Food Prospects | 3
- **Restricted Elective** | 3
- **Restricted Elective** | 3

Hours | 16

- **MA 131** Calculus for Life and Management Sciences A
- **MA 141** Calculus I
- **GEP Humanities (p. 1423)** | 3
- **COM 110** or **COM 112** Public Speaking or Interpersonal Communication | 3
- **HS 290** Horticulture: Careers and Opportunities | 1
- **GEP Health and Exercise Studies (p. 1422)** | 1

Hours | 15-16
Fourth Year

Fall Semester

CS/HS 480 Sustainable Food Production (capstone) 1
Restricted Elective 3
Restricted Elective 3
Restricted Elective 3
HS 492/493 Horticulture Internship 3
Free Elective 3

| Hours | 16 |

Spring Semester

CS 415 Integrated Pest Management 3
GEP Additional Breadth (p. 1417) 3
Restricted Elective 3
Restricted Elective 3
Free Elective 3

| Hours | 15 |

Total Hours 120-121

Horticultural Science (BS): Landscape Design, Gardens & Urban Environments Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orig.ncsu.edu/pfas/)

The Bachelor of Science in Horticultural Science: Landscape Design, Gardens & Urban Environments Concentration is one of the four concentrations offered in by the Department of Horticultural Science. Students are offered a unique look at various aspects of Horticulture.

Students learn the methods, processes, art, and science of horticulture. Courses in each concentration vary and are taught in classroom and laboratory settings or, for some classes, online. Internships are required, which provide hands-on experience and learning.

Students can follow paths toward industry, entrepreneurship, research, and an advanced degree.

**Career Opportunities**

Horticulture graduates fill positions in production, processing, sales, service, and outreach. Among these are:

- County extension agents
- Vocational agriculture teachers
- Plant breeders
- Landscape designers and landscape contractors
- Floral crop grower or floral designer
- Fruit and vegetable growers
- Business owners
- Orchard, nursery, greenhouse, and garden center managers
- Research, production, and promotional specialists with commercial seed, fertilizer chemical, and food companies
- Urban horticulture specialists
- Garden writers
- Quality control technologists
- USDA specialists
- County and state government planners
- Leaders in other phases of agricultural and industrial developments
- Students also prepare for careers in research, teaching or extension in horticulture

**Horticultural Science (BS): Plant Breeding and Biotechnology in Horticulture Concentration**

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Bachelor of Science in Horticultural Science: Plant Breeding & Biotechnology in Horticulture Concentration is one of the four concentrations offered in by the Department of Horticultural Science. Students are offered a unique look at various aspects of Horticulture.
Students learn the methods, processes, art, and science of horticulture. Courses in each concentration vary and are taught in classroom and laboratory settings or, for some classes, online. Internships are required, which provide hands-on experience and learning.

Students can follow paths toward industry, entrepreneurship, research, and an advanced degree.

Horticultural Science (BS): Production Systems and Entrepreneurship in Horticulture Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Bachelor of Science in Horticultural Science: Production Systems and Entrepreneurship in Horticulture Concentration is one of the four concentrations offered by the Department of Horticultural Science. Students are offered a unique look at various aspects of Horticulture.

Students learn the methods, processes, art, and science of horticulture. Courses in each concentration vary and are taught in classroom and laboratory settings or, for some classes, online. Internships are required, which provide hands-on experience and learning.

Students can follow paths toward industry, entrepreneurship, research, and an advanced degree.

Dr. Helen Kraus (https://cals.ncsu.edu/horticultural-science/people/htkraus/)
Undergraduate Coordinator and Professor
Department of Horticultural Science
114 Kilgore Hall, Campus Box 7609
North Carolina State University
Raleigh, NC 27695-7609
Phone: 919-515-1208

Career Opportunities

Horticulture graduates fill positions in production, processing, sales, service, and outreach. Among these are:

- County extension agents
- Vocational agriculture teachers
- Plant breeders
- Landscape designers and landscape contractors
- Floral crop grower or floral designer
- Fruit and vegetable growers
- Business owners
- Orchard, nursery, greenhouse, and garden center managers
- Research, production, and promotional specialists with commercial seed, fertilizer chemical, and food companies
- Urban horticulture specialists
- Garden writers
- Quality control technologists
- USDA specialists
- County and state government planners
- Leaders in other phases of agricultural and industrial developments
- Students also prepare for careers in research, teaching or extension in horticulture

### Communication

Select one of the following: 3

- COM 110 Public Speaking
- COM 112 Interpersonal Communication
- COM 202 Small Group Communication

### Mathematics & Sciences

**MA 107** Precalculus I 3

Select one of the following: 3

- MA 114 Introduction to Finite Mathematics with Applications
- MA 121 Elements of Calculus
- MA 131 Calculus for Life and Management Sciences A

**ST 311** Introduction to Statistics 3

**CH 101** Chemistry - A Molecular Science 3

**CH 102** General Chemistry Laboratory 1

**CH 220** Introductory Organic Chemistry 3

**CH 222** Organic Chemistry I Lab 1

**BIO 181** Introductory Biology: Ecology, Evolution, and Biodiversity 4

**BIO 183** Introductory Biology: Cellular and Molecular Biology 4

or **PB 200** Plant Life 3

Select one of the following: 3

- ARE 201 Introduction to Agricultural & Resource Economics
- ARE 201A Introduction to Agricultural & Resource Economics
- EC 201 Principles of Microeconomics
- EC 205 Fundamentals of Economics

### Foundational Courses

**HS 201** The World of Horticulture: Principles and Practices 3

**HS 290** Horticulture: Careers and Opportunities 1

**SSC 200** Soil Science 3

**SSC 201** Soil Science Laboratory 1

**HS 301** Plant Propagation 4

**PB 321** Introduction to Whole Plant Physiology 3

**ANS/HS 215** Agricultural Genetics 3

or **CS 211** Plant Genetics 3

**HS 451** Plant Nutrition 3

**AEC 360** Ecology 4

Select one of the following: 3

- AEC 380 Water Resources: Global Issues in Ecology, Policy, Management, and Advocacy 3
- CS 224 Seeds, Biotechnology and Societies 3
- ES 200 Climate Change and Sustainability 3

