Geospatial Information Science & Technology

The Master of Geospatial Information Science and Technology (MGIST) equips students with the necessary knowledge and tools to become high-end geospatial professionals using a unique curriculum that leverages NC State’s strengths in computational and data sciences, information technology, and interdisciplinary training in combination with professional skills development in areas of project management, technical writing, and communications. The MGIST was designed to be completed entirely online, allowing flexibility for both students just entering the work force and working professionals.

Through a combination of geospatial theory, hands-on applications, and client-based service-learning experiences, students graduate from the program with a solid foundation to provide a wide range of geospatial expertise for local, state, national, and international organizations.

Admissions Requirements

Admission to the program requires an undergraduate GPA of 3.0 or better, a professional resume, a personal statement describing the applicant’s professional ambitions and experience, and 3 letters of reference. Students with less than a 3.0 undergraduate GPA may be considered for provisional admission into the MGIST or referred to the GIS Certificate program to enhance skills and prepare for reapplication to the MGIST.

Master’s Degree Requirements

The MGIST degree requires 33 course credit hours including a 3-credit-hour Capstone course and development of a professional portfolio highlighting geospatial analytic skills and competencies. A cumulative GPA of 3.0 or better is required in order to graduate. Specific course requirements are listed on the MGIST web site.

Student Financial Support

Students in this program are eligible for financial aid and may compete for program assistantships and internships.

Other Relevant Information

The GIS program also offers a Graduate Certificate in GIS (https://online-distance.ncsu.edu/program/graduate-certificate-in-geographic-information-science/) (12 credit hours). Certificate students may transfer up to 12 credits of B or better grades upon application and acceptance into the MGIST program.

- Geographic Information Systems (Certificate) (http://catalog.ncsu.edu/graduate/natural-resources/graduate-certificate/geographic-information-systems-certificate/)

Faculty

Full Professors
- Sankarasubramanian Arumugam
- DelWayne R. Bohnenstiehl
- David A. Crouse
- George D. Garson
- Christopher Graham Healey
- Ronnie William Heiniger
- George R. Hess
- Hamid Krim
- Thomas J Kwak
- Duane K. Larick
- Yu-Fai Leung
- Jay Frederick Levine
- Ross Kendall Meentemeyer
- Helena Mitasova
- Stacy A. C. Nelson
- Margery Frances Overton
- William John Rasdorf
- Gary T. Roberson
- Sandra E. Yuter

Associate Professors
- William R. Smith
- Ranga Raju Vatsavai
- Karl William Wegmann
- Jeffrey G. White
- Stephen B. Wiley

Assistant Professor
- Jelena Vukomanovic

Practice/Research/Teaching Professors
- Perver Korca Baran
- Eric Shane Money

Degrees
Stacy Kathleen Supak
Laura Gray Tateosian
Vaishnavi Thakar

Lecturers
Juliana Regina Quist
