Music Technology (BS): Software & Digital Hardware

The undergraduate major in Music Technology is an interdisciplinary program that provides a foundation of theoretical and practical skills in music and electrical and computer engineering to prepare students to design, develop, and implement advanced music technologies. In addition to a variety of supporting courses, it has three primary components: a musicianship core (29 hours including applied and ensemble study); an engineering core (26 hours including calculus and physics); and a music technology core (18 hours). All students will complete a two-semester senior design project.

Students pursuing the Software and Digital Hardware concentration will take an additional 9 hours of engineering courses focusing on the design of computing systems.