### Electives

- **IDS 201** Environmental Ethics 3
- **HS 492** Horticulture Internship 3
- **HS 493** Research Experience in Horticultural Science 3
- **HS 494** Teaching Experience in Horticultural Science 3

### GEP Courses

- **ENG 101** Academic Writing and Research 4
- **GEP Humanities (p. 1423)** 6
- **GEP Social Sciences (p. 1430)** 3
- **GEP Health and Exercise Studies (p. 1422)** 2
- **GEP Additional Breadth (p. 1417) (Humanities/Social Sciences/Visual and Performing Arts)** 3
- **GEP Interdisciplinary Perspectives (p. 1426)** 2
- **GEP U.S. Diversity (p. 1431) (verify requirement)**
- **GEP Global Knowledge (p. 1419) (verify requirement)**

### Foreign Language Proficiency

**Free Elective**  
**GEP Humanities (p. 1423)**  
**GEP Interdisciplinary Perspectives (p. 1426)**  

**Hours** 15

**Total Hours** 120

### Career Opportunities

Horticulture graduates fill positions in production, processing, sales, service, and outreach. Among these are:

- County extension agents  
- Vocational agriculture teachers  
- Plant breeders  
- Landscape designers and landscape contractors  
- Floral crop grower or floral designer  
- Fruit and vegetable growers  
- Business owners  
- Orchard, nursery, greenhouse, and garden center managers  
- Research, production, and promotional specialists with commercial seed, fertilizer chemical, and food companies  
- Urban horticulture specialists  
- Garden writers  
- Quality control technologists  
- USDA specialists  
- County and state government planners  
- Leaders in other phases of agricultural and industrial developments  
- Students also prepare for careers in research, teaching or extension in horticulture

### Horticultural Science (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website ([https://apps.oirp.ncsu.edu/pgas/](https://apps.oirp.ncsu.edu/pgas/))!

The academic minor in Horticultural Science is offered to students who desire a strong foundation in the principles of horticultural science. Students may choose to enhance their own major by selecting courses in a specialized area of horticulture such as fruits and vegetables, ornamentals, floriculture, or landscape horticulture, or they may pursue a more general approach to the entire field of study.

### Admissions

Students who plan to minor in Horticultural Science should contact the Coordinator listed below for consultation and approval. The Undergraduate Coordinator will assign a minor advisor who will monitor the student’s progress. Students should complete a Declare a Minor ([http://ncsu.edu/registrar/forms/pdf/minor.pdf](http://ncsu.edu/registrar/forms/pdf/minor.pdf)) form and submit to Registration and Records.

### Certification

The student must complete the “Application for Minor” form be kept on file in the Undergraduate Coordinator’s office until the student’s final semester at which time the proper procedure for certification of the minor will be completed.

### Coordinator

Dr. Helen T. Kraus  
Department of Horticultural Science  
Box 7609, N.C. State University  
(Kilgore Hall 132)  
Raleigh, NC 27695-7609  
919-515-1208
Plan Requirements

- Completion of at least 16 credit hours.
- A grade of “C-” or better must be achieved in each course.

Elective Courses

Select three of the following:

- HS 200 Home Horticulture
- HS 242 Introduction to Small Scale Landscape Design
- HS 280 Hands-On-Horticulture
- HS 302 Gardening with Herbaceous Perennials
- HS 303 Ornamental Plant Identification I
- HS 304 Ornamental Plant Identification II
- HS 411 Nursery Management
- HS 421 Temperate-Zone Tree Fruits: Physiology and Culture
- HS 422 Small Fruit Production
- HS 431 Vegetable Production
- HS 432 Introduction to Permaculture
- HS 440 Greenhouse Management
- HS 442 Floriculture Crop Production
- HS 451 Plant Nutrition
- HS 462 Postharvest Physiology
- HS 471 Landscape Ecosystem Management

Horticulture (Undergraduate Certificate)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orp.ncsu.edu/pgas/).

Regardless of your educational background, the online Undergraduate Certificate in Horticultural Science provides comprehensive education from award-winning faculty. Requiring only 15 credit hours of coursework, the program is designed to increase personal knowledge and skills. Deepen your knowledge and pursue a passion for horticulture through an online program designed for working adults.

The undergraduate certificate is a non-degree, individually-tailored program offered through the Department of Horticultural Science at NC State University. Courses are available both online and campus, so students don’t need to take time off from work or face long commutes to campus.

Tailor your coursework and education based on your interests. Note: Students with a bachelor’s degree in the sciences interested in advancing a career through graduate work will find the Graduate Certificate in Horticultural Science (https://horticulture.cals.ncsu.edu/online/online-horticulture-programs/graduate-certificate-program/) more appropriate.

Eligibility

Participants must hold a high school diploma or equivalent to enroll in this program. Online Horticulture applicants are enrolled, students must receive a minimum grade of C (2.0) in all courses.

Students may begin taking courses for the certificate in Summer, Fall, or Spring.

Cost

Visit NC State’s Undergraduate Online and Distance Education Tuition rates page (https://studentservices.ncsu.edu/your-money/tuition-and-fees/distance-education/#distance-education-tuition-and-fees-for-fall-2016-spring-2017) for detailed information about graduate tuition and fees.

The total Online Undergraduate Certificate in Horticultural Science cost estimate (North Carolina residents) for Fall 2018-2019 is $3,540 for all 15 hours of coursework.

NC State University also offers a monthly payment plan (https://studentservices.ncsu.edu/your-money/bill/pay-your-bill/enroll-in-a-payment-plan/) to make paying your education easier.

Advisor

Undergraduate Certificate students are assigned an academic advisor from the Horticultural Science undergraduate faculty. The student and advisor reflect on the student’s personal and professional goals to design an individual course of study.

