Biomanufacturing (Certificate) (For Post-Baccalaureate Students)

To see more about what you will learn in this program, visit the Learning Outcomes website (https://apps.oirp.ncsu.edu/pgas/).

The Certificate in Biomanufacturing provides graduates with the knowledge base and hands-on skills that will prepare them to quickly contribute to a cGMP biomanufacturing operation in significant ways and should reduce the time needed for on-the-job training in those operations.

Academic Structure
Term Effective: 1/2009
Plan Code: 32BTECCTU
CIP Code: 26.1201
Description: Undergraduate Certificate in Biomanufacturing
Offered: On-campus format

Plan Requirements
Prerequisite: In order to enroll in the first course in the program, applicants must have earned a bachelor's level degree, and have completed CH 223 Organic Chemistry II (or equivalent) and BIO 183 Introductory Biology: Cellular and Molecular Biology. Interested graduates should contact the BTEC's manager of student programs.

Credits earned toward a bachelor's degree will not count for credit in the post-baccalaureate certificate.

Requirements for the Post-Baccalaureate Undergraduate Certificate in Biomanufacturing include a minimum of 13 credit hours as specified below. All courses must be completed with a grade of 'C-' or higher:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
<th>Counts towards</th>
</tr>
</thead>
<tbody>
<tr>
<td>BEC 425</td>
<td>Molecular Biology for Biomanufacturing</td>
<td>6</td>
<td>6</td>
</tr>
<tr>
<td>or BEC 445</td>
<td>Cell Line Development for Biomanufacturing</td>
<td></td>
<td></td>
</tr>
<tr>
<td>BEC 330</td>
<td>Principles and Applications of Bioseparations</td>
<td></td>
<td></td>
</tr>
<tr>
<td>BEC/CHE 463</td>
<td>Fermentation of Recombinant Microorganisms</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Biomanufacturing Specialization: 4

Select one specialization area:

Upstream Operations:
BE 426 & BEC 480 Upstream Biomanufacturing Laboratory and cGMP Fermentation Operations

Downstream Operations:
BE 436 & BEC 485 Introduction to Downstream Process Development and cGMP Downstream Operations

Elective Courses: 3
Select three credits of the following:

Any 4** or 5** Level BEC Course
BE 426 Upstream Biomanufacturing Laboratory
BE 436 Introduction to Downstream Process Development
BE 445 Cell Line Development for Biomanufacturing
BE/CHE 448 Bioreactor Design
BE/CHE 462 Fundamentals of Bio-Nanotechnology
BE 475 Global Regulatory Affairs for Medical Products
BE 480 cGMP Fermentation Operations
BE/CME 483 Tissue Engineering Technologies
BE 485 cGMP Downstream Operations
