Plant Pathology

Plant pathology researches and extends knowledge to solve plant disease problems by focusing on plant-pathogen interactions at the genomic, cellular, organismal, and ecological levels. Approaches include disease management, epidemiology, molecular biology and host-parasite interactions. Focus areas are bacteriology, bioinfomatics, functional genomics, mycology, nematology, virology, soil-borne pathogens and mechanisms of pathogenesis, and host resistance.

Admission Requirements
The general application procedures of the Graduate School noted at the beginning of this section are followed. The Plant Pathology Graduate Program does NOT require the GRE. A detailed statement of applicant interests and goals in plant pathology is very helpful for the admissions committee.

Master’s Degree Requirements
There is a core curriculum of a minimum of 12 credit hours that includes PP 501, PP 502, PP 506, PP 707, and PP 601. The core should be supplemented with a minimum of 18 credit hours in courses at the 500 or higher level, which support the focus of the study. Students serve as teaching assistants for one course.

Doctoral Degree Requirements
Students entering the Ph.D. degree program are expected to take the core curriculum outlined for the Master’s degree or have had the equivalent at another institution. Additionally, Ph.D. students must include a departmental-approved ethics course, two credits PP 801, and at least two other 700-level Plant Pathology courses. Ph.D. students serve as teaching assistants for two courses.

Student Financial Support
A limited number of half-time assistantships are available on a competitive basis. Benefits include in-state tuition, out-of-state tuition and health insurance as covered under the Graduate School’s Graduate Student Support Plan. Applicants are considered for assistantship support at time of application. Special supplements to assistantships are available on a competitive basis for outstanding students. Also, many faculty programs have research grant-funded or training grant-funded assistantships. Contact individual faculty regarding availability of research assistantships.

Other Relevant Information
Fully equipped and staffed laboratories for research are available in addition to greenhouse facilities and environmental growth chambers in the phytotron. Special facilities for experimental work on diseases under field conditions are available at 16 University and NC Department of Agriculture and Consumer Services-related locations throughout the state. Genomics facilities, microcomputers, library, mycological herbarium, digital imaging/graphics equipment programs, and an interdepartmental electron microscopy center are additional features available for the department.

Faculty

Full Professors
Peter J. Balint-Kurti
David M. Bird
Ignazio Carbone
Christina Cowger
Marc A. Cubeta
Eric Lee Davis
Ralph A. Dean
Shuijin Hu
Steven Lommel
Frank John Louws
David S. Marshall
Peter Ojiambo
Charles H. Opperman
Jean B. Ristaino
David F. Ritchie
Howard D. Shew
Anna Elizabeth Whitfield
Carolyn Young

Associate Professors
James P. Kerns
Lina Maria Quesada
Dorith Rotenberg

Assistant Professors
Oliver Baars
Adrienne Marie Gorny
Daisy Ahumada Hernandez
LeAnn Lux