After starting or completing the Online Horticulture Undergraduate Certificate, students may wish to count their earned credits toward a Bachelor of Horticultural Science degree (https://horticulture.cals.ncsu.edu/academics/undergraduate-programs/bachelor-of-science/). To transfer credits from the Undergraduate Certificate program to the Bachelor’s degree, the following conditions must be met:

- The course number must be at the 200 level or higher
- The course must be letter graded
- The student must have earned a C or better in the course

Undergraduate Certificate Program Coordinator

Ms. Elisabeth Meyer (https://cals.ncsu.edu/horticultural-science/people/emmeyer/)

Undergraduate Certificate Coordinator and Lecturer

Department of Horticultural Science
112 Kilgore Hall, Campus Box 7609
North Carolina State University
Raleigh, NC 27695-7609
Phone: 919.513.1786

Plan Requirements

Enrollees must complete a total of 15 credit hours. All the course work is available as online and distance education courses. Two foundational horticultural courses are required for the certificate, taking up six of the total fifteen credit hours:
### Foundational Courses

**Total Hours:** 15

1. The student and his or her advisor will select the remaining nine hours of courses that will constitute the student’s certificate requirements. Students enrolled in the Certificate program may take all 15 hours from the Department of Horticultural Science. Or, they may choose at least 12 hours from Horticultural Science, with remaining credit hours from approved classes in other departments.

With completion of 15 credit hours and a grade of C (2.0) or better in each course, the student will be award a certificate acknowledging their accomplishments.

## Curricula

The curriculum emphasizes the fundamentals of biological, chemical, and physical sciences, offering students both breadth of knowledge and depth of understanding. It is designed to provide students with broad experience in biological and chemical sciences and to encourage the development of experimental skills. Because of the breadth of the course requirements, many students can add a second major in a variety of science disciplines such as Biological Sciences, Microbiology, Genetics, or Chemistry. Minors can also be added from various disciplines.

- Note: Only entering freshmen studying Biochemistry, Nutrition Sciences, or Plant Biology participate in the Life Sciences First Year Program (http://catalog.ncsu.edu/undergraduate/collegeofals/).

For more information about this department, including contact information, visit the department (http://biochem.ncsu.edu).

H.R. Horton
James Knopp

## Department of Molecular and Structural Biochemistry

Biochemistry is the science which is concerned with the discovery and understanding of the chemical principles of life. It is a wide-ranging field from the composition, biosynthesis, structure and function of biomolecules to the control and regulation of biochemical processes within organelles, cells, organs and organisms. Biochemical principles form the basis of most laboratory procedures within the life cycle.

### Awards

The H. Robert Horton Award is given to the outstanding student in Biochemistry based on scholarly and research achievements.

### Honors

The honors program in Biochemistry is jointly administered within the College of Agriculture and Life Sciences and the College of Sciences. It is designed for students who wish to explore advanced courses and/or research and be rewarded for outstanding academic achievement.
Biochemistry (BS)

### Career Opportunities

The Biochemistry program provides B.S. graduates with the scientific background and skills required for employment in biochemistry, molecular biology, biotechnology, and genetics and for the health professions of medicine, dentistry, veterinary medicine, pharmacology and related fields.

### Department of Plant and Microbial Biology

For more information about this department, including contact information, visit the department (https://pmb.cals.ncsu.edu).

The instructional program in Plant Biology provides classroom, laboratory, and field experience in the fundamental areas of the plant sciences. Undergraduates majoring in plant biology select major courses that are tailored to their interests within the discipline and are required to have a supervised research or teaching experience that allows them to work closely with departmental faculty. Majors, as pre-professionals in the plant sciences, are prepared for advanced study in plant biology and other biological fields, as well as in the applied plant sciences, such as horticulture, crop science, plant pathology, natural resource management, and conservation.

### Curricula

The Bachelor of Science degree with a major in Plant Biology is offered under the science curriculum of the College of Agriculture and Life Sciences. Students can choose to pursue a general major with courses in different areas of Plant Biology, or can specialize in one of the following areas: Ethnobotany, Plant Biotechnology and Molecular Biology, and Plant Systematics and Ecology. The Bachelor of Science in Plant Biology with a double major in another life science or applied plant science is possible, as is a double major in a humanities and
social sciences discipline (anthropology, English, history, philosophy, psychology, or political science). Selected faculty in Plant and Microbial Biology also work with the Biological Sciences faculty in the College of Sciences to offer the B.S. degree in Microbiology, details about which are located at: http://catalog.ncsu.edu/undergraduate/collegeofsciences/biology (p. 1312)

Certificate in Field Botany

The Department of Plant and Microbial Biology and the Department of Forestry and Environmental Resources offers a joint certificate in Field Botany (https://oucc.dasa.ncsu.edu/field-botany-11fboctu/) to any student enrolled in an undergraduate program or as a non-degree seeking student. This is a non-degree program that will allow students to develop skills in vascular plant identification through both sight recognition and use of keys, and knowledge of specific domain terminology. Students who complete the certificate will find it helpful in securing positions with US Army Corps of Engineers, US Fish and Wildlife Services, private consulting companies, private conservation companies, and Natural Heritage programs. They could be working to help preserve wetlands, conserve endangered plants to improve wildife habitat, conserve rare plants, and prepare impact statements and reports of areas of development. Students interested in the Field Botany certificate program should contact Dr. Alexander Krings at akrings@ncsu.edu.

Biotechnology (Minor)

To see what you will learn while pursuing this program, visit the Learning Outcomes website (https://apps.orp.ncsu.edu/pgas/)

The undergraduate Minor in Biotechnology is a university-wide program and draws upon NC State’s strength in the life sciences, agriculture, and engineering. Students in the minor will participate in a series of cutting-edge laboratory-intensive courses. Upon completion of the minor, students will have a conceptual understanding of a wide array of research applications in biotechnology, as well as mastery of numerous techniques.

