

Computer Engineering (BS)

To see more about what you will learn in this program, visit the Learning Outcomes website (<https://apps.oirp.ncsu.edu/pgas/>)!

Core Courses

The electrical and computer engineering curricula share core courses comprising a substantial portion of the first three years of study. Many of the core courses are offered three times a year in fall, spring, and summer. A strong emphasis is placed on fundamental concepts in core courses so that graduates are prepared for rapid technological changes common in the electrical and computer engineering professions. A comprehensive foundation in mathematics and the physical sciences in the freshman year is followed in subsequent years by additional core courses in mathematics, physics, electric circuit theory, digital logic, computer systems, electronics, electromagnetics, and linear systems. Laboratory work is designed to demonstrate fundamental principles and to provide experience in designing and testing electronic hardware and computer software. Both curricula have a required two semester senior design project which gives students comprehensive experience in designing, building, and testing physical systems.

Curricula

In addition to the core courses described above, students in the electrical engineering curriculum take two foundational electives and four specialization electives in areas of their choice within the discipline and two technical electives that can be in either electrical engineering or selected engineering courses offered by other departments. Beyond the core, students in the computer engineering curriculum take courses in discrete mathematics, data structures, embedded systems, and complex digital systems, in addition to four specialization electives in areas of their choice and one technical elective. For both curricula, a variety of elective courses are offered in communications, computational intelligence, controls, digital signal processing, digital systems, nanotechnology, mechatronics, microelectronics, networking, robotics, and VLSI design. There are typically a dozen or more of these courses offered each fall and spring semester and two or three available each summer.

Plan Requirements

First Year

Fall Semester		Hours
CH 101	Chemistry - A Molecular Science ¹	3
CH 102	General Chemistry Laboratory ¹	1
E 101	Introduction to Engineering & Problem Solving ²	1
E 115	Introduction to Computing Environments	1
ENG 101	Academic Writing and Research ²	4
MA 141	Calculus I ¹	4
Hours		14
Spring Semester		
ECE 109	Introduction to Computer Systems ²	3
MA 241	Calculus II ¹	4

PY 205 & PY 206	Physics for Engineers and Scientists I and Physics for Engineers and Scientists I Laboratory ¹	4
Select one of the following Economics Courses:		3
ARE 201	Introduction to Agricultural & Resource Economics	
ARE 201A	Introduction to Agricultural & Resource Economics	
EC 201	Principles of Microeconomics	
EC 205	Fundamentals of Economics	
E 102	Engineering in the 21st Century	2
Hours		16

Second Year

Fall Semester

ECE 200	Introduction to Signals, Circuits and Systems ²	4
ECE 209	Computer Systems Programming ²	3
MA 242	Calculus III	4
PY 208 & PY 209	Physics for Engineers and Scientists II and Physics for Engineers and Scientists II Laboratory	4
Hours		15

Spring Semester

COM 110	Public Speaking	3
CSC 226	Discrete Mathematics for Computer Scientists ²	3
ECE 211	Electric Circuits ²	4
ECE 212	Fundamentals of Logic Design ²	3
ECE 220	Analytical Foundations of Electrical and Computer Engineering ²	3
Hours		16

Third Year

Fall Semester

ECE 301	Linear Systems	3
ECE 302	Microelectronics	4
ECE 306	Introduction to Embedded Systems	3
ST 371	Introduction to Probability and Distribution Theory	3
Hours		13

Spring Semester

ECE 309	Data Structures and Object-Oriented Programming for Electrical and Computer Engineers	3
Select one of the following:		1
ECE 380	Engineering Profession for Electrical Engineers	
ECE 381	Engineering Profession for Computer Engineers	
ECE 383	Introduction to Entrepreneurship and New Product Development	
ECE 310	Design of Complex Digital Systems	3
CPE Elective (p. 2)		3

ENG 331	Communication for Engineering and Technology	3
Hours		13
Fourth Year		
Fall Semester		
Select one of the following Senior Design Project I courses:		3
ECE 482	Engineering Entrepreneurship and New Product Development I	
ECE 484	Electrical and Computer Engineering Senior Design Project I	
MAE 482	Engineering Entrepreneurship and New Product Development I	
CPE Elective (p. 2)		3
ECE Elective (p. 3)		3
Hours		9
Spring Semester		
Select one of the following Senior Design Project II courses:		3
ECE 483	Engineering Entrepreneurship and New Product Development II	
ECE 485	Electrical and Computer Engineering Senior Design Project II	
MAE 483	Engineering Entrepreneurship and New Product Development II	
ECE Elective (p. 3)		3
Open/Technical Elective (p. 5)		3
Hours		9
Total Hours		105

¹ A grade of C or higher is required.

² A grade of C- or higher is required.