Biotechnology is not universally accepted, and one role of a university is to ensure that this technology is used wisely. A key part of the training provided by the Biotechnology Minor is the requirement for an ethics course that promotes critical thinking of ethical issues and discussions of individual and collective rights and responsibilities. By active participation in break-out sessions, each student can contribute their concerns and thoughts regarding the complex issues that accompany the use of genetically engineered organisms.

Admissions and Certification of Minor

Students who have questions or who would like to be admitted to the minor should complete the University Minor Declaration Form. The minor must be completed no later than the semester in which the student expects to graduate from their degree program. The University Minor Declaration Form is the paperwork necessary for certification and should be completed during the registration period that will complete the requirements for the minor or during the registration period for the student’s final semester at NC State.

Plan Requirements

The requirements for the Biotechnology Minor include 8-11 credits of biotechnology-related laboratory courses (see Group B and C), and a 1-3 credit biotechnology ethics course (Group E). A 3 credit research experience related to biotechnology (Group D) is strongly recommended but may be replaced with an additional 2 credit biotechnology-related laboratory course (Group C) and a 1 credit biotechnology professional development course (Group D). Group A describes the pre-requisite courses a student will need to have completed satisfactorily in order to be eligible to start the minor. The minor requires 19-22 credit hours depending on course selection.

MEA 320 Fundamentals of Air Pollution 3
MEA 321 Fundamentals of Air Quality and Climate Change 3
MEA 323 Geochemistry of Natural Waters 3
MEA 409 Watershed Forensics 3
MEA 410 Introduction to Mineralogy and Petrology 4
MEA 411 Marine Sediment Transport 3
MEA 412 Atmospheric Physics 3
MEA 415 Climate Dynamics 3
MEA 421 Atmospheric Dynamics I 3
MEA 422 Atmospheric Dynamics II 3
MEA 425 Introduction to Atmospheric Chemistry 3
MEA 440 Igneous and Metamorphic Petrology 4
MEA 443 Synoptic Weather Analysis and Forecasting 4
MEA 444 Mesoscale Analysis and Forecasting 4
MEA 449 Principles of Biological Oceanography 3
MEA 450 Introductory Sedimentology and Stratigraphy 4
MEA 451 Structural Geology 4
MEA 454 Marine Physical-Biological Interactions 3
MEA 455 Micrometeorology 3
MEA 458 Introduction to Tropical Meteorology 3
MEA 459 Field Investigation of Coastal Processes 5
MEA 460 Principles of Physical Oceanography 3
MEA 462 Observational Methods and Data Analysis in Marine Physics 3
MEA 463 Fluid Physics 3
MEA 464 Ocean Circulation Systems 3
MEA 465 Geologic Field Camp 4
MEA 466 Preparatory Course for Field Camp 1
MEA 467 Marine Meteorology 3
MEA 469 Ecology of coastal Resources 3
MEA 470 Introduction to Geophysics 3
MEA 471 Exploration and Engineering Geophysics 3
MEA 473 Principles of Chemical Oceanography 3
MEA 476 Worldwide River and Delta Systems: Their Evolution and Human Impacts 3
MEA 479 Air Quality 3
MEA 481 Geomorphology: Earth's Dynamic Surface 3
MEA 485 Introduction to Hydrogeology 3
MEA 488 Meteorology for Media 3
MEA 493 Special Topics in MEAS 1-6
MEA 495 Junior Seminar in the Marine, Earth, and Atmospheric Sciences 1
MEA 498 Internship in MEAS 1-6
MEA 507 Discipline-based Education Research in the Geosciences 3
MEA 510 Air Pollution Meteorology 3
MEA 511 Introduction to Meteorological Remote Sensing 3
MEA 514 Advanced Physical Meteorology 3
MEA 515 Climate Dynamics 3
MEA 517 Fundamentals of Climate Change Science 3
MEA 518 Climate Risk Analysis 3
MEA 519 Barriers to Climate Change Literacy 3
MEA 525 Introduction to Atmospheric Chemistry 3
MEA 530 Principles of Physical Oceanography 3
MEA 549 Principles of Biological Oceanography 3
MEA 553 Estuarine Biogeochemistry 3
MEA 554 Marine Physical-Biological Interactions 3
MEA 556 Marine Sediment Transport 3
MEA 570 Geological Oceanography 3
MEA 573 Principles of Chemical Oceanography 3
MEA 574 Advanced Igneous Petrology 3
MEA 577 Electron Microprobe Analysis of Geologic Material 2
MEA 579 Principles of Air Quality Engineering 3
MEA 580 Air Quality Modeling and Forecasting 4
MEA 581 Fluid Mechanics in Natural Environments 3
MEA 582 Geospatial Modeling 3

### Semester Sequence

This is a sample.
teaching positions in community colleges, prominent colleges and universities, for research positions in major federal and state government laboratories, and in private industry. Research technician positions in many life science areas in governmental and industrial laboratories are also career possibilities. The field of plant biotechnology provides additional opportunities with several graduates seeking employment in the biotechnology industry including companies in nearby Research Triangle Park. Graduates are also well qualified for professional training in the health professions.

### Plant Biology (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website [here](https://apps.oirp.ncsu.edu/pgas/)

The Department of Plant Biology offers a Minor in Plant Biology to all baccalaureate students at North Carolina State University in any major except Plant Biology. As the fundamental discipline of the plant sciences, plant biology involves the study of the structure, function, classification, diversity, and interactions of plants. The program also provides a strong background for research in all areas of the plant sciences and plant molecular biology.

#### Admissions

Students may declare their intention to complete the Plant Biology minor by consulting with Dr. Jordan.

#### Certification

Dr. Jordan will certify the minor prior to graduation. The minor must be completed no later than the semester in which the student expects to graduate from his or her degree program. An electronic application to graduate with the minor should be made in MyPack Portal no later than during the registration period for the student's final semester at NC State.

#### Contact Person

Chad V. Jordan  
2214-A Gardner Hall  
919.515.2222  
chad_jordan@ncsu.edu

*SIS Code: 11PBM*

#### Plan Requirements

- Completion of a minimum of 15 semester hours.
- Courses counting toward the minor must be taken for a letter grade unless noted otherwise.
- A grade of 'C' or above in each course for it to be included in the minor.
- Transfer credit will only be allowed for the PB 200 Plant Life/PB 250 Plant Biology requirement.

#### Code | Title | Hours
---|---|---
PB 200 | Plant Life | 4
or PB 250 | Plant Biology | 4

#### Elective Courses

Select 11 credits of the following:

- PB 213 | Plants and Civilization | 3

---

1. Students Entering NC State through the Life Sciences First Year (LSFY) Program must take LSC 101 Critical and Creative Thinking in the Life Sciences
2. Credit is not allowed for more than one of MA 121 Elements of Calculus, MA 131 Calculus for Life and Management Sciences A, and MA 141 Calculus I
3. Credit is not allowed for both ST 101 Statistics by Example and ST 311 Introduction to Statistics. Students interested in research are strongly encouraged to take both ST 311 Introduction to Statistics and ST 312 Introduction to Statistics II
4. A minimum of four Plant Biology elective courses are required and must total 12 credit hours. At least two of these courses must be at the 300-level or higher and must total 6 credit hours. A minimum GPA of 2.00 is required across all PB coursework.
5. At least one course PB Elective course must have a laboratory or be a laboratory or field-based course.
6. Students interested in pursuing graduate and professional training should take PY 211 College Physics I to meet the PY requirement followed by PY 212 College Physics II as a Restricted Elective.

### Career Opportunities

The undergraduate degree is an excellent pre-professional degree in the plant sciences. Graduates are employed as researchers in academic, government, or industrial labs, as field botanists and conservationists in state and national parks, and as employees of environmental education, or public service organizations. Many majors continue with graduate studies in a plant science discipline, after which they are qualified for the graduate programs in many areas of plant science. Some seek research technicians positions in major federal and state government laboratories, and in private industry. Research technician positions in many life science areas in governmental and industrial laboratories are also career possibilities. The field of plant biotechnology provides additional opportunities with several graduates seeking employment in the biotechnology industry including companies in nearby Research Triangle Park. Graduates are also well qualified for professional training in the health professions.
Life Sciences First Year

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Life Sciences First Year (LSFY) program at NC State University was developed with the goal of helping students find the right fit in a degree program at NC State. LSFY is a joint program between the College of Agriculture and Life Sciences and the College of Sciences. Designed for students who enter NC State with an interest in any aspect of the life sciences, the LSFY curriculum allows students to begin laying the foundation for further studies in any of the life science degree programs at NC State. At the same time, the advising program and specially designed courses encourage and provide the means for students to explore their academic interests to settle on the academic home that is best for them, while understanding what they need to do to achieve their professional goals. After learning more about degree requirements and exploring their own interests and aptitudes (both in and out of class), LSFY students apply by the end of their first year to transfer into a degree program.

The LSFY program includes all incoming first-year students who express interest in earning a degree in one of the following majors: Biochemistry, Biological Sciences, Genetics, Microbiology, Nutrition Science, Plant Biology, or Zoology. There is no need to fill out a special application for the program.

To learn more about the LSFY program, visit the website (https://departments.sciences.ncsu.edu/lsfy/).

Total Hours 30-32

¹ **Exploring Opportunities in the Life Sciences**
- Most LSFY students will take LSC 103 Exploring Opportunities in the Life Sciences, which allows them to explore a variety of degree programs at NC State. Some students may instead choose a section that explores a single area within the life sciences in more depth—examples include BCH 103 Introduction to Biochemistry, MB 103 Introductory Topics in Microbiology, and PB 103 Perspectives on Botany. All sections of 103 will also address transition issues common to many first-semester college students as well as resources and opportunities available at NC State.

² **Chemistry**
- Chemistry Placement: Students who do not place into CH 101 Chemistry - A Molecular Science or more advanced chemistry should try to complete preparatory coursework (CH 111 Preparatory Chemistry or equivalent) in the summer prior to their freshman year.
- First Semester: Life science students take CH 101 Chemistry - A Molecular Science and CH 102 General Chemistry Laboratory to start their required coursework in chemistry, but those interested in pursuing chemistry, biochemistry, or chemical engineering will want to consider CH 103 General Chemistry I for Students in Chemical Sciences and CH 104 General Chemistry Laboratory I for Students in Chemical Sciences instead—these students should consult with an advisor to select the appropriate chemistry course.
- Second Semester: Students should work with their advisor and/or the Undergraduate Coordinator(s) in their major(s) of interest to decide on the appropriate chemistry course to take during their second semester. Some will want to take quantitative chemistry (CH 201 Chemistry - A Quantitative Science/CH 202 Quantitative Chemistry Laboratory) and some will want to start organic chemistry. Degree programs in the life sciences at NC State typically require two semesters of organic chemistry (CH 221 Organic Chemistry I/CH 222 Organic Chemistry I Lab and CH 223 Organic Chemistry II/CH 224 Organic Chemistry II Lab), but there are exceptions. The following require only one semester of organic chemistry (CH 220 Introductory Organic Chemistry or CH 221 Organic Chemistry I/CH 222 Organic Chemistry I Lab); Environmental Sciences and Marine Science Biological Oceanography. **Note:** CH 220 Introductory Organic Chemistry is not a replacement for CH 221 Organic Chemistry I and does not serve as a pre-requisite for CH 223 Organic Chemistry II.
Calculus

- Most NC State majors in life sciences require MA 131 Calculus for Life and Management Sciences A and MA 231 Calculus for Life and Management Sciences B, but some students (particularly those interested in Biochemistry and some aspects of Environmental Science) may wish to pursue the three semester sequence instead (MA 141 Calculus I, MA 241 Calculus II, and MA 242 Calculus III). Two life science majors (Nutrition Science and Plant Biology) and some related majors require only one semester of calculus, and therefore accept MA 121 Elements of Calculus in place of MA 131 Calculus for Life and Management Sciences A. However, MA 121 Elements of Calculus cannot be used as a prerequisite for MA 231 Calculus for Life and Management Sciences B, so you should not take that option unless you are absolutely sure you will not want or need to take a second semester of calculus.

- Students who decide not to take a second semester of calculus should work with their advisor and/or the Undergraduate Coordinator(s) in their major(s) of interest to decide on an appropriate course to take during their second semester instead of calculus.

- Students who place into a pre-calculus course should try to complete preparatory coursework (MA 107 Precalculus I or equivalent) in the summer.

ENG 101 Academic Writing and Research and the General Education Program (GEP)

- All NC State students take 39 credit hours as part of the General Education Program (GEP). For students in the life sciences, 15 of those credit hours are met by major requirements. The remaining 24 GEP credit hours include ENG 101 Academic Writing and Research, which can be taken either the first or second semester of the first year. Any students taking an additional GEP Elective in the first year are encouraged to explore First Year Inquiry (http://www.ncsu.edu/firstyearinquiry/current_courses.htm) and the GEP course lists (http://oucc.dasa.ncsu.edu/general-education-program/) for Humanities or Social Sciences or Interdisciplinary Perspectives for courses of interest.

General Notes:

- Students entering NC State with credit for college courses will work with an advisor to determine appropriate course choices based on their interests and program requirements.

- All students are required to take online placement exams in chemistry and math before they finalize their first-semester schedules.

- Minimum requirements to be eligible for any degree program in the life sciences are C- or better grades in LSC 101 Critical and Creative Thinking in the Life Sciences, BIO 181 Introductory Biology: Ecology, Evolution, and Biodiversity, BIO 183 Introductory Biology: Cellular and Molecular Biology, CH 101 Chemistry - A Molecular Science or CH 103 General Chemistry I for Students in Chemical Sciences, and ENG 101 Academic Writing and Research. An overall GPA of 2.0 or better is required for continued enrollment at NC State.

North Carolina Cooperative Extension Service

The NC Cooperative Extension at NC State University is part of a national Extension network that transforms the research knowledge of the university system into practical learning experiences and opportunities for all residents of NC to improve their lives.

Client’s value Cooperative Extension based on our proven ability to help people improve their lives though their personal application of the new knowledge they learn. Dedicated staff are committed to finding the best unbiased information and then helping individuals one-on-one or creating educational programs to help solve real problems and address relevant issues. Respect for individual needs and the belief that education can improve lives has built a strong and respected relationship throughout the state and nation.

The NC Cooperative Extension partners with all one hundred County Governments and the Eastern Band of Cherokee Indian Tribal leadership to provide locally based Agents with the skills and passion to provide the education and hands-on training needed to impact local issues. Agents use advisory councils of local residents to identify key issues and concerns in their families, businesses, and communities. Once key issues are identified, agents develop educational programs and appropriate teaching and experiential learning methodologies to help targeted audiences learn what they can do to improve their practices, behaviors and lives. Outcomes and impacts of these programs are determined through evaluations to ensure public trust and accountability of resources provided.

North Carolina Cooperative Extension key areas of educational expertise include: Strengthening the economic and environmental vitality of NC food, feed, fiber and forest systems and ornamental plant based industries; Family health and nutrition; Positive youth development and leadership (4-H); and Community Development.

Prestage Department of Poultry Science

The Prestage Department of Poultry Science provides a program that encompasses multiple disciplines. Poultry Science is the study of poultry species and the core and traditional sciences involved in animal agriculture production. These sciences include but are not limited to: biology, chemistry, math, and physics. Instruction includes the principles of vertically integrated poultry production and related disciplines such as nutrition, physiology, genetics, immunology, toxicology, biotechnology, and general poultry management.

Through teaching, research, and extension, the department serves students, poultry producers, and allied industries. Poultry production has increased rapidly during the last two decades and ranks first in North Carolina as a source of agricultural income. Growing demand for poultry products, our climate and economic conditions in the state provide a sound base for continued expansion.

The Prestage Department of Poultry Science is one of only six land-grant academic departments in the U.S. dedicated to poultry science. We produce nearly a third of all poultry science graduates. With abundant scholarship opportunities and a 95% job placement rate, our graduates have opportunities that range from flock supervisors and processing managers to geneticists and vaccine sales representatives.

For more information about this department, including contact information, visit our website (https://cals.ncsu.edu/prestage-department-of-poultry-science/).

**Plans**

- Feed Milling (Certificate) (p. 369)
- Feed Milling (Minor) (p. 369)
- Poultry Science (BS): Science Concentration (p. 370)
- Poultry Science (BS): Technology Concentration (p. 372)
- Poultry Science (Minor) (p. 374)

**Feed Milling (Certificate)**

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Undergraduate Certificate in Feed Milling offers a course of study that will focus on teaching, developing, and implementing new technology associated with feed milling and animal agriculture in North Carolina, the U.S., and internationally. The Feed Milling Certificate program seeks to provide an educational opportunity to individuals in the feed industry who live and work in remote areas of the country, to increase the technical knowledge of individuals working in the feed and allied industries, to increase awareness of government regulations that apply to the feed industry, and to develop skills of feed mill employees. This certificate is available on-campus and via Distance Education.

**Feed Milling (Minor)**

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Minor in Feed Milling is designed to provide a foundation in animal feed milling technology. The objectives of the minor are for the student to: acquire an understanding of the functions of a modern feed mill; to learn procedures to assist in operating a feed mill; and to apply academic skills to the challenges of operating a manufacturing facility.

**Admissions**

Students interested in this minor can contact the following Coordinator of Advising:

Dr. Adam Fahrenholz, 234C Scott Hall  
919.515.5408  
adam_fahrenholz@ncsu.edu  
The application for the minor is available in 212/213 Scott Hall (Poultry Science).

**Certification**

Certification for Minor in Feed Milling must be submitted to Dr. Adam Fahrenholz, 234C Scott Hall, no later than the registration period for the student’s final semester at NC State. The minor must be completed no later than the semester in which the student expects to graduate from his or her degree program.

**Contact Person**

Dr. Adam Fahrenholz

Total Hours: 17

¹ Students need enough credits from the elective list below to make at least 15 total credits for the minor.

## Poultry Science (BS): Science Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

### Curricula

Students desiring a Bachelor of Science degree with a major in Poultry Science may choose either the science or technology curriculum offered by the Prestage Department of Poultry Science. Students interested in research or veterinary/medical fields can meet the pre-requisites for these professional schools through the science concentration. These students are also better prepared for advanced study in various disciplines such as genetics, nutrition, physiology, and pathology. The technology curriculum in Poultry Science allows a greater selection of courses in business and economics; and offers a student both basic and applied knowledge in poultry production which can be utilized in the poultry or allied industries upon graduation. One may obtain a double major in other curricula by the Prestage Department of Poultry Science. Students interested in research or veterinary/medical fields can meet the pre-requisites for these programs.

### Career Opportunities

The transition from small farm to large commercial poultry operations has created more specialized positions than there are available poultry science graduates. Production-oriented positions and off-the-farm operations in areas such as processing and distribution offer new job opportunities. Allied industries such as: feed manufacturing, equipment sales, financing, pharmaceutical development and research — need additional employees trained in Poultry Science. Graduates are employed in the communication and public relations sectors, as teachers, and extension and research specialists and as veterinarians.

Poultry Science (BS): Technology Concentration

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.orip.ncsu.edu/pgas/).

Curricula

Students desiring a Bachelor of Science degree with a major in Poultry Science may choose either the science or technology curriculum offered by the Prestage Department of Poultry Science. Students interested in research or veterinary/medical fields can meet the pre-requisites for these professional schools through the science concentration. These students are also better prepared for advanced study in various disciplines such as genetics, nutrition, physiology, and pathology. The technology curriculum in Poultry Science allows a greater selection of courses in business and economics; and offers a student both basic and applied knowledge in poultry production which can be utilized in the poultry or allied industries upon graduation. One may obtain a double major in other curricula through careful use of electives and/or summer school attendance. These students should consult the undergraduate advisers in the department(s) concerned.

Career Opportunities

The transition from small farm to large commercial poultry operations has created more specialized positions than there are available poultry science graduates. Production-oriented positions and off-the-farm operations in areas such as processing and distribution offer new job opportunities. Allied industries such as: feed manufacturing, equipment sales, financing, pharmaceutical development and research — need additional employees trained in Poultry Science. Graduates are employed in the communication and public relations sectors, as teachers, and extension and research specialists and as veterinarians.

Poultry Science (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

Upon completion of the minor in Poultry Science curriculum, students will be able to describe the management of poultry including advanced topics such as genetics, nutrition, physiology and pathology.

Admissions and Certification of Minor

In both instances, students should contact Ms. Lynn Worley-Davis, 919.515.6852, lwdavis@ncsu.edu. The minor must be completed no later than the semester in which the student expects to graduate from his or her degree program. Paperwork for certification should be completed no later than during the registration period for the student’s final semester at NC State.

Contact Person

Ms. Lynn Worley-Davis

The College of Design teaches design thinking in an interdisciplinary environment that makes sense of the world for the benefit of the public. The College integrates practical, ethical, and aesthetic thought and action to enhance the meaning and quality of life through the creation of knowledge informing the critical study of artifacts and places.

The College of Design gathers creative minds from around the world whose interests and expertise span a variety of disciplines. An inspiring and elite group of faculty prepare our designers to go out and shape the world.

The world needs good design. It plays a major role in the development of branding, product development, business practices and procedures, and more. The size and shape of mobile devices, the animation we see on the big screen, the materials used in the buildings we enter—design touches everything around us.

Department of Art + Design

The Department of Art and Design awards the Bachelor of Art and Design degree and the Bachelor of Arts in Design Studies. The pedagogical core of the program aims to reinforce foundation principles of design theory as applied to two-and three-dimensional design. Our curriculum addresses broad cultural, ecological, and societal considerations and promotes in our graduates the ability to meet the challenges of collaborative design. We emphasize the application of creative thinking and problem solving to design projects ranging from single to mass-produced artifacts. The areas of application span the range from formal design, fibers and surface design to emerging areas in media arts. Examples of current areas of study are hybrid applications of traditional and digital media that encompass imaging, animation, fiber and surface design, photography, printmaking, illustration, form generation and installations.

The Department of Art and Design believes there is an essential need for students in a technically-based research university to engage in course work that fosters creative thinking and problem solving. To meet this need, the department offers courses to all students in the university a minor in Art and Design. Minors are guided through a selection of courses with the consultation from a design adviser.

For more information about this department, including contact information, visit the department (http://design.ncsu.edu/academics/art-design/).

The curriculum is to provide structure for the creation of a new model of art for graduate study in a specific art or design discipline. The goal of the Bachelor of Art and Design degree may wish to use it as a foundation providing students skills that allow them to perform and succeed in a wide variety of art and design professions after graduation. These individual artistic and practical talents are developed as different expressions of one potentiality.

### Fourth Year

#### Fall Semester

- **Design Studio** 1,2 6
- **Design Advised Core** 3
- **ADN 493 Art and Design Senior Lecture** 1,2 3
- **GEP Additional Breadth (p. 1417)** 3

**Hours** 15

#### Spring Semester

- **Design Studio** 1,2 6
- **Design Elective** 3
- **GEP Humanities (p. 1423)** 3
- **GEP Health and Exercise Studies (p. 1422)** 1

**Hours** 13

**Total Hours** 120

1. A grade of C- or higher is required.
2. No more than six-credit-hours of studio may be taken in any semester. No more than one non-ADN studio course can fulfill the studio requirement.
3. The Spring semester of Junior year opens the opportunity to fulfill the College's International Experience requirement. Please consult your advisor and the Department Head.

### Career Opportunities

Career opportunities for graduates of the Department of Art and Design range from independent artist-designers to corporate level art-design directors. Graduates of this department are currently working in fields such as software design, multimedia, illustration, textile design, fashion and apparel design, art and design education, photography, filmmaking, special effects-digital, set design, exhibition design, museum education, public art and entrepreneurs.

### Art and Design (Minor)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/)

The Department of Art + Design believes that there is an essential need for students in the broader university to engage in coursework that fosters creative thinking, problem-solving, and making. To meet this need, the department offers an undergraduate minor in Art + Design, available to university students in majors offered outside of the College of Design. The minor in Art + Design consists of 15 total credit hours of study, of which 6 hours must be satisfied at the basic course level. The remaining 9 hours of courses may be selected from the elective course list provided below. A grade of “B” or better will be required for credit in all courses in the minor. Although all efforts are made to accommodate minors, it is important for potential students to know and understand that access to Art + Design courses are based on a hierarchy where priority access goes to Art + Design majors.

### Program Objectives

- To discover basic art + design principles through hands-on activities
- To apply art + design process and theory to solve problems creatively and efficiently
- To increase awareness of one’s self and environment
- To foster an appreciation and understanding of the disciplines of art and design

### Admissions

Admissions into this minor program requires that the student be in good academic standing at the university with a minimum overall GPA of at least 2.0. Students must also complete all Art + Design minor courses with a grade of ‘B’ or better. To officially add or drop the Art + Design Minor, students must complete the “Declare Minor Form” form that is available online here (https://studentservices.ncsu.edu/forms/Registrar/declare_minor.pdf). After completing the “Declare Minor Form”, students should bring it to the College of Design Department Heads Suite that is located in Brooks Hall 215.

Email: kathleen_reieder@ncsu.edu

**SIS Code: 12DNM**

### Plan Requirements

Minor in Art + Design consists of 15 credit hours of study of the approved courses and has the following requirements:

- Completion of a minimum of 15 credit hours for Art + Design minor designated courses.
- A university grade of 2.0 or above.
- A grade of ‘B’ or better in all courses required and credited to the minor
- No course used for the minor can be taken for credit only (S/U)
- Only courses offered from the department of Art + Design will count toward the minor degree.
Design Studies is:

- Open to students whose interests and talents in design are more general and/or cross-disciplinary than those in the specific student-based programs
- Broadly engaged in issues of material culture.
- Preparatory for later advanced study in the design professions
- A blend of aesthetic, cultural, historical, social, physical, technological, business and entrepreneurial knowledge
- Collaborative in providing the learning and background necessary for further study in archival and cultural preservation, museum practice, conversation, collections administration, costume and theatre design, criticism, research, and arts and nonprofits management

Design Studies is not a transitional program from which to transfer into one of the studio-based degree programs in the College of Design. Design Studies students who wish to change majors will need to apply for competing seats in the freshmen class of a studio-based program and are subject to the select admissions process that requires a portfolio review.

Specific curriculum requirements are available online (https://www.acs.ncsu.edu/php/coursecat/degree_requirements.php).

**Certification**

The minor must be completed no later than the semester in which the student expects to graduate from his or her degree program. Students must contact the Art + Design minor advisor to check that all minor degree requirements have been met. If they have met, the student can apply for their minor degree in the MyPack online portal at the same time that they apply for graduation their final semester at NC State.

**Design Studies (BA)**

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Bachelor of Arts in Design Studies is a non-studio based program that provides an interdisciplinary orientation to the history and theory of the design disciplines, material culture and design thinking. Design Studies focuses on the social, historical, technological and physical contexts in which design is produced. It presents the formative role of design in shaping human values and experiences.

Undergraduate students will be introduced to the breadth of the design disciplines expanding their awareness of design and the design process. Students can explore the range of career options in the fields of design through Design Studies concentrations in Non-Profits Studies, Business Administration. Individuals preparing for a graduate education in design theory and criticism, museum practice, business management, entrepreneurship or marketing in design may choose from courses suited to their unique objectives. Students who want more general education will develop an understanding of design and its intrinsic relationship to the broader culture.

Design Studies is:

**Career Opportunities**

Career opportunities for graduates of the Department of Art and Design range from independent artist-designers to corporate level art-design directors. Graduates of this department are currently working in fields such as software design, multimedia, illustration, textile design, fashion and apparel design, art and design education, photography, filmmaking, special effects-digital, set design, exhibition design, museum education, public art and entrepreneurs.

**Design Studies (BA): Business Administration Concentration**

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Bachelor of Arts in Design Studies is a non-studio based program that provides an interdisciplinary orientation to the history and theory of the design disciplines, material culture and design thinking. Design Studies focuses on the social, historical, technological and physical contexts in which design is produced. It presents the formative role of design in shaping human values and experiences.

Undergraduate students will be introduced to the breadth of the design disciplines expanding their awareness of design and the design process. Students can explore the range of career options in the fields of design through Design Studies concentrations in Non-Profits Studies, Business Administration. Individuals preparing for a graduate education in design theory and criticism, museum practice, business management, entrepreneurship or marketing in design may choose from courses suited to their unique objectives. Students who want more general education will develop an understanding of design and its intrinsic relationship to the broader culture.

Design Studies is:

- Open to students whose interests and talents in design are more general and/or cross-disciplinary than those in the specific student-based programs
- Broadly engaged in issues of material culture.
- Preparatory for later advanced study in the design professions
- A blend of aesthetic, cultural, historical, social, physical, technological, business and entrepreneurial knowledge
- Collaborative in providing the learning and background necessary for further study in archival and cultural preservation, museum practice, conversation, collections administration, costume and theatre design, criticism, research, and arts and nonprofits management

Design Studies is not a transitional program from which to transfer into one of the studio-based degree programs in the College of Design. Design Studies students who wish to change majors will need to apply for competing seats in the freshmen class of a studio-based program and are subject to the select admissions process that requires a portfolio review.

Specific curriculum requirements are available online (https://www.acs.ncsu.edu/php/coursecat/degree_requirements.php).
